Mr. BLANTON. Mr. Speaker, to meet the gentleman's objection, I have had a motion drawn eliminating all the facts and conclusions and including simply the instructions, and I think this will meet the objection of the gentleman from Michigan, and I ask unanimous consent to present this in lieu of the other motion.

Mr. MICHENER. Mr. Speaker, reserving the right to object, that is just the point I am making. This shows clearly that the gentleman from Texas knows better, but he attempts to put in the RECORD a stump speech which should not be here, and when somebody has the courage and the bravery to stand up and question the tactics of the gentleman, then he graciously concedes that he is wrong. [Applause.]

Mr. BLANTON. Mr. Speaker, I do not concede I am wrong at all. Every fact stated in my motion, as a basis for the House thus to instruct its conferees, was admitted in the printed hearings by Commissioner Hazen in his testimony, and Commissioner Hazen further said that "the people of Washington had greater privileges and were the least taxed and the best cared for of any people in the United States"; but to meet the gentleman's objection I ask that the following motion, without the time to read it being taken out of my time, be substituted for the other motion.

Mr. SISSON and Mr. MAVERICK objected.

Mr. BLANTON. Mr. Speaker, I withdraw the first motion.

The SPEAKER. The gentleman from Texas, under the rules of the House, has the authority to withdraw his first motion.

Mr. BLANTON. And I offer another motion of the highest privilege in the place of the one that has been read.

Mr. MAVERICK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman from Texas offers a motion which the Clerk will report.

Mr. MAVERICK. Mr. Speaker, does this mean that a person can put in a motion which is obviously a long stump speech and then can withdraw it at will? I want to know so I can do that in the future, also. Is that proper procedure?

The SPEAKER. The Chair is not passing upon what is proper procedure. The Chair is simply stating what the rules and precedents of the House permit a Member to do.

Mr. MAVERICK. I want to know, so that I can do the same thing.

Mr. BOILEAU. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BOILEAU. Mr. Speaker, may I ask whether or not if such procedure is followed, the gentleman from Texas will be entitled to an additional hour, because this is a different resolution?

The SPEAKER. The Chair does not think so.

Mr. BLANTON. I do not want an additional hour, but merely the remaining time still due me.

Mr. SNELL. Mr. Speaker, a parliamentary inquiry.

Mr. BLANTON. Mr. Speaker, I do not yield for a parliamentary inquiry, unless the gentleman from New York wants to make it on this one matter.

Mr. SNELL. It is on the matter before the House.

Mr. BLANTON. With the understanding it will not be taken out of my remaining time, I yield to the minority leader.

Mr. SNELL. Mr. Speaker, I think it is important to have a ruling on this proposition. I made the point of order earlier that the argumentative part of the original proposition was not in order and I think for the future precedents of the House we should have a ruling on that question.

The SPEAKER. The gentleman made his point of order before the reading of the motion had been concluded, as the gentleman will recall.

Mr. SNELL. Yes.

The SPEAKER. And the Chair stated at the time that the Chair felt the motion should be read in full, which was then done. So far as the main question is concerned, of course, the point of order made by the gentleman from Michigan comes entirely too late, because debate has been practically concluded.

The gentleman from New York did not renew his point of order at the conclusion of the reading of the resolution.

The rule to which the Chair has referred provides only for a motion, but the Chair does not believe that any presiding officer ought to put himself in the position of dictating to a Member just how his motion should be made. If the Chair should hold that the motion carries argument, then it would be up to the Chair to delete from the motion such portions as occurred to the Chair to be argumentative, and if that were the practice the Chair at some time might delete portions of the motion in exercising that privilege.

The Chair thinks this is a matter for the House to decide, and the Chair is unwilling, out of a spirit of fairness, to undertake to dictate to the Members just how they shall draw their motions. [Applause.]

The Clerk will report the motion.

The Clerk read as follows:

MOTION OF HIGHEST PRIVILEGE

Mr. BLANTON, under clause 1½a of rule XXVIII, section 910, of the rules of the House of Representatives, offers the following motion to instruct House conferees, being a motion of the highest privilege, to wit:

Moved that managers on the part of the House, who, at the request of the Senate, were appointed by the Speaker on April 24, 1936, for a conference with the managers on the part of the Senate, who were appointed by the Senate on April 23, 1936, respecting the disagreeing votes of the two Houses relative to 87 amendments placed by the Senate on the House bill (H. R. 11581) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1937, and for other purposes, have been in conference more than 20 days without avail, said House conferees having been appointed for more than 20 calendar days, and have made no report to the House, that they, the said managers on the part of the House be, and they are hereby, instructed as follows:

First. The House instructs its managers to insist on the disagreement of the House to Senate amendment no. 1, which proposes to appropriate $5,700,000 out of the United States Treasury as a Federal contribution on the local civic expenses of the District of Columbia, and to insist on the House provision respecting same.

Second. The House instructs its managers to insist on the disagreement of the House to Senate amendments nos. 37, 38, and 39, appropriating $78,660 for so-called character education, and to insist on the refusal of the House to appropriate any money for so-called character education.

Third. The House instructs its managers to insist on the disagreement of the House to Senate amendment no. 83, which struck from the House bill "Sec. 6", which Senate amendment 83 would permit high-salaried judges, high-salaried prosecuting attorneys, high-salaried doctors, and other high-salaried officers and employees to accept outside employment from others.

Mr. SNELL. Mr. Speaker, I ask for a division of the question.

The SPEAKER. The Chair will pass upon that later.

Mr. BLANTON. Mr. Speaker, my time has not expired and I want to say in conclusion——

Mr. SNELL. Are we going to debate this all over again?

The SPEAKER. The gentleman from Texas has 12 minutes remaining under the rule.

Mr. BOILEAU. Mr. Speaker, I make the point of order that the gentleman has presented a different resolution to the House and the Speaker has ruled he is not entitled to time on the second resolution.

The SPEAKER. The gentleman from Texas has 12 minutes remaining out of the hour allowed him under the rule.

Mr. BLANTON. Mr. Speaker, I have done my honest, conscientious duty in presenting this motion to the House. As chairman of the House conferees, I am the servant of the House. It is immaterial to me personally what the House does about it. I am ready to obey the instructions of

the House on these matters, and under your instructions to carry them out. If you tell the House conferees what you want done, I will stand against the Senate until something terribly hot freezes over, before I give in to them. But it all depends on what the House wants done, and how you instruct your conferees.

If you gentlemen who have been throwing obstacles in my way want the people of Washington to keep up this peculiar situation, unjust to the people of the States, where they pay very little local civic taxes in Washington, D. C., and our people back home in the States have to contribute $5,700,000 in cash every year out of the United States Treasury to pay part of the taxes due by Washington citizens, and you can persuade this House by a majority vote to instruct the House conferees to agree to appropriate the $5,700,000, we conferees will be forced to carry out your instructions. But I do not believe you will ever get this House to thus instruct us.

The Washington Star said, on April 26, 1936, that the Washington Board of Trade records show that during the last 5 years visitors to Washington had spent $221,547,992 here in cash. Visitors from the States contributed that amount to the people of Washington during the last 5 years. You know what that means to Washington—$221,547,992 spent here in 5 years by visitors from our States.

They visited Washington because it is the Nation's Capital. They visited Washington because of the Government buildings here. They visited Washington because of the attractive institutions the Government has constructed here.

Now, if a majority of you gentlemen want to continue this, it is all right—giving away of the people's money out of the United States Treasury to the pampered people of Washington—we conferees will have to obey your instructions, but I will never vote for it, and I am now throwing the responsibility upon your shoulders.

I have done all that any one man could do to stop this injustice. The splendid members of my subcommittee have done all they could do, and they have done wonderful work to protect the already overburdened taxpayers living in the 48 States of this Nation.

There is no one who, truthfully, can say that I have not been fair and just to the people of Washington. There is no one who will say that I have not worked hard and have not spent much of my time to adjust these inequities.

I am one Member of Congress who in 20 years has represented three big districts—71 big counties in Texas—some of which like Presidio and Brewster are 200 miles across the county. I represent only 12 counties now. But some of these good people living in my two former districts still call on me for different things they want done, as I am their friend.

I have to do this in addition to my official duties for my own district, and I work about 16 hours per day in order to attend to all such calls.

If some of my friends, very liberal-thinking friends, do not like what I did toward eliminating communism from the public schools when we passed the "red rider", and they want to take a stand against me, on these propositions, then well and good. It is their responsibility. It is not mine. I will meet them on that issue of repealing the "red rider" whenever they get it up before the House.

Mr. Speaker, these are three clear-cut issues for the House to decide. It must decide first whether it will let the Senate force it to make the people of the States contribute $5,700,000 each year to pay local civic expenses of Washington people. Then the House must decide whether it is going to waste another $78,660 on so-called character education for Superintendent Ballou to pervert in communizing the public schools of Washington. And, last, the House must decide whether it is going to allow high-salaried judges, and high-salaried prosecuting attorneys, and high-salaried doctors to neglect their duties by accepting outside employment in local colleges. Those are the three issues.

I have performed my duty. The able members of my subcommittee have performed their duty. The responsibility now rests upon the shoulders of the House. We managers on the part of the House, who are servants of the House, stand ready to obey the orders of the House.

Mr. Speaker, I am grateful to my colleagues for granting me permission to quote the testimony of Commissioner Hazen and of Mr. Parker from our hearings.

From our printed hearings on the 1935 bill I quote the following:

Commissioner HAZEN. The Commissioners would like to call attention to the fact that in the fiscal year 1934 the tax rate of $1.70, which has been in effect during the fiscal years between 1928 and 1933, inclusive, has been reduced to $1.50. This reduction represents a saving to taxpayers in the fiscal year 1934 of $2,445,000.

Moreover, in the fiscal year 1934 the assessed valuation of real estate has been reduced by $80,000,000—a saving to property owners of $1,200,000. The District budget for the fiscal year 1935 is based upon continuing the $1.50 tax rate in that fiscal year.

It is also contemplated that a further reduction in the assessed valuation of real estate of approximately $50,000,000 will be made in 1935.

The Commissioners also invite attention to the recommendation under the chapter for the water service for a 25-percent reduction in water rates for 1935, and an increase in the metered allowance now 7,500 cubic feet to 10,000 cubic feet. This means a saving to water users of about $600,000. In the fiscal year 1934 Congress allowed a discount of 10 percent of the amount of any bill for water charges paid within 15 days after the date of the rendition thereof. It is estimated that this will mean a saving of about $100,000 to water users.

From our printed hearings of the 1936 bill, I quote the following:

Mr. BLANTON. By a reduction in the assessed valuations of real estate to the extent of $80,000,000, you meant that you distributed that over the general assessments?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. Then you further state:

"It is also contemplated that a further reduction in the assessed value of real estate of approximately $50,000,000 will be made in 1935."

Did you make that further reduction?

Commissioner HAZEN. There was further reduction.

* * * * * * *

Mr. BLANTON. And you did make another reduction, approximately $50,000,000, in assessed values, as noted by the assessor, Mr. Richards, of 10 percent in the assessed valuations?

Mr. RICHARDS. Yes, sir.

Mr. BLANTON. And that was general all over the District?

Mr. RICHARDS. Yes, sir.

Mr. BLANTON. So that property owners generally got the benefit of that additional $50,000,000 reduction?

Commissioner HAZEN. That is quite right.

Mr. BLANTON. Then this year and last year you have given the property owners in the District a reduction in the assessed values of real estate of $130,000,000, or 15 percent, have you not?

Commissioner HAZEN. Approximately; yes, sir.

Mr. BLANTON. Then you also say:

"The Commissioners also invite attention to the recommendation under the chapter for the water service for a 25-percent reduction in water rates for 1935 and an increase in the metered allowance, now 7,500 cubic feet, to 10,000 cubic feet. This means a saving to water users of about $600,000."

That was provided?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. So that the property owners of the District got a saving of $600,000 through a decrease in water charges?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. In addition to that $600,000 decrease in water charges, they also got the benefit of the increased metered allowance of 2,500 cubic feet of water?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. Without extra charge?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. So that they got a double benefit in the matter of the water charges?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. Then you further say:

"In the fiscal year 1934 Congress allowed a discount of 10 percent of the amount of any bill for water charges paid within 15 days after the date of the rendition thereof. It is estimated that this will mean a saving of about $100,000 to water users."

That was a saving of $100,000 additional, approximately?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. To water users here in Washington?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. It is a fact, Mr. Commissioner, that the tax rate this year, the fiscal year 1935, is only $1.50 per 100 on real estate and only $1.50 per 100 on personal property, is it not?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. There is no contemplation in the minds of the Commissioners to increase that tax for next year, 1936? You do not contemplate increasing it?

Commissioner HAZEN. We do not contemplate increasing it.

* * * * * * * *

Mr. BLANTON. With that $1.50 tax rate, you stated in your preliminary general statement, that you carried over from the last fiscal year to the present fiscal year a surplus of $4,600,000?

Commissioner HAZEN. That is right.

Mr. BLANTON. And you say that you will inherit next July 1 a surplus of——

Commissioner HAZEN. $2,450,000.

* * * * * * *

Mr. BLANTON. You have also, for this coming fiscal year, a trust fund, as you said in your general statement, of $1,430,000?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. That is a fund to which you have access, which you get out of the Treasury, regardless of what Congress does in this bill, is it not?

Commissioner HAZEN. Yes, sir.

* * * * * * *

Mr. BLANTON. You have no income tax for the District of Columbia?

Commissioner HAZEN. That is true.

* * * * * * *

Mr. BLANTON. * * * The tax on intangibles in the District is now what, Mr. Donovan?

Mr. DONOVAN. $5 per thousand.

Mr. BLANTON. That is one-half of 1 percent, is it not?

Mr. DONOVAN. That is right.

* * * * * * *

Mr. BLANTON. In the District of Columbia there is a gasoline tax of 2 cents a gallon?

Commissioner HAZEN. Yes, sir.

* * * * * * *

Mr. BLANTON. In the District of Columbia there is a license-tag tax that people pay in order to get their license plates each year. That amounts to only $1 per car.

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. That would be $1 per car for an $8,000 Rolls-Royce limousine as well as a dollar per car for a Ford or a Chevrolet?

Commissioner HAZEN. Yes, sir.

* * * * * * *

Mr. BLANTON. In the District of Columbia the average water tax per family is now approximately what?

Mr. DONOVAN. It is about $8.75.

Mr. BLANTON. Was not that the tax before Congress reduced it?

Mr. DONOVAN. It was that before Congress reduced it.

Mr. BLANTON. But Congress reduced it?

Mr. DONOVAN. You mean the 25-percent reduction?

Mr. BLANTON. Yes.

* * * * * * *

Mr. BLANTON. In the District of Columbia a man who built a house 25 years ago, and then paid for having his house connected with the sewer system of the District, has not in the last 25 years had to pay a single additional monthly service charge for sewers, has he?

Commissioner HAZEN. No.

Mr. BLANTON. And he will not have to pay any in the future, will he?

Commissioner HAZEN. No, sir.

* * * * * * *

Mr. BLANTON. Mr. Commissioner, you have been a public servant for a long time, and you are intimately acquainted with every detail of Washington business and history. On the whole, can you cite the people of any city of the United States who have better privileges, who are better cared for, than those in the city of Washington?

Commissioner HAZEN. I think that it is the greatest city in the United States.

Mr. BLANTON. And Washington people are better cared for, are least taxed, and have greater privileges than any other people in the United States?

Commissioner HAZEN. I believe they do.

From our printed hearings on the 1937 bill, I quote the following:

Mr. BLANTON. You are acquainted with the four Mapes bills?

Commissioner HAZEN. Yes, sir; somewhat.

Mr. BLANTON. One of those bills has for its purpose to increase the gasoline tax from 2 to 4 cents, to make it comparable with the gasoline tax in other cities.

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. Has that bill the approval of the Commissioners?

Commissioner HAZEN. The answer is that we have a surplus, and we did not feel we could justifiably increase taxes as long as we had a surplus.

Mr. BLANTON. And it is because you have a large surplus—$3,059,748.70—that you are against that increase-of-gasoline-tax bill?

Commissioner HAZEN. We have to consider the surplus.

Mr. BLANTON. What surplus do you expect to have in the general fund on July 1?

Commissioner HAZEN. $1,992,748.70.

Mr. DONOVAN. That is only in the general fund.

Mr. BLANTON. That is in the general fund. Now, what about the water fund?

Commissioner HAZEN. In the water fund we will have $504,000.

Mr. BLANTON. And in your gasoline-tax fund?

Commissioner HAZEN. $563,000.

Mr. BLANTON. So that aggregates a surplus of $3,059,748.70 on July 1.

GASOLINE TAX IN VARIOUS STATES

Mr. BLANTON. Mr. Commissioner, I call attention to the gasoline tax that is now effective in the cities of various States:

Alabama, 6 cents; Arizona, 5 cents; Arkansas, 6 cents; Colorado, 4 cents; Florida, 7 cents; Georgia, 6 cents; Idaho, 5 cents; Indiana, 4 cents; Kentucky, 5 cents; Louisiana, 5 cents; Maine, 4 cents; Maryland, 4 cents; Nebraska, 4 cents; Nevada, 4 cents; New Hampshire, 4 cents; New Mexico, 5 cents; North Carolina, 6 cents; Ohio, 4 cents; Oklahoma, 4 cents; Oregon, 4 cents; Pennsylvania, 3 cents; South Carolina, 6 cents; Tennessee, 7 cents; Texas, 4 cents; Utah, 4 cents; Vermont, 4 cents; Virginia, 5 cents; Washington (State), 5 cents; West Virginia, 4 cents; Wisconsin, 4 cents; and Wyoming, 4 cents.

But in the District of Columbia the tax is 2 cents per gallon.

So that right over here across the river bridge, when you get into Virginia, the State gasoline tax is 3 cents more than it is in Washington, D. C.

Commissioner HAZEN. I think it is 5 cents in Virginia and 4 cents in Maryland.

Mr. BLANTON. But Maryland has an additional sales tax. I say it is 3 cents more in Virginia, just across the bridge, than it is in Washington.

Commissioner HAZEN. In Virginia?

Mr. BLANTON. Yes; than it is in Washington?

Commissioner HAZEN. That is right.

Mr. BLANTON. And if you go out here to Chevy Chase across the line into Maryland, the tax there is double what it is in Washington, 4 cents as compared to 2 cents, plus their sales tax.

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. And the cities in all of the States outside of Washington, D. C., instead of paying a license-tag tax of a dollar pay many times that; you realize that?

Commissioner HAZEN. Yes.

Mr. BLANTON. In other words, in some States they pay $10 and $12 on a Ford or Chevrolet, while in Washington you pay only a dollar even on a $10,000 Rolls-Royce.

The Mapes bill proposes to increase that charge, does it not?

Mr. DONOVAN. The Mapes bill calls for a weight tax.

Commissioner HAZEN. Another very good idea that we have down there is that we make them pay the police fines and penalties.

Mr. BLANTON. Yes; that is a good idea. But you do recognize that if you needed it, you have a great potential source of revenue in an increase of your gasoline tax comparable to that in other cities, and also in the increase of your license-tag tax; do you not?

Commissioner HAZEN. Yes, sir.

Mr. BLANTON. But you do not care to pursue that, because you have a $3,000,000 surplus.

MAPES BILLS NOT FAVORED BY COMMISSIONERS AT PRESENT TIME

Mr. BLANTON. Those four Mapes bills all passed the House several years ago by a unanimous vote—all four of them. Mr. MAPES is an exceptionally fine Member of Congress; able, sincere, and honest. His committee went into this subject carefully and prepared those bills after have having months of hearings and giving close consideration of the subject. The four bills passed the House without a vote against them.

They have been held up by the Senate.

Would you mind telling us whether or not you favor the other Mapes bills?

Commissioner HAZEN. We do not at the present time, Mr. Chairman.

Mr. BLANTON. One of those bills I would like to know your reaction on, as to why you are not willing to require these big trucks, engaged in interstate freight traffic, that use up and wear out the streets and highways of the city of Washington, to pay a much larger charge as provided for in the Mapes bill.

Mr. HAZEN. I think it would be a very fair thing to do.

Mr. BLANTON. Have your Commissioners suggested the passage of such legislation as that?

Mr. HAZEN. No, sir.

Mr. BLANTON. Do you realize that until you do have legislation passed like that, that these big trucks, some larger than a railroad freight car, that crowd people off of the street, are continually using your hundreds of miles of highways in the District of Columbia, practically with no charge at all on them?

Mr. HAZEN. That is right, except for the gasoline that they use, of course.

Mr. DITTER. Insofar as the license privilege is concerned, the operator of a truck or bus, irrespective of its weight and its potential damage to your streets, pays just the same as a pleasure car? Is that correct?

Mr. HAZEN. Do you mean public-utility busses?

Mr. DITTER. I am talking of any busses or trucks to which licenses are issued in the District of Columbia, that they pay the same amount as a Chevrolet or Ford coupe, the weight of which would not be comparable nor the potential damage to your streets be as great.

Mr. HAZEN. They pay the same, except the utility busses.

Mr. DITTER. And the utility bus has to take out a certificate of public convenience, that is issued to it as a public utility, but,

insofar as an automobile license operation privilege is concerned, they pay exactly the same?

Mr. RICHARDS. They pay the same, plus the tax on personal property; that is all.

Mr. BLANTON. They all pay that.

Mr. DITTER. They all pay the same. Do not let us quibble about it. They pay exactly the same as the Chevrolet or Ford pleasure car on the road.

Mr. HAZEN. I have no brief for the busses.

Mr. DITTER. We are not condemning them either, but we want to know something now.

Why is it that the Commissioners have refused to recommend the enactment of legislation by which trucks or busses would be required to pay a licensed operation cost comparable to those charged by other municipalities and States?

Mr. HAZEN. I rather think that we should have the whole thing, passenger cars as well as busses, covered by the same legislation.

Mr. DITTER. Have you made any recommendation with respect to the enactment of such legislation?

Mr. HAZEN. No; not to this Congress.

Mr. DITTER. Do the Commissioners contemplate a further consideration of the matter that was raised by Mr. BLANTON last year on the subject of taxation?

Mr. HAZEN. Mr. DITTER, the Commissioners felt that, as long as they had this surplus——

Mr. DITTER (interposing). Will you not first answer that "yes" or "no"?

Mr. HAZEN. I would rather consult the Commissioners a little bit on that problem.

Mr. DITTER. Did I understand that you were adverse to the first Mapes bill, to which the chairman directed your attention?

Mr. HAZEN. The gas bill?

Mr. DITTER. Yes.

Mr. HAZEN. I am at the present time.

Mr. DITTER. Do you speak for the Commissioners' Board as a whole, or individually?

Mr. HAZEN. I think I speak for the Commissioners.

Mr. DITTER. And your objection to it is based entirely on the fact that you have a surplus of approximately $3,000,000?

Mr. HAZEN. Oh, no; $500,000.

Mr. DITTER. $3,000,000 as a whole, including $500,000 in the gas fund—is that right?

Mr. HAZEN. That is right.

Mr. DITTER. Then, in contemplation of the elimination of that relief or emergency fund, are you not prepared to say that the Mapes bill has merit and that it should be recommended for enactment?

Mr. HAZEN. Undoubtedly it has merit, and as soon as we need the money for these things I would be very strongly in favor of it—have been all along.

Mr. DITTER. That is helpful, Mr. Chairman.

Mr. BLANTON. But it is easier to get it out of the Federal Treasury than through taxation.

Mr. Speaker, I now quote from the printed hearings:

STATEMENT OF LOVELL H. PARKER

Mr. BLANTON. Gentlemen, we have before us this morning Mr. L. H. Parker.

Mr. Parker, when were you employed by the board of trade as their statistician?

Mr. PARKER. As I recall it, it was about September—it was October before we made our final arrangement.

Mr. BLANTON. Do you mean October 1935?

Mr. PARKER. 1935; yes.

Mr. BLANTON. Your report was addressed to Mr. Edward F. Colladay?

Mr. PARKER. That is right.

Mr. BLANTON. As "chairman, advisory committee, municipal finance committee, board of trade, Washington, D. C."?

Mr. PARKER. That is right.

Mr. BLANTON. You were working for them when you made this report?

Mr. PARKER. Certainly.

Mr. BLANTON. And as their employee you rendered them this report?

Mr. PARKER. That is correct.

Mr. BLANTON. What are they to pay you for this tax survey?

Mr. PARKER. That is $5,500.

Mr. BLANTON. Then the board of trade pays you $5,500?

Mr. PARKER. Yes. That is the final amount agreed on.

Mr. BLANTON. When did you get that position with the Joint Committee on Internal Revenue Taxation?

Mr. PARKER. I was appointed to that position in 1926.

Mr. BLANTON. What was your salary when you were first appointed to that position?

Mr. PARKER. $600 a month.

Mr. BLANTON. And you have held that position continuously since 1926?

Mr. PARKER. That is correct.

Mr. BLANTON. What annual salary do you get now?

Mr. PARKER. $800 per month.

Mr. BLANTON. When was your salary increased to $800 per month?

Mr. PARKER. It was increased once in 1929, as I recall it, to $700, and then it was increased in 1935 to $800.

Mr. BLANTON. Which is approximately the equal of the salary of a Congressman or a Senator.

Mr. PARKER. Pretty nearly.

Mr. BLANTON. Well, we get $833, and spend half of it for incidental expenses, and you get $800; is that right?

Mr. PARKER. That is correct.

Mr. BLANTON. The committee may call on you at any time it wants to, from January to December?

Mr. PARKER. That is correct.

Mr. BLANTON. And you are at all times under orders of the committee?

Mr. PARKER. Yes, sir.

Mr. BLANTON. Did you have authority from Mr. ROBERT DOUGHTON, who is the vice chairman of the Joint Committee on Internal Revenue Taxation, to accept employment from the board of trade and to receive $5,500 for it?

Mr. PARKER. No, Mr. BLANTON, because Mr. HARRISON was chairman.

Mr. BLANTON. Please just answer my questions, Mr. Parker.

Mr. PARKER. I understood you to say that——

Mr. BLANTON. Yes or no; did you have authority from Mr. DOUGHTON to accept that employment?

Mr. PARKER. No.

Mr. BLANTON. Did you ever tell BOB DOUGHTON that you were going to take that employment, before you took it?

Mr. PARKER. No, Mr. BLANTON.

Mr. BLANTON. Did you know that there are hundreds of pieces of property here in Washington that are occupied by people which, in 1934, before there was any arbitrary reduction in assessed values made, were rendered for or had an assessed valuation much less than one-half of what they cost and what they were worth? Did you know that?

Mr. PARKER. I knew that a great many were below what they cost, but as to what they were worth, I did not think there were any as low as that; no, Mr. BLANTON.

Mr. BLANTON. For instance, here is a list of the lots covered by the New House Office Building, on which the New House Office Building was erected. Here are the figures on assessments and values given us by Tax Assessor Richards on those lots that we had to buy over there.

Here is part of lot 15, known as lot 809 in square 636; all of these are in square 636. That was assessed at $1,479, and local Washington citizens testified that it was worth $2,795.10, and we paid that.

Here is lot 806, assessed at $2,345, and parties here testified that it was worth $4,422.90. And that is what we had to pay for it.

Mr. PARKER. This was in connection with condemnation proceedings?

Mr. BLANTON. It was either condemnation or agreement, but was what the Government had to pay for it. We had to pay these amounts.

Here is lot no. 20, which was assessed at $1,256, and Washington experts testified that it was worth $10,100. That was nearly nine times what it was assessed at. We had to pay that for it.

Here are lots 1, 2, and 19, which were assessed at $13,792. Parties here testified that it was worth $34,537.50, and that is what the Government had to pay for it.

Here are lots 3, 6, 16, 17, and 18, which were assessed at $24,192, and Washington experts testified that it was worth $51,303.47. And that is what the Government paid for it.

Here are lots 9, 10, and 11, which were assessed at $12,249, and Washington experts testified they were worth $24,577.30. That is what the Government had to pay for it.

Here is lot 15, known as lot 808, assessed at $1,759, and Washington experts testified that it was worth $3,488.60. That is what the Government had to pay for it.

Here is lot 14, known as lot 807. That was assessed at $2,534. Washington experts testified it was worth $5,076.20. That is what we had to pay for it.

Here is lot 5, known as lot 800, assessed at $2,845. Washington experts testified that it was worth $5,692.60. That is what the Government had to pay for it.

Here is lot 5, known as lot 801, which was assessed at $1,026. Washington experts testified that it was worth $2,250. That is what the Government paid for it.

That gives you an idea of the low assessments here.

Mr. PARKER. May I ask, Mr. BLANTON, if those were the tax experts for the people selling the property?

Mr. BLANTON. They were experts, Mr. Parker, for the people of Washington, just as you are the expert for the board of trade, representing them, and getting $5,500 to speak for them.

Mr. PARKER. I am wondering if the Government hired experts to give their testimony on these same properties?

Mr. BLANTON. I don't value the opinion of such hired experts. I just give these figures to show how little value their testimony is worth when they come in here and say that they are overassessed. We members of this subcommittee know they are not and we have been studying this question here for many years.

Mr. PARKER. My report does not touch on that, if I may state that. My report merely deals with figures and facts on taxation. I have not said anything about real property taxes at all.

Mr. BLANTON. Did you know that since those low assessments in 1933, and since that data has been shown to us, the Commissioners, during the last 2 years, have arbitrarily further lowered the assessed value of real estate in Washington $130,000,000? Did you know that?

Mr. PARKER. I know there have been some decreases; yes.

Mr. BLANTON. When you were employed and had your salary raised to $800 a month, or $9,600 a year, did Mr. HARRISON, who is the

chairman of this joint committee, or Mr. DOUGHTON, who is the vice chairman, authorize you to accept outside employment?

Mr. PARKER. Nothing was said about it.

Mr. BLANTON. You talk about other taxes than real-estate taxes. Did you know that the people in your State of Massachusetts, in West Virginia, in Missouri and Iowa and Texas and Pennsylvania and Oklahoma and New York and Virginia and New Hampshire and North Dakota, in addition to having to pay much more than $1.50 per hundred city tax, which is the total tax that the people of Washington pay for everything, they all have to pay county taxes and State taxes, and in some instances school taxes, water taxes, courthouse, jail, and bridge-bond taxes. You knew that, did you not?

Mr. PARKER. Why, certainly.

Mr. BLANTON. You knew that in addition to the one tax of $1.50 per $100 on low assessed value that the Washington people pay for everything, people in other cities sometimes have to pay a special water tax for their water system. Did you know that?

Mr. PARKER. Yes.

Mr. BLANTON. Can you cite me to any city in the United States where the water charge is as low as $6.60 per year per average family?

Mr. PARKER. I think the water charge here is very low.

Mr. BLANTON. Now, please listen to my questions. You are advertised in the newspapers as a $9,600-a-year Government expert. You ought to be able to answer a question. You have sat around the hearing table a lot of times. Now, please answer my questions definitely and we will get along.

Can you cite me to any city in the United States where you know that the water charge is as low as $6.60 per year per average family, which is the charge here in Washington?

Mr. PARKER. No; but I have not made an examination of it.

Mr. BLANTON. Can you cite me to any city in the United States where there is not a sewer-service charge?

Mr. PARKER. No; I cannot, but I could find out.

Mr. BLANTON. Mr. Parker, did you know that in the District to every family is given an exemption of $1,000 on household goods?

Mr. PARKER. That is correct.

Mr. BLANTON. Name me another State that has that much of an exemption. In my State it is $250 on household goods.

Mr. PARKER. I will have to search the records.

Mr. BLANTON. Do you know of another State that gives a $1,000 exemption?

Mr. PARKER. I cannot recall whether it is more or just that much; I cannot recall.

Mr. BLANTON. Mr. Parker, did you know that in Washington, to every family, in addition to the exemption of $1,000 on household furniture, there is exempt from taxation their library, whether it is worth $5 or $5,000,000? Did you know that?

Mr. PARKER. I think that is correct.

Mr. BLANTON. That is absolutely exempt from any tax whatever. Will you name me one single State, if you can, where that exemption prevails; where, in addition to the exemption on household furniture, whatever it may be, there is also an exemption from taxes on the family library, regardless of its value? Can you give me one other city like that?

Mr. PARKER. I do not think so. I think that is an unusual provision.

Mr. BLANTON. Let us pass on to another thing. Did you know that in the District of Columbia to every person is given an exemption from taxes on all of their wearing apparel, regardless of its value? That is, in addition to the library exemption, in addition to the $1,000 exemption on household furniture, there is exempt to each person their wearing apparel, here in the District of Columbia, whether that wearing apparel is worth $5 or $5,000,000. Did you know that?

Mr. PARKER. Well, of course, it would be unusual to find $5,000,000 worth of wearing apparel.

Mr. BLANTON. Now you are getting back into generalities again. I am asking you the question, Did you know that that is the situation?

Mr. PARKER. Yes; I knew that.

Mr. BLANTON. Can you give me the name of any city in the United States other than Washington where there is exempted the wearing apparel of the family?

Mr. PARKER. I do not know any offhand. I do not know what the specific provision of law is.

Mr. BLANTON. Let us get down to the intangible property tax. Did you know that in the District of Columbia there is no estate tax?

Mr. PARKER. Yes, Mr. BLANTON.

Mr. BLANTON. In the city of Washington there is no inheritance tax other than the Federal inheritance tax, is there?

Mr. PARKER. That is correct.

Mr. BLANTON. In the city of Washington there is no gift tax other than the Federal tax, is there?

Mr. PARKER. That is correct.

Mr. BLANTON. And that is applicable to all cities.

In the city of Washington there is no sales tax, such as they have over here in Baltimore and out in Iowa and in West Virginia.

Mr. PARKER. No; no general sales tax.

Mr. BLANTON. Mr. Parker, in Washington there is no sales tax such as they have in Baltimore, in West Virginia, in Iowa, and in other States, is there?

Mr. PARKER. That is correct.

Mr. JOHNSON. Do you know of any place where gasoline is sold where they charge less than 2 cents or even 2 cents a gallon as a tax? Do you know of any State in the Union where that is so?

Mr. BLANTON. Any other city in any State in the Union?

Mr. PARKER. Every State has a gasoline tax; no, I do not recall that.

Mr. JOHNSON. A tax expert ought to be able to answer the question without so much explanation. Do you know of any State in the Union—

Mr. PARKER. That has a lower rate?

Mr. JOHNSON. That pays as little as 2 cents a gallon gasoline tax?

Mr. PARKER. No; I do not.

Mr. BLANTON. Did you know that the President had that printed in a document called "Comparative Tax Burden in the District of Columbia and Other Cities"?

Mr. PARKER. I have seen it, but I think it is in a different form than that.

Mr. BLANTON. You knew he had it printed?

Mr. PARKER. Yes.

Mr. BLANTON. You knew he sent that down to Congress with a letter, did you not?

Mr. PARKER. Yes.

Mr. BLANTON. I quote from his letter the following:

"MY DEAR MR. CHAIRMAN: I am transmitting herewith a report prepared by the Treasury Department at my request on the tax paid by residents of the District of Columbia as compared with taxes paid by residents in other readily comparable cities.

"In general, the Treasury found that the actual money cost of government per capita to residents of the District of Columbia is below that in other cities; likewise the total tax paid by each of several different examples of property owners is lower in the District than in any other cities of between 300,000 and 825,000 population."

Mr. PARKER. That was in connection with the property tax.

Mr. BLANTON. The President sent us this data, and he gives us the tax levy per $1,000 in each of the following cities:

"Jersey City, N. J., $40.069 per $1,000; Boston, Mass., $37.10 per $1,000, that is your own city, where you were born; Minneapolis, Minn., $30.10 per $1,000; Newark, N. J., $29.20 per $1,000; Seattle, Wash., $28.13 per $1,000; New Orleans, La., $27.58 per $1,000; Baltimore, Md., $26.70 per $1,000; Portland, Oreg., $26.50 per $1,000; Milwaukee, Wis., $26.26 per $1,000; Buffalo, N. Y., $25.56 per $1,000; Kansas City, Mo., $25.23 per $1,000; Louisville, Ky., $24.48 per $1,000; San Francisco, Calif., $20.09 per $1,000; Cincinnati, Ohio, $18.22 per $1,000; Washington, D. C., $15 per $1,000."

Mr. Parker, when did you ever make a trip to Jersey City, N. J., to investigate that tax rate there?

Mr. PARKER. I never made such a trip to investigate the tax rate.

Mr. BLANTON. When did you ever make a trip to Boston, Mass., to investigate that tax rate there?

Mr. PARKER. I have not investigated any of those.

Mr. BLANTON. When did you ever make a trip to Minneapolis, Minn., to investigate the tax rate there?

Mr. PARKER. I never made a trip to any of those cities for that purpose.

Mr. BLANTON. When did you ever make a trip to Newark, N. J., to investigate the tax rate there?

Mr. PARKER. I never made such a trip.

Mr. BLANTON. When did you ever make a trip to Seattle, Wash., to investigate the tax rate there?

Mr. PARKER. I never made such a trip.

Mr. BLANTON. When did you ever make a trip to New Orleans, La., to investigate the tax rate there?

Mr. PARKER. Never; I have never investigated the tax rate there.

Mr. BLANTON. When did you ever make a trip to Baltimore, Md., to investigate the tax rate in Baltimore?

Mr. PARKER. I never made a trip there for that purpose; I lived there for a short time.

Mr. BLANTON. You never did make a trip there to investigate those tax rates?

Mr. PARKER. No; my reports distinctly do not say that. That would take a lot of time.

Mr. BLANTON. It would take more than $5,500 worth of employment, would it not?

Mr. PARKER. Much more than that.

It is a very difficult thing to determine the true value and its relation to the assessed value.

Mr. BLANTON. When did you ever make a trip to Portland, Oreg., to make a tax investigation there?

Mr. PARKER. I have never made such a trip. I could make a statement on all of them together.

Mr. BLANTON. Did you ever make a trip to Milwaukee, Wis., to investigate the tax rate there?

Mr. PARKER. I never made such a trip.

Mr. BLANTON. Did you ever make a trip to Buffalo, N. Y., to investigate the tax rate there?

Mr. PARKER. I never made such a trip there.

Mr. BLANTON. Did you ever make a trip to Kansas City, Mo., to investigate the tax rate there?

Mr. PARKER. I never made such a trip.

Mr. BLANTON. Did you ever make such a trip to Louisville, Ky., to investigate the tax rate there?

Mr. PARKER. I make the same answer.

Mr. BLANTON. Did you ever make such a trip to San Francisco, Calif., to investigate the tax rate there?

Mr. PARKER. The answer is the same.

Mr. BLANTON. Did you ever make such a trip to Cincinnati, Ohio, to investigate the tax rate there?

Mr. PARKER. The answer is the same.

Mr. BLANTON. Then you do not know what the Treasury Department did, do you?

Mr. PARKER. Pretty well.

Mr. BLANTON. Have you talked to any of them?

Mr. PARKER. No; but the report shows on its face.

Mr. BLANTON. You never talked with them?

Mr. PARKER. Not about this.

Mr. BLANTON. You have never talked with the President of the United States about that, have you?

Mr. PARKER. No, sir.

Mr. BLANTON. I happen to know that one of the President's friends in New York bought a $100,000 piece of property here in Washington, and at the same time bought exactly the same kind of property in New York for $100,000, and he pays much more taxes on the New York property than he pays in Washington. That is the answer.

Did you know that in addition to the things that the District pays for, with the help of the Government, that there are numerous local matters here in Washington that other cities have to pay for themselves that the Government pays for exclusively, 100 percent? Did you know that?

Mr. PARKER. There are some governmental expenses that they care for.

Mr. BLANTON. Do you know how much money is included in what we call the Interior Department appropriation bill every year for local expenses in Washington that other cities would have to pay for, and that the city of Washington would have to pay for if the Government were not here?

Mr. PARKER. I do not recall the amount.

Mr. BLANTON. You know there is a tremendous amount?

Mr. PARKER. Quite a large sum.

Mr. BLANTON. Do you not know that in practically every one of the 10 appropriation bills that we pass every year there is included a big sum of money that is spent for local improvements in Washington, in a civic way, that other cities would like to have, and for which they would have to pay themselves?

Mr. PARKER. I did not know that was in every bill. There are a number of them which carry it.

Mr. JOHNSON. Did the committee request you to make the report?

Mr. PARKER. The board of trade retained me to make the report.

Mr. JOHNSON. I thought you said the committee.

Mr. PARKER. I am talking about this committee requesting me to come here. I did not volunteer.

Mr. BLANTON. This committee has never asked you to make a tax survey, has it?

Mr. PARKER. No, sir.

Mr. BLANTON. The subcommittee of the Senate committee handling the District appropriation bill, headed by Senator THOMAS of Oklahoma, has never asked you to make a survey of taxes, has it?

Mr. PARKER. No, sir.

Mr. BLANTON. The only thing you have ever done in connection with taxes in Washington was done at the request of the Washington Board of Trade under your $5,500 employment?

Mr. PARKER. That is right.

Mr. BLANTON. You knew that the entire pay roll of the Howard University here in Washington is spent in Washington and you knew that that was paid for, 100 percent, by the United States Government, did you not? The District does not have anything to do with that. You know that, do you not?

Mr. PARKER. Yes, sir.

Mr. BLANTON. Did you know that this Government spent every dollar of the $14,750,000 of the cost of the fine Memorial Bridge that goes into Virginia; did you know that?

Mr. PARKER. I suppose they paid for the whole of it.

Mr. BLANTON. Did you know that this Government paid for all of the fine driveway on the other side of the river that goes to Mount Vernon?

Mr. PARKER. But that is not in the District.

Mr. BLANTON. But the District people use it. You use it all the time as a District man?

Mr. PARKER. Yes.

Mr. BLANTON. You drive over it with your family there frequently?

Mr. PARKER. Occasionally.

Mr. BLANTON. Did you know that the fine Lincoln Memorial, with the reflecting pools used for skating by Washington people in winter, which you find visited by such large crowds all the time, was all paid for by the Government of the United States—all that big plant?

Mr. PARKER. Yes.

Mr. BLANTON. Did you know that the Washington Monument, which attracts so many people, both from Washington and places outside of Washington, was paid for by the United States Government?

Mr. PARKER. Yes, sir.

Mr. BLANTON. Did you know that the Government of the United States has paid every dollar of the cost of this beautiful Supreme Court Building that attracts such large crowds here all the time?

Mr. PARKER. Yes, sir.

Mr. BLANTON. Did you know that this fine Congressional Library, with the additional Library building that they are building to the east of the present building, was paid for wholly by the United States Government?

Mr. PARKER. That is correct.

Mr. BLANTON. Did you know that right now you will find hundreds of Washington people in the Congressional Library using it, in the reading room?

Mr. PARKER. They have the same use of it as anybody else.

Mr. BLANTON. Did you know that all of these Government departments here that attract so many people to this city, where there were 600,000 of them here in April, tourists, all of whom spent about $25 in Washington, on the average—did you know that all of those department buildings were paid for by the Government of the United States and not by the District?

Mr. PARKER. Yes.

Mr. BLANTON. Did you know that if this Government plant was not here, that if the Government institutions were not here, that instead of finding this big city here you would find just a little village, like it was when we took it over?

Mr. PARKER. That is probaby true.

Mr. BLANTON. Did you know that when the Government of the United States took over this District of 10 miles square it was just a swamp-ridden, mosquito-ridden village, and they made a beautiful city out of it that attracts hundreds of thousands of people here every month?

Mr. PARKER. Of course, Washington, the city, has been developed by the National Government; there is no question about that.

Mr. BLANTON. Did you know that the purpose of your $5,500 employment by the board of trade was to try to get a big lump-sum appropriation for the Government? You knew that, did you not?

Mr. PARKER. No; I did not know that.

Mr. BLANTON. Mr. Parker, can you state to this committee that you know that France pays one franc of contribution to Paris because of its capital being planted there?

Mr. PARKER. No; but I can report and check up on that.

Mr. BLANTON. I will state to you that it does not.

Did you know that Belgium pays nothing as a contribution for its capital?

Mr. PARKER. No.

Mr. BLANTON. Did you know that Germany pays nothing in the way of a contribution for its capital?

Mr. PARKER. No.

Mr. BLANTON. Did you know that Great Britain pays absolutely nothing in the way of a contribution that is comparable to the lump sum that the United States pays to Washington?

Mr. PARKER. Great Britain has a system by which they make grants to all of their municipalities.

Mr. BLANTON. You say you know——

Mr. PARKER. I know about Great Britain; I know what they do there; they make grants.

Mr. BLANTON. Great Britain does not pay one dollar contribution. Did you know that Mexico pays nothing in the way of a contribution to its capital?

Mr. PARKER. No.

Mr. BLANTON. Did you know that Poland pays nothing by way of a contribution to its capital?

Mr. PARKER. No.

Mr. BLANTON. Did you know that Spain pays nothing by way of a contribution to its capital?

Mr. PARKER. No.

Mr. BLANTON. Did you know that Sweden pays nothing by way of contribution to its capital?

Mr. PARKER. No.

Mr. BLANTON. Did you know that Switzerland pays nothing in the way of a contribution to its capital?

Mr. PARKER. No.

Mr. BLANTON. Did you know that Yugoslavia pays nothing in the way of such a contribution?

Mr. PARKER. No.

Mr. BLANTON. Did you know that Brazil pays nothing?

Mr. PARKER. No.

Mr. BLANTON. I will state to you that none of these countries pays a dollar comparable to the lump sum that this Government pays to Washington.

Has it occurred to you any time, Mr. Parker, that, drawing a $9,600 annual salary from the United States Government, especially in view of the fact that you are serving a joint committee of the House and Senate, and that there is a controversy in Congress every year over a lump-sum contribution, and that in the past appropriation bills the Senate has put in whatever the District has asked for, whatever the board of trade has asked for, and the House has had to make a fight to keep it down, that there would be any ethical question involved in your serving the Washington Board of Trade for a $5,500 fee in a capacity that would be antagonistic to what the House and the Senate might do in this matter?

Mr. PARKER. As I say, when I went into this I went with the idea of making a tax survey and advising them as to taxes only.

Mr. BLANTON. I would suggest this to you, just as one Member of Congress, that as long as you are drawing $9,600 from this Government in annual salary and serving a joint committee of Congress, as one Member of Congress I would vote to require you either not to take such antagonistic employment, or to quit taking a Government salary. That is the way I feel about it. I feel that your one employment is antagonistic to the other, and it is an interference with the rights of the Government involved here. There is a question of $3,000,000 involved right now. That is probably what Mr. Colladay had in mind when he made this state-

ment in the hearing before the Senate committee. This colloquy occurred [reading]:

"Senator COPELAND. Are you going to tell us some new things, Mr. Colladay, or some additional reasons, or some old truths proven by new formulas, with a new presentation of the facts?

"Mr. COLLADAY. Senator COPELAND, if you and the other Senators present were going to make a final report on our case, I would be willing to just file the document which I have just handed to you and submit the case on the brief, but it would seem advisable to make the record a little more fully."

In conclusion, Mr. Speaker, I repeat that it would be outrageously unjust for us to make the people of the United States pay $5,700,000 on the expenses of the people of Washington.

Mr. Speaker, I move the previous question.

The previous question was ordered.

Mr. SNELL. Mr. Speaker, I ask for a division of the resolution.

The SPEAKER. The Chair thinks the resolution is divisible, and the Clerk will report the first portion of the resolution.

The Clerk read as follows:

Moved, That managers on the part of the House, who, at the request of the Senate, were appointed by the Speaker on April 24, 1936, for a conference with the managers on the part of the Senate, who were appointed by the Senate on April 23, 1936, respecting the disagreeing votes of the two Houses relative to 87 amendments placed by the Senate on the House bill, H. R. 11581, making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1937, and for other purposes, have been in conference more than 20 days without avail, said House conferees having been appointed for more than 20 calendar days, and have made no report to the House that they, the said managers on the part of the House be, and they are hereby, instructed as follows:

First. The House instructs its managers to insist on the disagreement of the House to Senate amendment no. 1, which proposes to appropriate $5,700,000 out of the United States Treasury, as a Federal contribution on the local civic expenses of the District of Columbia, and to insist on the House provision respecting same.

The SPEAKER. The question is on agreeing to the first part of the resolution.

The question was taken; and on a division (demanded by Mr. BLANTON and Mr. MAVERICK) there were—ayes 142, noes 39.

Mr. SISSON. Mr. Speaker, I object to the vote on the ground that there is no quorum present, and I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present. The Chair will count. [After counting.] Two hundred and thirty-six Members present, a quorum.

Mr. MAVERICK. Mr. Speaker, I demand the yeas and nays.

Mr. BLANTON. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. The gentlemen from Texas demand the yeas and nays. Those in favor of ordering the yeas and nays will rise and stand until counted. [After counting.] Thirty-four Members have risen, not a sufficient number, and the yeas and nays are refused.

So the first part of the resolution was agreed to.

The SPEAKER. The Clerk will report the second part of the resolution.

The Clerk read as follows:

Second. The House instructs its managers to insist on the disagreement of the House to Senate amendment no. 37–8–9, appropriating $78,660 for so-called character education, and to insist on the refusal of the House to appropriate any money for so-called character education.

The SPEAKER. The question is on agreeing to the second part of the resolution.

Mr. BOILEAU. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER. Those in favor of ordering the yeas and nays will rise and stand until counted. [After counting.] Fourteen Members have risen, not a sufficient number.

Mr. BOILEAU. Mr. Speaker, I demand a division.

The House divided; and there were—ayes 109, noes 46.

Mr. SISSON. Mr. Speaker, I make the point of order that there is no quorum present, and object to the vote upon the ground that there is no quorum present.

The SPEAKER. The Chair will count. [After counting.] Two hundred and forty-six Members present, a quorum.

So the second part of the resolution was agreed to.

The SPEAKER. The Clerk will report the third portion of the resolution.

The Clerk read as follows:

Third. The House instructs its managers to insist on the disagreement of the House to Senate amendment no. 83, which struck from the House bill "Sec. 6", which Senate amendment 83 would permit high-salaried judges, high-salaried prosecuting attorneys, high-salaried doctors, and other high-salaried officers and employees, to accept outside employment from others.

The SPEAKER. The question is on agreeing to the third portion of the resolution.

Mr. BLANTON. Mr. Speaker, on that I demand a division.

The House divided; and there were—ayes 86, noes 78.

Mr. BOILEAU. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. The gentleman from Wisconsin demands the yeas and nays. Those in favor of ordering the yeas and nays will rise and stand until counted. [After counting.] Twenty-six Members have risen, not a sufficient number, and the yeas and nays are refused.

So the third portion of the resolution was agreed to.

Mr. BLANTON. Mr. Speaker, I move to reconsider the votes by which these portions of the resolutions have been agreed to and lay that motion on the table.

The motion was agreed to.

SPECIAL ORDER

The SPEAKER. A special order was granted for this morning. The gentleman from Minnesota [Mr. CHRISTIANSON] is recognized for 10 minutes.

Mr. CHRISTIANSON. Mr. Speaker, I yield to the gentleman from Tennessee to present a conference report.

OFFICERS AND EMPLOYEES OF FOREIGN SERVICE OF THE UNITED STATES

Mr. McREYNOLDS. Mr. Speaker, I present a conference report and statement on the bill (S. 267) for the relief of certain officers and employees of the Foreign Service of the United States who, while in the course of their respective duties, suffered losses of personal property by reason of catastrophes of nature, for printing in the RECORD.

AGRICULTURE

Mr. CHRISTIANSON. Mr. Speaker, I take the floor today to make some observations upon the agricultural problem. You may perhaps consider me presumptuous in so doing, for the subject has been discussed in these halls for years by members much more competent than I. Little if any of what I shall say will have the merit of originality. Nevertheless I feel it my duty before terminating my service in the House to call attention to the fact that after years of thought and effort the problem still remains unsolved.

I wonder if it has occurred to Democrats who have criticised the Republican record and to Republicans who have called attention to the futility of New Deal measures, that Mr. Hoover and Mr. Roosevelt, although employing different expedients, approached the farm problem from the same starting point. The Hoover program and the Roosevelt program were different in detail, but they were based on the same philosophy and were postulated on the same error.

Mr. Roosevelt sought to balance supply and demand by reducing domestic production. Mr. Hoover sought to accomplish the same purpose by segregating and impounding the surplus. Each tried to raise the price by limiting the amount available for consumption, Mr. Roosevelt by keeping wheat from being raised, Mr. Hoover by keeping it from being sold. In the case of cotton the present administration has followed the same procedure its predecessor used in the case of wheat.

Each administration in a large measure failed, because the principle upon which it operated was wrong. Mr. Hoover did not anticipate that products withheld from the market

would nevertheless, so long as they were within the boundaries of the country, have a depressing effect on the market; and Mr. Roosevelt did not foresee that the vagaries of the weather and the disposition of cooperators to "chisel" and of non-cooperators to sow more acres in anticipation of a higher price, would confound the best-meant efforts at regimentation and regulation.

The weakness in the Hoover procedure was that if it raised prices it would also stimulate production and thereby so increase the hoarded surplus that the market would fall faster and harder when it finally collapsed under its own weight. The weakness in the Roosevelt program was that if it accomplished a substantial acreage reduction, it would in the event of drought or other calamity leave the country on short rations and invite the importation of farm products that should have been raised at home.

Each of these administrations failed because it either did not see or refused to see that agriculture in the United States was built up on a surplus basis and therefore cannot be prosperous without an export market, and that it cannot have an export market if the exporter has to compete in purchasing agricultural products with domestic millers buying for a protected home market at prices substantially above the world level.

A one-price system in a surplus producing country whose cost of production is higher than its competitors inevitably presents to the farmer the choice of two alternatives: He may sell in the domestic market at the world price, or he may sell at a protected price and forego the foreign market. In either case he goes broke.

No one has been able to point to any method by which the American producer of such surplus commodities as wheat and cotton can be saved, except by making effective a two-price system under which the farmer would receive a protected price in the home market for whatever is required for home consumption and the world price for the surplus.

What particular mechanism is adopted to accomplish that end is less important than that some such mechanism be adopted.

The payment of export bounties financed by equalization fees is only one of many proposals that have been made.

I am aware that there are some who claim that there are no longer any world markets in which our surpluses can be sold. Chester Davis is the latest recruit in the company of defeatists.

I am not willing to accept the assumption that we cannot sell anything anywhere if we make the price sufficiently attractive.

In making that assertion I am relying on the statements of men who have had years of practical experience in the grain trade, not on the theoretical conclusions of furloughed college professors.

I voted for the Agricultural Adjustment Act, as I did for the so-called Soil Conservation Act, not because I considered it an adequate farm measure but because it was the only proposal for the relief of agriculture for which we were given an opportunity to vote.

I do not condemn A. A. A. in its entirety, for it was not wholly bad; it did give the farmers, especially in the drought-stricken areas, relief that was badly needed. My criticism of it is that it did not go far enough. It gave relief but it did not solve the farm problem, but rather served to complicate it.

It did not any more solve the farm problem than the dole solves the problem of unemployment.

Instead of reducing acreage, it tended rather to shift production from one crop to another, thus creating new dislocations without removing the old ones.

It did not raise the prices of farm products. The increase in prices was accomplished—to the extent it has been accomplished—by 2 years of devastating drought, by the devaluation of the dollar, and by a rise in the world price level.

While it is not only our right but our duty, as the minority, to call attention to the shortcomings and errors of the party in power, it is also our obligation to formulate an alternative program. I hope that it will not be considered too presumptuous to offer as my own contribution to that program the following recommendations:

First. We should reserve to the farmer his home market by (a) repealing the present Reciprocal Trade Agreement Act, and (b) raising duties on agricultural products in instances where export bounties and depreciated currencies have facilitated their shipment into this country. [Applause.]

Second. We should reopen the foreign markets we formerly enjoyed by adopting a two-price system that would enable the farmer to sell his surpluses at competitive world prices without forcing him to accept anything less than a protected price in the domestic market.

Third. We should aim to develop new foreign outlets by facilitating reciprocal trade, and toward that end we should adopt the formula developed by George N. Peek, but rejected by the present administration. The farmer should not be subordinated to industry in the field of foreign commerce, but should be given the opportunity to pay for such imported noncompetitive agricultural products as coffee, tea, cocoa, silk, sisal, and rubber with American agricultural surpluses. Dr. John Coulter, lately of the Tariff Commission, has pointed out that this could be accomplished by imposing exchange restrictions making exchange issued to pay for foreign agricultural products redeemable only when presented in payment for American agricultural products.

The SPEAKER pro tempore (Mr. GILLETTE). The time of the gentleman from Minnesota has expired.

Mr. CHRISTIANSON. Mr. Speaker, I ask unanimous consent to proceed for 3 additional minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

Mr. GREENWOOD. Mr. Speaker, reserving the right to object, I am not going to object to the gentleman's request, but so much time has been used today that I will object to any further requests for time.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. CHRISTIANSON. Fourth. We should stop the irrigation and reclamation program of the present administration, which has largely if not entirely neutralized its efforts toward acreage reduction. [Applause.] Crop adjustment should start by withholding lands now untilled from cultivation rather than by retiring acres already producing. The Federal Government should discontinue leasing its own land and permitting it to produce in competition with privately owned farms.

Fifth. We should continue along a broader front experiments for discovering and developing new uses for agricultural products, in order that the farmer in the future may share more equitably in that part of the consumer's dollar that is not used to buy food or fiber.

Sixth. We should make provision for the refinancing of farm mortgages at the lowest possible rates of interest, in order that there may be accomplished the two objectives of (a) eventually liquidating the farm mortgage indebtedness and (b) releasing into the channels of commerce and industry farmers' buying power that now goes to and is hoarded by financial institutions. If the farmer is to be subsidized in any way, the subsidy should take the form of relief from a debt burden imposed upon him largely by conditions related to and growing out of the war.

Seventh. We should lower the cost of transporting agricultural products (a) by removing existing restrictions on the reduction of long-haul railroad rates and (b) by opening practicable water channels from the interior to the sea.

Eighth. We might tax agricultural land in this country on the basis of its rental income, as is done in England, rather than on a more or less arbitrarily fixed sales value, and thereby apply to farm taxation the yardstick of "ability to pay." This recommendation, of course, calls for State rather than Federal legislation.

This program looks toward the rehabilitation of agriculture, and rehabilitation is what the farmer wants. He is still the most individualistic of all citizens, and as such is

not satisfied with a dole, no matter how well camouflaged. Put the farmer on a basis of equality with others, and he can and will take care of himself. [Applause.]

[Here the gavel fell.]

PERMISSION TO ADDRESS THE HOUSE

Mr. GUYER. Mr. Speaker, I ask unanimous consent to proceed for 3 or 4 minutes out of order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

Mr. GREENWOOD. Reserving the right to object, I served notice that I would object to any further requests for time to speak. If somebody wishes to ask unanimous consent to extend their remarks or something like that, that is all right, but I must object to any further request to speak.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

Mr. GREENWOOD. Mr. Speaker, I object.

WHERE?

Mr. SHORT. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. SHORT. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following radio address, delivered by me, on May 25, 1936, which has been slightly extended:

My fellow Americans, in behalf of the National Republican Congressional Committee, I thank the Columbia Broadcasting System for this opportunity to address the American electorate.

Limited time will permit me to explore only a few of the bewildering meanderings of New Deal policies since March 4, 1933. President Roosevelt frequently assures us that "we are on our way." "Where, oh, where?" is the big, baffling question in the minds of the American people.

Do the New Deal generals themselves have a clear conception of what they are trying to do?

We see them negotiating reciprocal-tariff treaties for 3 years, with a professed view to lowering tariffs in every direction—and last week President Roosevelt, by Executive order, belatedly increased tariffs on ruinous imports of cotton goods from Japan. What, then, is the New Deal policy—to lower tariffs or raise them? As a Republican Member of the House of Representatives, I am honored to find the President coming belatedly to embrace the solid Republican principle of protection for American workers and American farmers. Not so his Secretary of State! The people of America will not dismiss lightly the befogged policy which is indicated by this overdue upward revision of the textile tariff after 3 years of frantic efforts to lower our protection in every other sphere.

Similarly, we find the New Deal pursuing vigorously a policy to curtail agricultural production. Hundreds of millions of dollars of the taxpayers' hard-earned money have been poured out of the National Treasury to reduce crops. At the same time we find literally hundreds of millions more being poured out of the Treasury at another vent to build gigantic irrigation projects—which will bring hundreds of thousands of new acres into cultivation, to further increase the total agricultural production of the Nation. Such an inconsistent policy is sheer idiocy, and no sane person can make any sense out of such a hodgepodge.

When we find a government raising tariffs and lowering tariffs at the same time—plowing under acreage and bringing new acreage into fertility at the same moment—buying Chinese silver and Mexican silver with good American gold, only to use that silver as a sterile reserve against more and more paper money—when we see these conflicting and contradictory policies being pursued in all directions at once, it is appropriate to pause and ask, "Where is the New Deal heading America? What is the New Deal doing for recovery? What obstacles are being placed in the path of America's sane and orderly progress?"

Again, there is the problem of Roosevelt confusion in relation to our foreign trade in farm products. Producers of every major crop in America virtually have been compelled to reduce their acreage—in the name of balanced agriculture. But how is our agriculture being balanced?

In 1932 American farmers sold 7,886,000 bushels of corn to foreign countries. In addition, they shipped more than 150,000 barrels of corn meal and corn flour. They shipped 12,000,000 pounds of hominy and corn grits. American farm products went to every quarter of the globe. But look at the same picture for the calendar year 1935. The official figures recently have been published by the Department of Commerce. In 1935 we imported 43,242,000 bushels of corn; and we did not export a pound of corn, corn meal, flour, hominy, or corn grits.

Can any citizen of the United States rationalize a program which takes American acres out of production so that the necessary foodstuffs may be imported from foreign farmers?

Consider imports of pork. In 1932, we imported only 29,000 pounds of live hogs, but in 1935 we imported 3,414,317 pounds of live hogs. During the full calendar year 1935 our total imports of pork products of all kinds aggregated 13,908,176 pounds—and this after the New Deal had deliberately slaughtered more than 6,000,000 American hogs in 1933 and 1934!

Putting it another way, we took money from our National Treasury—money which ultimately must be paid in taxes upon every citizen—to destroy millions of pounds of pork, and then made up our consequent deficiency in 1935 food supplies by importing almost 14,000,000 pounds of pork from foreign lands. This is not an agricultural policy. It is, rather, the systematic destruction, the willful undermining of the American economic system. If long pursued, it will mean the utter ruin of the American farmer.

Perhaps the New Deal at heart is not overly solicitous concerning the welfare of American agriculture. You will recall the address of the principal New Deal campaign manager, Postmaster General James A. Farley, a few days ago at Grand Rapids, Mich., in which he referred with eloquent disdain to "a typical prairie State." We people of the great agricultural-producing region of America long have understood the contempt, scorn, and derision in which Tammany holds the great Middle West. We know the eastern city dude ignorantly believes that people out West are nothing but "hicks" and "rubes", only to be laughed at—they laughed at Lincoln!

Many good people of the great prairie States, I may add, appear to reciprocate heartily in their mistrust of the political system of Tammany Hall.

Yet it is illuminating to find the Postmaster General and the chairman of the Democratic National Committee and the chairman of the Democratic State Committee for New York publicly proclaim his sincere contempt for "a typical prairie State."

In the final analysis, however, this unsympathetic attitude of the Postmaster General is not difficult to understand.

The prairie States will be the last in the Union to be Tammanyized by the Farley spoils system. Our people believe in fair play.

The prairie States still are fighting for constitutional government. They believe in the Supreme Court.

The prairie States will be the last to ratify the New Deal policy of reckless squandering of the people's money and the Nation's substance. They do not want to mortgage the future of their children; nor do they believe that an artificial, temporary prosperity can long continue by giving the people abnormal "shots in the arm" of their own money, borrowed against their future, which they themselves ultimately must pay back.

The people of the prairie States realize that our Government is not confined to Washington but extends to every hamlet in our land. The people of this country are the Government, and no government can give to its people anything that it does not take from them. Always we must pay for what we get. No kind of government supports its people. Every type of government is supported by its people. Until the advent of the New Deal, our American system of government was the servant and not the master of men.

The people of the prairie States are liberal—but not like Roosevelt and Farley, with other people's money.

The prairie States will be the last in this Union to accept the principle of the boondoggle as the foundation stone of American prosperity. They believe in individual initiative and private enterprise.

The prairie States always have operated on the system of balanced budgets. Nebraska has no State debt today. Kansas has been operating on a balanced budget since 1932. We pay as we go.

The prairie States support an honest and industrious people, and no public slurs and aspersions from Tammany spoilsmen will change the honorable and forthright convictions of that section.

In a little more than 3 years, the New Dealers have increased our national debt by more than $10,000,000,000, and in spite of this excessive expenditure we will have about 12,000,000 unemployed and 20,000,000 of our people on relief. Nothing is more distressing or demoralizing to an individual or to a nation than to be hopelessly bogged down in the mire of debt. Such a path leads to bankruptcy, repudiation, and loss of individual and national honor.

At the end of the next fiscal year of the Roosevelt administration (1937) our national debt will be in the neighborhood of $36,500,000,000. This is greater than the value of all the farm lands and farm buildings, the farm machinery, and farm improvements in the United States today. It is estimated that the current value of all farm property is only $34,500,000,000; but before the New Dealers get through with their reckless extravagance and fantastic bootstrap recovery, the national debt of the United States will exceed this figure by, roundly, $2,000,000,000.

There is not to be found in all human history a more shocking example of reckless waste. Political expediency and New Deal nostrums, Machiavellian demagoguery and half-baked panaceas are to blame.

The New Deal already has cost us the prosperity and progress of an entire generation. And the Roosevelt administration still has 7 months to go. This New Deal is a fake and a fraud. Its father is trickery, its mother deception, and its offspring corruption. In 1932 it seduced the voters of America and ever since March 4, 1933, it has raped the Government and its people. The voice is the voice of Roosevelt, but the hand is the hand of Farley.

I leave with you the question with which I began, "Where, if anywhere, is President Roosevelt leading our great country?" Shall we continue to own this country, or shall we be owned by it? Shall we remain free men in a republic of representative democracy, or shall we become slaves in a dictatorial bureaucracy or serfs in a regimented communistic society?

In November 1936 every voter must answer this question at the ballot box. Then, I predict, Jim Farley will learn that while the people of the prairie States may have a little hayseed in their hair, they do not have cobwebs in their brain.

PERMISSION TO ADDRESS THE HOUSE

Mr. GOLDSBOROUGH. Mr. Speaker, I ask unanimous consent that on Thursday next, after the reading of the Journal and disposition of matters on the Speaker's desk, I may be allowed to address the House for 15 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

Mr. PATMAN. Reserving the right to object, Mr. Speaker, I dislike very much to object to my good friend speaking. I always enjoy what he has to say, but we are expecting to be considering the Robinson-Patman equal-opportunity-in-business bill at that time, and I shall be compelled to object. I hope the gentleman will withdraw his request or make it for some other date.

Mr. GOLDSBOROUGH. Mr. Speaker, I modify the request to speak on Monday next.

The SPEAKER pro tempore. The gentleman from Maryland asks unanimous consent that on Monday next, after the reading of the Journal and disposition of matters on the Speaker's desk, he may address the House for 15 minutes. Is there objection?

There was no objection.

OLD-AGE PENSIONS AND SOCIAL SECURITY

Mr. GOLDSBOROUGH. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER. Without objection it is so ordered.

There was no objection.

Mr. GOLDSBOROUGH. Mr. Speaker, about 6 years ago, on June 12, 1930, I made the first speech ever made in the American Congress favoring a national old-age-pension system.

At that time my views were ridiculed in many quarters, but since then the idea has spread among our people by leaps and bounds, so that in 1935 the American Congress passed an Old Age Pension and Social Security Act, and during the same year the legislature of my own State of Maryland passed an Old Age Pension and Social Security Act.

To May 1 in Maryland 7,517 persons are receiving up to $30 a month—averaging $17 a month—in old-age pensions, and by the end of the year it is expected that this number will be increased by 4,134, bringing the total up to 11,651 in Maryland alone.

Of course, the present laws are not sufficiently broad in their provisions to provide for all worthy cases, nor are the monthly payments as large as they should be.

A beginning has been made, and those who believe it to be a public disgrace to have the aged and those unable to work dependent on charity will never stop their efforts until every almshouse in the country is empty and for rent. Personally, I will continue to labor for the cause of old-age pensions and social security until we have fully adequate legislation.

CALL OF THE HOUSE

Mr. MILLARD. Mr. Speaker, I raise the point of order that there is no quorum present. Important business is being transacted and we should have a quorum present.

The SPEAKER pro tempore. The Chair will count. [After counting.] One hundred and twenty-four Members are present, not a quorum.

Mr. BANKHEAD. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 109]

Adair	Curley	Hope	Rayburn
Andrew, Mass.	Darden	Huddleston	Reed, N. Y.
Andrews, N. Y.	Dear	Jenckes, Ind.	Rogers, N. H.
Bacon	Ditter	Kee	Ryan
Barden	Duffey, Ohio	Keller	Sanders, La.
Berlin	Dunn, Miss.	Kennedy, Md.	Sandlin
Bolton	Eaton	Kerr	Schaefer
Brennan	Eckert	Lambertson	Schuetz
Brewster	Englebright	Lanham	Tobey
Brooks	Fenerty	Lee, Okla.	Treadway
Buckley, N. Y.	Ferguson	McGroarty	Turpin
Bulwinkle	Fernandez	McLean	Utterback
Caldwell	Flesinger	Maloney	Wadsworth
Carmichael	Fulmer	Montet	Werner
Cartwright	Goodwin	Moran	Wigglesworth
Cary	Green	Murdock	Wilcox
Casey	Greenway	Norton	Wilson, La.
Cavicchia	Gwynne	O'Connell	Wood
Chapman	Hamlin	O'Neal	Zioncheck
Claiborne	Harlan	Peterson, Fla.	
Clark, Idaho	Hennings	Plumley	
Creal	Hoeppel	Quinn	

The SPEAKER. Three hundred and forty Members are present, a quorum.

Mr. BANKHEAD. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

CALENDAR WEDNESDAY

Mr. BANKHEAD. Mr. Speaker, I ask unanimous consent that business in order on Calendar Wednesday may be dispensed with this week.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

PERMISSION TO ADDRESS THE HOUSE

Mr. MONAGHAN. Mr. Speaker, I ask unanimous consent to proceed for 4 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

Mr. GREENWOOD. Mr. Speaker, I served notice that I would object to any further speeches today.

Mr. MONAGHAN. Mr. Speaker, then I ask unanimous consent that on tomorrow, after the reading of the Journal and disposition of matters on the Speaker's desk, I be permitted to proceed for 10 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

Mr. PATMAN. Reserving the right to object, Mr. Speaker, I dislike very much to object to the request of the gentleman from Montana, but the House will consider a bill tomorrow, under a special rule, in which the people of the country are very much interested. I objected to the gentleman from Maryland [Mr. GOLDSBOROUGH] under similar circumstances. I shall be compelled to object, unless the gentleman would change his request to some other date.

Mr. MONAGHAN. Mr. Speaker, I ask unanimous consent that I be permitted to speak on Monday next, after disposition of matters on the Speaker's desk, for 10 minutes.

The SPEAKER. The gentleman from Montana asks unanimous consent that on Monday next, after disposition of matters on the Speaker's desk and the special order heretofore granted, he be allowed to address the House for 10 minutes. Is there objection?

There was no objection.

SESSIONS OF THE COMMITTEE ON IMMIGRATION

Mr. DICKSTEIN. Mr. Speaker, I ask unanimous consent that the Committee on Immigration may sit during the sessions of the House tomorrow and Thursday.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

VOCATIONAL EDUCATION

Mr. GREENWOOD. Mr. Speaker, I call up House Resolution 520.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House Resolution 520

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 12120, a bill to provide for the further development of vocational education in the several States and Territories, and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill and continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. GREENWOOD. Mr. Speaker, I yield 30 minutes to the gentleman from Pennsylvania [Mr. RANSLEY].

PERMISSION TO ADDRESS THE HOUSE

Mr. ROBSION of Kentucky. Mr. Speaker, will the gentleman yield to permit me to submit a unanimous-consent request?

Mr. GREENWOOD. Mr. Speaker, I yield.

Mr. ROBSION of Kentucky. Mr. Speaker, I ask unanimous consent that on Friday next, after the reading of the Journal and the disposition of matters on the Speaker's table, I may be allowed to use the 30 minutes I was to have used yesterday.

Mr. PATMAN. Mr. Speaker, reserving the right to object, I dislike to object to the request of the gentleman from Kentucky, but we are not at all certain that by Friday we shall get through with the bill we are going to take up tomorrow, and it would endanger the passage of that legislation. I ask, therefore, that the gentleman fix another date.

Mr. ROBSION of Kentucky. Mr. Speaker, I ask unanimous consent that on Monday next, after the reading of the Journal and the disposition of the two special orders heretofore granted, I may address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

VOCATIONAL EDUCATION

Mr. GREENWOOD. Mr. Speaker, House Resolution 520 from the Committee on Rules provides for the consideration of the vocational-education bill. It is a liberal rule, providing for amendment and for 1 hour of debate to be confined to the bill.

Mr. Speaker, it might be well to have a little background for the consideration of this bill in order that we may know the purpose of the resolution. This bill provides for the authorization of $18,000,000—$6,000,000 is to be used for the year ending June 30, 1937; $6,000,000 for the year ending June 30, 1938; and $6,000,000 for the year ending June 30, 1939. It is a continuation of the program for vocational education and is divided three ways—for training along agricultural lines, along the line of home economics, and for training in industry.

Mr. Speaker, the first legislation of this character goes back to 1918, when the Smith-Hughes Act was passed, which contributed $500,000 for training in agriculture and $500,000 for industrial training. The Smith-Hughes Act was followed by the George-Ellzey Act in 1934, providing $3,000,000 a year; but that act expires this year; and it is for the continuation of this work that the increase from $3,000,000 to $6,000,000 is proposed in this bill.

Mr. JOHNSON of Texas. Mr. Speaker, will the gentleman yield?

Mr. GREENWOOD. I yield.

Mr. JOHNSON of Texas. Will opportunity be afforded to substitute the Senate bill for the House bill?

Mr. GREENWOOD. The rule does not so provide; but I have discussed the matter with the Parliamentarian and understand that after the first section of this bill is read the Senate bill could be offered as an amendment. The rule provides that the bill is wide open for amendment.

Mr. JOHNSON of Texas. I may say to the gentleman from Indiana that a number of Members would like to see the Senate bill substituted for the House bill.

Mr. GREENWOOD. There are several members of the committee who would like to see the same thing done, and I believe the parliamentary situation will be such as to permit its being done, even though the rule does not specifically provide for it.

Mr. Speaker, we all recognize the merits of this character of education. Most of the States have a very elaborate system of academic education, of schooling along scientific and educational lines, but it is only within the last few years that we have recognized the great necessity for educating not only the younger, but even the older people along scientific lines in trades and vocations. Perhaps the emergency that arose from the depression when there was so much unemployment brought more vividly to our minds the necessity of educating people in order that they may be able to earn a livelihood; and this bill proposes a permanent program along the lines already undertaken. The unemployment situation in many States and the extra burden that has been thrown upon the States has required this Federal aid on a 50-50 basis. I think the Federal Government is equally interested with the States in helping place the youth, the men and women, and even those of adult age, in a position where they may be able to earn a livelihood through having a better understanding of the different vocations. Many of the States have undertaken this program but would have to abandon it if Federal aid is not continued as proposed by this legislation.

Mr. Speaker, three very basic features of life are covered by this bill: First, farming, going back to our greatest of natural resources, the soil. Agricultural education has one-third of the privileges and appropriations authorized in this legislation. The conservation of the soil is perhaps the greatest necessity confronting any nation that has a large population to insure the future perpetuity of the race. We have in the Orient many examples of nations which have neglected their soil, nations like China and the Asiatic countries, where the population has increased rather phenomenally, but where a soil is so depleted that hunger and starvation is constantly menacing the future of the people. In our Nation, of course, the farm population, dependent on the soil, is the largest single group. Then the bill also undertakes to encourage the teaching of new methods in the home. There are perhaps better methods than we have known in the past which have been brought about through discovery and invention, and the necessity arises for organizing the home upon an economic basis in order to care for the necessities, in order to take care of living under present circumstances; health, sanitation, and home management, all these subjects appeal, I think, to the entire membership of the House. Then, in this mechanical age, this age of invention and discovery, the trade a man learned at 10, 12, or 15 years ago may be of no further use to him; it does not stand him so well in stead to earn a livelihood under present economic conditions.

So it is going to accommodate modern life to the situation as we now find it, which grew out of the depression and out of the advancement that has come through the years. This particular type of education is greatly needed and is being popularized in various States because the youth of the country desire to learn something whereby they may earn their own livelihood by the use of their hands. I think it is very laudible that the Federal Government is putting up 50 percent of these funds so that the States may meet the appropriation and take advantage of this class of education. I trust the rule may be adopted and the bill enacted into law.

Mr. RANSLEY. Mr. Speaker, I yield 10 minutes to the gentleman from Michigan [Mr. DONDERO].

Mr. DONDERO. Mr. Speaker, the subject of vocational education is not a new one in this country. More than 19 years have passed since the original act was adopted by the Congress of the United States, and it is now permanent

legislation. Under the Smith-Hughes Act the States receive $7,157,000 each year and, as pointed out by the gentleman from Indiana [Mr. GREENWOOD], this bill is supplemental and is offered to carry on the program inaugurated under the original Smith-Hughes Act. I am deeply interested in the subject of vocational education. The Members of the House will notice that in the House bill now under consideration only 3 years are provided for with $6,000,000 appropriated each year. It was the thought of the committee, after due consideration, that instead of making this permanent legislation it should be made for the span of 3 years so that at the end of that time it would be better known what should be done and what provision should be made with reference to either curtailing the subject of vocational education or increasing and broadening its scope.

I may say in passing that this bill comes before the House with the unanimous report of the Committee on Education. There is no dissenting opinion. The $6,000,000 provided each year is to be divided three ways among the States. If this bill becomes law, taken with the Smith-Hughes Act, it means that each State would receive only $274,000 if the money is allocated or allotted equally. If this bill does not become law, and we carry on under the Smith-Hughes Act, then if the money is divided equally the States would receive about $150,000 each.

I am fully aware of the fact that the Senate of the United States has passed a similar bill, and I understand a movement is on foot in the House to offer the Senate bill as an amendment to the pending House bill. The Senate bill carries an appropriation of $12,000,000 each year and is permanent legislation, while the House bill carries an appropriation of only $6,000,000 each year. I may say to the House that the Committee on Education held hearings on this bill, and so far as the testimony offered before that committee is concerned, there was nothing presented to justify the inclusion of an annual appropriation of $12,000,000; therefore, it was the unanimous judgment of the committee that $6,000,000 is ample, for the reason that the George-Ellzey Act, which expires in another year—and this bill is offered in lieu of that—carried but $3,000,000, while this bill doubles that amount.

Mr. TARVER. Will the gentleman yield?

Mr. DONDERO. I yield to the gentleman from Georgia.

Mr. TARVER. The committee has given consideration to the Senate bill. Was it studied by the House committee?

Mr. DONDERO. I may say to the gentleman that the Senate bill and its provisions were known to the committee, or at least the substantial provisions of it, and the same were discussed by our committee.

Mr. TARVER. The gentleman does not intend to convey the impression in his statement that the committee was unanimously opposed to the provisions of the Senate bill?

Mr. DONDERO. No. My statement is that the committee was of the unanimous opinion that the House bill was the right kind of a bill to bring before the House at the present time.

Mr. PALMISANO. Will the gentleman yield?

Mr. DONDERO. I yield to the gentleman from Maryland.

Mr. PALMISANO. House bill 10190 was identical with the Senate bill. The gentleman who introduced the so-called George bill in the Senate then introduced the bill which is now pending before the House.

Mr. TARVER. Will the gentleman yield?

Mr. DONDERO. I yield to the gentleman from Georgia.

Mr. TARVER. There is another major difference between the House and Senate bills, as, of course, the gentleman knows. The Senate bill provides that a certain proportion of these funds shall be made available to the States without matching.

Mr. DONDERO. Yes; I understand that.

Mr. TARVER. It strikes me that the provisions of the Senate bill are perhaps more meritorious than the mere increase in the amount which is made available, in that it tends to give to States which may not be able to match Federal funds some opportunity to participate under the provisions of this legislation. Will the gentleman discuss that feature of the Senate bill?

Mr. DONDERO. I may say to the gentleman from Georgia that the question of matching funds, of course, is one that is vital to the States which feel they cannot appropriate sufficient money to meet the Federal aid. I call attention to the fact that the House bill attempts simply to supplement the Smith-Hughes Act and the George-Ellzey Act and carries out the same policy and the same principle involved in the Smith-Hughes Act, namely, that the States shall match dollar for dollar the money provided by the Federal Government in aid to the States.

Mr. COX. Will the gentleman yield?

Mr. DONDERO. I yield to the gentleman from Georgia.

Mr. COX. The gentleman just stated there was no evidence given to the committee to justify an expenditure in excess of $6,000,000. Does the gentleman recall Mr. John C. Wright, Assistant Commissioner for Vocational Education, appearing before the committee?

Mr. DONDERO. Yes.

Mr. COX. Did the gentleman hear him make the following statement:

> I might add one statement, Mr. Chairman, and that is that the States spent up until this past year, 1935, $3 of their own money for every dollar of Federal money.

Mr. DONDERO. Yes; and I call attention to the fact the testimony also showed that for every dollar of Federal money only $1.39 was spent by the States. In answer to the question of the gentleman from Georgia, may I say further that when Mr. Wright appeared before the committee and we asked him to justify the $12,000,000, he substantially said to the committee:

> I am here, but I cannot talk.

Mr. DEEN. Will the gentleman yield?

Mr. DONDERO. I yield to the gentleman from Georgia.

Mr. DEEN. I would like to correct the gentleman's statement, and he is making a very splendid speech. He stated that Mr. Wright, who appeared before the committee, could not justify or could not talk about this legislation. Is it not a fact that under the Budget and Accounting Act, heads of departments have to get permission from the President before they may make recommendations under these bills?

Mr. DONDERO. That is possible, if the hearings show it, but I may say to the gentleman from Georgia that so far as it applies to the Senate bill, and so far as I am able to learn, the Senate never even held any hearings on the bill it passed.

Mr. DEEN. I am informed by distinguished Senators that there was no objection on the Senate side, and therefore no hearings were held.

Mr. DONDERO. There were no hearings whatever, and therefore they had no testimony before them on which to base the amount of $12,000,000, and to run this up from $3,000,000 to $12,000,000 means an increase of 300 percent in 1 year. The committee did not think this was wise, and I believe the amount is entirely in excess of the requirements.

So far as it affects my own State, I have searched the records and have found that in my own State of Michigan we have 222 schools teaching agriculture.

[Here the gavel fell.]

Mr. RANSLEY. Mr. Speaker, I yield the gentleman from Michigan, 2 more minutes.

Mr. DONDERO. In the 222 schools, I find that nearly 47,000 of our young people have found not only instruction but benefit. This particular instruction has touched 1,250,000 people of the Nation, mostly young people graduating from high schools. It has aided the boys and girls on the farm and in the city alike. This bill and the underlying principle of the bill reach into the homes of the people of the cities, those who live in nonfarm homes, and reaches out into the country in the most remote recesses, and gives aid and benefit to the young people of the Nation.

I have a very interesting statement here from my own State, with regard to the benefits of this form of legislation

principally to the young people, and I want to read from the Michigan State Farm Bureau a brief paragraph written to me April 30, 1936, in which that bureau says:

> At the present time in Michigan, there are approximately 3,000 young farmers who have graduated from the agricultural departments of the high schools in Michigan. I desire to report to you that vocational agriculture is quietly and effectively changing the type and caliber of the men who now run our Michigan farms.

And what I can say about Michigan, undoubtedly every Member of the House can say about the young farmers in his State.

[Here the gavel fell.]

Mr. RANSLEY. Mr. Speaker, I yield the gentleman 2 more minutes.

Mr. DONDERO. One statement further:

> There can be no greater testimony to the effectiveness of this work, than when I tell you that a questionnaire to these young people composing the Farm Bureau Junior League indicates that better than 75 percent are graduates of vocational agriculture and that of this 75 percent but 10 percent have indicated a desire to leave the farm should an opportunity arise.

I think if nothing was before me except this statement showing a desire on the part of the young men and the boys of the country to stay on the farm, this would be sufficient alone to warrant my support of the legislation.

Mr. CRAWFORD. Mr. Speaker, will the gentleman yield?

Mr. DONDERO. I yield to the gentleman from Michigan.

Mr. CRAWFORD. Does the gentleman, who, I understand, is a member of the committee, have anything in the RECORD to support the contention recently made that this vocational work closed one of the large industries in my particular district of the State of Michigan?

Mr. DONDERO. No such information was before the committee.

Mr. CRAWFORD. The gentleman knows the case to which I refer?

Mr. DONDERO. I do not think I do.

Mr. CRAWFORD. The charge was made by our Governor that vocational education funds were used for the purpose of closing a large industry at Portland, Mich., throwing out of employment some 600 people. I have been very much concerned about it, because I have been a friend of this legislation and have spoken in behalf of it, but at the same time I wanted to find out from the gentleman if he has found anything in the records which supports the alleged claim that this vocational education fund is being used for the purpose of closing industries in the State of Michigan.

Mr. DONDERO. No such information has reached me and neither has any such information come before our committee, I will say to the gentleman.

Mr. JOHNSON of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. DONDERO. I yield.

Mr. JOHNSON of Oklahoma. I simply wish to observe that the gentleman has made such a splendid argument, he has convinced me we ought to adopt the Senate bill rather than the House bill.

Mr. DONDERO. Let not our enthusiasm run away with the Treasury of the United States. Let us keep our feet on the ground.

Mr. HOUSTON. Mr. Speaker, will the gentleman yield?

Mr. DONDERO. I yield.

Mr. HOUSTON. I am in favor of the legislation, but I wonder if the gentleman thinks that $6,000,000 is sufficient to carry through the program. Was there any evidence presented to the gentleman's committee that this would not be enough money?

Mr. DONDERO. I will say to the gentleman that this is an increase of 100 percent over the appropriation of last year and we feel that an increase of 300 percent is far in excess of any requirement presented to our committee.

Mr. HOUSTON. How does this affect the hundreds and thousands of young men and women roaming around the country out of employment? Do they participate in this fund?

Mr. DONDERO. I do not think they could all be absorbed.

[Here the gavel fell.]

Mr. RANSLEY. Mr. Speaker, I yield the gentleman 3 additional minutes.

Mr. DONDERO. But I think a part of them could be absorbed if they sought aid under this particular kind of program.

Mr. HOUSTON. Just how would it work?

Mr. DONDERO. That is a mater of set-up in the various States, the Federal Government simply cooperating with the States in their program.

Mr. HOUSTON. I am very much in favor of the program.

Mr. CITRON. Mr. Speaker, will the gentleman yield?

Mr. DONDERO. I yield.

Mr. CITRON. Section 6 of the House bill is the protective clause against utilizing any vocational money for services of vocational trainees for private profit. Has the Senate bill a similar protective provision?

Mr. DONDERO. No; not in any way.

On page 3 you will find in the Senate bill provisions which include public and other service occupations. Testimony before our committee established a situation where that identical thing occurred in which individuals were trained for the purpose of giving aid to enhance private profit. That provision—section 6 of the House bill—is to preclude public money being used for that purpose.

The Senate bill does not include that safeguard. Let me make one more observation. I have before me a letter from the superintendent of public schools in Pontiac, Mich., in which he says:

> Here in Pontiac, where the training of boys for the automotive industry is of such pressing importance, but where local ability to finance the needed extension of vocational training is so restricted, the provisions of the bill would make possible a splendid service to our youth.

That is signed by James H. Harris, superintendent of schools.

Mr. MASSINGALE. Will the gentleman yield?

Mr. DONDERO. I yield.

Mr. MASSINGALE. In the hearings before your committee, was there any evidence to the effect that a large number of vocational-training schools had to close throughout the Nation for lack of funds, and that that is the reason why the Senate increased the amount?

Mr. DONDERO. I think the Senate bill was passed before the House had concluded the hearings and before the bill was reported for consideration.

I can say that the testimony before our committee was most conclusive; that the gentleman's State of Oklahoma had received tremendous benefits from the funds allocated to the State of Oklahoma under this form of legislation, keeping many people off the relief roll.

Mr. MASSINGALE. I grant that, but the gentleman has not quite answered my question. I know that in Oklahoma dozens and dozens of vocational training schools had to close because the appropriation was not sufficient for them to carry on.

Mr. DONDERO. It is possibie that the demand of the schools in your State was greater than the allocations of funds. I am not satisfied that this will be a panacea for all ills.

Mr. MILLARD. Will the gentleman yield?

Mr. DONDERO. I yield.

Mr. MILLARD. What is the provision as to how the money shall be divided?

Mr. DONDERO. It will be divided in three ways, which you will find in section 1 of the bill. Six million dollars each year for 3 years, beginning July 1, 1937. One-third in proportion—farm population bears to the total farm population of the United States; one-third in proportion to rural population; one-third in proportion to non-farm-population States to match amount.

Mr. MILLARD. How much would New York State get out of that?

Mr. DONDERO. I am not able to go into the detail of that. I hope the House bill will pass; we could not spend that amount of money to any better advantage.

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. GREENWOOD. Mr. Speaker, I yield 10 minutes to the gentleman from Georgia [Mr. Cox].

Mr. COX. Mr. Speaker, I take it that there is no serious opposition to the adoption of the rule. If I sense the feeling of the membership, it is that the most of us, if not practically all of us, are very much interested in the enactment of the pending bill or legislation of that type. Probably the only controversy that will arise will be over whether or not the Senate bill be substituted for the bill reported by the House committee, which is the bill that the pending rule is intended to make in order. I desire to go directly to the argument of our distinguished colleague, the gentleman from Michigan [Mr. DONDERO], who has just addressed the House, in which he opposes the substitution of the Senate bill upon the ground that there was nothing by way of evidence submitted to his committee indicating a need for the money. I have made some little investigation of this subject matter, and I say to you that the information that I have obtained is that there is very great need for the money authorized to be appropriated in the Senate bill, because there are a great many people anxious for the training this activity provides, who have no hope of ever obtaining it with the money provided in the House bill. The present need is greater than it has ever been before. The records reveal that 1,129,000 students are now enrolled in vocational-education classes in the United States. A recent check-up in the various States reveals that more than 5,900 rural high schools in the United States need vocational education in agriculture, and, it should be understood, this bill provides for vocational education in agriculture, trade, and industry, and in home economics. It is conservatively estimated that if funds were available more than 6,000,000 people would be reached in vocational education.

The situation in Arkansas is typical. In that State at the present time there are 478 rural consolidated high schools, in which 110 departments of vocational agriculture are maintained under the present funds. There are on file 200 applications for additional departments in the State office of Arkansas at the present time. For the benefit of people coming from the larger cities it should be understood that the fund authorized to be appropriated by this bill is not to be expended wholly or entirely in rural communities but that it goes to the equal benefit of those and to an equal extent for those living in the cities. The greatest school of this type which we have in the country is the one located at Buffalo, and while it is probably the largest of this type of the city schools nevertheless it is typical of all the rest. The time at my disposal is not sufficient to enable me to develop in detail the argument that I would like to make to support the proposition that there is need for the funds provided in the Senate bill. I think we would commit a very serious mistake in not accepting the Senate bill in lieu of the House bill. It is a bill that my colleague, Mr. DEEN, of Georgia, introduced, and it is the bill upon which the hearing was had by the committee. Congress, in this kind of legislation, has done and is seeking to do something for the working people who are ambitious to improve their own opportunities and condition. This is an activity that does something for working people, something for the boys on the farm, something for country girls, something for ambitious and poor laboring boys in the cities. Let us render the finest service that it is possible for us to render to this very deserving class by substituting the Senate bill for the House bill when the opportunity offers itself in the consideration of the House bill.

Mr. JOHNSON of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. COX. Yes.

Mr. JOHNSON of Oklahoma. I was interested in the statement the gentleman made in reference to the number of applications for such vocational schools in the State of Arkansas. Has the gentleman the figures for the entire United States, and particularly for the State of Oklahoma?

Mr. COX. Mr. Speaker, I am sorry that I have not the figures for the entire country available here at hand, nor do I recall the figures for the State of Oklahoma; but Arkansas, I may say to the gentleman, is typical of all the States, and it is not the rural agricultural States alone that are interested, but States like New York.

Mr. SIROVICH. Mr. Speaker, will the gentleman yield?

Mr. COX. Yes.

Mr. SIROVICH. As I understand the debate, the House bill makes it mandatory for every State to match the amount of money the Government gives. Does the Senate bill do the same?

Mr. COX. The Senate bill provides that for the years 1937, 1938, 1939, 1940, and 1941, I believe, the States shall contribute 50 percent of the amount contributed by the Federal Government; for the year 1942 they shall contribute 60 percent—that is, the States or the local communities—and for the year 1943, 70 percent; for 1944, 80 percent; for 1945, 90 percent; and thereafter an equal amount.

The SPEAKER. The time of the gentleman from Georgia has expired.

Mr. GREENWOOD. Mr. Speaker, I yield the gentleman 2 additional minutes.

Mr. TERRY. Mr. Speaker, will the gentleman yield?

Mr. COX. Yes.

Mr. TERRY. I am very much interested in the splendid statement made by my colleague. I know that in my State of Arkansas a number of schools in various counties will not be able to have this vocational work unless the Senate bill is adopted.

Mr. COX. That is very true. With respect to my own county, which is an agricultural community, there are two or three schools in which vocational training is carried on, but there are other schools wanting the service. Let me say this to you: I have seen the effect of the work of these vocational teachers and what they have done with boys and girls in my home county.

Mr. McCLELLAN. Mr. Speaker, will the gentleman yield?

Mr. COX. I yield.

Mr. McCLELLAN. Were the figures which the gentleman gave with reference to Arkansas the number of applications pending that are not now receiving aid?

Mr. COX. Now in the State offices there are pending 200 applications.

Mr. McCLELLAN. Which are not now receiving aid?

Mr. COX. And cannot be accommodated.

Mr. McCLELLAN. Now, if we do not substitute the Senate bill and only make an appropriation of $6,000,000, as provided by the House bill, then those applications cannot be taken care of?

Mr. COX. They cannot be taken care of, because you will understand that $3,000,000 of the $6,000,000 has already been allocated; that is, contracted.

Mr. McCLELLAN. And that is true with reference to the other States of the Union, with reference to applications pending? They cannot be taken care of either?

Mr. COX. That is very true.

I want to complete the statement I started to make a few moments ago. It is not only Arkansas, Alabama, and Georgia and the other agricultural States that are benefited, but it is the great populous communities, like the great city of New York and others.

The SPEAKER. The time of the gentleman from Georgia [Mr. Cox] has expired.

Mr. RANSLEY. Mr. Speaker, I yield 7 minutes to the gentleman from Kansas [Mr. GUYER].

Mr. GUYER. Mr. Chairman, I am in favor of the legislation now before the House. I believe that the money

expended in such a worthy cause is most commendable, and I am heart and soul in favor of the objects of this act and what it will do for the young people of the country.

I wish to speak briefly, however, upon another subject, and I ask the indulgence of the House while I digress from the subject of this debate in order to bring to the attention of the House a matter which is very likely to be of profound consequence to this country during the coming summer.

The matter to which I refer promises to assume the gravest proportions in certain areas of the country and it has nothing whatever to do with the favorite seasonal sport of this year—politics.

For several years, and notably 2 years ago, certain parts of the Central Western States have been devastated by a pest of grasshoppers. All at once they have appeared in alarming numbers in the valley of the Kaw or Kansas River just west of Kansas City, Kans. Here 6,000 acres of land devoted to truck gardens are threatened with certain destruction. Only immediate succor will prevent the loss of over a million dollars' worth of vegetables which supply the Kansas City (Mo.) and Kansas City (Kans.) markets. This has not happened in the Kaw Valley since 1874.

The Secretary of Agriculture told me Saturday morning that no funds were available for this purpose and no bait or poison mash available for the purpose of fighting this plague. This bait, which consists of a mixture of bran, sorghum, or other similar sweet liquid, and paris green or other arsenical poison, is scattered over the gardens or fields affected to the degree of about 50 pounds per acre. These truck gardeners have exhausted their credit to finance seeding and planting, and any aid that will help them must be immediate; but so far neither myself nor the Kansas Senators have found the source of any immediate relief.

However, we are still seeking some accessible funds so that these hard-working people may proceed with their work of supplying the markets of the two Kansas Cities and other places with fine vegetables. This valley of the Kaw is as rich as the Nile, but the grasshoppers at this time threaten to absolutely devastate the whole area devoted to the production of vegetables for market.

Before this Congress adjourns it should appropriate from $250,000 to a half million dollars, making it available to the Secretary of Agriculture to combat the scourge which at this time threatens to destroy the products of this highly developed land. Should we fail to do this there is a highly probable necessity of calling a special session of Congress to enact legislation to protect the farms and gardens of the country from the blight of grasshoppers.

A wide area, which I saw mapped at the office of Secretary Wallace, will be subject to these pests, and on account of the dry season may assume gigantic proportions before the summer is over. If we should adjourn before this money is appropriated we may have to be called back, as I have said, to deal with the emergency this situation threatens. Montana, the Dakotas, Minnesota, Nebraska, and other Western States are threatened.

This money should be made available for use by Secretary Wallace to meet this situation if and when it arrives. I introduced a joint resolution last Friday, providing for an appropriation of $20,000 to meet the Kansas situation at once. These producers are small farmers and depend upon their gardens for a livelihood. The failure of their gardens on this land of the Kaw bottoms would mean destitution for hundreds of families who operate these truck farms. Congress has the power to aid these people, and it is comparatively a simple matter to kill these pests with poison bait; but the producers cannot themselves furnish the poison bait. The Government in exterminating the pests there at Kansas City will prevent the spread and propagation upon wider areas.

Mr. HOUSTON. Mr. Chairman, will the gentleman yield?

Mr. GUYER. I yield.

Mr. HOUSTON. I will agree with the gentleman and support his bill if he will include therein the eradication of the bindweed.

Mr. GUYER. They have remedies for the bindweed. It is a terrible thing and it is becoming a great scourge.

Mr. SIROVICH. Mr. Chairman, will the gentleman yield?

Mr. GUYER. I yield.

Mr. SIROVICH. What is the chemical formula of the poison bait?

Mr. GUYER. It is bran, sorghum, and paris green. I have used it myself on my alfalfa fields, and it is absolutely effective. It requires about 50 pounds to the acre.

Mr. SIROVICH. Does it not poison other animals?

Mr. GUYER. No; it does not. It is so thinly distributed and so little arsenic in it that no domestic animal would be injured by it. It probably might poison birds if they would get enough of it, which is very doubtful.

Mr. MEAD. Mr. Chairman, will the gentleman yield?

Mr. GUYER. I yield.

Mr. MEAD. Is it not possible, in view of the fact that this is a small project, involving the expenditure of only $20,000, that it might be taken care of by some existing agency? For example, the W. P. A.?

Mr. GUYER. W. P. A. requires that 90 percent of it shall be spent for labor. That would not be the case here. We went all over that.

Mr. MEAD. Is there not any possible relief from the State of Kansas itself, through the Governor or through existing laws?

Mr. GUYER. I think possibly there might be, though I know nothing about that. There probably will be, but that remains to be seen.

Mr. RANSLEY. Mr. Speaker, I yield the balance of my time to the gentleman from Alabama [Mr. HILL].

Mr. HILL of Alabama. Mr. Speaker, I deem this measure one of the most important that has come before this Congress. We must confess that the old day is gone, and with the passing of the old day we have witnessed the passing of the old systems. One reason we find ourselves at this hour in the throes of the depression is the fact that some years ago we did not have the vision to see that the old systems were passing and that with new, scientific methods and modern technology they had to go. Not recognizing these facts, we failed to educate and to prepare our people for the new, scientific, technological day in which we live.

Mr. Speaker, the bill under consideration would provide funds for education in agriculture, for education in the industries and the trades, and for education in home economics. The farm population of this country has increased during the depression by some 20 or 30 percent. Thousands of men who went into our cities to work in the shops and industries have been forced back on the farms. These men have got to be educated and trained through vocational education to make their own livelihood. In the cities we find millions of men walking the streets, thrown out of jobs on account of machines. These unemployed have got to be trained for new vocations and new trades.

We have been spending billions of dollars for relief to the unemployed and those in distress. Why should we not today authorize the appropriation of $12,000,000 in an effort to get at least some of these people back to work? The good American citizen does not want relief, does not want a dole; what he wants is the opportunity to make his own livelihood. While we are spending billions of dollars on relief we ought to be able to spend $12,000,000 to help train and educate these people to make their own living.

It is conservatively estimated that there are in this country today at least 6,000,000 people who would take advantage of vocational education if they only had the opportunity. There are some 9,300 rural schoolhouses scattered throughout the country that want and need to offer courses in vocational education, and which would do so if they could only get the funds necessary to carry on the work.

The record shows that under the vocational-education program 80,000 farm boys, that is, future farmers of America, have taken vocational agricultural courses and have participated in the rehabilitation and readjustment of their farm family problems. Boys and girls, in city and in country, have

been training and preparing themselves to earn their daily bread and to play their part as citizens and in the work of the world.

Mr. GREENWOOD. Mr. Speaker, I yield 1 minute to the gentleman from Alabama.

Mr. HILL of Alabama. Of the thousands and hundreds of thousands of dollars the Federal Government has expended during these latter years in the State of Alabama, nothing has done more for our people, nothing has proved more beneficial than the help given in vocational education under the wise and able leadership of Dr. J. B. Hobdy of our State department of education. Through our vocational-education program we are helping the men and women of Alabama to find themselves, to readjust themselves, to see and to obey the economic traffic lights; and we are helping them to come back and to earn their own livelihood. Let us appropriate the $12,000,000, for "where there is no vision the people perish." [Applause.]

[Here the gavel fell.]

Mr. GREENWOOD. Mr. Speaker, I yield the balance of my time to the gentleman from Georgia [Mr. DEEN].

Mr. DEEN. Mr. Speaker, it is impossible to give a history of the legislation in this brief time, but I do want to call the attention of the House to a few facts. The pending bill, H. R. 12120, was considered by the Committee on Education of the House in its original form as the bill H. R. 10190. The committee held hearings for 2 or 3 days; and it is illuminating and interesting to read the hearings and to find that in one community in the State of Arkansas last year it was testified to by a representative of vocational training in Arkansas that 250 beef cattle were canned in that given community, and 50,000 pounds of fruits and vegetables were canned in a vocational training school and community, and that not a person in that community had been on relief at any time in the past 3 or 4 years. It was also testified to by a representative of vocational education from my own State that in one of the communities in Georgia last year a sufficient amount of fruits, vegetables, and meats were canned and preserved to take care of the people during the winter, and that not a person in that community had been on relief any time since 1933. This is due to the work of vocational training and vocational education.

It was interesting to me to note that in the hearings it was developed that there are approximately 8,000,000 people in the United States today who would like to have training in vocational education, either in agriculture, or in the trades and industries, or in home economics.

I call the attention of the Members to pages 24 and 25 of the hearings, where is shown the distribution of the vocational-education funds supplied under both the George-Elizey Act and the Smith-Hughes Act. It will be found that one-third of the money has gone to vocational training in agriculture, one-third to vocational training in the trades and industries, and one-third to training in home economics.

I call the attention of the House also to page 60 of the hearings, to a statement by Mr. Wright, a representative of the vocational-education office in Washington. When the chairman asked if there were any further questions Mr. Wright said:

> I might add one statement, Mr. Chairman, and that is that the States spent, up until this past year, 1935, $3 of their own money for every dollar of Federal money.

Mr. Speaker, as I say, the pending bill (H. R. 12120) originally was H. R. 10190, the bill considered by the committee, and identical with Senate bill S. 2883, which has passed the Senate. I hope the membership of the committee and of the House will at the proper point substitute the Senate bill for my bill. [Applause.] I have no pride in authorship, but I am concerned about the destinies of 8,000,000 to 10,000,000 people who are on our hands but who want to get on their own feet. The only way to get them off the hands of the taxpayers is to put them on their own feet and the best way of getting people off of relief and keeping them off is to give them some training in a profession or business that will enable them to make a living. No American with pride, and most of them have pride, wants to be on relief. They want work and they are entitled to it.

Mr. Speaker, at the proper time, when the Senate bill is offered as a substitute for my bill, I hope that the House will adopt it.

Mr. BEITER. Will the gentleman yield?

Mr. DEEN. I yield to the gentleman from New York.

Mr. BEITER. The gentleman has given some very illuminating figures and I want to point out some interesting figures, also. Out of 6,217 who will graduate from the public elementary schools of Buffalo this June, some 2,259 have signified their intention of taking up this vocational work.

Mr. DEEN. I thank the gentleman.

Mr. MILLARD. Will the gentleman yield?

Mr. DEEN. I yield to the gentleman from New York.

Mr. MILLARD. What is included in home economics?

Mr. DEEN. Does the gentleman mean what is meant by home economics?

Mr. MILLARD. Yes.

Mr. DEEN. The canning of fruits, vegetables, and so forth; teaching of sewing, cooking, and so forth.

Mr. Speaker, I want the Members of the House to note this, and I am sure they are entitled to the information. The Committee on Education of the House after several executive sessions reported my bill which calls for an appropriation of $6,000,000 for each of the 3 years beginning on July 1, 1937, and including $6,000,000 for each of the fiscal years 1938 and 1939. It was in the form of a compromise bill. I did not vote for the $6,000,000. I did not vote for my bill. I wanted $12,000,000, the same as is provided for by the Senate bill, and I believe my colleagues on the committee know that. I am not bound to any other agreement by anyone in committee, and neither is anyone else bound. [Applause.]

[Here the gavel fell.]

Mr. GREENWOOD. Mr. Speaker, I move the previous question on the adoption of the resolution.

The previous question was ordered.

The resolution was agreed to.

THE LATE RANDOLPH PERKINS

The SPEAKER. The Chair wishes to state to the Members of the House that the name of the gentleman from New Jersey [Mr. KENNEY] was inadvertently omitted as a member of the committee appointed to attend the funeral of our deceased colleague the gentleman from New Jersey [Mr. PERKINS]. The Chair now announces the appointment of the gentleman from New Jersey [Mr. KENNEY] as a Member of the committee in addition to the members already named.

EXTENSION OF REMARKS

Mr. BLANTON. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD and to quote therein the evidence of Mr. Hazen and Mr. Parker.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

THE YOUTH PROBLEM IN CRIME

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD and to include therein a speech made by Edgar Hoover to the Boys' Club in Philadelphia.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, under leave to extend my remarks, I insert the following address by John Edgar Hoover, Director, Federal Bureau of Investigation, United States Department of Justice, before the Thirtieth Annual Convention of the Boys' Club of America, Philadelphia, Pa., 9:15 p. m., May 20, 1936. This speech should be read to or read by every boy and girl in America. It should also be read by every father and mother.

> In appearing before you, the patrons and supporters of the Boys' Clubs of America, I hope that I am addressing the entire country. The problems of youth in crime which I shall discuss are not limited to sectional or local boundaries—they reach from border to border and coast to coast. They disclose a malign threat over every

home in this Nation. They reveal a tremendous responsibility which should be undertaken by our every citizen. They are the problems which confront us because of the awful fact that a great part of today's crime is committed by our youth.

WHY CHILDREN COMMIT CRIMES

We have youth in crime because we have failed to provide youth with proper outlets and upbringing. Only in the rarest instances of diseased minds can we say that the first offender commits crimes out of sheer antisocial sentiments. Children are driven to crime because of deep-laid faults in society such as poverty, degeneracy, and because their elders neglect them.

When youth commits a crime, generally it is because older persons have committed a greater crime; it is because of laxity in early discipline; because of apathy on the part of parents and neglect by those of the community who should help the helpless; because of distorted views held by those who should know better and who have allowed adolescent minds to take a downward direction which can lead only to destruction.

TWENTY PERCENT OF CRIME COMMITTED BY THOSE UNDER VOTING AGE

Today, as you know, 20 percent of our crime is the work of persons who have not yet even reached the voting age. This means that one-fifth of all murders, of arson, thievery, robbery, and the other malignant outrages against our commonwealth are committed by persons of immature bodies and immature minds, persons who should be reaching the threshold of useful life. However, this 20 percent falls tragically short of the ideal of American citizenship. It is not a pleasant picture. It is not a healthful outlook. It is not a normal condition when a nation such as America must bow under the disgrace of a set of circumstances in which one-fifth of our most deadly outlaws, our murderers, our machine-gunning desperadoes, are little beyond childhood. It becomes incumbent upon all of us, therefore, to recognize and admit the causes for such scandalous conditions, and, reaching beyond, to search for the means by which they may be remedied.

CAUSE OF DISRESPECT FOR LAW

I believe that a prime factor in the disregard by youth for law lies in an equal or greater disrespect for law and order on the part of the adult of our generation. Seek to evade it though you may; seek to apologize; seek to excuse yourselves; nevertheless, upon the shoulders of grown-up America rests the burden for this condition. You may allege that youth has made a hero of the gangster. I insist that no youth ever developed a heroic ideal that was not first centered about his father or his mother, and when the youngster begins to show disrespect of law and order you can be sure that he learned something of that attitude at home or because those in his home failed to keep him in the right company and isolated from bad examples.

BOILING POT OF UNDERWORLD

I have only to look at the stack of mail upon my desk since the capture of Alvin Karpis, Harry Campbell, William Mahan, and Thomas H. Robinson, Jr., to realize that these blots of scum from the boiling pot of the underworld were looked upon by many persons as worthy of emulation. These correspondents express sorrow for the "poor" kidnapers, and regret that they must be placed behind bars. This is what usually happens when the Federal Bureau of Investigation eradicates what I prefer to call not "public enemies" but "public rats." Each of them has his audience like a motion-picture star; each of them has his public; each of them has his great gathering of sentimental yammerheads, who utter remonstrances at his apprehension and detection. So long as that asinine behavior continues, I insist that the crime problem, as affects youth today, is also a crime problem involving the moronic adults of this country, who, through ill-considered actions and idiotic idolatry of cowardly outlaws, develop an ever-increasing tendency toward crime by the youth of America.

COMBAT INHERENT CRIMINAL WORSHIP

Our first problem, therefore, is to change this mistaken attitude; to carry on a campaign of education through which the unthinking American shall be forced to realize his disgrace in looking upon men of desperate crime as anything other than what they really are—the lowest dregs of society. This can be accomplished. Indeed, I take pleasure in informing you that while thousands expressed sorrow at the eradication of Dillinger, only hundreds lamented the capture of Alvin Karpis or Campbell or Mahan or Robinson. Our job is to steadily reduce that number until such maudlin sentiment is nonexistent. Once this is done, we truly can throw our every effort into keeping boys and girls out of jail. We must work with a dual purpose, never failing to realize that while we combat the growth of criminal instincts in youth, we also must combat the inherent criminal worship in many of our men and women.

BUILDING NEW VIEWPOINT

We of the Federal Bureau of Investigation are constantly working toward not only the capture and conviction of the enemies of society, but toward the building of a new viewpoint which we hope will result in fewer violators of the law. It was toward this end that sometime ago, with the assistance of the law-enforcement agencies of America, we began the compilation of crime statistics, not as mere figures, but as guideposts in our endeavor to combat the degradation of otherwise good citizens. We have no desire to be known solely as hunters of men; we would much rather be looked upon as preventers of crime.

PRIDE IN HONESTY RATHER THAN WORSHIP FOR GANGSTER

Behind the spectacular efforts of the Bureau in its necessary campaigns against the more desperate of our outlaws lies the never-failing desire to build a barrier between the law and its violation. We have no happier days in the Federal Bureau of Investigation than when vast throngs of boys under the guidance of friendly special agents are taken through the big building and are shown how we operate. We hope our young visitors will take pride in honesty rather than worship for the gangster thereafter. We hope to see the day when every law-enforcement officer in America will realize that the best weapon against crime is a feeling of confidence and friendship upon the part of every boy and girl in his neighborhood.

SPECIAL AGENTS CAREFULLY SELECTED

It is our ideal to possess in the 37 nationally distributed field divisions of the Federal Bureau of Investigation a type of special agent whose history has been traced almost from babyhood to assure us that he is an upright, honest, courageous citizen. We are gratified that our files contain numerous letters from boys throughout America who want to so live that they, upon reaching maturity, can fulfill these obligations and become candidates for positions in this organization. I earnestly hope that the time will come when every local law-enforcement agency in America can arouse the same ambition in the boys of its community.

GROWTH OF CRIMINAL TRACED

Now, let us try to trace the growth of a criminal. True, there are instances where the following conditions do not apply. Their divergence, however, only proves the rule. All too often we find that the 18-, the 19-, the 20-year-old offender has come from a family where selfishness is predominant. It may take the form of incompatibility leading to the divorce of the parents. It may be that parents are concerned only with their own pleasures, leaving the youth to drift as he will. Or it may be that they are poverty-ridden, ignorant people, not realizing their responsibilities. No matter what the foundation may be, it is almost inevitable that the attitude of the parents has a great bearing upon the future of the young criminal. We find that he has mixed with street-corner gangs at an age when his every attention should have been upon the furtherance of his education. We find, for instance, that practically every one of these public rats—"Baby Face" Nelson, John Dillinger, Alvin Karpis, "Pretty Boy" Floyd, and numerous others—started their career of crime when they were little more than children, reared in neglect and poverty. We find them engaged in petty thefts, stealing tires from automobiles, acting as runners and delivery boys for bootleggers, engaging in robberies with older men at such ages as 14, and 15, and 16, a time at which, in the older and more conservative days of America, parents were accustomed to hold serious talks with their boys about their future, instilling into their immature and pliable minds the desire for honorable careers, for achievement, for accomplishment, for a future of honesty and worth-while endeavor. But these boy criminals and thousands upon thousands of others like them were allowed to drift.

Without remonstrance, they were permitted to gather in surroundings and companionships which bore no other possible future than that of outlawry. The saloon, the tavern, the pool hall, the gang at the corner, were places prohibited to the average youth, and infraction of these rules received well-deserved punishment. The sentimental theorists who dominate present-day child guidance, however, believe that if a child is chastised, it may develop an inhibition or affect its later self-expression. So long as we fail to recognize that discipline is an essential part of human development, just so long will we have an aimless, directionless milling of the herd which can result only in mental panic and a thorough disregard for the rights of society to peace and order.

RESURRECT STANDARD OF DISCIPLINE

It is time for America to resurrect that standard of discipline which did much to give this country its rugged, stalwart honesty of purpose, its determination, its achievements. I refer to that parental discipline and guidance which did so much to create law-abiding, successful, and forward-looking citizens. Today, however, that old-fashioned standard has been transformed into the wine card of the cocktail bar; into the sapient belief that an immature mind can be granted utter freedom of action without disastrous results. Its lesson has been supplanted by the dangerous one of the roadside tavern, the parked automobile upon a lonely road, by the constant apathy-engendered desire to have everything which youth wants, inevitably leading to a desire on the part of youth to get what it wants by fair means or foul.

I hope you look upon me as old-fashioned in the enunciation of such beliefs. I much rather would be old-fashioned than to have upon my conscience the knowledge that some boy or some girl is condemned for year after year to live in the fetid atmosphere of a prison cell block, identity destroyed, future forever marred, possibility of good citizenship severely blighted.

MUST CONVINCE YOUTHS WHY CRIME DOES NOT PAY

Therefore, to return to our young criminal, we find that our youth has been handicapped from the beginning—that he had a bad start for which he is not responsible. If we try to tell youth today that crime does not pay, we are confronted with the question of why it does not pay. If we answer that the price of crime is prison, youth answers that it is easy to get probation, a pardon, or a parole. Youth, in spite of all its imagination, is literal. Youth is factual. Youth possesses a certain clarity of vision which often is lost in the more mature mind. One child in a neighborhood, who has learned the fallacy of our all too often maladministered

law enforcement, can become a professor of law evasion for a hundred other neophytes in crime.

Do not for a moment think that youth today knows nothing of the tricks by which it can avoid punishment. You must remember that civilization as it exists today is in direct conflict with the guiding impulses in the days of the cave men. Law as such is an artificial barrier reared by society for the protection of all against individual desires for the gratification of greed. Once we fail to teach reverence for these laws from infancy onward, and the reason for them, then indeed have we a recalcitrant and rebellious being whose very instinct inclines him toward crime.

FROM REFORM SCHOOL TO PENITENTIARY

So what happens when youth, hampered by a lack of parental guidance, indulges in his first infraction? He receives the benefit of that most necessary and most laudatory system, known as probation. It is right that he should have probation. It is a crime for any child upon his first offense to be incarcerated without a chance to reform, always excepting the very rare antisocial degenerate. But under our maladministered system, we find that often the probation officer is ignorant; that he sometimes is himself a criminal; or that he is merely a political panderer willing to debauch the most sacred of tasks—that of the protection of our youth—merely to keep a job.

And so in this modern pilgrim's progress toward the inevitable slough of despond, we find our child criminal sunk deeper and deeper, first through poorly administered probation, then into reform schools which are not reform schools but crucibles wherein boil the worst instincts of humanity and where innocence vanishes and insolence takes its place. We find him educated, step by step, not in law obedience but in law avoidance. We find him traveling from the reform school to the reformatory, from the reformatory to the prison with rarely a thought toward his true reformation but always with the association of the vicious, the foul-minded, and the dangerous older criminal. At last he himself becomes a professor of crime, and he, like others, carries on his recruiting in an ever-widening circle which at last has brought us to the degrading position wherein each year in America 12,000 human beings—approximately one-fourth of those killed in battle during the World War—die by murder. Each year, the army of those who suffer from major crimes in the United States equals about one-third of the entire number of enlisted and drafted men who were summoned to protect America in the most crucial hour of our recent history—the World War.

POTENTIAL MURDERS AND VICTIMS

Furthermore, if our army of potential murderers and potential victims of murder were to be gathered into battalions and regiments, they would outnumber the peacetime Army and naval forces of the United States by more than 200,000. If our entire band of criminals who operate constantly throughout the United States and against whom the law-enforcement agents of America are engaged in endless battle were to be assembled in one municipality, it would be almost double the population of Philadelphia (1,950,961).

PRESENT-DAY CRIME PICTURE IN AMERICA

Take that thought with you as you drive along the streets of your home city. Think of what it would mean if block after block, traffic light after traffic light, boulevard after boulevard, office building after office building, residence section stretching into other residence sections and beyond that into suburbs; if all of these should be peopled by robbers, by thieves, by firebugs, rapists, desperadoes, and murderers. That is your present-day crime picture in America. Go further and remember that one-fifth of all of these—in every fifth house—would live some youth who should be looking forward to a life of accomplishment and worth-while purpose, but who is doomed to be nothing but prison fodder.

THE CRIMINAL ROAD TRAVELS DOWNWARD

What is the answer? The only answer can be that this condition constitutes a national crisis calling for a reawakening of our patriotic instincts. It demands that we give of our time; that we give of our energy; that we contribute our best thought and endeavor toward the wiping out of conditions by which such an emergency is created. It means that our children must be taught that adventure lies not along the road of violation but that there are adventures in honest endeavor—greater ones, laudable ones, happy ones.

They must be taught that there is only one road in the world of crime and that road travels downward to the swamps and morasses of suffering. They must be shown the true character of the criminal—that law infraction can lead only to disillusionment, to the weakening, physically and morally, of anyone who follows its teachings. They must be taught that a great career lies before them—more exciting than that of any criminal's life—the career of law enforcement. They must be urged to fight for honesty and the thought be instilled within them that they are crusaders; the volunteers in a new battle for American character and integrity. They must be inculcated with a new political economy—the economy of political honesty.

POLITICS SHOULD NOT BE ALLOWED TO INTERFERE WITH LAW ENFORCEMENT

I would like to say at this point that I am not a critic of our political system. Our country lives by that system. It has prospered by it. In the final analysis our greatest men—Washington, Jefferson, Lincoln, and all such national figures—were in politics. However, there is a sharp line of demarcation between the man in politics working always with America uppermost in his thoughts and the politician who thinks only about his job and cares not how he gets it. It is to this latter influence that much of today's crime problem can be traced.

The political hanger-on who wants a job as head of a police department for what he can get out of it, the crooked or ignorant vote getter, the legislator who impedes law enforcement for private or political reasons, the political parasite who for selfish ends wants to be a warden or a probation officer or a policeman or a detective or a guardian of paroled prisoners, is the type to which I refer. They are enemies of America and of every honest man in politics. They are bringing disrepute upon what should be the most laudable career to which any youth of America could aspire. These are the scuttling rats in the ship of politics, gnawing at its timbers, besmirching its ideals, and doing their utmost to wreck our system of government. Against them the many fine and honorable men who, at a personal sacrifice to themselves, have entered political careers are battling almost in vain. Why must this be so?

Do you believe for a moment that the honest men in politics willingly suffer the degradation which these parasites bring upon them? Quite the opposite. Yet time after time they must stand impotent and watch the very persons whom they despise go before the people with all sorts of fantastic and bombastic schemes and be enthusiastically reelected. I need not say that this statement does not refer to any party or any person. It refers to the American habit of enthusiasm for fine promise and failure to demand solid achievement from political self-seekers. You allow crooked people in your county, your city, and your community to come before you, often flaunting their crookedness, and you vote for them because they are shrewd, because they are clever, or because they know how to be good campaigners, and I submit that no elected crook ever willingly appointed an honest man. The same applies for the ignorant, for the mere office grabber, for the hanger-on, for the panderer, and the man who wants a political position only because it is a job.

Politics should not be concerned with jobs. It should be concerned wholly with principles and careers, and until we offer careers, until we have in Government men and women who have built their lives toward the honorable objective of serving their country in public positions, just so long will we have 12,000 murders a year, 1,500,000 major crimes, and an army of malefactors who could march by this building for days on end without once the end being sighted.

REAL MEN VERSUS DESPERATE CRIMINALS

In this connection I desire to draw a contrast—that of the achievements of boys' clubs under intelligent private direction and the lack of reformation accomplished by the average State institution. One turns out men; the other turns out more desperate criminals. Why is this so? The private institution often works with limited funds and against many obstacles; the State or community institution has heavy appropriations, full-time employees, large buildings, and expansive grounds, yet it can do little more than send forth graduates of crime, who are bound, in many instances, for that larger college known as the penitentiary. The answer is that private institutions are built with a desire for rehabilitation and accomplishment.

The community institution has fallen into the grasping hands of the renegades of our political system, too often diverted to personal ends. That's the word for which I have been seeking—the renegade—the traitor, the vile enemy in our political family which seeks to disrupt our institutions of government; who knifes from within; who has only selfish purposes; who is the antagonist of everything that is honorable in our present-day form of government. As such, he is a friend of crime and a barrier to law enforcement. In his constant undermining of the finer ideals of our political system he crawls into our court rooms; he assembles the crooked doctors to change the faces of our outlaws; he telephones the crooked lawyer to be on hand not only for the protection of the criminal but for the planning of the crime; he contacts the crooked aviator, the crooked shopkeeper, the crooked hotel and hideout owner, the criminal gunsmith, and every other member of that undercover army, the support by which crime lives, thrives, and plunders. He sneaks into our reformatories, into our probation system, into our prisons, always with one foul purpose—the realization of personal gain at the expense of the commonwealth. He encourages suspended sentences. He is in the lobby rooms of legislatures to fight against the passage of proper laws for the hampering of criminal activities. He is the whining pleader before the elected judge, who, all too often, must answer to his command that the proper process of law be set aside and a criminal walk free from the court room. This is the man whom every high-minded person in politics abhors. This is the man whom it is our duty as American citizens to eradicate from our political picture, so that the honest man who so often thanklessly strives in your behalf and under the cloud of ignominy may be given a free hand and encouragement in the battle for the sanctity of our political system.

CONSTANT CAMPAIGN AGAINST CRIME

Therefore your campaign as the friend of the boy and girl in crime must be a constant one. We must carry education into the home. We must follow it into the school. A knowledge of the ill effects of crime and the benefits of crime prevention should be required of every school teacher in America. What is the sense of spending hours in teaching our youth the history of America, when many of those boys and girls are doomed to recall that history while sitting in a dank prison cell? Teachers should spend more time

building the future of America, a future which can be made as clean, as high-minded, and as progressive as we, the people, desire it. We need a new viewpoint—not one of sentimentality, but of wise adjudication and administration. We need to know that the problem of crime is the problem of the family, and we need above all things to incessantly instill in the pliable mind of youth the unalterable fact that, seek as it will, try and twist and squirm though it may to beat society at the game of crime, it cannot win. To that end we must have adequate avenues of detection, swift apprehension, and certain punishment. This does not mean that law-enforcement officers are eager to reap a harvest of arrests and prison sentences. Instead the honest law-enforcement agencies of America are eager to see the day when anyone, youth or adult, faced with the temptation of crime, will be bolstered in his fight against it by the knowledge that if he commits this crime he will be punished. There is no country in the world which has the proper law enforcement that also has a real crime problem—the two cannot exist.

PAROLE PROBLEM

We must strike on all fronts, and particularly at the one which today is doing, perhaps, more than any other factor to undermine our national respect for law. I refer to that filth-encrusted scandal, the parole problem. I am not an opponent but an advocate of the wise, intelligent administration of the highly laudable theory of parole. However, I do object, and object most strenuously, to the administration of that system as it is administered in some of our States. Practically every special agent of the Federal Bureau of Investigation who has died on the field of battle against criminals has been sent to his death by a gun in the hands of a paroled convict. I object to the fact that of the 13,010 most desperate, vicious enemies of society listed in the identification files of the Federal Bureau of Investigation 3,734 of them have been touched by the magic wand of parole or pardon clemency. I equally protest against the fact that even the most honest advocates of the parole system have adopted an ostrichlike attitude in attempting to cover up atrocious defects.

Time after time we hear these men, to whom I give all credit for sincerity and honesty of purpose, insist that only a certain percent of parolees fail to live up to their promises. This is the group which brings about our secondary crimes. This is the group which heads our desperate gangs, which commits our kidnapings, our train robberies, our bank hold-ups, and our murders. These are postgraduates of outlawry and professors of crime. These are the select minority which the parole champions dispose of so glibly. These are the men who, like a prisoner in Florida, committed two murders, received clemency for each, then committed a double murder to show how much he was reformed. Or like the man in Montana, who, when paroled, kidnaped the daughter of his benefactor and carried her away to become a white-slave victim in a mountain cabin. Or the man in a Middle Western penitentiary who committed four murders, who was paroled four times, and then graduated into kidnaping. This group contains the John Dillingers, the "Baby Face" Nelsons, the "Pretty Boy" Floyds, and the Alvin Karpises and Barker boys, each of whom piled murder upon murder until he became a national menace.

Against this condition I protest with all the strength in my being, and I say that our penal system cannot come from behind the cloud of disgrace until the sentimentalists and convict-indulging theorists recognize the fact that every time they allow such men to go free upon the streets they are building an example to the youth of America that you can get away with crime; that you can beat our system of law enforcement. I appeal to you as representative citizens of America to fight this problem into the open and to insist that this dangerous policy be sweepingly and constructively changed.

WONDERFUL WORK OF BOYS' CLUBS

To those who loyally and enthusiastically support the boys' clubs of America may I address a few words of admiration and sincere appreciation for the wonderful work which they are accomplishing. The upbuilding of the morale of the youth of our country through these organizations is of inestimable value, not only to those directly benefiting by the operations of the boys' clubs but to each and every individual who loves his country and who is interested in its development and progress. The character and personality development which the boys' clubs of America accomplish will return manyfold gold dividends throughout the generations to come. I know of no greater work; I know of no better work; I know of no work better entitled to receive the enthusiastic support of every man and woman interested in law enforcement and our country's institutions.

DEVELOPMENT OF VOCATIONAL EDUCATION

Mr. PALMISANO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 12120) to provide for the further development of vocational education in the several States and Territories.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 12120, with Mr. ROBERTSON in the chair.

The Clerk read the title of the bill.

The first reading of the bill was dispensed with.

Mr. PALMISANO. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I am rather surprised that my colleague the gentleman from Georgia [Mr. DEEN] has taken the floor today and more or less repudiated the pending bill.

In connection with this matter I may say there were three votes taken in the committee. One vote was to appropriate or authorize $4,000,000, another to authorize $8,000,000, and the final vote was on the authorization of $6,000,000. There was no opposition to the bill, as the report shows. There has been no minority report filed.

Following the committee report, the gentleman from Georgia again introduced his bill in accordance with the report of the committee, which is H. R. 12120, now being considered by the House. The gentleman from Georgia then wrote the report of the committee, which speaks for itself.

Mr. COX. Will the gentleman yield?

Mr. PALMISANO. I yield to the gentleman from Georgia.

Mr. COX. I am sure the gentleman wishes to cast no unfavorable reflection upon my colleague, the author of this bill. The gentleman has expressed surprise at the attitude taken by the gentleman from Georgia [Mr. DEEN] in the consideration of the rule. May I ask the gentleman if he does not remember that the difference which has developed here today between the gentleman from Maryland [Mr. PALMISANO], chairman of the committee, and the author of the bill, and the gentleman from Georgia [Mr. DEEN] was brought out before the Rules Committee when a rule was requested?

Mr. PALMISANO. Yes.

Mr. COX. Therefore, the gentleman has known since that time at least or all along what the attitude of the gentleman from Georgia was.

Mr. PALMISANO. Not all along. From that time on. I may say that if the gentleman from Georgia [Mr. DEEN] entertained those views at that time he should have so stated to the committee and not appeared before the Rules Committee and conveyed to the Rules Committee an impression to which that committee was unanimously opposed.

I may say further that in my absence I designated the gentleman from Georgia to call the committee together so that a resolution could be prepared for presentation to the Rules Committee. The Members of the House will readily appreciate that if I knew the attitude of the gentleman from Georgia was contrary to what had been agreed to in the committee I certainly would not have permitted him to call the committee together and give him full sway.

Mr. DEEN. Will the gentleman yield?

Mr. PALMISANO. I yield to the gentleman from Georgia.

Mr. DEEN. May I ask the gentleman if he is not aware of the fact that in committee and during the hearings I contended all the way through, as the hearings will show, for my original bill which called for an appropriation of $12,000,000?

Mr. PALMISANO. Mr. Chairman, if the gentleman was not in agreement with the committee, he should have refused to sign the committee report, and he should have presented a minority report to the Members of the House stating that he was opposed to the action of the full committee, even though it opposed his own bill. He should have asked for a substitution of bills. I say when the members of the committee agree and there is not filed a minority report, the Members of the House should stand by the committee or else abolish all of the committees.

When we speak of the Senate bill, we should bear in mind that with all due respect to the Senate they held absolutely no hearings on the measure.

Mr. TARVER. Mr. Chairman, will the gentleman yield?

Mr. PALMISANO. In just a minute. I understand they held no hearings, while we held hearings for 3 days. We then considered the bill and did the best we possibly could under the circumstances, and the members of the committee knowing my views on the legislation came to me and said, "We understand your views, but notwithstanding your views on the legislation, you have been fair and honorable and have given a hearing to every member of the committee."

Mr. TARVER. Mr. Chairman, will the gentleman yield?

Mr. PALMISANO. Pardon me, let me finish my statement.

Let me now call your attention to another provision they are adding to the bill with respect to vocational teachers, if you please. They have introduced in the Senate bill a provision whereby they are going to educate the mayors and councilmen and the public officials of the various municipalities, and I say to you that if you adopt this provision of the Senate bill it is the duty of those same gentlemen to come here and teach the Members of the Congress what to do, because they are now going out and asking us to be permitted to teach men who have been elected by the people of their own towns and cities and, if you please, teach their own superior officers, because after all is said and done, if they are going to teach the mayor of New York City or the mayor of Baltimore or Cleveland, why not give them the same right to teach their own Governor, whom they happen to be subordinate to?

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. PALMISANO. Let me first finish this statement.

Let me refer to some of the testimony we heard, referring to Mr. Baumes, whose testimony appears at page 40 of the hearings. He is a gentleman from Virginia and happens to be one of the teachers in public service, and I am asking him a question:

The CHAIRMAN. If the heads of the various departments have had some technical education, should they not be able to instruct their men? Take, as an example, this head of the department of weights and measures that you mentioned; if he is well qualified, would he not be able to instruct his men accordingly?

Mr. BAUMES. You would think so, but we have found that that usually is not true, for several reasons.

Here is a man technically educated to conduct this particular business and here comes along an ordinary teacher who is going to tell him what to do.

Then at page 41, near the bottom of the page, the following occurred:

The CHAIRMAN. Then the teacher would get instructions from the head of the department and then, in turn—

Bear this in mind—

The teacher would educate.

Mr. BAUMES. Yes, sir; you are exactly right.

Is this Congress going to say to a man who is advocating vocational training that we are going to permit them to educate or instruct the mayors and the officials of the municipal governments throughout the State, and they, in turn, go to a particular man to get instruction and then in turn instruct the municipal agents? I say, Mr. Chairman, we are going too far on this proposition, and this is what will happen if we put in the provisions of the Senate bill.

[Here the gavel fell.]

Mr. PALMISANO. Mr. Chairman, I yield myself 5 more minutes.

Mr. WHITE. Will the gentleman tell us where that provision is in the Senate bill?

Mr. PALMISANO. Page 3, line 15, which states—

including public and other service occupations in such States and Territories.

The gentleman who spoke on this subject and whom I have just quoted is going to obtain his knowledge from the municipal employees, and then, in turn, he would convey it to others. I say, Mr. Chairman, we cannot accept a proposition of this kind.

I may say that on page 4 of the report filed by my colleague the gentleman from Georgia, at the top of the page, it is stated:

S. 2883 also contained the provision that training in public and other service occupations should be included in the amount allotted to trade and industrial subjects. The committee did not accept this provision.

This is the provision referred to by the gentleman whom I quoted from the hearings. I may say that I have not the time now to go over the hearings, but there is another provision here referred to by Mr. Baumes, where Mr. Baumes goes on to say that in Virginia they have been instructing the mayors and the city councilmen, who are elected by the people, and if this principle applies, why not let them instruct us? I think it would be proper and then they could instruct the Governor of a State, who, in turn, would be their superior officer. I submit we are going far afield on this whole proposition.

Mr. COX. Will the gentleman yield?

Mr. PALMISANO. I yield.

Mr. COX. The gentleman quoted from the bill and made some reference to something in the Senate bill that the House bill did not carry. I presume the gentleman referred to section 2 of the House bill.

Mr. PALMISANO. I am referring to the Senate bill, page 3, line 15, which includes a public-service corporation.

Mr. DONDERO. That is line 6, page 3.

Mr. COX. That is substantially the same as section 1 in the House bill. In other words, are not the two bills, the House bill and the Senate bill, substantially the same, except as to the amount of money to be allocated to the States, and so forth?

Mr. PALMISANO. No; that is not true. In the House bill we eliminate the public service and in the House bill we include section 6, which is not contained in the Senate bill.

There has been a lot of talk and criticism that the money has been used by boys for private gain. In order to prevent that we added section 6, which says:

SEC. 6. No part of the appropriations herein authorized shall be expended in industrial-plant training programs, except such industrial-plant training be bona-fide vocational training, and not a device to utilize the services of vocational trainees for private profit.

That provision is not in the Senate bill.

Mr. COX. That is correct. Section 6 of the Senate bill is substantially the same as section 5 of the House bill.

Mr. PALMISANO. The Senate bill, with the exception of the amount, is identically the same as the House bill, except section 6 of the House bill eliminates the public-service occupation.

[Here the gavel fell.]

Mr. PALMISANO. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. MORITZ].

Mr. MORITZ. Mr. Chairman and members of the Committee, I want to say a few words in relation to this bill. In the first place, I was one of the Members who voted for the $12,000,000. We lost that vote, but we compromised on $6,000,000. Now, in all frankness and fairness, inasmuch as we agreed to that, why should you try to substitute the Senate bill?

Subsequently it was brought to the attention of the committee that this appropriation was very important, because we found out that of all the money expended for relief, for getting the best returns, this money expended for vocational education gave us the best returns.

Mr. HOUSTON. Will the gentleman yield?

Mr. MORITZ. I yield.

Mr. HOUSTON. The gentleman says there was a compromise from $12,000,000 to $6,000,000. Does not the gentleman think that $12,000,000 would be more proper?

Mr. MORITZ. Yes; but we agreed on $6,000,000, and we ought to keep our agreement, because if we had not agreed to $6,000,000 we would not have gotten any bill.

Mr. DEEN. Will the gentleman yield?

Mr. MORITZ. I yield.

Mr. DEEN. The gentleman knows that I did not vote for the $12,000,000?

Mr. MORITZ. The gentleman knows that I voted for it, and we lost, and we voted for the compromise of $6,000,000.

Mr. DEEN. The gentleman knows that he voted for the $6,000,000.

Mr. MORITZ. Yes.

Mr. DEEN. And he knows that I did not vote for the $6,000,000?

Mr. MORITZ. I do not know about that.

Mr. DEEN. Well, I know it.

Mr. MORITZ. But, at any rate, of the money spent for relief, this has been the best investment we have, because it helps people to help themselves. We found out in States like Oklahoma and Texas that they are being taught how to provide and prepare food. When the Government ordered the cattle to be slaughtered, they were taught to can this meat,

and in that way they saved themselves from starvation. Furthermore, this activity in the school helps the youth of our country do something worth while, as against loafing around in a poolroom and idling their time away, and maybe getting into mischief, as often happens.

Mr. TERRY. And if the gentleman were not on the committee, then he would vote for the $12,000,000?

Mr. MORITZ. I believe I would; yes. I yield back the rest of my time.

Mr. CARTER. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. DONDERO].

Mr. DONDERO. Mr. Chairman, there has been considerable said here today about the difference between the Senate bill and the House bill. The Senate bill provides for permanent legislation authorizing $12,000,000 anuually. The House bill provides for $6,000,000 each year for 3 years. The Senate bill provides for a matching by the States up to 50 percent, until 1942, and then graduates that percentage up until it is 100 percent. The House bill provides the same as the Smith-Hughes bill, 100-percent matching by the States, or, dollar for dollar. The statement has been made on the floor this afternoon to the effect that the States contributed $3 for every dollar contributed by the Federal Government. I have here a letter dated March 14, 1936, signed by Mr. Wright, from the Bureau of Education, directed to me, in which he says that—

> To match this expenditure, which was $4,000,000 last year, from Federal money, as required by the basic Vocational Education Act, the States and Territories expended for the same purpose in this year ended June 30, 1935, the sum of $5,149,000, or $1.39 of State and local money for each dollar of Federal money expended.

I quote that simply to show that the States have matched dollar for dollar under the Smith-Hughes Act.

There is one provision in the Senate bill which goes so far that if adopted we will have men receiving their money from the Federal Treasury who have been taught how to sell gasoline, selling gasoline to you at the gas stations; you will have men in grocery stores and meat shops who have been taught by Federal money how to sell goods and merchandise over the counter. I believe it is more essential to place the buying power in the hands of the people to buy those commodities rather than to take Federal money to teach people how to sell them to the people who have no money with which to buy them. That is a vicious provision in the Senate bill which ought to be taken out, if the House adopts the Senate bill.

Mr. DEEN. Mr. Chairman, will the gentleman yield?

Mr. DONDERO. Yes.

Mr. DEEN. Let me ask the gentleman this question: He spoke about teachers teaching people how to sell meat and other products. Is it not a fact that when we came to Congress the Parliamentarian took mercy on us, and with the Federal salary that he receives, taught us some parliamentary law?

Mr. DONDERO. How far would my good friend from Georgia go? Would he use Federal money for the teaching of every human activity known to mankind?

Mr. DEEN. No; but I do not think it is fair to discriminate simply because a person works in a meat shop or in a 10-cent store. They ought to have the same opportunity as that given to other people in farm, factory, or school.

Mr. DONDERO. Does not the gentleman think they ought to be instructed by the people who employ them, rather than get money out of the Federal Treasury to teach them? Let me read one sentence from the testimony of Mr. Baumes, of Virginia, appearing at the bottom of page 40 of the hearings. He said:

> This thing is happening: That as we closed our last fire school in Richmond last summer the head of the bureau of weights and measures said to me, "You have just done something for the firemen of the State. Why can't you do it for the weights-and-measures men?"

The Senate bill would go so far as even to teach the weights-and-measures men of the various States, counties, cities, and towns of the United States how to weigh and how to test the scales—all to come out of the Federal Treasury. Why should not that be a part of the work of the States and not of the Federal Government?

Mr. COX. If the Senate amendment should be offered as a substitute for the House bill, the gentleman would then have an opportunity to offer an amendment to the amendment, that is, to the Senate bill offered as an amendment, to strike out the language in section 1 of the Senate bill which would authorize the objectionable activity to which the gentleman refers. I do not know that there would be any serious objection to that amendment.

Mr. DONDERO. Would the gentleman be willing to vote for that kind of an amendment to strike it out?

Mr. COX. Yes; I think I would.

[Here the gavel fell.]

Mr. CARTER. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, in the first place, I want to call the attention of the Committee to the fact that the appropriation made under the present act is not the only assistance that the Federal Government is giving for the purpose of vocational education. The Smith-Hughes Act, which is a continuing act and goes on from year to year, provides $7,382,000. In addition to that, there has been provided for the last 2 or 3 years under the George-Ellzey Act $3,184,000. The act that we are considering today has been referred to as the $6,000,000 per annum act. It actually provides $7,302,000 per annum, instead of $6,000,000. That $6,000,000 is the largest single item and is for one specific purpose.

I have always voted for vocational education bills. I have spoken for them here at various times before the membership of this House. I am just as strongly for vocational education today as I ever have been, and I am for this House bill. I regret that the distinguished gentleman from Georgia, my good friend for whom I have the highest regard and kindly personal feeling, has seen fit to desert the committee. I feel it my duty to stand by the committee. He was designated by this committee to report this bill. Here is the recommendation:

> Report favorably, with the recommendation that the bill do pass.

Mr. DEEN. Mr. Chairman, will the gentleman yield?

Mr. CARTER. In just a moment. I decline to yield at this time. I will yield to the gentleman later.

That is his statement. That is not my statement. For reasons that are amply sufficient to himself, I know not why, but all of a sudden he says, "Well, let us take the Senate. It has $12,000,000 in it. Let us take the Senate bill."

Now, I do not desire to be parsimonious about educational matters, but I do desire to stand for a bill that I think may be finally enacted into law.

The increase provided for in the present bill, which I am compelled to refer to as the Deen bill, although the gentleman from Georgia at the present time is disavowing it, over the George-Ellzey bill, and it is replacing the George-Ellzey bill, is $4,117,397 per annum. There has been talk that the vocational educational work ought to be extended and expanded. I say to you that I am for a program of that kind, but I do believe, when we are providing over $4,000,000 per annum for additional expansion work, that we are providing quite a generous sum. As those who have charge of this work extend it and if it is the desire of this House to extend it further in years to come, we can give them additional amounts.

I yield now to the gentleman from Georgia.

Mr. DEEN. The gentleman knows that this bill is only an authorization and that they can come back every year and get an appropriation. We are not paying them this money for the next 50 years. The gentleman knows that.

Mr. CARTER. I know that this is an authorization bill limited to 3 years, and that the sums authorized under this bill will be appropriated each and every year.

Mr. DEEN. Will the gentleman yield further?

Mr. CARTER. I yield for a brief question.

Mr. DEEN. The gentleman read the introduction to the report, "The Committee on Education, to whom was referred the bill", and so forth, "to provide for vocational education—

the committee having had the same under consideration report favorably with the recommendation that the bill do pass with the following amendments." The gentleman knows that the word "unanimous" is not in the report. Does not the gentleman know further that while I contended in the committee at every meeting, both at executive sessions and in the open hearings, for the $12,000,000, the gentleman from California fought it and bitterly opposed it all the way through?

Mr. CARTER. No. I did not oppose the $12,000,000 bitterly. I opposed it because I did not believe the President of the United States would sign a bill providing for that sum.

I think if we do want to increase this we ought to go at it in a sensible way. While we could make a reasonable increase, and have made a reasonable increase, I do not want to increase the amount to an extent that it would endanger the passage of the bill.

Mr. SNELL. Mr. Chairman, will the gentleman yield for a short question?

Mr. CARTER. I yield.

Mr. SNELL. What is the amount we are appropriating now for this same work?

Mr. CARTER. At the present time the Federal Government for this work is appropriating $10,701,603 per annum. That is, under all bills. That is for the United States, Hawaii, and Puerto Rico.

Mr. SIROVICH. Mr. Chairman, will the gentleman yield for a question?

Mr. CARTER. In just a moment. I may say to the gentleman from New York [Mr. SNELL] that that amount would be increased by something over $4,000,000 if the present House bill is enacted into law.

Mr. SNELL. Does the gentleman mean that it would make it over $14,000,000?

Mr. CARTER. Yes.

Mr. BIERMANN. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield.

Mr. BIERMANN. I wonder if I am correct in my understanding of these facts. The George-Elizey Act, which this bill is displacing, during the present year supplies $3,184,000?

Mr. CARTER. Three million, one hundred and eighty-four thousand dollars; yes.

Mr. BIERMANN. And the House, after quite a little hearing, more than doubled the amount.

Mr. CARTER. Yes.

Mr. BIERMANN. The Senate, without any hearing, seeks to quadruple it. Is that right?

Mr. CARTER. That is just about the situation. Without yielding further, I would like to say that I have endeavored to find out on what the Senate based its estimate of $12,000,000. There is not, so far as I can find, one sentence of a hearing anywhere to show why they increased the amount. One of the representatives of the Bureau of Education, Mr. Wright, appeared before the House committee and said in substance that he could not tell us anything because he did not have permission of the Bureau of the Budget, or somebody, to talk; and he never said one word about the Bureau of Education needing any additional amount.

[Here the gavel fell.]

Mr. CARTER. Mr. Chairman, I yield myself 2 additional minutes.

Mr. SIROVICH. Mr. Chairman, will my distinguished colleague yield for a question?

Mr. CARTER. I yield.

Mr. SIROVICH. As I understand the situation at the present time, the House bill provides that the States must match the money contributed by the Federal Government. Is that right?

Mr. CARTER. That is right.

Mr. SIROVICH. The Senate bill, on the other hand, does not make it mandatory for every State to match equally money contributed by the Federal Government because many of our Southern States are in a very frightful economic condition and cannot match funds. The Senate bill, therefore, would help these States in the emergency with which they are confronted at the present time. Am I correct?

Mr. CARTER. No. I think the gentleman is inferring that it treats some of the States in one manner and other States in another manner. This is not true. The Senate bill does not require 100-percent matching, but it does treat all States alike on a sliding-scale basis, the States matching I think at first 50 percent of what the Federal Government provides with gradual increases year by year until a full matching is reached. As I understand the Senate bill it applies equally to all the States and not just to certain States.

Mr. McCLELLAN. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield.

Mr. McCLELLAN. If I understood the statement made by members of the committee this afternoon correctly, taking the situation in the State of Arkansas as an illustration, which would be typical of the situation in other States, there are now pending over 200 applications from schools in that State which cannot be acted on favorably unless this additional appropriation is made.

Mr. CARTER. Mr. Chairman, I yielded for a question.

Mr. McCLELLAN. My question is: How many schools are there in the United States in a similar condition?

[Here the gavel fell.]

Mr. CARTER. Mr. Chairman, I yield myself 2 additional minutes.

Mr. McCLELLAN. I am trying to determine the extent of the need for this additional money. If that situation is true in Arkansas certainly it is true in other States.

Mr. CARTER. There is, no doubt, need in many of the States for additional work, and we are providing something over $4,000,000 for the next year for an expansion of the work.

Mr. BEITER. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield.

Mr. BEITER. The gentleman mentioned the President of the United States and wondered what he would do in the event the bill passed. Permit me to read an excerpt from a letter addressed by the President to the New York State Conference of Mayors.

Mr. CARTER. I do not yield for that letter. I do not know what it is about.

Mr. BEITER. I wish to read from it an excerpt giving the President's views on legislation of this kind.

Mr. CARTER. If the letter relates to this bill, I would like to hear it. If it does not relate to this bill, I cannot yield for the gentleman to read it.

Mr. BEITER. It relates to legislation of this type.

Mr. CARTER. I decline to yield at the present time.

[Here the gavel fell.]

Mr. PALMISANO. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia [Mr. TARVER].

Mr. TARVER. Mr. Chairman, I do not believe any Member of the House is more deeply interested in the subject of vocational education than I am. I know it is not a popular thing to oppose the largest amount that may be suggested for a cause of this kind.

Mr. Chairman, I am in favor of certain provisions of the Senate bill, but I think the gentlemen who have presented their case to the Committee of the Whole for the bill reported by the House committee have made the best argument for the House figure; and, so far as I am concerned, although I would like to see as much money as possible appropriated for this cause, it is my purpose to support the House figure of $6,000,000, although if the Senate figures are adopted, I shall not vote against the bill on that account. After all, when you double the amount which has been heretofore appropriated for a particular purpose at one stroke in a time of depression like this when we are having as much difficulty as we are in making Government expenditures and income meet, my colleagues, you have gone a long way, and the people of this country interested in vocational education ought to be satisfied.

I shall now address my remarks to a feature of the bill in which I am very much interested. The House committee apparently determined first that it ought to have a provision in the bill providing that 50 percent of the amount of the annual appropriation need not be matched by the States. I gather this from the fact that they originally considered the first bill introduced by Mr. DEEN. After considering it the committee worked out a draft of the bill which they had reintroduced, and in the reintroduced draft they included on the first page a proviso to the effect that 50 percent of the amount of the appropriation need not be matched. This was evidently based upon the idea that they were adding $3,000,000 to the $3,000,000 which had theretofore been authorized, and that since the States had apparently experienced great difficulty in matching the $3,000,000 which was already available, they might not be able to match the additional $3,000,000, and for the 3 years to be covered by the terms of this bill the States should be relieved of matching the additional $3,000,000.

I felt that that provision was exceedingly wise, and I regret very much that the committee had recommended to the House that it be stricken from the bill by amendment, but, after all, it is a matter to be determined by the House as to whether it will accede to the judgment of the committee or not.

I have a particular reason for feeling that especially in times like these the matching requirement ought not to be made for a very liberal part of this appropriation. I notice in my own State, with regard to vocational agricultural instruction that the schools located in the districts which have the least property values and the least taxable resources get no help. The school districts are required, as you know, or at least they are in my State, to pay a part of the money required to match the Federal funds; therefore the school districts which have ample property values and ample taxable resources are able to put up the necessary money to help match the Federal funds and their boys receive education in vocational agriculture, while in the poorer sections where they are not able to raise by taxation the necessary money to match the Federal money, but where they need this aid fully as much if not more than in the other sections to which I have referred, they get no assistance whatever. It appears that it is like the part of the Scriptures which says: "To him that hath shall be given."

Mr. SIROVICH. How can we overcome this?

Mr. TARVER. We can overcome it by defeating the committee amendment which proposes to strike out the proviso requiring that 50 percent of this money shall be allocated without being matched by the States.

[Here the gavel fell.]

Mr. PALMISANO. Mr. Chairman, I yield 1 minute to the gentleman from Idaho [Mr. WHITE].

Mr. WHITE. Mr. Chairman, we know that there are a great many unemployed in this country, and we are very much concerned with the matter of appropriating sufficient money to take care of the unemployed. But what about the children of the unemployed? These children cannot follow the footsteps of the father. They must be trained in vocational education. They must be fitted to follow a useful pursuit and qualify themselves to do useful things. Many school districts cannot provide this education unless assisted by the Federal Government.

Mr. Chairman, let me quote the following from a letter which I have just received from the State director of vocational education in the State of Idaho, William Kerr:

> We sadly need the funds provided for under Senate bill 2883 so that we could reach a large number of out-of-school farm youth with Federal funds that do not require matching by local funds. School districts are glad and anxious to match these funds for farm boys attending high schools. The older boy who has finished high school or dropped out of school is even in better position to make use of vocational training, but local districts are not financially able just now to help in reaching this group.

Mr. Chairman, the provision in the Senate bill which we propose to substitute for the House bill that—

> One-half of the annual allotments for each field of work except teacher training would not have to be matched for a period of 6 years. There would be a gradual increase in State and local matching after that until 1948, when all the money would have to be matched—

will be of great assistance and vitally necessary to extract the benefits that are proposed by this legislative body to help fit the growth of my State to meet the responsibility of useful citizenship. The farm organizations of Idaho are particularly interested in this legislation and are giving close attention to the deliberations of Congress in considering this measure as evinced by a number of communications received. For the information of the Members, I shall read a letter from the Kimberly Grange:

> KIMBERLY, IDAHO, *April 30, 1936.*
>
> Congressman COMPTON I. WHITE,
> *Washington, D. C.*
>
> DEAR MR. WHITE: We, the members of Kimberly Grange, No. 230, Kimberly, Idaho, most heartily endorse Senate bill 2883 and would ask that you use your influence to further this measure.
>
> We feel that the permanent authorization of additional funds will be of great assistance to enlarge and increase the program for the out-of-school group.
>
> There are a number of young people in this community, ranging in ages from 18 to 25 years, who are not being reached by the limited funds now available who would be benefited immensely by the passage of Senate bill 2883.
>
> Thanking you, we are,
> KIMBERLY GRANGE, No. 230, KIMBERLY, IDAHO,
> C. ROY HAVERLAND, *Secretary.*

Mr. PALMISANO. Mr. Chairman, I yield 1 minute to the gentleman from New York [Mr. BEITER].

Mr. BEITER. Mr. Chairman, the gentleman from California refused to yield to me so that I could make the President's position clear in connection with legislation of this type. May I read an excerpt from a letter signed by the President, as follows:

> It has indeed been gratifying to note the splendid progress made by the State of New York in the training of municipal officials, particularly the police and firemen. There can be no doubt that training produces efficiency and I am glad that the division of State police has been able to cooperate closely with your organization in the promotion of this splendid educational movement.
> FRANKLIN D. ROOSEVELT.

Mr. Chairman, the demand for vocational education in the State of New York at the present time is far above the financial ability of the State of New York and the various communities within the State, and without the assistance of funds which may be made available by the passage of this bill the situation will constitute a serious emergency.

I have letters and telegrams in my files from principals of the Girls Vocational High School, the Seneca Vocational High School, the McKinley Vocational High School, the Peckham Vocational High School, the Technical High School, the Burgard Vocational High School, all of Buffalo, N. Y., and the supervisor of vocational education, city of Buffalo, and treasurer, New York State Vocational Association, all endorsing Senate bill 2883 and recommending that the House bill be amended in accordance with the Senate bill, or that the Senate bill be substituted for H. R. 12120 in the House.

The demand for vocational education service in the State of New York at the present time is so far above the financial ability of the State of New York and various communities within the State that without the assistance of funds that could be made available by the passage of this bill the situation will constitute nothing less than a serious emergency. Out of 6,217 pupils graduating from the public elementary schools this June in Buffalo, N. Y., 2,259 have declared their intention to enter vocational high schools. This does not include a proportionate expected demand from the parochial school system. It is impossible to provide the training they request under present conditions.

Buffalo is in great need of all the possible funds to come from the Senate bill. A tremendous increase in enrollment in the vocational schools is indicated and seriously curtailed educational budgets make increased Federal assistance absolutely necessary.

The Senate bill is endorsed by the Conference of Mayors and Other Municipal Officials of the State of New York and 5,000 cities, villages, and towns, represented in the American

Municipal Association, the National Federation of Thirty-six State Leagues of Municipalities, have gone on record favoring the measure. It is also supported by the American Vocational Association and leading educators and municipal officials throughout the country. The Municipal Training Institute of New York and the New York State Association of Towns have gone on record favoring the adoption of the Senate bill, which passed the upper House without a dissenting vote.

Cities, villages, and towns of the United States, acting through their State leagues of municipalities, have since 1928 operated training schools for more than 50,000 officials in the service of these municipalities. These schools, which constitute vocational education in the field of public employment, have become indispensable to the efficient administration of municipal affairs. One authority has said tranchantly that "they have put the breath of life into the dry bones of civil service."

The cities and first- and second-class villages of New York State, acting through their official association, the New York State Conference of Mayors and Other Municipal Officials, have since 1928 operated training schools for more than 33,000 municipal officials. The schools have won the unanimous endorsement and support of all mayors and other municipal officials in the State. The board of regents of the University of State of New York has recognized the standing and significance of the schoods by creating an educational corporation of municipal officials to operate them. Many officials and authorities consider them to be one of the most hopeful signs for permanent improvement in future municipal government.

A bill by Senator GEORGE, S. 2883, makes available to the several States, funds for the further development of vocational education. The bill provides that a portion of such funds may be expended for the vocational training of those in public and other service occupations. If enacted into law, this bill will enable municipalities of the Nation, after appropriate Federal and State action, and through State departments of education, to share in such funds for the operation, by their official organizations, of in-service training schools for municipal officials. It should be emphasized that this training is now being accomplished at a very modest cost, and that any Federal funds utilized would be small in amount. The exact nature of the demand which might be expected can best be illustrated by citing the cost of the training program of the New York State Conference of Mayors, which has averaged annually about seventy-five hundred dollars. There is absolutely no need for the expenditure of large sums of money in such training work, because it can be done through the cooperative use of existing training facilities and resources in all levels of government.

S. 2883 has been favorably and unanimously by the Senate Committee on Agriculture and Forestry. However, the companion bill, H. R. 12120, by Congressman DEEN, has been reported by the House Education Committee with the elimination of provisions for the training of those in public and other service occupations. The municipalities of the country desire strongly that S. 2883, by Senator GEORGE, be passed rather than H. R. 12120, by Congressman DEEN. However, if a compromise is absolutely necessary as between the two bills, it is the desire of the municipalities of the country to retain in the bill, which is finally agreed upon, the phrase "including public and other service occupations", as this appears on page 3, line 15, of S. 2883, as reported by the Senate Committee (Calendar 1590). If H. R. 12120 is to be amended from the floor of the House, it is the earnest hope of the municipalities that a similar provision be inserted in the amended House bill.

S. 2883 is endorsed by the 5,000 cities, villages, and towns represented in the American Municipal Association, the national federation of 36 State leagues of municipalities. It is also supported by the American Vocational Association and leading educators and municipal officials throughout the country. In New York State the measure is favored by the Mayors' Conference, the Municipal Training Institute of New York State, the New York State Association of Towns, and educational authorities.

Perhaps the most striking endorsement of S. 2883 is found in recent action by the Governor, legislature, and educational authorities of the State of New York. By chapter 225 of the laws of 1936 of the State of New York, Governor Lehman, the legislature, and the board of regents of the University of the State of New York, have paved the way for the use of Federal vocational-education funds for the training of local-government officials. This statute enables cities and villages of the State, through the State Department of Education, to share in any Federal funds made available for the training of public officials by the Congress of the United States. It is the first State statute of its kind in the country.

Mr. PALMISANO. Mr. Chairman, I yield 1 minute to the gentleman from Ohio [Mr. FLETCHER].

Mr. FLETCHER. Mr. Chairman and Members of the Committee, it is my sincere belief that all Members of the Senate and the House who have carefully studied the provisions of this bill providing funds for vocational education are unanimous in the conviction that no money allocated by the Federal Government for any purpose is more certain to pay big dividends than is the money we are authorizing to be expended for vocational education.

Anyone who has had opportunity to judge the financial, social, economic, and intellectual results of vocational education, under the encouragement of the Federal Government, cannot fail to realize that no other type of education is more appreciated by the American people.

THE YOUNG PEOPLE ARE WATCHING US FROM THE GALLERIES

Today, as we are assembled here in the Halls of Congress, we have seen looking down upon us from the overcrowded galleries young men and women who have journeyed to the Nation's Capital from all parts of the country.

Many of these young people who are here on sightseeing tours under the guidance of their teachers have graduated from schools this year and are being sent out into the world to earn a living with a type of education for which, I regret to say, in too many cases, there is very little or no market.

BABSON ADVISES INVESTMENT IN SELF-IMPROVEMENT THAT ASSURES SELF-ADVANCEMENT

To succeed in life or in business in these modern times it is necessary to equip yourself with ideas and training which you can exchange for success.

To make money, under present conditions, you must equip yourself with ideas and training worth money.

Babson, the famous financial expert and investment counsellor, is right when he says, "The best investment is investment in yourself—in self-improvement that will assure you self-advancement."

Much of the high-school, college, and university education fails to equip young people with ideas which they can exchange for success, money, happiness, or anything else worth while.

Education that cannot be marketed, education the world does not need and does not want, is not of much value to the person who possesses it.

Education that leaves you where you are costs too much even if you get it for nothing.

The type of education for which we are now providing will equip thousands of students with ideas, training, knowledge they can exchange for greater success, increased earnings, and greater opportunity.

A LIFETIME INVESTMENT THAT PAYS BIG DIVIDENDS

A while ago this Congress authorized the building of two battleships at a cost of $104,000,000.

The amount of money authorized in this bill for the education of our citizens is only about $12,000,000.

A bomb, dropped from an airplane flying the skies or shot from a submarine plowing the seas, would wreck the two battleships costing one hundred and four million, and send them to the bottom of the sea. But the education purchased by hundreds of thousands of our young citizens at an investment of only twelve million, authorized in this measure, can-

not be destroyed. It will last throughout an entire lifetime and will draw interest and pay big cash dividends from the start.

THREEFOLD FUNCTION OF THE EDUCATION COMMITTEE IN THE UNITED STATES CONGRESS

Mr. Chairman, one of the functions of the Congressional Committee on Education, of which I have the privilege to be a member, is to assist in determining the responsibility of the United States Government to education insofar as Federal legislation is concerned.

Another function of our Education Committee of the United States Congress is to secure and interpret the new research findings relating to changing conditions in education throughout the Nation and to be guided by these facts in preparing legislative measures in the interest of education.

A third duty of the House and Senate Committee on Education is to formulate a practical, businesslike policy of Federal cooperation with the State for the purpose of meeting such serious emergencies as this one which now threatens the educational advantages of unprepared and unadjusted millions of people.

The threefold function of our Education Committee which I have just explained has never been exercised in behalf of any legislation for which there is greater need than there is for this legislation which our committee reports to the House today.

WITHOUT EDUCATION DEMOCRACY IS IMPOSSIBLE

Any recovery program, spending thousands of millions of dollars to open factory doors but leaving schoolhouse doors closed would likely be discredited by the parents of the Nation, who have the responsibility of training and educating the children who are to be the citizens of tomorrow.

We have every assurance of those in official position to speak with authority that under the New Deal of the Roosevelt administration education is assured a square deal.

PARENTS GOING BACK TO SCHOOL

It is a concern of legislators, as well as the concern of educators, that parents are going back to school today. Never before has there been such a demand for adult education, and this is a fact in which both State and National Governments have deep interest. This bill provides for new educational training for the parents as well as for the children.

All agree that the safety and perpetuity of democracy depends in a large degree upon the education of the citizenry, and that means the education of both the young and the old.

No nation can rise above the level of what its citizens think, and its citizens cannot think above the level of what they know.

When our citizens stop learning, our Nation will start dying.

ALL CONGRESSMEN AND SENATORS LEGISLATING FOR THE PEOPLE SHOULD BE EDUCATORS OF THE PEOPLE

Believing that legislators for the people should also be educators of the people in such subjects as economics, social and political science, and the processes of government, I have conducted a large number of educational forums throughout the United States in an effort to help unadjusted men and women make the most of themselves and get ahead in life.

This experience has given me an opportunity to study the results of vocational education of the type we are providing in this bill.

So great has been the response to these business, educational, and self-advancement forums which I have had the pleasure personally to conduct, under auspices of the Peoples' Traveling University Service, that in most cities large numbers of people were turned away, night after night, unable to find standing room in the packed auditoriums.

POPULARITY OF ADULT EDUCATION

Nowhere has there been a greater response than among the Ohio people at home, whom I have had the honor to represent in Congress, as was demonstrated in a series of these public meetings conducted previous to the second session of the Seventy-third Congress.

In several communities, in response to popular demand, it was necessary to repeat the same programs two and three times to accommodate those who were unable to get into the crowded building at previous forum sessions.

The response has always been the same from special professional, college, and university groups as that from groups composed of businessmen, wage earners, and the rank and file of men and women representing all walks of life.

POPULARIZING TECHNICAL SUBJECTS FOR PEOPLE WHO WANT TO BE MORE SUCCESSFUL

Further experiments were made to get the reactions of people to adult education on subjects usually conceded to be too abstract to popularize, but which can be made to yield information valuable to anyone ambitious to succeed in life.

As editor and publisher of a daily newspaper several years ago, I endeavored to learn the attitude of our newspaper readers toward adult education on such technical subjects as economics, sociology, psychology, dietetics, and so forth. To do this I conducted several forums as special educational features sponsored by my newspaper.

To assist in that part of this educational work, devoted to economics, sociology, and so forth, I engaged a noted authority, Attorney Lee Francis Lybarger, who had been highly recommended by my friend, Hon. Henry T. Rainey, distinguished Speaker of the National House of Representatives, who was himself one of America's foremost students of economic, political, and social questions.

This newspaper experiment in adult education proved to be one of the most popular as well as one of the most useful education features sponsored in all the many years I have been engaged in the newspaper business.

COMMENDED BY WARREN G. HARDING

The late President Warren G. Harding, with a number of his business and political friends, attended a number of our forums and commended them in the highest terms of appreciation.

These experiences I mention here in an effort to prove to my colleagues in Congress, the growing interest in adult, self-advancement type of education and to prove that the people, who no longer respond to the old political appeal, do very enthusiastically respond to the educational appeal which gives them a chance to ask questions and gain new facts so vitally essential to their intellectual equipment, if they are to keep abreast of the times in a rapidly changing world.

IT IS NEVER TOO LATE TO START MAKING OUR LIFE WHAT WE WANT IT TO BE

As a result of these personal experiments and humble efforts to open the doors of educational opportunity to larger numbers of people, I cannot help realizing how tragic it would be for this Congress to fail in giving approval to the bill under discussion. There can be no greater service than that of helping men and women to make the most of themselves at any age.

Its passage will give new hope and greater assurance of advancement for thousands of people in the years ahead. It will help people, regardless of age. It is never too late to start becoming what we might have been had we had a better chance in our earlier years.

Let no Member of this Congress underestimate the intellectual hunger of the radio-bored masses of people.

More men and more women are intellectually lonely today for the companionship of new ideas and new knowledge than ever before.

NEWTON D. BAKER WARNS SELF-SATISFIED MEN AND WOMEN THAT TO SUCCEED THEY MUST KEEP ON LEARNING

There is little hope for half-educated or self-satisfied people in these changing times.

Newton D. Baker, former Secretary of War, and frequently mentioned for the Presidency of the United States, says:

> The man who graduates from college or university today and stops learning tomorrow is uneducated the day after.

This legislation makes it possible for people to continue their education through all the years of their adulthood.

The report of President Hoover's special committee on recent economic, business, and employment changes should awaken from their lethargy the intellectually indifferent who are satisfied with the education they received in school or college, and cause them to realize the imperative necessity for making investment in new training, new knowledge, and new ideas, if they hope to survive and get ahead, socially, vocationally, or financially.

TODAY IT IS EITHER LEARN OR PERISH

We are living in a swiftly changing world where people whose knowledge is stale and incomplete cannot compete.

Even in the most prosperous times employers are compelled to drop from their pay rolls the self-satisfied men and women who have quit learning.

The wage earner who does not have a program for self-improvement and who is not investing in new education of some kind eventually becomes mentally rusty and is as much of a menace to the industry that employs him as the machines that are allowed to become rusty and in need of repair.

Job-destroying, labor-saving devices, with electric brains and fingers of steel are daily forcing unprepared thousands out onto the dangerous precipice of unemployment and business uncertainty to face a jobless future. Today it is either learn or perish.

OUTWITTING YOUR MIDDLE-AGE DEADLINE

The middle-age deadline employment policy is crowding countless numbers past 35 and 40 over the precipice of employment uncertainty, partly because of their own neglect to keep their personalities, their knowledge, and their training up to date.

One way for people to outwit the fatal middle-age deadline is by modernizing their minds.

No employer gives a hang how old you are if you have an idea that is worth something.

The door of opportunity is everywhere being slammed shut in the empty, dull faces of smug, contented people who think they know enough.

Life ends at 40 for those who do not keep abreast of the times. There is no middle-age deadline for men and women who have new training, new ideas, and new knowledge.

Unfortunately the last thing people invest in is new ideas, new training, and new knowledge. Too many minds are out-of-date, antique models 20 years behind the times.

YOUR GREATEST DANGER

Because of the astounding new inventions, increasing thousands of labor-saving machines, billion-dollar merger combines, overproduction, chain-store distribution, merciless new competition, the middle-age deadline employment policy, and other alarming revolutionary changes that are coming with terrifying swiftness, millions who have let their training and knowledge get out of date, must quickly prepare themselves to readjust their lives by equipping themselves with new facts and new self-improvement or face stark tragedy.

THERE IS NO TRAGEDY GREATER THAN THE TRAGEDY OF BEING UNPREPARED

The late President Calvin Coolidge pointed the way to those ambitious to advance themselves, when he said:

The chief hope of the average man today is in his mind.

Those who have been listening to the apostles of despair, prophesying dangerous years ahead, should take new hope in the more optimistic predictions of those educators, employers, and business leaders who state that the so-called 5 dangerous years ahead will bring more reward, more happiness, more new opportunities for money making to those who modernize their training, their knowledge, and their thinking than have been known in any similar 5-year period in the business history of America.

But this hope is only for those who prepare and get ready for the new opportunities that are coming.

At the last session of Congress, we authorized the spending of millions to aid the unemployed and justly so; but there has been little organized effort in behalf of the unemployable who lack training, and who, in spite of rapidly growing prosperity, will continue to remain unemployed unless they increase their earning ability by specialized education such as this bill provides.

NO GOVERNMENT CAN HELP PEOPLE WHO DO NOT HELP THEMSELVES

No matter how many billions of dollars the Government may spend to help people, yet much of the spending will be in vain unless people are encouraged to do something toward helping themselves by improving themselves.

No legislation, no government, can change the fundamental, basic law that to earn more it always will be necessary to learn more and be more.

The moment men and women stop learning that moment they begin slipping and no government on earth can do anything about that.

TO SUCCEED TODAY YOU MUST CREATE NEW CAUSES THAT RESULT IN SUCCESS—AND SELF-EDUCATION IS QUICKEST WAY TO DO IT

Individualism may give way to collectivism or to a variety of other "isms", but that will not change the fact that the individual, in the final analysis, will have to assume the responsibility of doing something for himself by following a program of self-development that will release and make usable his latent and often wasted ability.

Intellectual stagnation is probably the greatest calamity that can happen to a human being.

But intellectual stagnation, which handicaps people in getting jobs or holding jobs, will ever remain a matter under the exclusive control of the individual himself.

WHY DO SO MANY COLLEGE GRADUATES FAIL?

But, you ask, if more education is the means by which many of the unemployable can make themselves more certain of securing employment, then why are so many college and university graduates failures?

A part answer to that question is, our high schools, colleges, and universities, just like the railroads, banks, and most industries, have not been able to keep up with the new demands resulting from rapidly changing conditions and therefore have continued to graduate thousands annually equipped with obsolete education for which there is no demand and no market.

OVERSTUFFED MINDS

A "horse and buggy" education in an airplane world is one reason why so many college people fail.

Obsolescence in education is responsible for the graduating of overstuffed minds without trained thinking capacity, and the individual handicapped by a nonthinking mind has to be reeducated before he can be put on the pay roll at profit to himself or his employers. It is the thinking job that pays the biggest salary.

Stuffing a mind with so much that is of no use or which will soon be out of date and therefore, in a short time, have no value, does not make a thinking mind.

TO SUCCEED, STUDY SUCCESSFUL METHODS OF SUCCESSFUL MEN

Still another reason why so many college people fail in life, is that so many of their professors are failures, as they themselves frankly admit. Too many professors, upon whom students must rely for their education, have themselves never succeeded at anything; too much theory and not enough practical sense.

If you are planning to be a success in life, then it is highly important you learn from successful men the success methods by which they succeeded.

Merely because a man has a Ph. D. degree and a scholastic knowledge of the contents of books is no conclusive proof that he has either the capacity or the knowledge to educate students to be successful in life as it is lived today.

WHY MANY EDUCATORS AGREE WITH ARTHUR BRISBANE

Arthur Brisbane says:

Students who spend 4 years in college acquiring a technical education, which only a few ever will use afterwards, forfeit about 50 percent of their chance of attaining practical success in life by deducting from useful effort their 4 most important years.

Parking a mind on a college campus for 4 years does not educate it.

NEW METHODS IN ADULT EDUCATION

Chicago University, Columbia University, and many other leading universities of the country have done great work through their university extension courses in assisting people to acquire the additional margin of education necessary to increase their earning ability.

Those identified with the American Association for Adult Education, who recently held their annual convention in Washington, have done a great work in aiding people to secure the kind of knowledge necessary for their advancement.

Still another education service which makes available to adults in all walks of life a practical training that is original in that the facts are presented by the eye-learning methods almost exclusively, is the Peoples' Traveling University Service, to which I have personally devoted much time and money, in an effort to be of some slight service to men and women interested in self-education.

PICTURIZED KNOWLEDGE PUT INTO THE BRAIN THROUGH THE EYES

By means of hundreds of exhibits, stage demonstrations, and more than 2,000 colored financial and business charts, research findings of all kinds are simplified and so picturized by the Peoples' Traveling University Service, as to be easily understood and easily remembered.

By this eye-learning method new business facts from the Department of Commerce of the United States Government and other research bureaus of the Government are made practical and instantly usable to the thousands who have been eager to avail themselves of this training.

In an effort to make available to men and women of all ages and from all walks of life the researches in every field of science, this Peoples' University Service which, as previously stated, is a traveling university service, presents information in motion pictures, featuring the kind of knowledge which extensive surveys have shown most practical in aiding people to adjust themselves to changing business, employment, and economic conditions.

TO HELP MEN INCREASE THEIR EARNING ABILITY

A small fortune of thousands of dollars has been invested in the several tons of equipment necessary to present these unique educational programs.

The latest researches on advertising, salesmanship, personnel relations, business psychology, occupations, finance, and a wide variety of other subjects have been contributed by hundreds of business concerns and business leaders, philanthropic foundations, financial institutions, university research organizations, and prominent men and women in every vocational field.

All this vast storehouse of information is classified, organized, standardized, systemized, and put into the mind via the-eyeway-highway-to-the-brain method.

A LIFE PROGRAM FOR SELF-DEVELOPMENT

Not only do we bring the latest facts from every field of knowledge, including biology, psychology, finance, investment, economics, sociology, salesmanship, advertising, personnel relations, business, occupations, and so forth, but in addition to that, the Peoples University Service presents extensive information showing the various factors that decrease the earning power of the individual in over 3,000 occupations.

Self-study plans are provided and the students are shown how to organize a life program for continued self-education and self-development.

Sixty special-made trunks are used for shipping the business, scientific, educational exhibits and equipment used in presenting these modern business methods and personal advancement lessons featured by our Traveling University Service, which is the most extensive and the first service of its special kind in the field of adult education in this or any other country, so far as is known.

PEOPLES UNIVERSITY SERVICE MAKES LEARNING A PLEASURE

It is the purpose of educational service of this type to simplify some of the vast storehouse of technical knowledge heretofore available only to laboratory and academic technicians and make it understandable and usable for the man in the street.

My enthusiasm for this bill providing Federal aid in behalf of vocational education is very great because of having had opportunity to see with my own eyes how eager and hungry the masses of the people are for ideas, knowledge, training that will help them to be somebody and get somewhere in life.

PEOPLES UNIVERSITY SERVICE FORUMS APPEAL TO MEN AND WOMEN IN ALL WALKS OF LIFE

This business of adult education has been a sort of hobby of mine. For many years, I have devoted as much time as I could spare each year to this service which we call the Peoples University Service.

The Peoples University Service is a nonprofit service, but it has paid big dividends in happiness, friends, and the gratitude of more than a million two hundred thousand people in the United States and Canada who in 19 years have attended our business and self-advancement forums.

In our Peoples University Service forums have been bankers, doctors, lawyers, preachers, and men and women of all professions and vocations, including the public officials and Governors of several States. Sitting in the same audiences were laboring men, salesmen, clerks, stenographers, and people of every vocational interest and aptitude.

PEOPLE REALIZE THE HANDICAP OF AN OUT-OF-DATE MIND

This I mention to show that knowledge, training, or educational service designed to help the individual is universal in its appeal and is greatly needed.

If people were not interested in education, in self-improvement, in making the most of themselves, getting ahead, learning the new technique necessary to adjust themselves to changing conditions, then they would not crowd auditoriums in every city from coast to coast, as I have seen them do.

These personal experiences convince me that the Federal Government should hasten to join with the State governments to open the door of educational opportunity to the people of America as is being done by this legislation on which we are soon to vote. The amount of money we, as Members of Congress, are asked to authorize is an investment in happiness, in achievement, in citizenship, in opportunity for the masses of the people. There is little chance today for the man with an out-of-date mind.

EDUCATION BEYOND MONEY VALUE

The education, training, and information that will be made available to thousands under the provisions of this bill cannot be estimated in terms of dollars and cents alone. There are social, intellectual, spiritual values and intangible values that cannot be computed on any kind of adding machine. The contentment, the hope, the inspiration and aspiration, education, and training of the type we are providing in the bill before us comprise priceless values beyond computation.

PRESIDENT ROOSEVELT'S SPEECH

Most of us will admit that we can solve our old problems only by the application of new knowledge. In one of his great speeches to Congress, President Roosevelt said:

> Fear and worry, based on unknown danger, contribute to social unrest and economic demoralization.

This kind of vocational and adult education helps remove some of the fear and worry to which the President referred.

The proper kind of vocational and adult education gives people scientific information about themselves, about life, opportunity; encourages self-analysis, self-understanding, self-development, self-expression, and self-realization.

Self-education shows people how to develop their ability and market their ability to better advantage. Facts were presented to our committee showing how this kind of vocational education kept hundreds off relief rolls and enabled them to provide for themselves.

This type of education teaches people how to discover and develop their unused mental resources, how to train themselves for more effective business thinking and more effective

living, how to plan their future in line with a definite success goal, and how to advance themselves by the scientific method from where they are today to where they want to be in life tomorrow.

FREEING YOUR MIND FROM FEAR AND WORRY

This practical vocational and adult education does not deal in academic theories, but does deal in the kind of practical economic and business facts that enables men to free themselves from some of the fear and worry inspired by a sense of insecurity.

Educational agencies that aid men and women to adjust themselves happily to a changing world are doing something toward removing fear and worry, based on unknown danger, which contributes to the social unrest and economic demoralization.

This is the goal toward which President Roosevelt is directing the forces of the United States Government under his great constructive and fearless leadership.

The day President Roosevelt signs this bill providing for additional vocational education he will open the door of opportunity to grateful thousands in every State of the Union.

The President has been teaching the philosophy of the good neighbor. Before the eyes of the American people and the eyes of the world he has been living the philosophy of the good neighbor. By signing this vocational education bill the President will be demonstrating the philosophy of the good neighbor in a way that will increase for him the admiration and affection of every American citizen who appreciates his heroic, courageous leadership.

As individual self-improvement is the chief hope of the average man who wants to be successful, so is universal education the chief hope of democracy that wants to survive.

Mr. CARTER. Mr. Chairman, I yield 5 minutes to the gentleman from Nebraska [Mr. STEFAN].

Mr. STEFAN. Mr. Chairman, as a member of the Committee on Education of the House, I attended practically all of the hearings which were held on this particular legislation. The pending bill is a compromise. I supported the original Lee bill and the Deen bill. As a result of the compromise, and after a lot of deliberation and many hearings, we decided upon the bill now under consideration. I want to stand by my distinguished chairman in the remarks he made on the floor of the House today that this bill has been reported out of the committee unanimously by the membership of that committee. I have had letters from the State director of vocational education, my State; from the chairman of home economics; from the executive secretary of the League of Nebraska Municipalities, all of them agreeing as to the good results obtained by vocational education. This league wants to retain parts of the Senate bill. However, Mr. Chairman, there is no argument as to the good which vocational education has done in our country. Every member of the committee is for vocational education.

Mr. LEE of Oklahoma surrendered his bill to Mr. DEEN, of Georgia, because Mr. LEE was for vocational education. The majority of us got behind the Deen bill until we got into a sort of deadlock, and we decided on the $6,000,000 bill instead of the $12,000,000 bill. We wanted to reduce expenditures. Like my colleague the gentleman from Ohio [Mr. FLETCHER], I favored the original bill, but fearing we would have no bill at all, I joined the rest of the membership of the committee, believing that this bill would be the bill we would discuss today, and only when I arrived on the floor today did I learn there was going to be an attempt made to substitute the Senate bill for the House bill.

There are things in the Senate bill favored by people in my State which I approve of and am for, but if the Senate bill is substituted for the House bill without section 6 of of the House bill, which protects labor against the exploitation of those who are seeking slavery in our country, I say you are defeating the purpose of vocational education.

I hope every Member of this House will some time secure a copy of the confidential report brought to the Office of Education by representatives of labor and representatives of education, which indicates that public money has been used in exploiting slave labor in our country. I hope the gentleman from Georgia [Mr. DEEN], who has agreed to accept section 6 of the House bill, of which I am the author, will continue the agreement when he proposes the Senate bill for the House bill.

Mr. DEEN. Mr. Chairman, will the gentleman yield?

Mr. STEFAN. I yield.

Mr. DEEN. The gentleman has made a very valuable statement, and is a good member of the committee and is my friend and colleague. The gentleman knows I have no intention of deserting any agreement with respect to retaining his amendment to the Senate bill if the Senate bill is substituted for my bill. I have agreed to accept the gentleman's amendment.

Mr. STEFAN. I want to thank the gentleman, and I hope he will accept my section 6.

[Here the gavel fell.]

Mr. CARTER. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. MARSHALL].

Mr. MARSHALL. Mr. Chairman, I happen to be a member of the Committee on Education and it had not been my intention to have any remarks to make with regard to this proposed legislation this afternoon, but since I learned that the George bill is going to be offered as a substitute, I want to appeal to the membership of the House to sustain the Committee on Education and to sustain the chairman in the bill that has been brought forward.

There are those in the United States who question the advisability of the United States Government having too much to say about our educational system; in other words, there are those who still believe that the question of education is still a State matter and ought to be handled in that way.

There is no argument here about the vocational proposition being beneficial, and I am for it, but I take it if we enact the George bill, whereby we do not have to match Federal funds with State funds, it will not be much longer until there will be legislation here where the Federal Government will be asked to do it all, and there will be no matching of any amount. It seems to be the tendency of the country today to ask Uncle Sam to do everything. I do not believe it would be well for the States of this Union to urge or bring about a condition whereby all support of education comes from Washington and I think, too, that we ought to be a little careful about the extent to which we increase this appropriation.

I feel the bill that has been reported by the committee is a rather liberal increase over the amount that is provided in the legislation under which we are now living, and I would caution the membership of the House about increasing this appropriation to the extent that it is increased under the George bill.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That for the purpose of providing for the further development of vocational education in the several States and Territories there is hereby authorized to be appropriated for the fiscal year beginning July 1, 1937, the sum of $6,000,000; for the fiscal year beginning July 1, 1938, the sum of $6,000,000; and for the fiscal year beginning July 1, 1939, the sum of $6,000,000: *Provided*, That the several States and Territories shall not be required to match more than 50 percent of the appropriations authorized under the provisions of this section. One-third of this sum each year shall be allotted to the States and Territories in the proportion that their farm population bears to the total farm population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is made. One-third of the sum appropriated for each fiscal year shall be allotted to the States and Territories in the proportion that their rural population bears to the total rural population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is to be made. One-third of the sum appropriated for each fiscal year shall be allotted to the States and Territories in the proportion that their nonfarm population bears to the total nonfarm population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is to be made: *Provided, further*, That the allotment of funds to any State or Territory for each of the three purposes enumerated in

this section shall be not less than a minimum of $10,000 for any fiscal year, and there is hereby authorized to be appropriated for the fiscal year beginning July 1, 1937, the sum of $175,000, or so much thereof as may be needed, which shall be used for the purpose of providing the minimum allotments to the States and Territories provided for in this section; for the fiscal year beginning July 1, 1938, the sum of $175,000, or so much thereof as may be needed, which shall be used for the purpose of providing the minimum allotments to the States and Territories provided for in this section; and for the fiscal year beginning July 1, 1939, the sum of $175,000, or so much thereof as may be needed, which shall be used for the purpose of providing the minimum allotments to the States and Territories provided for in this section.

With the following committee amendment:

Page 1, line 9, after the figures, strike out:
Provided, That the several States and Territories shall not be required to match more than 50 percent of the appropriations authorized under the provisions of this section.

Mr. TARVER. Mr. Chairman, I rise in opposition to the committee amendment. I do not desire to add very much to what I was saying a few moments ago. This is the provision of the bill to which I had reference. When the committee first drafted the bill, it inserted this proviso, which would have allowed 50 percent of the $6,000,000 authorization to be allocated to the States without being matched and, therefore, would have afforded some opportunity to the States that are in such financial distress that they are unable to match in full the Federal funds and to the communities in those States, which because of low property values are unable to furnish any portion of the amount of money necessary to match Federal funds, to secure some benefits under the provisions of the bill. If this committee amendment striking out this provision is voted down, then 50 percent of the $6,000,000 will be allocated to the States, and, therefore, to the communities and subdivisions of the States, which may not be able to match the amount in full, and it is my earnest hope that action may be taken by the committee to that end in order that those who are most in need of this aid may receive some of the benefits of the money.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield?

Mr. TARVER. Yes.

Mr. BANKHEAD. My friend is very clear in matters of this sort and I fear he may be laboring under an erroneous conclusion with reference to the provisions of existing law and the effect of opposing this committee amendment.

Mr. TARVER. I should be very glad if I am in error to have the gentleman point out wherein that is so.

Mr. BANKHEAD. Some here are indulging in the hope that in view of the very conditions the gentleman from Georgia has expressed with reference to the poverty of some sections, that at least a part of this appropriation shall be expended without matching, at least temporarily.

Mr. TARVER. That is what I am endeavoring to have done, and if the committee amendment be adopted and this provision be stricken out, then under the provisions of the following sections of the bill, especially section 5, as to the method of allocating between the States, all of it will have to be matched. If you vote down the committee amendment and leave the proviso in the bill, then only 50 percent of it will have to be matched. I take it the gentleman from Alabama is in accord with my position.

Mr. BANKHEAD. Yes. I fear I misinterpreted the gentleman's attitude.

Mr. NICHOLS. Mr. Chairman, will the gentleman yield?

Mr. TARVER. Yes.

Mr. NICHOLS. If the House should turn down the entire House bill and adopt the Senate bill, there is no question but that it would be unnecessary to match in full the Federal money.

Mr. TARVER. I do not know what the House will do, but if you want to have half the money not matched, then vote down this committee amendment. If you want to require that the States match the money in full, then vote for the committee amendment.

Mr. NICHOLS. And if the committee amendment is voted down, would it then be necessary to further amend the bill before the conditions the gentleman is talking about would prevail?

Mr. TARVER. No. If the committee amendment is voted down, it leaves in the bill the proviso which would insure that $3,000,000 of this money will be distributed between the States without matching. If the committee amendment is adopted, all of it will have to be matched.

Mr. NICHOLS. I take it that the gentleman probably thinks it would be a wise thing to adopt the Senate bill as an amendment, but for fear that will not be done, the gentleman thinks this amendment should be voted down.

Mr. TARVER. No. I do not think that we are warranted at this time in increasing the amount of this allocation by fourfold. I think that doubling the amount is amply sufficient for the present in view of the financial condition of the Government. I represent an agricultural district, and there is no one in this House more interested in the cause of vocational education than I am.

Mr. HILL of Alabama. But even if the committee amendment is voted down and the Senate bill is not adopted, the State then will have to match at least 50 percent of it.

Mr. TARVER. They will have to match 50 percent. If you do not vote the committee amendment down, they will have to match it all.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was rejected.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 2, line 7, after the word "made", insert "for the salaries of teachers, supervisors, and directors of agricultural subjects in such States and Territories."

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: On page 2, line 15, after the word "made", insert "and shall be used for the salaries of teachers, supervisors, and directors of home economics subjects in such States and Territories."

The committee amendment was agreed to.

The Clerk read as follows:

Committee amendment: On page 2, line 23, after the word "made", insert "and shall be used for the salaries of teachers, supervisors, and directors of trade and industrial education subjects in such States and Territories."

The committee amendment was agreed to.

The Clerk read as follows:

Committee amendment: On page 3, line 1, after the word *"Provided"*, strike out the word *"further."*

Mr. PALMISANO. Mr. Chairman, in view of the fact that the Committee did not adopt the first amendment offered by the committee, it will be necessary to vote this amendment down, because the first proviso appeared on page 1. Of course, this is the second proviso.

I ask unanimous consent, Mr. Chairman, to withdraw the amendment.

The CHAIRMAN. Without objection, the last committee amendment is withdrawn.

There was no objection.

Mr. COX. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COX: Strike out all after the enacting clause and insert the following:

"That for the purpose of providing for the further development of vocational education in the several States and Territories there is hereby authorized to be appropriated for the fiscal year beginning July 1, 1937, and annually thereafter, the sum of $12,000,000: *Provided*, That the several States and Territories shall be required to match by State or local funds, or both, 50 percent of the appropriations authorized under the provisions of this section until June 30, 1942; 60 percent for the year ending June 30, 1943; 70 percent for the year ending June 30, 1944; 80 percent for the year ending June 30, 1945; 90 percent for the year ending June 30, 1946; and annually thereafter 100 percent of the appropriations authorized under the provisions of this section. One-third of this sum each year shall be allotted to the States and Territories in the proportion that their farm population bears to the total farm population

of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is made, and shall be used for the salaries and necessary travel expenses of teachers, supervisors, and directors of agricultural subjects in such States and Territories. One-third of the sum appropriated for each fiscal year shall be allotted to the States and Territories in the proportion that their rural population bears to the total rural population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is to be made, and shall be used for the salaries and travel expenses of teachers, supervisors, and directors of home-economics subjects in such States and Territories. One-third of the sum appropriated for each fiscal year shall be allotted to the States and Territories in the proportion that their nonfarm population bears to the total nonfarm population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is to be made, and shall be used for the salaries and necessary travel expenses of teachers, supervisors, and directors of trade and industrial subjects, including public and other service occupations, in such States and Territories: *Provided further*, That the allotment of funds to any State or Territory for each of the three purposes enumerated in this section shall be not less than a minimum of $20,000 for any fiscal year, 50 percent of which shall be matched by State or local funds, or both, and there is hereby authorized to be appropriated for the fiscal year beginning July 1, 1937, and annually thereafter the sum of $175,000, or so much thereof as may be needed, which shall be used for the purpose of providing the minimum allotments to the States and Territories provided for in this section.

"SEC. 2. In addition to the sum authorized to be appropriated by section 1 hereof, there is hereby authorized to be appropriated, and required to be matched in the same proportions as such sum, the sum of $1,200,000, to be allotted to the States and Territories in the proportion that their total population bears to the total population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is made, and shall be used for the salaries and necessary travel expenses of teachers, supervisors, and directors of, and maintenance of teacher training in, distributive occupational subjects in such States and Territories: *Provided, however*, That the allotment of funds to any State or Territory for the purpose of this section shall be not less than a minimum of $10,000 for any fiscal year after July 1, 1937, and there is hereby authorized to be appropriated for the fiscal year beginning July 1, 1937, and annually thereafter the sum of $54,000, or so much thereof as may be needed, which shall be used for the purpose of providing the minimum allotments to the States and Territories provided for in this section.

"SEC. 3. That for the purpose of cooperating with the States and Territories in preparing teachers, supervisors, and directors of agricultural, trade and industrial, and home-economics subjects there is hereby authorized to be appropriated for the use of the several States and Territories for the fiscal year beginning July 1, 1937, and annually thereafter the sum of $1,000,000. Said sum shall be allotted to the several States and Territories in the proportion which their population bears to the total population of the United States and Territories, according to the last preceding United States census: *Provided*, That the allotment of funds to any State or Territory shall be not less than a minimum of $10,000 for any fiscal year. And there is hereby authorized to be appropriated for the fiscal year beginning after the enactment of the act and annually thereafter the sum of $54,000, or so much thereof as may be needed, which shall be used for the purpose of providing the minimum allotments to the States and Territories provided for in this section.

"SEC. 4. For the purpose of carrying out the provisions of this act there is hereby authorized to be appropriated to the Office of Education, Department of the Interior, for vocational education, for the fiscal year beginning July 1, 1937, and annually thereafter the sum of $350,000, to be expended for the same purposes and in the same manner as provided in section 7 of the act approved February 23, 1917, as amended October 6, 1917.

"SEC. 5. The Secretary of the Treasury, through the Division of Disbursement of the Treasury Department, shall, upon the certification of the United States Commissioner of Education, pay, in equal semiannual payments, on the 1st day of July and January of each year, to the custodian for vocational education of each State and Territory designated in the act approved February 23, 1917, the moneys to which the State or Territory is entitled under the provisions of this act.

"SEC. 6. The appropriations made by this act shall be in addition to, and shall be subject to the same conditions and limitations as, the appropriations made by the act entitled 'An act to provide for the promotion of vocational education; to provide cooperation with the States in the promotion of such education in agriculture and in the trades and industries; to provide cooperation with the States in the preparation of teachers of vocational subjects; and to appropriate money and regulate its expenditures', approved February 23, 1917, except that the appropriations made by this act for home economics shall be subject to the conditions and limitations applicable to the appropriation for agricultural purposes under such act of February 23, 1917, with the exception of that part of section 10 thereof which requires directed or supervised practice for at least 6 months per year; that such moneys as are provided by this act for trade and industrial subjects, including public and other service occupations, may be expended for part-time classes operated for less than 144 hours per year; that the provisions of section 11 of the act of February 23, 1917, requiring at least one-third of the sum appropriated to any State to be expended for part-time schools or classes shall be held to include any part-time day-school classes for workers 14 years of age and over, and evening-school classes for workers 16 years of age and over; except that the appropriations made by this act for distributive occupational subjects shall be limited to part-time and evening schools as provided in said act of February 23, 1917, for trade, home economics, and industrial subjects and as qualified by the provisions of this section; and that the appropriations available under section 4 of this act shall be available for expenses of attendance at meeting of educational associations and other organizations and for expenses of conferees called to meet in the District of Columbia or elsewhere, which, in the opinion of the Commissioner, are necessary for the efficient discharge of the provisions of this act.

"SEC. 7. The appropriations authorized by this act shall be in lieu thereof and not in addition to the appropriations authorized in sections 1 and 2 of Public Law No. 245, Seventy-third Congress, approved May 21, 1934.

"SEC. 8. As used in this act the term 'States and Territories' means the several States, the Territories of Alaska and Hawaii, the island of Puerto Rico, and the District of Columbia."

Mr. PALMISANO (interrupting the reading of the amendment). Mr. Chairman, I make the point of order that this amendment is not germane. This is the Senate bill.

Mr. MONAGHAN. Mr. Chairman, a parliamentary inquiry.

Mr. PALMISANO. Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. MONAGHAN. Mr. Chairman, I would like to know whether or not the dispensing of the reading of the amendment would dispense with the reading of the House bill.

The CHAIRMAN. The gentleman from Georgia [Mr. COX] has offered an amendment, which the Chair understands is in the words and figures of the Senate bill. The gentleman from Maryland asks unanimous consent that the further reading of the amendment be dispensed with. Is there objection?

Mr. MONAGHAN. Mr. Chairman, I am constrained to object.

The CHAIRMAN. The Clerk will continue reading the amendment.

Mr. MILLARD (interrupting the further reading of the amendment). Mr. Chairman, I ask unanimous consent that the further reading of the amendment be dispensed with.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. MONAGHAN. Mr. Chairman, I object.

Mr. NICHOLS. Mr. Chairman, I move that the further reading of the amendment be dispensed with.

The CHAIRMAN. The question is on the motion of the gentleman from Oklahoma.

The motion was agreed to.

Mr. PALMISANO. Mr. Chairman, I make the point of order that this amendment is not germane.

The Senate bill injects a new matter entirely to that in the House bill. Vocational training from 1917 to date has always been for the purpose of training individuals and not groups. It was for the purpose of individuals obtaining an education voluntarily. We are now injecting, by this amendment, a provision that would force education by the State or municipal governments. The amendment provides that the municipal agent, whether he desires an education or not, under the instruction of his master, who may not be a teacher in vocational training, must take that education. In that connection let me cite the rules of the House, on page 365, referring to germaneness:

> One individual proposition may not be amended by another individual proposition even though the two belong to the same class.

That was shown recently when we considered the Frazier-Lemke bill. There was a provision attempting to loan money to the farmers of the country, and the Home Owners' Loan Corporation took up the same subject. The amendment to the Frazier-Lemke bill was ruled out of order because it was another subject matter.

Reading further from the rules:

> Thus the following were not germane:
> To a bill proposing the admission of one Territory into the Union, an amendment for admission of another Territory.

To a bill for the relief of one individual, an amendment proposing similar relief for another.

To a resolution providing for a special order for one bill, an amendment to include another bill.

I say this is entirely new matter. It may appear that it is extending vocational training, but the fact is that they are now attempting to teach not individuals but groups of public employees throughout the various States of the Union. I say it is not similar to the bill before the House. The intention of vocational training was to teach boys and girls who wanted an education voluntarily. This amendment would be the enforcement of an education upon men who have a training themselves by someone, as the testimony shows, who will later obtain an education from one in authority, and then he will divulge that education to someone else in the other jurisdiction, who is also in charge.

Mr. BANKHEAD. Mr. Chairman, I would like to be heard on the point of order.

The CHAIRMAN. The gentleman from Alabama.

Mr. CARTER. Mr. Chairman, I would like to be heard briefly.

The CHAIRMAN. The Chair will hear the gentleman from California before the close of the argument.

Mr. BANKHEAD. Mr. Chairman, I shall be very brief in answering the arguments made by the gentleman from Maryland. The exclusive proposition now presented to the Chair is upon the point of order made by the gentleman from Maryland, that the Senate bill is not germane to the House bill. Without undertaking to go into the various comparisons of one section of the House bill and a similar section of the Senate bill, even a casual examination of the provisions of the two bills, it seems to me, would clearly convince the Chair that the major purposes sought to be effectuated by the two bills are identical in purpose and design.

It is true there may be some incidental or minor differences with reference to the regulations set up, or with reference to some details of the bill there may be differences; but upon the point now presented of the germaneness of the Senate bill to the House bill, it seems to me rather clear, certainly, that the point of order is not well taken.

Mr. Chairman, I do not care to pursue the argument further than this statement of the general principles involved.

The CHAIRMAN. The Chair will hear the gentleman from California on the point of order.

Mr. CARTER. Mr. Chairman, I wish to be heard briefly on the point of order.

Mr. Chairman, in the past vocational education bills have had to do with agricultural training, home economics, and training in trade and in industry. I call the Chair's attention to section 2 of the Senate bill under consideration as an amendment, which section injects into the picture two other proposals. I maintain, Mr. Chairman, that the injection of these new proposals is in violation of section 7 of rule XVI of the House relative to germaneness, reading as follows:

No motion or proposition on a subject different from that under consideration shall be admitted under color of amendment.

I submit, Mr. Chairman, the point of order should be sustained.

The CHAIRMAN. The Chair finds the title of the Senate bill, the provisions of which are included in the pending amendment, and the title of the House bill which it would amend to be the same. Both provide for the further development of vocational education in the several States and Territories. An examination of the text of the bills indicate that to a considerable extent they carry the same provisions; but, as pointed out by the gentleman from California, the Senate bill adds to the provisions of the House bill certain fields of vocational training in public and other service occupations.

The Chair finds in Cannon's Procedure, on the subject of germaneness, this paragraph:

That an amendment to be germane means that it must be akin to or relative to the subject matter of the bill. It must be an amendment that would appropriately be considered in connection with the bill.

Both the amendment and the House bill deal with the subject of vocational education.

The Chair quotes from the definition of vocational education given in Webster's dictionary the following statement:

A vocational school is a school the main purpose of which is to provide training for the occupations or vocations whether in the professions, commerce, or trade.

In the opinion of the Chair the pending amendment, as stated by the gentleman from Alabama, seeks to effectuate the identical purposes of the House bill except to carry those purposes a bit further and to provide a larger appropriation for them.

The Chair, therefore, holds that the amendment is germane and overrules the point of order.

Mr. COX. Mr. Chairman, whatever I might say in support of this amendment would be in part at least a repetition of arguments already made dealing with the relative merits of the House and Senate bills.

It has been developed in the consideration of this measure up to this point that the Committee on Education reporting the House bill is tremendously interested in the adoption of the legislation. There is, however, an indication of difference as between members of the committee over the amount of appropriation that should be authorized. The Senate bill—you will recall the statement made by the author of the House bill—is the bill upon which the hearing before the Committee on Education of the House was had; that is, the two bills were identical. The change in the bills as they now are was brought about by amendments made by the Committee on Education, which resulted in the original bill being withdrawn and reintroduced by the gentleman from Georgia [Mr. DEEN].

I hope the committee will accept the amendment.

Mr. STEFAN. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. STEFAN to the amendment offered by Mr. COX: On page 7, line 12, after the word "act" and the period, insert a new section:

"SEC. 6–a. No part of the appropriation herein authorized shall be expended in industrial-plant training programs, except such industrial-plant training be bona-fide vocational training and not a device to utilize the services of vocational trainees for private profit."

Mr. STEFAN. Mr. Chairman, the hour is getting late, and I shall not take the 5 minutes to which I am entitled.

Mr. BANKHEAD. Mr. Chairman, if the gentleman will permit an interruption, I may say that so far as I know the amendment is agreeable to all concerned, if it is to the chairman of the committee.

Mr. PALMISANO. Mr. Chairman, I am opposed to the amendment of the gentleman from Georgia.

The CHAIRMAN. The Chair will say to the gentleman from Maryland that the amendment now pending is the amendment offered by the gentleman from Nebraska.

Mr. PALMISANO. Mr. Chairman, I would call attention to the fact that the amendment of the gentleman from Nebraska is already in the House bill; so the question involved here is the amendment offered by the gentleman from Georgia.

Vocational education has been progressing with an appropriation of $3,000,000 a year. We have increased that to $6,000,000 a year. The pending bill increases the present amount by $4,000,000. By adopting the Senate bill as an amendment, the amount will be increased to $12,000,000, a 300-percent increase; and there was absolutely no testimony before the committee to warrant any increase whatever.

Mr. BURDICK. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. BURDICK. Mr. Chairman, I make the point of order that the gentleman is not speaking to the matter before the House, the amendment offered by the gentleman from Nebraska.

The CHAIRMAN. The gentleman from Maryland will proceed in order.

Mr. PALMISANO. The amendment of the gentleman from Nebraska is already contained in the House bill. The question involved is $12,000,000. I say, gentlemen, vote against both amendments, and pass the House bill with $6,000,000 instead of the Senate bill with $12,000,000. To adopt the amendment of the gentleman from Nebraska would be to make it appear that we are in sympathy with the Senate bill.

Mr. Chairman, I say that the Members should vote against both amendments and proceed to pass the House bill as reported by the committee, because that bill has been unanimously reported. Some folks back home have sent telegrams up here to Members urging that they not stand by the committee, and now we find a different proposition before the House. Three separate votes were taken on this bill, and I ask the Members to stand by the committee.

[Here the gavel fell.]

Mr. BOILEAU. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, the gentleman from Maryland [Mr. PALMISANO], it seems to me, has offered a rather novel argument. He admits the merit of the amendment offered by the gentleman from Nebraska [Mr. STEFAN], but merely for the purpose of adding strength to his opposition to the Senate bill he asks the House to vote down the amendment offered by the gentleman from Nebraska. I understand the gentleman from Maryland is perfectly agreeable to having this proposition in the House bill, and, as a matter of fact, his committee accepted it. It seems to me in order to properly present the matter to the House. The gentleman from Maryland should gladly accept the amendment offered by the gentleman from Nebraska. I would like to have the gentleman from Maryland give the Members of the House a real good argument why the amendment offered by the gentleman from Nebraska should not be adopted as an amendment to the amendment offered by the gentleman from Georgia. The gentleman has offered no argument against the amendment offered by the gentleman from Nebraska.

Mr. PALMISANO. It is already contained in the House bill.

Mr. BOILEAU. It is in the House bill, but it is not in the amendment that will be next voted upon by the Members of the House. It seems to me, in the interest of clarity, in the interest of good legislation, and in the interest of presenting the matter fairly to the House, the amendment should be adopted.

[Here the gavel fell.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nebraska [Mr. STEFAN] to the amendment offered by the gentleman from Georgia [Mr. Cox].

The amendment to the amendment was agreed to.

Mr. FORD of Mississippi. Mr. Chairman, I offer an amendment to the amendment offered by the gentleman from Georgia [Mr. Cox].

The Clerk read as follows:

Amendment offered by Mr. FORD of Mississippi to the amendment offered by Mr. Cox of Georgia: On page 3 of the amendment, strike out the following words in line 6: "including public and other service occupations."

Mr. COX. Mr. Chairman, this is the language of the bill to which the opposition rather strenuously objected. I cannot see that it will injure the legislation; therefore I accept the amendment and hope it will be adopted by the House.

Mr. FORD of Mississippi. Mr. Chairman, in considering the proposed legislation now before us for the promotion of vocational education through Federal aid for that purpose, I feel that there is not a Member of this House who would attempt to deny that free public instruction is one of the most valuable undertakings of an organized government. I insist that popular education is the basis of freedom and of justice in that it offers the fullest opportunity for every person to rise in the world in keeping with democratic ideals. By means of education the road to success is kept open to all who are willing to exert the effort required to travel it.

I am happy to have consistently and actively supported the idea of a permanent policy of Federal aid to education, and at the present time there is pending before the House Committee on Education a bill I introduced on March 4, 1935, H. R. 6370, embodying a plan which would make available $100,000,000 a year for Federal aid to public education in the several States, and sufficient provision is therein included to make this assistance a permanent policy of the United States Government, control of the funds to be exclusively exercised by the State and local educational authorities. I serve notice on the House and on the Committee on Education, of which I am a member, that the school children, the parents, the bus drivers, the school teachers, and the overburdened local taxpayers of this country appreciate the merits of this proposal and are demanding this assistance to which they are entitled. The fight for its approval will be continued until victory crowns our efforts.

Today we are considering Federal aid to vocational education, since the Committee on Education has reported a bill to the House, H. R. 12120, authorizing the appropriation of $6,000,000 a year for the next 3 years to be devoted to this purpose. While our committee was studying this measure I, and a number of the other members of the committee, wanted the authorization placed at $12,000,000 a year and the Federal aid so given made a permanent proposition, not limited to any term of years. The committee, acting by majority vote, rejected our proposals and reported H. R. 12120, carrying an authorization for the $6,000,000 and with the 3-year limitation.

But the situation is not beyond hope of successful remedy. The Senate has already passed its vocational-education bill, and that measure carries the $12,000,000 authorization as a permanent policy—exactly the same thing we tried to secure in the Committee on Education.

The gentleman from Georgia [Mr. DEEN], author of the House bill reported from the committee, has stood up here this afternoon and splendidly declared that pride of authorship does not go so far with him as does a sincere desire to see something really worth while done to improve the educational opportunities of the boys and girls of our country, and that he hopes that the provisions of the Senate bill will be adopted in place of the enactment of his bill.

It will be an easy parliamentary process for the House to now adopt the provisions of the Senate bill. All we will have to do is simply to strike out all after the enacting clause of the House bill and insert in place of the stricken matter the provisions of the Senate bill. A majority in behalf of the amendment—carrying the Senate provisions—offered by the gentleman from Georgia [Mr. Cox] will accomplish the desired purpose.

Twelve million dollars a year and a permanent policy of assistance to vocational education will be the result of the adoption of the amendment. In urging you to adopt the amendment I do not feel that I am deserting my committee, as I wanted the more liberal provision made in the committee before the bill came to the floor. I thought we had debate and amendment on the floor in order that we might be able to correct just such situations as this now confronting the advocates of suitable assistance to education. Even if I had to desert a committee, I would do it without hesitation if I considered it necessary to effect the result essential to the best interests of the people. Committee allegiance cannot come ahead of allegiance to duty.

The gentleman from California [Mr. CARTER] calls attention to the fact that regardless of whether we pass a bill at this time under the operation of the Smith-Hughes Act, $7,382,000 per annum will, from year to year, be made available to vocational education over and above the amounts otherwise provided. That is correct, but we know, and the school children and parents know, that we need this $12,000,000 in addition to that which will be obtained under the Smith-Hughes Act. The need appears all the more pressing when we consider that the act of May 21, 1934, which has also provided $3,184,000 since date of enactment, will expire in another year, leaving that sum no longer available.

The funds made available by the legislation now under consideration will be used for agricultural education for our farm boys, for home science education for the girls who are interested in learning better methods of home management, and for vocational training in trades and industry. Money could not be expended to a purpose any better than to equip boys and girls to lead a more useful and abundant life. This will certainly enable them to improve upon their opportunities, to the benefit of themselves and their associates.

I have offered an amendment to the amendment of the gentleman from Georgia which would strike out the words "including public and other service occupations." If my amendment to the amendment prevails, it will mean that none of the funds will be used for training people to be firemen or policemen or public officials or similar undertakings, and will reserve all the money for the education of the boys and girls in the fields I have just mentioned.

Allow me, Mr. Chairman, to again urge that the amendment to make $12,000,000 available as a permanent policy be agreed to, and that my amendment to the amendment also be agreed to in order that possible undesired complications may be prevented.

A test of the friendship of this House for the children of this country trying to get an education and for the parents and teachers trying to give it to them has come. I cannot think that we will violate our trust.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi [Mr. FORD] to the amendment offered by the gentleman from Georgia [Mr. COX].

The amendment to the amendment was agreed to.

Mr. McCORMACK. Mr. Chairman, I move to strike out the last three words.

Mr. Chairman, may I ask the chairman of the Education Committee a few questions? What is the amount of the appropriation now for vocational training?

Mr. PALMISANO. $3,000,000.

Mr. McCORMACK. That expires next year?

Mr. PALMISANO. It expires next year; yes.

Mr. McCORMACK. The purpose of both of these bills is to continue vocational education beyond next year?

Mr. PALMISANO. The House bill continues it for 3 years with an increase in the appropriation to $6,000,000. The Senate bill makes it a permanent proposition.

Mr. McCORMACK. Now, the appropriation is $3,000,000?

Mr. PALMISANO. $3,000,000; yes.

Mr. McCORMACK. The House bill increases the appropriation 100 percent?

Mr. PALMISANO. Yes.

Mr. McCORMACK. And the Senate bill increases it 300 percent?

Mr. PALMISANO. The gentleman is correct.

Mr. McCORMACK. That is all I want to know.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. McCORMACK. No; I have the information I wanted.

Mr. PALMISANO. I may say to the gentleman from Massachusetts that, under the House bill, the program is continued for 3 years as it has been since 1917, and, under the Senate bill, it would be made a permanent proposition at $12,000,000 a year. The original Smith-Hughes bill appropriated $500,000, which was to be continued and increased until it reached $6,000,000. We are now providing the $6,000,000 which was to be the permanent amount under the original Smith-Hughes Act. Now they are asking for $12,000,000, which would double the amount that was originally anticipated.

Mr. RICH. Mr. Chairman, will the gentleman yield and tell us where we are going to get the money?

Mr. LAMNECK. Mr. Chairman, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Ohio.

Mr. LAMNECK. Do I understand that the Senate bill also provides for an appropriation for all time after 1946?

Mr. McCORMACK. I rose in order to get time to ask certain questions. Can the gentleman from Maryland answer the question of the gentleman from Ohio?

Mr. PALMISANO. Under the Senate bill it is to be a permanent proposition.

[Here the gavel fell.]

Mr. FULLER. Mr. Chairman, I rise in opposition to the pro-forma amendment.

Mr. Chairman, I realize there is some little feeling on behalf of the committee for their own bill. Personally, I think the committee, although made up of various classes of representation here in the House, has been fair and has gone along pretty well with this matter, but the Senate bill, known as the George bill, as I understand, was never before the committee. The bill was passed after the committee had acted upon the matter. It is true they did discuss, as I understand, the question of whether the amount should be $6,000,000 or $12,000,000 and decided upon $6,000,000, although there were a great many of them who then, as now, were in favor of $12,000,000.

I have no criticism to offer of the committee in asking us to stand by the majority report, but with respect to a question like this, it seems to me the members of the committee ought not to be such sticklers for little technicalities. In my estimation $12,000,000 is not too much. We do not have enough now and we cannot appropriate too much for a cause like this.

Mr. RICH. Mr. Chairman, will the gentleman yield?

Mr. FULLER. Yes; for a question.

Mr. RICH. If the gentleman yields for just a question, and I have to make it short, may I say that while we are talking all the time about spending I would like to know where you are going to get the money.

Mr. FULLER. It is easy to know where we are going to get the money. We will get it off of the manufacturers of Pennsylvania and they will never even feel it. Money wisely spent for education of those unable to pay their way through colleges is always a good investment.

Mr. RICH. And when you get through you will have wrecked the country.

Mr. FULLER. Oh, no. Do not take up all my time.

Mr. MARSHALL. Mr. Chairman, will the gentleman yield?

Mr. FULLER. I hope the gentleman will excuse me, as I only have a little more time. The gentleman has spoken on the measure and there are some Members on our side who want to speak on this amendment, because they were in favor of the George bill and could not get recognition. However, this is a forum where we can all speak a little.

Mr. Chairman, I know the needs of the country boys. Some of you gentlemen who live in cities and have had fine opportunities and have not had to patronize the public schools may not realize the importance of this proposition, but I know what it is for a poor farmer boy to crave an education. I never had any opportunity for college education in my own life, and I know what it means to the farm boys who go out and work their way through school. This bill will give them an opportunity to learn a vocation or a profession. It also gives them an opportunity to be taught a trade, and, more than this, they teach the girls of the country their duties as wives and mothers. They further teach them things which they have never before had an opportunity to be taught. The children of the rich and those able to attend college do not take vocational training or attend these schools. Such schools teach practical thrift and economy, and, in addition to teaching trades, make better farmers. They teach the girls how housewives can make a dollar go further, how to buy, manage the home budget, and get the best results from earnings, besides health features. The present program and appropriation cannot take care of one-half the demand or afford teachers living wages. This allowance, although larger than formerly, is really economy. This bill will just be known as the George-Deen measure, and the poor boys and girls of the country will hold in grateful remembrance not only the authors but all who support this worthy measure. Let us take care of the young people who seek an education and they will, in appreciation, later take care of our governmental needs. I hope the

amendment containing the provisions of the George bill is adopted. [Applause.]

Mr. BANKHEAD. Mr. Chairman, I move to strike out the last two words. I imagine some Members may get tired of the reiteration of the statements so often made by me on the floor of the House that in my deliberate judgment, although I may be in error in my conclusions, the very best money spent by the Federal Government is for appropriations for the Public Health Service and those appropriations for vocational education in its various phases. [Applause.]

I have been in Congress over a period of a good many years now, by the kindness and indulgence of my constituents, and ever since I came to Congress 20 years ago, at which time at my own request I was placed for a number of years on the House Committee on Education, I think I make a fair statement that from a very modest beginning, as far as appropriations and activities are concerned, I have seen this program of Federal leadership and stimulation for vocational education grow, not only in effectiveness but also in the confidence and appreciation of the American people. [Applause.] It is true that we are spending tremendous amounts of money. We have voted for some appropriation bills at this session of Congress that were very distasteful to me because of the tremendous amounts of money involved in them which I feared were not going to be expended for any humanitarian or benevolent purpose or to accentuate the needs of social justice in this country; but they have passed. But here is an act, not an appropriation, mind you, but an authorization for an appropriation, to quite largely increase—and I say that frankly—the authorization for vocational education.

I was one of those who in the hearings before the committee 3 years ago on the George-Elzey bill insisted that this appropriation should not only go to the benefit of the country boys and girls, but that at least one-third of it should be devoted, as it is now devoted under existing law, to the education of boys and girls of the towns and cities in industrial training. Sitting in my place behind that table during this Easter period and for a number of weeks, I have seen day after day file into the galleries of this Chamber the youth of our country—high-school boys and girls now being trained in the schools of this country to take up the burdens of citizenship when we older men shall lay them down; and the only objective that I have had in mind during all of these 20 years in advocating liberal appropriations for vocational education has been that these American youths shall have a fair, reasonable, decent opportunity in the country precincts and in the city precincts to be trained in head and in heart and in hand so that they might adequately cope with the problems of life as intelligent creatures, and not be deprived of the benefits of vocational education that would train them in the useful trades and arts and sciences, in agriculture, and in domestic industry to take up these burdens. I have always felt that it is at least partly the duty of the Federal Government to make reasonably fair appropriations for this purpose. I am not afraid of this $12,000,000 appropriation for this purpose, because I believe that as far as the youths of our country are concerned—and they lay heavily upon our hearts, of course—it is the best money that we can spend. [Applause.]

The CHAIRMAN. The question is on the amendment of the gentleman from Georgia as amended.

The question was taken; and on a division (demanded by Mr. PALMISANO) there were—ayes 125, noes 51.

So the amendment as amended was agreed to.

The CHAIRMAN. Under the rule, the Committee will rise and report the bill to the House.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ROBERTSON, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee had had under consideration the bill H. R. 12120, and he reported the bill back to the House with an amendment adopted in the Committee of the Whole.

The SPEAKER. Under the rule the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed, and a motion to reconsider the vote by which the bill was passed was laid on the table.

WHEELING COAL PLAN

Mr. RAMSAY. Mr. Speaker, I ask unanimous consent to extend my own remarks on a bill I introduced yesterday.

The SPEAKER. Without objection it is so ordered.

There was no objection.

Mr. RAMSAY. Mr. Speaker, I introduced yesterday House Joint Resolution 596 that has for its purpose the granting to the coal States the right to enter into compacts with each other, for the purpose of stabilizing the coal industry. The provisions of the joint resolution are as follows:

That the consent of the Congress of the United States is hereby given to the States of Pennsylvania, Ohio, Illinois, Indiana, West Virginia, Kentucky, and Tennessee, or any two or more of them, to negotiate and enter into agreements or compacts for conserving and stabilizing the production and sale of coal, and such agreements may authorize the forming of competitive zones to regulate the production and sale of such coal, under State and governmental guidance with the express purpose of securing a fair profit for the capital invested in such business, as well as a fair and living wage for the employees engaged in such mining and production.

SEC. 2. No such compact shall be binding or obligatory upon any State, or its producers or miners of coal, unless and until it has been approved by the legislatures of each of the States whose assent is contemplated by the terms of the compact or agreement and by the Congress.

This joint resolution is based on what is known as the Wheeling coal plan, the details of which were worked out and recommended by the Wheeling Chamber of Commerce. The plan, as recommended by this association, is as follows:

WHEELING COAL PLAN

1. Form the coal industry into competitive zones.

2. State and governmental control is not advocated. State and governmental guidance for legal reasons is necessitated.

3. Name the Governor of each State the coal administrator of his State. Have the Governors of the States in the competitive zones form an administrative tribunal.

4. The tribunal will:

(a) Organize the operators of each zone in a unit.

(b) Retain engineers to ascertain production in consumption, definitely rate each property, so that production is balanced in relativity to consumption by zone, by State, by district, by operation, by year, by month, and by day.

5. Cooperation by labor and capital, so that employee gets a living wage and employer a fair profit. Employees are encouraged to organize into associations for mutual self-help.

The sponsors of this code believe that the future of the Nation depends on coal and offer to cooperate with the Government, the State, labor, the operator, and the public to solve the problem.

Zone the coal industry as follows:

1. Lake zone, comprising Pennsylvania, Ohio, West Virginia, Kentucky, and Tennessee. Approximate tonnage, 392,000,000. The personnel of the administrative tribunal for this zone would comprise the Governors of Pennsylvania, Ohio, West Virginia, Kentucky, and Tennessee.

2. Tidewater zone, comprising Virginia and Maryland. Approximate tonnage, 17,000,000. Central Pennsylvania properly belongs in this zone. The personnel of the administrative tribunal for this zone would comprise the Governors of Virginia and Maryland.

3. Midwest zone, comprising Illinois and Indiana. Approximate tonnage, 93,000,000. Western Kentucky properly

belongs in this zone. The personnel of the administrative tribunal for this zone would comprise the Governors of Illinois and Indiana.

4. Southern zone comprises Alabama. Approximate tonnage, 21,000,000, and so forth.

Geographical zones have been selected where competition is most acute. Other zones can be formed in States or sections of States not already zoned. The tonnage of the industry zoned in 1926 approximates 523,000,000 tons, or 91.2 percent of the Nation's total production.

Strong belief is affirmed in private ownership. Initially, however, the Governors must act as the Moses to lead the industry out of the wilderness. The States can legally do this, as they will exercise their own sovereignty in saving a natural resource. When the plan functions, the tribunal of Governors could resign. A commissioner could be appointed by the operators of each State. These commissioners, instead of the Governors, would then comprise the tribunal for each zone. If desired, a national commissioner could be appointed by the operators to direct the entire industry, like Judge Landis in baseball, or the Honorable Will Hays in the motion-picture industry.

Productive schedules would be given operators 2 weeks in advance for the ensuing month, showing the number of days to operate and tonnage per diem. As insurance companies through experience base premiums on a mortality table, so eventually time would produce a productive table, scientifically arranged, so that each property would work 250 days a year with a fixed and set personnel.

No consumer of coal, large or small, with a social conscience, desires to pay a price that means starvation to miners and bankruptcy to operators. The price of the product should be such that the miner gets a living wage and the operator a fair profit.

After careful analysis and study, it is our opinion that 50 operators getting away from the law of the jungle and cooperating could save an industry, classed as basic by the President of the United States, and that is a public necessity in peace and in war, in which there are billions of dollars invested and upon which 2 percent of the Nation's population depends, directly for a livelihood, and all America in some degree, directly or indirectly, for comfort and existence.

CHECK WEIGHMEN

It is our opinion that every mine should have a check weighman. The check weighman should be a member of the department of mines in every State and sent to the mine by the State. His remuneration should be set by the States and paid by the cutters and loaders at the mine he is working. Check weighmen should be changed from mine to mine, and changed frequently, so that they will not be partial to either miner or operator.

COMPANY STORES

The company store was once a positive utility. Mines were in isolated districts, but the invention of the automobile has made them less of a utility, but still in many cases a necessity.

Compulsory trading should be absolutely prohibited. The administration of the company stores should be checked by the State mine department, so that there would be no excessive profiteering.

SCRIPT

Script is not legal tender in the payment of wages. Consequently its use should be completely prohibited.

COMPANY HOUSES

Occupancy should not be compulsory. Sanitary laws of the State or district should be enforced. Rental should be nominal.

It is obvious to students of the bituminous-coal industry that time has supplanted the old central competitive field, comprising Illinois, Indiana, Ohio, and Pennsylvania. Conditions call for new alinements, and thus this new competitive field is suggested. Steam coal alone has been considered. Geographical districts have been selected where competition is most acute. Other sections in States designated or States unnamed can later on be included. The tonnage in the field named approximates 150,000,000 tons per annum, or one-third of the Nation's total production.

Mr. Speaker, I sincerely hope the Judiciary Committee will at once report out this bill, and that the Congress will pass the same at this session, and give to these States interested a chance to work out their own salvation.

CURRENT ATTACKS ON IMMIGRATION LEGISLATION

Mr. DICKSTEIN. Mr. Speaker, I ask unanimous consent to extend my own remarks by inserting a radio speech I made over the National Broadcasting Co.

The SPEAKER. Without objection it is so ordered.

There was no objection.

Mr. DICKSTEIN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include my address made over a National Broadcasting Co. network Thursday, April 23, 1936, as follows:

I desire this evening to explain to my radio audience some of the tactics being employed by certain opponents of the Kerr-Coolidge bill in their efforts to prevent orderly consideration of this bill on its own merits on the floors of both Houses of Congress. At the outset permit me to make this unqualified statement, which can easily be verified by anyone who will care to examine its provisions: The Kerr-Coolidge bill, as amended, is not a liberal immigration measure but a deportation bill of drastic nature.

Let me impress upon you that this Kerr-Coolidge bill is the only major legislative proposal dealing in general with aliens within the United States that has been favorably reported from the appropriate committees of both the United States Senate and the House of Representatives during this Congress and is awaiting consideration on the floors of both Houses of Congress.

Opponents of the Kerr-Coolidge bill have succeeded in having another bill introduced in Congress, the so-called Starnes-Reynolds bill, as a sort of buffer bill, toward which all antialien groups in the country can direct their support. There is even a rumor heard occasionally that an effort will be made to offer the Starnes-Reynolds bill as an amendment in substitution for the text of the Kerr-Coolidge bill.

One member of the House Committee on Immigration and Naturalization has been openly informed that opponents of the Kerr-Coolidge bill have made an arrangement whereby every bill reported from the committee will be denied any consideration on the floor of the House unless and until the Committee on Immigration and Naturalization favorably reports some bill to the House providing for the mandatory deportation of all unnaturalized aliens from the United States immediately. One of the Senators from the State of North Carolina, a gentleman for whom I have a high regard, recently held the Senate floor for 4 days in a one-man filibuster against the orderly consideration of the Kerr-Coolidge bill, and while making this filibuster speech stated in part—I quote the Senator: "I wish to state to my distinguished friends in the Senate, I am trying to talk this bill to death."

By means of radio addresses, by printed pamphlets, by letters, telegrams, and petitions sent to the Members of Congress and Senators, and even by speeches in the halls of Congress, the opponents of the Kerr-Coolidge bill are conducting a campaign of vilification, slander, and misrepresentation of facts. The only immediate effect of this un-American campaign is to create a situation among the foreign-born people living in the United States from which this country will be a long time recovering. A reign of terror has been created by the unthinking threats of mandatory and wholesale deportation of all aliens.

Now, for a few moments, let us calmly consider the benefits to be secured by the prompt enactment of the Kerr-Coolidge bill. In the first place, let me say quite frankly that this is the first major legislative proposal in many years, dealing exclusively with aliens subject to the immigation laws who are living within the United States, which has received favorable action by the committees of both the House and the Senate so as to have both the Senate bill and the House bill on the calendars of both Houses of Congress at the same time.

In the second place, let me emphasize the fact that the enactment of the Kerr-Coolidge bill will not enable any alien in any foreign territory to secure admission to the United States, unless that alien is right now entitled to admission under provisions of the immigration laws as they now exist. In the third place, let me assure you that this bill will decrease the number of lawful admissions of aliens, who have never before been in the United States and who seek entry after the enactment of this bill as quota immigrants. This result is obtained in two ways: first, every alien in the United States who is permitted to remain here pursuant to provisions of this bill will be deducted from the quota of the country of which such alien is a native, and so if he remains here he prevents some other native of his country from coming here as a quota immigrant; second, the preference under the quota now enjoyed by skilled agriculturists and their wives and minor children is repealed by this bill, so that hereafter those aliens will only be entitled to come here as quota immigrants without any preference quota, and this will have the effect of keeping most of them out until they can secure a regular quota number.

The enactment of the Kerr-Coolidge bill will not change or repeal the existing provisions of the immigration law requiring the mandatory deportation of alien criminals, anarchists, Communists, violators of the Federal narcotic laws, who are not only narcotic addicts, or persons in the immoral classes subject to deportation. Nor will the bill extend to these classes of aliens any benefits whatever not now enjoyed by them under existing provisions of law.

Four new classes of criminal aliens, who are not now subject to deportation under existing law, are added to the deportable classes. But, because of the drastic provisions created by that law, it is necessary in the public interest to authorize the use of limited discretion as to the actual deportation of aliens in these new deportable classes. Other provisions of the bill will greatly increase the apprehension and detention of aliens thought to be subject to deportation until a proper warrant is issued for their arrest. This will rid our country of some 20,000 criminals.

This will attempt to treat the alien in the noncriminal classes, whose status under the immigration law is questionable while he remains here, as though he were a normal human being, and gives him a chance to have his status adjusted without undue expense or delay, so that he may not be forced to leave his home and fireside in this country. His status will be adjusted so that he will be in a position to proceed under our naturalization laws and eventually become a citizen. The Kerr-Coolidge bill, however, does not grant citizenship, either directly or indirectly, to any alien whatsoever.

One of the major objections expressed by those opposed to the Kerr-Coolidge bill is that it grants discretion to be exercised in certain limited groups of deportation cases. I feel the advocates of the Starnes-Reynolds bill, who oppose the authorized use of discretion under the Kerr-Coolidge bill, are not as sincere as they might be.

My reason for this statement is that in the Starnes-Reynolds bill will be found a vastly more extensive grant to use discretion when it authorizes consular officers abroad, in their judgment, to deny visas to aliens who are unable to pass the consul's intelligence test as to whether or not the applicant for a visa has—and I quote—"intelligence equal to a normal rate of an average sampling of native-born American white stock." In other respects this bill abounds in discretional features.

I consider one whole portion of the Starnes-Reynolds bill, namely, that portion which seeks to establish permanent fingerprinting records and registry of all aliens in the United States, as a particularly vicious proposal at this time. This proposal, if enacted into law, would definitely establish an alien bloc in the United States on un-American principles. The alien would become a self-conscious member of a group set apart by operation of law from the citizen neighbors in each community and the ready assimilation of such aliens into the United States citizenship would be rendered vastly more difficult than it is under existing provisions of law.

I can think of no more fitting way of closing my remarks than reading to you a little quip from the New York Times entitled "One Good Plan": "One earnest lady would solve the unemployment problem by deporting 7,500,000 aliens and give their jobs to 'Americans.' Actually the results may be even more gratifying than she anticipates. For instance, sending 7,500,000 people out of the country means a great many new jobs in shipping and shipbuilding, and land transportation of all kinds. There will also be hundreds of thousands of new jobs for watchmen to keep an eye on the millions of homes deserted by the deportees. But this is not all. Actually there are fewer than 3,000,000 unnaturalized aliens in the country over the age of 21. If we are to deport 7,500,000 aliens, we shall have to begin by first importing about 4,000,000 of them; and this again means a boom in transportation employment. It may be, of course, that this earnest lady expects to get her 7,500,000 aliens by first depriving all naturalized citizens of their citizenship rights and making them real 'foreigners.' That would create at least a million new clerical jobs. The more you look at the scheme the more wonderful it becomes."

FLOOD CONTROL ON THE MISSISSIPPI RIVER

Mr. WILSON of Louisiana. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 3531) to amend the act entitled "An act for the control of floods on the Mississippi River and its tributaries, and for other purposes", approved May 15, 1928, with House amendments, insist on House amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana? [After a pause.] The Chair hears none and appoints the following conferees:

Mr. WILSON of Louisiana, Mr. WHITTINGTON, Mr. GRISWOLD, Mr. RICH, and Mr. ENGLEBRIGHT.

MEDALS TO MEMBERS OF BYRD SECOND ANTARCTIC EXPEDITION

Mr. ROBERTSON. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Joint Resolution 209, authorizing the presentation of silver medals to the personnel of the Second Byrd Antarctic Expedition.

The Clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

Mr. RICH. Mr. Speaker, reserving the right to object, was that handled by any committee; and if so, by what committee?

Mr. ROBERTSON. The Naval Affairs Committee. The Senate unanimously passed the bill and it was handled by the Naval Affairs Committee, and it carried no appropriation.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The Clerk read as follows:

Resolved, etc., That the Secretary of the Navy be, and hereby is, directed to cause to be made at the United States Mint such number of silver medals as he may deem appropriate and necessary, respectively, to be presented to the deserving personnel of the Second Byrd Antarctic Expedition that spent the winter night at Little America or who commanded either one of the expedition ships throughout the expedition, to express the high admiration in which the Congress and the American people hold for their heroic and undaunted accomplishments for science, unequaled in the history of polar exploration.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MONOPOLISTIC MOTIVES OF THE CORPORATE CHAINS

Mr. HOUSTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. HOUSTON. Mr. Speaker, during the first session of the Seventy-fourth Congress, the Honorable WRIGHT PATMAN introduced a bill making it unlawful for any person engaged in commerce to discriminate in price or terms of sale between purchasers of commodities of like grade and quality, to prohibit the payment of brokerage or commission under certain conditions, to suppress pseudo-advertising allowances, to provide a presumptive measure of damages in certain cases, and to protect the independent merchant, the public whom he serves, and the manufacturer from whom he buys, from exploitation by unfair competitors.

The Patman bill does not propose to prohibit an entire business, nor even an entire class of transactions. It only imposes certain limits of security upon the transactions to which it relates, within which limits full latitude remains for all sound economic processes and beyond which limits the evils at which this bill is aimed are characteristically found.

Those evils may be summarily stated as the abuse of the large buying power controlled by a few large purchasers to extract from manufacturers and other selling sources, price preferences and discriminatory allowances not justified by any sound economies in the distinctive methods of selling and servicing those customers; allowances which the seller, therefore, cannot afford to grant proportionally to his entire trade, since to do so would reduce his revenues below the reasonable net profit; discriminations, therefore, which the seller can grant only because they are discriminatory; that is, only because they are counterbalanced by sales to other customers at higher prices from which the seller can recoup such part of his reasonable net profit as he loses on sales to the preferred customers, and which he must in the long run recoup somewhere to justify his continuance in business; discriminations, in short, which for these very reasons can be granted to a few only at the expense of the remaining customers of the same seller.

The bill is to help the manufacturer to resist the unfair demands of the large buyer. He grants these demands only under fear of losing the business to some other competitor who will grant them if he does not. The more able he is made to treat all customers alike, the better and more efficiently he can organize and conduct his business, and the more easily can he do business at a profit, and at the same time grant his customers, and through them the public whom he serves, a share in his economies through reductions in prices.

The right of the chain stores and mail-order houses to do business is recognized, and the Patman bill would not destroy them unless they depend for their existence upon unfair concessions and discriminations. So far as they are able to perform the sound, economic function of bringing the necessities and adornments of life from the producer to the consumer on a basis of equality with independent merchants, it leaves them with the same freedom as the independent. But anyone familiar with chain-store buying power and its ruthless use need not be told that the chains are already getting any price differentials supported by differences in cost. The evil lies in the fact that they are getting much more. They are getting concessions, discriminations, rebates, and other differentials representing neither savings to the seller nor service value to the consumer public; and they are getting them only by virtue of their power to bludgeon the manufacturer into granting them under threat of loss of the large business which they are able to control. Insidious methods are sometimes employed to render these tactics still more deadly. Spies are placed or subsidized in banks, in the manufacturer's own offices, or in other quarters of confidential information to learn when his notes are falling due, so that a large offer of business or a threat of its withdrawal, with consequent gain or loss of case resources, may be laid on the manufacturer's doorstep at the critical moment. This bill would protect the manufacturer against such victimization.

The report of the Federal Trade Commission contains interesting information as to the methods of the corporate chains in dealing with manufacturers:

> Two of the large chain companies do not place orders with a certain manufacturer because of its refusal to allow brokerage. Another manufacturer reported that it does not sell to two chain companies because they operate commission establishments or buying agencies which demand a brokerage fee on all purchases.
>
> One or two manufacturers, stating that coercion had been employed to force the cutting of prices, said that if the customer has a large order and demands a cut price, the company often is required to meet the demand or lose the business to its competitors. The other stated that the large chains chisel a substantial percentage from the net invoices of every order placed.
>
> One manufacturer reported that some years ago it made extensive sales to a chain, but that the demands of that chain became so excessive that it was forced to stop selling the chain. The chain in question had built up the volume of its purchases to about 40 percent of this manufacturer's output, and then suddenly demanded larger concessions, which the manufacturer was forced to grant or else have its production curtailed to that extent. As a result of this experience the manufacturer built up a trade with small jobbers to avoid being forced to make concessions. Another manufacturer reported that a chain company refused to handle its products unless the chain was given a free-goods allowance. Another manufacturer stated that an arrangement is in effect with one chain company whereby a percentage of net invoice price is rebated. Still another manufacturer was forced to grant concessions to a chain by threat that it would discontinue its purchases and manufacture its own products unless it were granted a preferential price.

Among the evils prevalently found are, first, the grant of quantity discounts exceeding any marginal-cost differences between the customers concerned—that is, unsupported by differences in the cost of manufacture, sale, or delivery resulting from the differing methods of quantities in which such commodities are to such purchasers sold or delivered; second, the payment of brokerage by the seller to dummy brokerage concerns owned and controlled by large buyers and serving the latter's interest; third, the grant of advertising and similar allowances which are either out of relation to the value of any service or facilities rendered in exchange or which, in any case, result in saddling onto the seller the burden of the preferred customers' advertising cost, whereas his smaller competitors must sustain their own.

It is in these three fields, accordingly, that the Patman bill visits its restrictions; and to them those restrictions are carefully limited, leaving full latitude as follows: First, for differentials in prices or terms wherever they furnish an apt vehicle for the transmission of real comparative economies through the channels of distribution to the ultimate consumer; second, in the payment of brokerage wherever the brokerage function offers a real economic service and where it is paid by the one who really benefits from that service to the one who actually renders it in his behalf; third, in the use and compensation of all legitimate advertising and advertising services wherever it is really desired as advertising, and not to cloak the grant of a competitive advantage to one customer as against another.

Fifteen years ago chain stores were doing only 4 percent of the retail business of this country. In 1929 chains did 20 percent; by 1933 the ratio had increased to 25. Independents, which did 77 percent of the total business in 1929, accounted for 71 percent in 1933. The sales of independents decreased 53 percent, whereas the sales of chains decreased 35 percent. In 1933 there were 26,000 fewer independent stores than in 1929.

Before the onslaught of big business, 300,000 independent dealers have gone down, and unless the movement toward centralization is checked, 500,000 more are due to follow them. Eight hundred thousand men, each the master of his own store, men who have spent their lives learning merchandising, who know the peculiar needs of their own customers, who love their communities and have given a helping hand in their development, who cherish the institutions of their country because those institutions have enabled the individual man to develop, to grow, and to achieve—these 800,000 masters must become servants, employees of great chain corporations, cogs in a soulless and conscienceless machine, robots of distribution, receiving and obeying orders from the great city, directing them what to sell, how to sell it, and how much to sell it for. That is the prospect that is due to face the American people.

There is no economy in commercial piracy. It may enable a few men to amass a fortune, but to the great mass of the people it spells a total loss. The consumer is best served when he buys his goods from day to day at honest prices, allowing a fair margin of profit on every item, a profit that will enable the manufacturer, the jobber, and the retailer to continue doing business, competing with others in a fair and honorable way. Whenever a manufacturer or a merchant fails as a result of unfair competition, the loss ultimately falls on the consumer. The bankruptcy of many producers and distributors may mean temporary savings for the patrons of bargain counters; but ultimately it results in monopoly for a few producers and distributors, who will charge the public a price limited only by what the market will bear.

We have enacted laws to prevent railroad companies from giving rebates to favored shippers. We require warehouses to charge every man the same price for storing grain and other commodities. We make telephone companies maintain a uniform schedule of rates. We revoke the licenses of insurance companies if they collect different premiums from different policyholders for the same risk.

Why should not the principle of fair dealing which has been adopted for the protection of those who use the railroad for transportation, the warehouse for storing commodities, the telephone for communication, and insurance for protection be extended to protect those who buy merchandise and those who sell it?

We prohibit discrimination because discrimination lifts the burden off a favored group and places it upon the rank and file. We prohibit it because when some pay less than a fair price others pay more. We prohibit it because discrimination is the mother of monopoly, and H. R. 8442, a bill to amend section 2 of the Clayton Act, is aimed at monopolistic motives.

I find no fault with the principle that the fittest should survive, but I protest with all the emphasis I can command against a misinterpretation of that principle which gives advantage, not to the fittest but to the strongest and the craftiest. Civilization puts the emphasis on right rather than on might. The powers of government should be used to make business civilized.

STATE CONVENTION OF YOUNG DEMOCRAT CLUBS AT DAVENPORT, IOWA

Mr. JACOBSEN. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD to include a speech made by my colleague, Mr. WEARIN.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. JACOBSEN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address of Hon. OTHA D. WEARIN before the State convention of Young Democrat Clubs at Davenport, Iowa, on May 18, 1936:

Mr. Chairman and Young Democrats of Iowa, I am honored and delighted with this opportunity of addressing the State convention of Young Democrat Clubs in my home State. Permit me to congratulate you upon the splendid sessions you have been having here in Davenport. I want to go further than that and say I think this organization represents one of the most powerful factors in the national affairs of the Democratic Party. I say that, not because I am one of your number myself and a member of various of Young Democratic Clubs in my State, but because I really believe what I say.

Before entering upon a discussion of national affairs and the relationship of our group to the important questions of the hour, I want to say that I take particular satisfaction out of speaking in Davenport tonight, located as it is in the Second Congressional District of Iowa, represented in Congress by my able and beloved friend, the Honorable BERNHARD M. JACOBSEN, of Clinton. I will never forget my first meeting with him at Des Moines while I was a member of the Iowa State Legislature, and I recall with satisfaction the many courtesies extended to me by him and his secretary during my first freshman days in Washington and throughout the balance of my service in my present capacity. As you know, Mr. JACOBSEN is a member of the powerful and important Committee on Appropriations of the House of Representatives. His splendid work has brought him the admiration of the leadership and placed him in such a position that he is remarkably influential in our national councils of state.

Again I want to repeat that the invitation to address this splendid group of young men and women of my own age has brought a thrill that one seldom experiences. I have been a candidate for public office for a number of years, and in every instance have felt the powerful influence of the Young Democrats, who have stood by me and fought for me in a splendid manner.

The Nation is fully aware of the influence of the group in campaigns that are past and that are still in the offing. Nothing delights me more than to see members of our group interested in public service and offering themselves at the respective primaries and general elections for public office. Let no one discourage you in your ambitions with the statement that you are still too young. I have been guilty of that so-called damnable crime for a long time but have borne up under its weight without feeling any particular disadvantage from it. If I had the time tonight I would go back, as I sometimes do, and trace the history of world affairs singling out a few of the younger men and women who have participated in important events. I shall say briefly, however, that it is always encouraging for us to remember that Sir William Pitt, one of England's greatest statesmen, was a member of Parliament at 21, Chancellor of the Exchequer at 23, and Prime Minister and practically ruler of all England at 25. Many of the leading founders of this Nation, including Thomas Jefferson and Alexander Hamilton, who represented the two schools of political thought of the time, were still in their thirties when the Declaration of Independence was written and the Constitution of the United States in the process of formation. William Jennings Bryan, who probably had a longer reign of influence in Democratic politics and in national affairs than any other man in American history, was nominated for the Presidency the first time when he was 36 years of age. Theodore Roosevelt was in his early forties (I believe 43) when he succeeded to the Presidency the first time. Today the New Deal has recognized a splendid group of young men in positions that range from the heads of important New Deal agencies to assistant secretaries of the respective departments, including my good and able friend, Charles West, of Ohio, at the present time Assistant Secretary of the Interior.

I would call this fact to your attention: That in the United States Senate and the House of Representatives at the present time is a sizable group of young men which, at the beginning of the Seventy-third Congress, to which I was elected, ranged in age from 28 to 40. Very frankly, as I look back over the achievements of the past two sessions and the contributions that have been made to the welfare of the Democratic Party, making allowances for the seniority of the leadership, I am just as well pleased to be a member of that younger group as I would be if I were a member of the older group.

But to get to the business of the evening: There are just a few things I want to bring you tonight in the way of a message from the Capitol. After 4 years, during which the Democratic Party has been in control of every branch of the Government with the exception of the Supreme Court, we have witnessed a startling rise, a phenomenal improvement, in the morale, and the economic condition of the United States. It is unnecessary for me to refer before this well-informed group of young men and women to the condition of the country in 1932 at the time we succeeded to power, with your aid and assistance. I feel that we should not take the time to discuss in detail the bankrupt condition of American agriculture, suffering from 10-cent corn and 2-cent hogs, the desperate state of American banking, the ruined condition of business as a whole, and the greatest load of unemployment that America has ever carried. Out of that chaotic condition a great President has brought order and progress. At this moment I pay tribute to the great leader of the Democratic Party, Franklin D. Roosevelt.

As I survey the national scene tonight I see a striking change just as you do. I see an improvement in American agriculture that has increased its income from approximately five billions in round numbers to what will probably be in the neighborhood of nine billions this year. I see a restoration of industrial activity which is astonishing. Every day I pick up publications, some of which are hostile to the program, read their vicious and vitriolic editorials, and turn to the business sections to find a series of headlines that read something like this: New building boom forecast by experts; bonds improve on wide front; stock prices advance under market boom; further increase in agricultural income predicted for 1936; steel output best since 1930; automobile sales peak record smashed; oil company net rise for quarter; tobacco industry higher for week, and so on through a long list of similar improvements that cover almost every industrial field of activity.

Now, my friends, in view of the fact that we are young men and women, I feel it might be proper for me to direct my attention a little more to the New Deal of tomorrow rather than the New Deal of today, with which you are just as familiar as I am. Not even the most pessimistic and partisan of our opponents dares to dispute the truth of the headlines I have just quoted to you. You know, as I do, that many factors have entered into securing the results we have sought and gained. The only argument that can be used today is that being promulgated by the vested interests of this Nation in the thought that fear dominates the country as a result of the program. In the first place, can you imagine American business and American people being afraid of the economic improvement that has taken place under the New Deal since 1932? Such a supposition is absurd, but let us pause for a moment and see what the pessimists are afraid of.

A few days ago I met a reactionary on the streets, living in a dreamland of long ago, when personal liberty could be used to the extent of capitalizing upon the very souls of the masses who work for a living with their hands and who form the foundation of America past, present, and future. He told me that American business and the American public are afraid to go ahead because of the acts of the present administration. I said, "What are they afraid of? Are they afraid of having their bank deposits guaranteed up to $5,000, are they afraid of having their homes saved when private financial institutions fail to save them, are the people of America afraid of having the uncertainty of poverty in old age swept aside with social-security legislation, are they afraid of being protected in their dealings in securities, are they afraid of having their national wealth increased with a program of self-liquidating public works, are they afraid of a power-development program to bring cheap electricity into homes that are warped with drudgery, are they afraid of legislation to prevent the overcapitalization of industry that heretofore has resulted in their being fleeced out of millions of dollars for worthless watered stocks and bonds, are the American farmers afraid of 75-cent corn, $1.25 wheat, 10-cent hogs, 14-cent cattle, 11-cent cotton, and 18½-cent tobacco, as compared to 9-cent corn, 20-cent wheat, 2-cent hogs, 4-cent cattle, 6½-cent cotton, and 10½-cent tobacco in 1932, are they afraid of having their farms refinanced at a saving of from 1 to 1½ percent; are they afraid of Federal loans on their agricultural products affording them an opportunity to await the arrival of satisfactory market conditions; is anyone afraid to have the unemployed of this Nation fed through the productive agency of the Public Works or Works Progress Administration until such time as American industry becomes sufficiently rehabilitated to absorb them; is either the American public or American business afraid of the generally improved economic conditions since the advent of the New Deal, as evidenced on the market pages of every newspaper in the United States, be it hostile or friendly to the program?"

Out of today always comes another day, and no one is more interested in that prospect than the young Democrats of America. We have advanced this far, now where do we go from here? As I view the national scene today I think there are three important issues in the welfare of this Nation that we must continue to meet and deal with in the future. American industry, including agriculture, in which we of Iowa are so vitally interested, and all lines of business activity in the United States can be traced directly to these three important items. One is the tariff, another is the national attitude toward the question of electric power, and the third is the matter of employment. Now let us pause for a moment to consider: That great idealist and stanch believer in the principles of democracy, Woodrow Wilson, once said with reference to the tariff, that the whole question and its relationship to business reminded him considerably of the man who entered the city of Boston for the first time, that you know is notorious for its winding streets. He approached a party near the station and said, "My friend, I am a stranger here. Can you direct me to the Commons?" The reply was, "Yes; I can. Take any one of these streets going in any direction, follow it, and eventually you will come to the Commons." So it is with American business. It is all closely associated with the question of the tariff. I shall not trace the history of the tendency of the leadership of the Republican Party throughout over half a century to instill in the minds of the American people the necessity of high protection. They, those leaders, were quite successful in doing it on the ground that the standard of living in America must be protected. They even sold the farmers and the laboring men upon digging down into

their jeans to pay the bill to the industrial interests of this country on the theory, that they were profiting themselves from the added cost.

The rates of protection rose higher and higher until eventually they reached their climax in that monstrosity known as the Hawley-Smoot Tariff Act, saddled upon the country during the administration of Herbert Hoover. Because of the terms of that act other countries were led to adopt similar nationalistic policies and to erect retaliatory tariff walls. When America could no longer sell her goods in the face of such opposition she was naturally forced to curtail her industrial production, which she did, with the subsequent result that workmen were thrown out of work by the millions. Their purchasing power thus destroyed was no longer brought to play to absorb agriculture's surpluses that in turn rose higher and higher, and we had the phenomenal condition in America in 1932 of millions of men and women crying for bread, the graineries of the Nation full to overflowing, and the producers of food commodities bankrupt.

We must remember that the United States is a surplus-producing country with reference to all her major agricultural products. Under those circumstances a tariff on such things, which has been used as a sop to convince representatives of agricultural districts to vote for industrial tariffs has been useless. We cannot expect a tariff on such surplus products to have any effect upon the market price except at such times when seasonal shortages might leave the American market with an inadequate supply of its own products. Our only hope for the future of the American farmer is to stimulate our foreign trade to such an extent that it will absorb our surpluses, or else adopt the temporary program of crop limitation as a permanent policy, which is not in harmony with the principles of the Democratic Party and is being used only at the present moment as a stopgap until we can correct such evils as were forced upon us under the Hawley-Smoot Act and similar atrocities.

In my humble judgment, the only way that we can expect permanent and extensive prosperity for American agriculture and for American industry, which has the same capacity to produce surpluses over and above the needs of the American market, is to develop our foreign trade. We cannot do that on a cash basis without absorbing all the financial resources of the world, which would be a disastrous thing. We cannot extend credit as a permanent program without also exhausting that resource, and thus the only other procedure is to stimulate the trade of this Nation with other countries of the world on the basis of exchange.

Now, I know the opponents to this particular program will say that the importation of foreign products into this country by way of exchange will lower the standard of American living, be a detriment to labor, and otherwise complicate our economic program. In the first place, I want to remind you that the most complete economic collapse we have ever witnessed occurred during the administration that preceded this one, and under the provisions of the highest protective law in the history of the United States. I want to remind you that when we cannot continue to do business for cash or credit indefinitely, which is obvious, we must arrange some program of exchange in order to absorb our production of foods and manufactured articles. It is better that we buy some products and keep our factories running and our farms producing than to witness the unemployment and bankruptcy that prevailed in 1932.

I subscribe to the program inaugurated by that great statesman, Cordell Hull, of arranging reciprocal-trade treaties in which an effort is being made to gradually bring down trade barriers and build up the American market in foreign countries. We have agreed to approximately 10 of them with extremely satisfactory results. Let us take for example the island of Cuba. Prior to the erection of trade barriers Cuba absorbed a large quantity of American lard, a basic commodity of this country, but during the course of the operation of the Hawley-Smoot Act that particular trade sank to the infinitesimal quantity of $818,116 in 1933 as compared to $3,920,270 in 1931. Under the new program adopted by this administration on September 3, 1934, it is again on the rise and reached $3,029,913 in 1935. I could go on through other lists of similar improvements of major agricultural products upon which we depend for prosperity, but time will not permit tonight. I can do little more than discuss the principles involved. If we can sell, and I firmly believe we can, surpluses of farm and industrial products to other countries through the agency of negotiated trade treaties in exchange for products that do not constitute the basic source of American prosperity or products that we do not produce at all it should be obvious to any thinking person that the business condition of this country would of necessity improve. If we can sell surpluses of pork, beef, wheat, cotton, tobacco, automobiles, steel, and other major products abroad we will establish a firm prosperity for American business. Farmers will have more money with which to keep the wheels of industry moving and that means work for the unemployed. A good example today is the renewed activity of farm machinery factories during the past 18 months.

Now, I know sometimes the ballyhoo artists like to get on the platform and weep crocodile tears because a boat load of Argentine corn has been delivered at San Francisco or Baltimore, Md. There has been an increase in the last 2 years of imports of Argentine corn, due to what? Due simply to the fact that the drought of the summer of 1934 occasioned a shortage in our own supplies that has not yet been entirely absorbed by our own production. When it has the Argentine will no longer be able to compete with our product, any more than it has in the past. One of the major reasons for which is the matter of its quality. It is not of such a character that it can be used in commercial activities with the exception of a limited field.

Just at the moment the dairying interests are fearful lest they are going to be destroyed under the terms of the Canadian Treaty. They must remember, however, that the importance of the imports under the terms of that treaty have been greatly magnified. For instance the annual importation of butter from Canada will only amount to one-tenth of 1 percent of the annual amount produced in this country. All of which brings me to this conclusion: The young Democrats of this Nation should be vitally concerned with the continuation of a broad-minded program for trade development in the United States, under the terms of reciprocal-trade treaties enacted by the present administration for the purpose of stimulating our trade with the world. That policy can under the able management of Secretary of State Hull bring about the maximum of activity and, thereby, the employment of men who have been thrown out of work under the program of the Hawley-Smoot Tariff Act.

The other important question that I desire to bring to the attention of the young Democrats of this convention is the issue of the development of power in the United States, which has become of large concern to the welfare of every man, woman, and child in the Nation.

Investigations of the Federal Trade Commission have revealed the fact that the corporate interests have been guilty of selling millions upon millions of dollars of watered stocks and securities to the American public that have pyramided corporation upon corporation, adding costs in the way of salaries for Hopsons and his kind, interest on securities back of which there was no real value, and other costs that have resulted in the unsuspecting public having to pay excessive rates for their electrical energy which has kept down consumption of the product and denied to untold millions the godsend of relief that comes from having the drudgery of homework, farmwork, and heavy labor lifted from their shoulders by that all-important commodity. In a recent private investigation of my own I found that consumers in our district are paying as much as 18 and 20 cents per kilowatt-hour for electricity. The power companies will dispute that and say that their rates are 4, 6, and 8 cents, but I say the total cost to the consumer is represented by the rate per kilowatt-hour and other charges including service. The Tennessee Valley program has brought electricity to the consumers in that territory at striking reductions. Poor people who could never afford the commodity before are now in a position to use it. I find, for example, that a man in my territory who paid $5.51 for 40 kilowatt-hours could have bought the same amount of current under the Tennessee Valley program for $1.20. You can see from this that he could either reduce his total annual charges under such a program to a marked extent or for the same amount of money he could bless his wife and himself with the advantages of other needed conveniences. I selected this single example from a large number in my files because of my lack of time tonight. I say to this assembly of young Democrats that you should have the courage to stand up against the powerful influence of the moneyed interests of the Nation who stoop to any method to intimidate their opponents and fight for the advancement of the power program of this administration that will bring rural electrification and electrification of homes in towns and cities at prices that the people can afford to pay.

As one of the solutions of our problem in Iowa I have offered the United States Congress a Missouri Valley power development project that would be similar to the T. V. A. That great statesman, Senator GEORGE NORRIS, of Nebraska, has offered one for the whole Mississippi Valley which is commendable. The results would be similar to what I described a moment ago with reference to the typical example of a consumer's charges. Until such time as we can achieve that type of project, it will be necessary for us to advance under the Rural Electrification Administration through the agency of cooperative rural lines, made possible through 100-percent loans to such groups. Unfortunately, the Washington set-up of that group has not had the kind of cooperation from the heads of the extension department in Iowa that they should have had. County agents throughout the State have, however, endeavored to cooperate to the best of their ability and with their help the program is advancing. You can expect some of the newspapers of this State to fight me on this program either openly or through a more subtle method of opposing me upon some other issue. If you find such a publication swinging into action against me turn to its advertising section and you will probably find some large, remunerative ads paid for by the power companies. With reference to this issue I will say again to the young Democrats at this convention that it constitutes one of the major programs of the future that will be a godsend to the common people. It is your duty and mine to stand behind Franklin D. Roosevelt and see that it marches forward.

The third major problem which will be with us for years to come as a result of the economic chaos into which we were plunged by the previous administration is the matter of unemployment. Millions of men were out of work when we took control of the Government. Right here and now, I want to say it is unfortunate that we have been forced to spend so many millions to insure them of food and clothing, but what is more unfortunate is the fact that a condition ever existed in this rich Nation that made it necessary for us to spend those millions to keep them from starving and freezing.

We have advanced a program of public works with the thought in mind that in addition to employing the men who were unemployed we could at the same time give to the Nation a constructive series of improvements that would increase the natural wealth and the values of the respective communities. Now the small carping critics who do not have the mental capacity to view this program on a national scale can select some individual project, and it is impossible for so vast a program to be perfect in every respect, and condemn it perhaps with some justification; but we, as young Democrats, should impress upon the public that it is the program as a whole that counts and not a specific mistake that has been made. I used to say to the audiences in our congressional district with reference to it that my wife was, generally speaking, an excellent cook. Once in a while she will make some pancakes for breakfast that are terrible, but I have never divorced her because of that individual mistake and am not going to, because, as I said before, generally speaking she is an excellent cook. That analogy will apply to the whole program about which I am talking at the moment. The entire situation, of course, all traces back to the principal point of my discussion, namely, that the trade of America is of the utmost importance. Through it we hope and have reason to believe that the prosperity of agriculture and industry will be restored. When that time comes the greater portion of the people who are out of employment will again be carrying their dinner pails to work and their wives will be singing happily in their little homes. While we are in the process of working with these major things in the future, and their advancement will rest entirely in the hands of men and women like yourself, of our own age, we will couple with them such other things as contribute to the permanent welfare of the country that I have already mentioned in the way of old-age pensions, unemployment insurance, regulation of stock exchanges and other things for the protection of the general public.

As I look out over this assembly of young men and women I am encouraged. I feel confident after watching the people of my own generation in action in public office that we will be able to meet and cope with these problems and that America, thank God, will continue to live.

THE COMING ELECTION

Mr. HOOK. Mr. Speaker, I ask unanimous consent to extend my own remarks by including a radio address I gave over a station in Detroit, Mich.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. HOOK. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following radio address delivered by me over Station WMBC, Detroit, Mich., May 18, 1936:

Next November the people of the United States will be called upon again to make their choice of a President and Congress. We have been told that the coming election is the most important since the election of Lincoln in 1860. This is true. Never since the days of the Civil War have the people of our Nation been faced with issues more fundamental than those presented to us today. We are entering a new age and policies are to be chosen to mark the course we are to follow in the future.

This much we have all learned from the lessons of the post-war decade of reckless and unsound prosperity and the bitter days of depression and privation which followed the collapse of the boom; that no longer can there be permitted in America unbridled exploitation either of natural or material resources or of human beings. We have learned that no longer can we afford to permit eight-tenths of 1 percent of our entire population to receive over 20 percent of the national income, while 60 percent of our families receive less than enough to supply them with the basic necessities of life. We have learned that the problem of unemployment resulting from technological efficiency and from the maturing of our economic system cannot be solved by a refusal to recognize that it exists. We have learned that America as a nation cannot afford to permit her millions of farmers to labor year after year for a return less than the cost of production. We have learned, in short, that there was something radically wrong with the method by which the fruits of our civilization were distributed among our people.

The American people have thought deeply during the past half dozen years, and I am confident that no return to the pre-depression system of inequality, privilege, and exploitation will be permitted. The American people in 1932 demanded and obtained an end to a system that bred insecurity and they will in the coming election again demand that our political parties face the facts of our economic and social life.

What are these facts? Briefly these: We are a Nation providentially provided with all essential material resources and magnificently equipped to produce an abundance of those goods and services which are required for a decent standard of living. So long as millions of our people are in want there is no place in America for idle men or idle factories, for America is technically and materially equipped to produce plenty for all. It is up to us to see that plenty is produced and distributed for the benefit of all the people of the Nation. It is up to the leadership in our Nation, both industrial and governmental, to so order our economic life that opportunity will be maintained for our youth, jobs for our laborers, adequate prices for our farmers, and security for our aged and those who are physically handicapped.

These are the facts which condition the thinking of our new age. They place upon the political parties of our Nation a grave responsibility, for it is the peculiar function of political parties in a democracy to formulate and define the issues as to choice of policy in order that the electorate may choose wisely. The American people are alert to the significance of the coming election and they are demanding that our parties face the facts and declare their position in positive, clear, and intelligible terms. There must be no equivocation, no weasling, no evasion. Any party that refuses to face our social and economic problems and refuses to give to the people a program for dealing with these problems in a sham and a pretense, a mixture of hypocrisy and cowardice.

I pause to ask the question as to what answer the leaders of the Republican Party have given to the problem of maldistribution of wealth, to the problem of unemployment, the problem of social and economic security? The Republican Party has proposed no positive program. The course of the G. O. P. has been one of negation and of empty criticism of the constructive achievements of the New Deal. The Republican leaders have nothing to offer the Nation except a return to the days of 1929, a return to the conditions of exploitation and insecurity, to those days of growing unemployment, financial debauchery, and depressed agriculture.

The leaders of the G. O. P., subsidized by funds from those who profit by the law of the jungle, have talked much but said nothing of a constructive nature. True, I'll admit, even the Republicans find it difficult to criticize some phases of the New Deal. The Republicans very generally voted in favor of the Social Security Act and the Federal Housing Administration Act. They raise no objection to the C. C. C. program. No fundamental objections has been raised against the policy of soil conservation. Herbert Hoover in one of his recent speeches even went so far as to claim credit for having originated the present farm program. The fact is, of course, that for 12 long years from 1920 to 1932 the leaders of the Republican Party resisted with every means at its disposal the enactment of a farm program that would be of real benefit to the farmers of this Nation. Yes; the Republican leaders now, after the Democratic New Deal has pointed the way, accept the necessity for the protection of our farmers by the National Government.

I could point out numerous instances of our Republican friends who have attempted to capitalize on the popularity of New Deal reforms—our junior Senator from Michigan [Mr. VANDENBERG], for instance, who speaks in such glowing terms about the New Deal establishment of protection for our bank depositors. I have but one question to ask of these Republican leaders who now recognize that reform in the interest of the people was long overdue in 1932: Why did not they when in power during the first 4 years of the depression take the initiative in proposing the reforms which they now support? The answer is, of course, that the leaders of the G. O. P. are controlled by those who supply the funds for the Republican Party, the bankers of Wall Street, the Du Ponts, the United States Chamber of Commerce, the utility companies, and others of our industrial and banking fraternity. These men wanted no reform, and the G. O. P. was helpless and still is. The trouble with the Republican Party is that it has been dying of sleeping sickness.

The New Deal promised relief for those millions of our people who were brought face to face with starvation by the Hoover depression. That relief was and is being given. The New Deal promised to take steps to set into operation the forces of recovery. This job, too, has been done and better days are at hand. The purchasing power of the people has been raised and factories, mines, and mills long idle are again in operation. I need not in Michigan point out the evidences of our remarkable recovery during the past 3 years.

The income of the farmers of our Nation has been raised by $2,000,000,000 and the farmers are again buying automobiles. For every 10 automobiles registered in 1932, there are 42 registered today. Automobile production is up by 70 percent in the last 4 years. New plants are being built in many Michigan cities, and for the first time since the Hoover depression factories are running behind in their orders. Employment in the automobile industry is up to 98 percent of what it was in 1929. It is estimated that over 4,500,000 cars will be produced this year, 90 percent of them in Michigan. In a sense, more than three-fourths of the people of the United States travel with their feet on a part of Michigan, for the floors of 90 percent of their cars and the chassis beneath are made in Michigan factories, by Michigan workers, largely from Michigan iron and timber. Increased automobile production has stimulated activity in the iron mines and the lumber industries. We are proud that our great Michigan industry is well back to normal, and as a Democrat I am proud that the New Deal has made possible the reemployment of thousands of men who were without work.

Michigan farmers, too, have come back. During the Hoover panic year of 1932 Michigan farmers received as the total for all livestock and crops produced but $118,567,000. In 1935, after 3 years of the New Deal, the total cash income for the farmers of our State had increased to $177,000,000, an increase of almost 50 percent. In 1932 the Michigan farmers were crushed beenath a burden of debt and taxation. Since the Democratic administration came into power, taxes on farm property have declined 60 percent and

foreclosures have dwindled. There is every indication that progress will continue toward full recovery in 1936 with the reelection of that great and glorious leader, Franklin D. Roosevelt.

One of the outstanding achievements in Michigan has been the increase of alfalfa acreage, in which Michigan now ranks second in the Union, an increase from 75,000 acres in 1919 to 1,000,000 acres in 1935. Michigan ranks second in the production of sugar beets, increasing her acreage 100 percent from 1931 to 1935. Michigan ranks first in the production of field beans, the value of this crop increasing from $5,363,000 in 1931 to nearly $10,000,000 in 1935. In potatoes, Michigan took second rank in the Nation in 1935 with a crop valued at $12,492,000. Before the New Deal in 1931 the potato crop brought Michigan farmers but $4,331,000. Michigan's cherry crop increased in value from $608,000 for the Republican panic year of 1932 to $1,622,000 in 1935. Michigan leads in cherry production; Michigan leads in onion production; and we are the first pickle-producing State in the Union. Does this look like the reduction program that the Republicans cry about? These are the facts that Brucker criticizes. Oh, let him spread the gospel of truth, not lies.

I repeat, Michigan farmers have come back, our acreages have increased, the value of our crops has multiplied, and I submit that the remarkable recovery of our farmers was made possible by the farm program of the New Deal. The junior Senator from Michigan, the Honorable ARTHUR H. VANDENBERG, has seen fit to criticize the New Deal farm program. I ask him to explain the recovery of the Michigan farmers. Senator VANDENBERG has stated that the Democratic program has reduced farm production. I ask him to look at the statistics for Michigan. Senator VANDENBERG would like to have the farmers of Michigan go back to the days of 1929, to live again those days of misery and hopelessness. Our junior Senator should hang his head in shame for his picayunish criticism of real achievement. His criticism is a typical Vandenberg vagary.

Sanctity of our courts and freedom of the press, and criticism of the Roosevelt Democratic agricultural program are the main themes of Senator VANDENBERG, who apparently desires to implant in the minds of his hearers that these paladiums of liberty have in some way been endangered by the New Deal in bringing the Nation from the depths of the Hoover panic of 1932 to the present state of well-advanced recovery. The junior Senator from Michigan is an orator of the old school, the very epitome of pomp and circumstance as he paces back and forth upon the Senate floor—a champion full worthy of the pelf and power faction of the Old Guard. Hamilton is his ideal, about whom he has written two books—Hamilton who opposed the farmers and who looked upon the people collectively as a dangerous beast.

What alternative to the program of the Democratic administration which has made possible this recovery do the G. O. P. leaders offer? None. They criticize the New Deal for spending money and unbalancing the Budget. They forget that the Budget became unbalanced under Herbert Hoover, and they forget too that while Mr. Hoover did nothing to remedy conditions, President Roosevelt's administration has brought about an increase in the income of our people from thirty-five billion in the last year of the Hoover administration to sixty-five billion in the present year of Roosevelt recovery. The Budget of the Nation may be out of balance as to emergency expenditures, but the budgets of millions of our people have for the first time since the days of Hoover Republican depression been brought into balance.

Republican leaders charge that the New Deal has regimented the lives of our people, that our traditional liberties are about to be destroyed, that the Constitution has been perverted and democratic institutions imperiled. Our junior Senator, Mr. VANDENBERG, has often put on his best oratorical shows in criticism of this nature. Now, I ask you from what source has come this hue and cry about the loss of liberty? Does the man who has been kept from starvation by a Democratic relief program and now has a job because the Democratic administration has made possible recovery make the complaint? No; of course not. Labor and agriculture have not complained. Those who do complain are those whose unjustified control of the economic life of our Nation has been broken. Few people will see anything pathetic in one of the millionaire Du Ponts crying as to loss of liberty; the people know that to the Du Ponts and others of their breed liberty has meant freedom to exploit our workers and farmers. The Democratic Party is the champion of liberty not for the Du Ponts or the utility companies, but for the great mass of our people. The New Deal has recognized that without a basis in economic security and opportunity there can be no liberty. Economic enslavement under the old deal of the Republicans was an absolute denial of the benefits of civil and political liberty. The New Deal has broken the dominion of the ruling economic class in America and naturally has encountered the wrath and the propaganda of those who would block reform. They speak through their mouthpieces in the Republican Party. They refuse to meet our social and economic problems squarely; and hiding behind the Constitution, they attempt to frighten the people with talk about an unbalanced Budget. The Republican leaders refuse to face the facts, because facing the facts would expose the emptiness of their position.

It is well understood that reform under the New Deal will continue. It is not proposed that America will be remade, but it is proposed that conditions in America will be so ordered that the goal of economic and social security for all will be reached.

The farm program is well under way, and American farmers for the first time since the World War can feel secure. The problems of labor have not been so completely solved. Technical efficiency in industry is constantly making necessary the employment of fewer and fewer men. It is estimated that industrial production has advanced 51 percent since January 1, 1933, yet unemployment has decreased but 30 percent. This means simply that to produce the same volume of goods today, fewer men are needed than were employed in 1933. Now it stands to reason that unless the worker's buying power keeps pace with the volume of production we cannot prosper. Our men must be given jobs, and it shall not be by scrapping the efficiency of the machine production. We cannot expect America to continue as a Nation with ten or more millions of our men unemployed. These men are red-blooded Americans with the same birthright as other American citizens. They must be given an opportunity to provide for themselves and their families. Among the rights of the workers is that paramount right to a job, and this right must and shall come before the right of privileged wealth.

Two proposals, mutually dependent, present themselves for our consideration. First, the income of our people must be raised so that a greater volume of goods can be purchased; and secondly, this increase in purchasing power can be best obtained by the employment of all of our people at adequate wages. This program entails a shorter workweek for the major industries with no decrease in wages, and perhaps with some raising of wages. It means the elimination of child labor. It means the giving of opportunity for vocational and higher education to our youth for a longer period than is now possible for most of the young people. This program means the elimination of the sweatshop and of starvation wages. It means the establishment of minimum-wage standards. It may mean a decrease in the rate of dividends and interest for a few corporations, but it will mean a greater security and a more abundant life for the millions of our workers and farmers. This program means the organization of labor into unions of their own choosing for the purposes of collective bargaining. It means the establishment of unemployment insurance, and I might say incidentally that our Republican Governor Fitzgerald has not seen fit to have the great industrial State of Michigan enact a law that will bring our workers within the scope of the New Deal Unemployment Insurance Act.

We need a Democratic Governor and a Democratic administration in the State of Michigan to properly institute and administer that program in sympathy with the national law and the New Deal.

Such a program means the establishment of old-age assistance for those workers who reach an advanced age. A beginning has been made in this program through the Railroad Retirement Act for the railway workers and through the Social Security Act for the people generally. The present old-age assistance program calls for Federal-State cooperation, the Federal Government matching the dollars paid by the States. The Federal Government has left the formulation of rules as to who should be eligible for assistance very largely to the States. I am sorry to state that our Republican administration, led by Gov. Frank D. Fitzgerald, has not given the State of Michigan nor the aged workers of Michigan an adequate old-age-pension law. Eligibility rules for qualification for assistance under the present law in Michigan make necessary in effect a pauper's oath. Small property holdings are to be turned over to the State. The amounts paid are pitifully inadequate. Now, it is recognized that Utopia cannot be gained solely through old-age-security legislation. But the right kind of old-age assistance can go far toward giving to our aged some recompense for a lifetime of toil and hardship. We must not treat those who have become old as if they deserved no consideration. Those workers who are old today made possible with the work of their hands and brains the efficiency of our society today. They must not be forsaken in the twilight of their lives. They must and shall be taken care of adequately and decently. The Michigan old-age-pension law must not above all require a pauper's oath, and it must not keep the aged on the verge of starvation.

Governor Fitzgerald's administration has failed, and I call on the voters of Michigan to cast their ballots next November for the party that has sponsored and begun our old-age-assistance program. That party is the party of President Roosevelt. Some Republican leaders of Michigan have of late been talking much about old-age assistance. I wonder why these gentlemen did nothing about the problem before 1932, when they had control of the National and State Government. The answer is, of course, that these gentlemen resisted reform as long as possible, and I submit that they are not fit persons to undertake the administration and development of a program to which fundamentally they are opposed and which they accept now only because it has become inevitable.

The issues facing us today have broken across traditional party lines. Under the leadership of President Roosevelt, the liberals have gathered in a final march against the forces of privileged wealth and power. Once again the forces of reaction using the Republican Party as their vehicle are throwing their resources into an effort to block reform. The coming election is clearly a battle between the rights of the people on the one side and the privileges of wealth on the other. Our fight is a fight for social justice, a fight for freedom of opportunity for the people of America, and the voters of Michigan must elect men to the Congress of the United States who are men of honor, independence, courage, and honesty.

This Nation does not want dictatorship, and it will not have dictatorship so long as the Representatives in Congress are free and honorable men. All too often we have had men in Congress

who have jumped at the crack of somebody's whip. No Representative can be worthy of the trust of the people who submits to the dictation of any selfish group, organization, or individual. He must be a man who will stand on and be bound by the principles of justice and equity as he sees them. Social justice will be obtained in this country only by maintaining the freedom of government, freedom of expression, and freedom of the ballot box. Democratic institutions will perish in America only when the representatives of the people are controlled by individuals or organizations, political or economic, and lose their identity as free agents to carry out the will of the people.

Founded in American tradition by those men and women who braved the wilderness and established our civilization is the precept that America shall always be a haven for the poor and oppressed, a land of opportunity where one may labor in security. The pioneers of America began the quest for social justice over a century ago. In our complex industrial age we must, in the spirit of the pioneer, continue their struggle until at last we have achieved a nation in which poverty and want are unknown.

GEN. CLARENCE R. EDWARDS

Mr. SMITH of Connecticut. Mr. Speaker, I ask unanimous consent to extend my own remarks by including a speech delivered by the gentleman from Massachusetts [Mr. CONNERY].

The SPEAKER. Is there objection?

There was no objection.

Mr. SMITH of Connecticut. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following speech of the gentleman from Massachusetts [Mr. CONNERY] at the dedication of the Gen. Clarence R. Edwards Bridge, between Lynn and Revere, Mass., on May 17, 1936:

I deem it an honor and a privilege, today, to be chosen by my own Yankee Division comrades to pay my humble tribute to the "Daddy" of the Twenty-sixth Division, American Expeditionary Forces, Maj. Gen. Clarence Ransom Edwards.

On April 20, 1936, I introduced in the House of Representatives House Joint Resolution 570. The resolution reads as follows:

"*Resolved, etc.*, That the President of the United States is hereby authorized to award posthumously in the name of Congress a Distinguished Service Medal to Maj. Gen. Clarence Ransom Edwards, who died February 14, 1931, after having organized the Twenty-sixth Division and commanded it with distinction during all but 18 days of its active service at the front. The high qualities of leadership and unfailing devotion to duty displayed by him were responsible for the marked esprit and morale of his command. To his marked tactical ability and energy are largely due the brilliant successes achieved by the Twenty-sixth National Guard Division during its operations against the enemy from February 4, 1918, to November 11, 1918."

The foregoing House joint resolution was reported favorably to the House by the House Military Affairs Committee on May 13, 1936, and I confidently expect it to become a law within the next few weeks.

The official record of the military service of General Edwards, as given by the War Department, is as follows:

"Clarence Ransom Edwards: Born in Cleveland, Ohio, January 1, 1859. Appointed from Ohio. Cadet, United States Military Academy, September 1, 1879. Second lieutenant, Twenty-third Infantry, June 13, 1883. First lieutenant, First Infantry, February 25, 1891. Transferred to Twenty-third Infantry, July 20, 1891. Major, Assistant Adjutant General, Volunteers, accepted (to rank from May 12, 1898) May 28, 1898. Vacated, October 1, 1899. Captain, Twenty-third Infantry, July 30, 1899. Assigned to Tenth Infantry, January 1, 1899. Lieutenant colonel, Forty-seventh United States Volunteer Infantry, Volunteers, accepted (to rank from May 12, 1899), October 1, 1899. Mustered out of Volunteer Service, July 2, 1901. Brigadier general, Chief, Bureau of Insular Affairs, accepted (to rank from June 30, 1906) July 2, 1906. Reappointed brigadier general, Chief, Bureau of Insular Affairs, June 30, 1910. Brigadier general (to rank from May 12, 1912), August 24, 1912. Major general, National Army, accepted (to rank from Aug. 5, 1917), August 22, 1917. Honorably discharged, major general, National Army, only, June 31, 1920. Major general (to rank from Mar. 5, 1921), April 27, 1921. Retired from active service, December 1, 1922. A. M., St. John's College, New York, 1891; LL. D., Middlebury College, Vermont, 1919; LL. D., Trinity College, Connecticut, 1919; LL. B., Syracuse University, 1920.

"SERVICE

"He served with his regiment at Fort Union, N. Mex., from September 30, 1883, to June 2, 1884; en route to and at Fort Porter, N. Y., to August 29, 1884; commanding the guard at the grave of President Garfield, Cleveland, Ohio, to July 1, 1886; at Fort Porter, N. Y., to (on leave of absence June 11 to Oct. 9, 1889) May 10, 1890; while at Fort Porter he served as post adjutant and treasurer in addition to his other duties. On duty at Fort Davis, Tex., post adjutant and range officer to December 15, 1890; professor of military science and tactics at St. John's College, Fordham, N. Y., to October 31, 1893; on duty in The Adjutant General's Office, Washington (M. I. D.), to November 1, 1895; garrison duty at Fort Clark, Tex., commanding Company H, Twenty-third Infantry, in charge of post exchange and of post gardens, also post treasurer to August 27, 1896; quartermaster, Twenty-third Infantry, commissary and ordnance officer to April 12, 1898; at New Orleans, La., regimental quartermaster, and ordnance officer, and acting adjutant general of provisional division, organized at that place to (resigned as regimental quartermaster May 12, 1898) May 23, 1898; adjutant general, Fourth Army Corps, at Mobile, Ala., Tampa, Fla., and Huntsville, Ala. (also mustering officer, Fourth Army Corps, from July 26 to Aug. 14, 1898), from May 25 to September 15, 1898; on sick leave of absence to December 4, 1898; adjutant general, Fourth Army Corps, to January 4, 1899, when he was ordered to report as adjutant general of the Department of Habana, Cuba; while en route to Habana, Cuba, via Washington, D. C., he was assigned to duty as adjutant general on the staff of Major General Lawton January 6, 1899.

"Although lieutenant colonel of the Forty-seventh Infantry, United States Volunteers, he never served with that regiment, having been on the staff of General Lawton up to the time of the latter's death, December 1899. Relieved December 18, 1899, and accompanied remains of General Lawton to San Francisco by transport, thence by rail to Washington, D. C., and on duty in the office of the Secretary of War as Chief of Division of Customs and Insular Affairs from February 12, 1900.

"While in the Philippine Islands he served in the following operations: General Lawton's Santa Cruz campaign; battle of Santa Cruz, April 9 and 10; battle of Pagsanjan, April 11, 1899; and minor engagements a few miles up the river from Pagsanjan, where, in command of a battalion of the First North Dakotas, he recovered four steam launches held by the insurgents; battle of Pacte, April 12, 1899.

"General Lawton's San Isidro campaigns; battle of Novaliches, September 22, 1899; first battle of San Rafael, April 29, 1899; second battle of San Rafael, May 1, 1899; battle of Balinag, May 2, 1899; battle of San Isidro, May 17, 1899.

"General Lawton's expedition to Province of Morong, June 2 to 8, 1899; battle of Cainta, June 3, 1899; engagement at Taytay, June 4, 1899.

"General Lawton's expedition to Province of Cavite, June 10 to 20, 1899; battle of Guadalupe Ridge on the advance from San Pedro Macati to the east or rear of Paranque; also engagement opposite Las Pinas, June 10, 1899; battle of the Zapote River, June 12, 1899; repelling attack of insurgents, extending from Imus down the river, enveloping Bacoor, October 2 and 3, 1899; repelling second vigorous attack of insurgents on same lines, which finally resulted in our forces driving off insurgents, pursuing them to and through Binacayan.

"On duty in the office of the Secretary of War, as Chief of Division of Customs and Insular Affairs from February 12, 1900, to July 1, 1902; colonel, Chief of Bureau of Insular Affairs, Washington, D. C., to June 30, 1906; and brigadier general, Chief of Bureau of Insular Affairs, to August 24, 1908.

"Commanding the post of Fort D. A. Russell, Wyo., from October 3, 1912, to February 26, 1913; commanding a brigade on the Mexican border to January 1914; en route to Hawaii and commanding brigade to December 14, 1914; en route to the United States to December 14, 1914, and to the Canal Zone to January 6, 1915; commanding the troops in the Canal Zone to April 16, 1917; in and en route to and from the United States January 31 to March 15, 1916; en route to the United States to April 23, 1917.

"He was commanding the Northeastern Department, with headquarters at Boston, Mass., May 1 to August 1917; commanding the Twenty-sixth Division at Boston, Mass., from August 22 to October 11, 1917. Rejoined the division in France November 11, 1917, and was commanding that division in France to October 24, 1918, except from November 25 to November 30, 1917.

"He participated in the following major operations: Champagne-Marne, Aisne-Marne, St. Mihiel, and Meuse-Argonne offensives.

"En route to the United States from November 5 to 14, 1918; on leave of absence to December 1, 1918; commanding the Northeastern Department, Boston, Mass., to August 31, 1920; commanding the Second Brigade, Camp Taylor, Ky., to September 8, 1920; commanding the Second Infantry Brigade, Camp Dix, N. J., to July 1, 1921; commanding the First Corps Area, Boston, Mass., to the date of his retirement.

"He was awarded three silver star citations for gallantry in action against insurgent forces at (1) Santa Cruz, Luzon, Philippine Islands, April 10, 1899; (2) San Rafael, Luzon, Philippine Islands, May 1, 1899; (3) near Guadalupe Ridge, Luzon, Philippine Islands, June 10, 1899.

"General Edwards received the following foreign awards: French Croix de Guerre with Palm; French Legion of Honor, Commander; Belgian Order of Leopold, Commander; Polish Order of Haller's Swords, Chevalier.

"General Edwards died February 14, 1931, at Boston, Mass.

"By authority of the Secretary of War:

"E. T. CONLEY,
"*Major General,*
"*The Adjutant General.*"

Col. O. L. Spaulding, Chief of the Historical Section of the Army War College at Washington, at my request, has given me the following information concerning the Twenty-sixth Division as to the number of days spent at the front and in foreign service:

APRIL 2, 1936.

Hon. WILLIAM P. CONNERY, JR.,
House of Representatives, Washington, D. C.

MY DEAR MR. CONNERY: In response to your telephonic request for information I furnish the following statistics as regards the four significant divisions concerned: Total time in foreign service,

1 year 7 months 2 days; total time at front, 193 days, 148 in quiet sector, 45 days in major operations and active sectors.

The above statistics were compiled from The War With Germany, by Col. L. P. Ayers; the Order of Battle of United States Land Forces in World War, A. E. F., compiled by the Historical Section, Army War College, and Division History Charts, compiled by the G–3 Section of the General Staff, G. H. Q., A. E. F.

I trust that this information will be of service to you.

Very truly yours,

OLIVER L. SPAULDING,
Colonel, Field Artillery,
Chief, Historical Section, Army War College.

It may be interesting to some of my listeners to know just what the words "quiet sector" in the foregoing report meant as pertains to the Twenty-sixth Division:

The laconic bulletins sent out daily to the War Department by the Commander-in-Chief, General Pershing, concerning the division, are also interesting as throwing light on life in a "quiet sector." Following are examples from the communiques of June:

"June 1, 1918, Twenty-sixth Division. May 31 to June 1, noon to noon. General impression quiet. Total of hostile shells, 1,060. Enemy apparently using a 15-centimeter heavy field howitzer.

"June 16, 1918. Twenty-sixth Division, June 13 to June 14, noon to noon; there was little activity of any description. The hostile batteries used about 1,000 shells of which 250 contained gas. The enemy planes were fairly active, a total of 21 being seen. Of these, 13 were within our territory. Our patrols were very active and on several occasions drew rifle and grenade fire from the hostile trenches.

"June 23, 1918, Twenty-sixth Division. June 20 to 21, noon to noon; hostile artillery still active, but less so than during last few days. Intermittent shelling of the entire sector throughout afternoon and evening with heaviest fire concentrated on right and center. On the left, Xivray bombarded with high explosives and gas. Total number of shells used, 1,800.

"June 24, 1918: Twenty-sixth Division, June 21 to 22, noon to noon; the day quiet except for a rather heavy harrassing fire executed by the hostile batteries. A total of 1,450 rounds, mostly small caliber, including a little gas, were used by the enemy. The fire was distributed over most of the sector.

"June 26, 1918: Twenty-sixth Division, daily average 1,800 rounds. Maximum for 1 day 6,000 rounds, fired on June 19. Minimum for 1 day 300 rounds, fired on June 21."

The official records of the War Department disclose the fact that 1,730 men were killed in action and 10,568 men were wounded while serving in the Yankee Division during the World War.

"Arriving in the autumn of 1917 the division went through the prescribed course of instruction until early in 1918, when, brigaded with the French, it entered the line for a month and a half's further training north of Soissons, in the Chemin des Dames sector. It was withdrawn for rest when the German offensive of March 21 necessitated its immediate return to the line in the La Reine and Boucq sectors, north of Toul. Here it had two important engagements—one in the Apremont Forest, where it repulsed with loss a heavy German raid, and at Seicheprey, where casualties on both sides amounted to approximately 2,000 men.

"On July 18 the division was thrown into the battle between the Aisne and the Marne, advancing in 7 days more than 17 kilometers against determined enemy opposition and capturing the towns of Epieds, Trugny, Torcey, Belleau, and Givry.

"It next took part in the American offensive of September at St. Mihiel. Operating under the Fifth Corps in the Rupt and Troyon sectors, north of St. Mihiel, it captured Bois-des-Eparages, Hattonchatel, and Vigneulles.

"Later, during the Meuse-Argonne offensive, it attacked northeast of Verdun and aided in the storming of Etrayes Ridge, capturing Bois-de-Belleu and the Bois d'Ormont, one of the most formidable heights in that region. The division was in this sector when the armistice called a halt to active operations."

General Pershing in the foregoing letter neglected to mention Flirey and Xivray in the Toul sector, while in that sector it was an interesting fact that the enemy attacked each individual infantry regiment of the division at separate places and were repulsed in each engagement. They attacked the One Hundred and First at Flirey, the One Hundred and Second at Seichprey, the One Hundred and Third at Xivray, and the One Hundred and Fourth at Apremont. In all of these engagements the One Hundred and First, One Hundred and Second, and One Hundred and Third Artillery played magnificent parts in smashing the enemy attacks.

On all of the fronts where the division was engaged the separate units of Engineers, supply trains, machine-gun battalions, Signal Corps, and liaison detachments served their beloved division with zeal, untiring energy, and heroism.

At Humes, on Christmas Day 1918, President Wilson visited the division and reviewed detachments of it.

The general impression made by the troops on this occasion may best be summarized by the telegram of the Commander in Chief to General Hale:

G. H. Q., *December 26, 1918.*

C. G., TWENTY-SIXTH DIVISION:

I desire to congratulate the division on the excellent work of the battalion which represented it as the guard of honor at Chaumont, on the fine appearance and discipline manifested by the men during the visit of the President of the United States to the billets of the division, and on the splendid appearance made by the detachments representing the division in the review for the President at Humes, France, December 25, 1918.

PERSHING.

We had only been in the trenches in the Chemin des Dames sector a short time when General de Mard'huy, in whose French Army Corps we were serving at that time, issued a general order.

The letter of compliment from the French corps commander, the first to be received by the division, conveyed under its official phrases a very real and personal affectionate regard. Too much emphasis cannot be placed on the mutual cordiality and esteem which from the very beginning marked the relations of the division's officers and men with their French associates. The letter follows:

ELEVENTH ARMY CORPS,
STAFF HEADQUARTERS,
March 15, 1918.

GENERAL ORDERS, No. 7

We regret that our comrades of the Twenty-sixth Division should leave us in order to fulfill their tasks elsewhere.

We have been able to appreciate their bravery, their sense of duty and discipline, also their frank comradeship; they carry away our unanimous regrets.

General Edwards has been pleased to consider the Eleventh Corps as godfather to the Twenty-sixth Division. The Eleventh Corps feels proud of the awarded honor, being sure that, wherever he may be sent, the godson shall do credit to the godfather.

GENERAL DE MAUD'HUY,
Comanding Eleventh Army Corps.

In September 1918 came the St. Mihiel drive, in which the salient was reduced and the line straightened out. This was the action in which the division captured Bois de Eperges, Hattonchatel, and Vigneulles.

In connection with the part the Twenty-sixth Division took in the capture of Hattonchatel the following tribute was paid by the French corps commander:

"From: General Claude, commanding the Seventeenth Army Corps.

"To: The commanding general, Twenty-sixth Division.

"General, the reputation of your division preceded it here far ahead.

"To all its titles of glory gained in fierce struggles, and only recently at the signal victory of Hattonchatel, it has added on the 23d of October a page which perhaps is more modest, but still does it great honor.

"In a few hours, as at a maneuver, it has gained all the objectives assigned it in the difficult sector of the Woods of Houppy, Etrayes, and Belleau.

"This operation is evidence, indeed, of superior instruction, mobility, and will.

"I do not know how to thank you sufficiently for your assistance, dear General, and it is my great desire to express to you all our grateful admiration for your splendid division which thus has added its name to all of those who have fought to hurl the enemy back from the outskirts of Verdun."

"It is not my intention to recount in detail the thousands of incidents of heroism of officers and men of the division. History will store up some of these glorious deeds for future generations to read. The men who were there on the field of battle know the story of unsung heroes whose names never will be mentioned. Many YD men here within the sound of my voice should be wearing upon their breasts Congressional Medals of Honor or Distinguished Service Crosses, yet their reward must be only the serene, complete content of knowing that they had served their country even far beyond the path of line of duty in battle, that they had performed heroic acts of which the world knows nothing, but in which they and their buddies who were there with them will glory while they live. They can look at the beautiful flag of the United States flying in the breeze with its gorgeous red and its pure white stripes, its deep field of blue, and its bright stars, too, and let their souls cry out, "You're my flag, you're particularly, specially my flag! I fought for you, I proved that I would die for you. I proved it to myself and to my country, and how I love you and what you represent—freedom, liberty, home, and loved ones."

That must be their reward and that reward is sufficient unto them because they are soldiers, soldiers in peace as well as in war.

Our dead rest peacefully in France, and in the hallowed resting places on our own dear soil.

We the living gather here today from the farthest corners of New England; yes, and from far-distant States of the Union. We come not only to honor our dead chief, but to proclaim to the Nation and to the world that we will fight in time of peace as we did in war to safeguard forever the patriotic principles so clearly defined by Thomas Jefferson in the Declaration of Independence, and the founders of the Republic in the greatest document ever written for the government of a people, the Constitution of the United States.

This dedication today is our answer to communism. As long as one of us lives we will resist any attempt on the part of anyone to overturn by force the Government of the United States, which has been perpetuated and sanctified by the blood of heroes of all our wars.

We pray for peace but we have no sympathy, and can have little respect for, the man or woman who lives under the protection of our American institutions and who will take all the

benefits of that protection and then refuse to take up arms to defend our country in time of need.

The Yankee Division is an American division. The men of the Yankee Division are Americans, and we recognize but one flag, the Stars and Stripes.

General Edwards, "Daddy" Edwards, the "Old Man", the "Idol of the Yankee Division", soldier, brother, father, comrade, all in one, stern in discipline, lover of wit and humor, proud of his outfit, proud of his officers, but most of all, prouder of—defender and champion of—the enlisted man.

He was relieved of his command because he insisted on casting diplomacy aside and, in biting, sarcastic words, told the "higher ups" that he would be no part of a scheme which would aggrandize self-seeking, would-be military leaders, to be brought about by the degradation of officers and men who had followed him unhesitatingly into the hell of battle and men who had already handed on to posterity another golden page of glorious deeds to be placed in New England's book of chivalrous sons, a book teeming with pages of self-sacrifice, honor, patriotism, and fighting fortitude continuing on and on, beginning with the foundation of the United States of America.

The excuse given to relieve him of his command was that Secretary of War Baker, when he was visiting the A. E. F. in France, had suggested that a certain number of divisional commanders who had led combat divisions in battle should be sent back to the United States to train new divisions. Perhaps this would have been done later with other commanders in addition to General Edwards, but as the armistice came shortly after he was relieved one shall never know the answer to that.

The general took his relief as a soldier. Let us see:

The final leave taking of General Edwards on October 26, 1918, was described by Dr. Morton Prince, of Boston, in a letter to Governor McCall of Massachusetts. He said, in part:

"I arrived at divisional P. C. (the advanced post of command during battle) just as the commanding general was transferring his command to his successor, an able officer of experience, who surely will lead the Yankee Division to further victories. Headquarters was a picturesque group of dugouts arranged in two rows, facing one another along an alley camouflaged overhead with boughs of leaves from enemy airplanes.

"In the commanding general's dugout were high officers and members of his staff, while in the alley were grouped other staff officers and headquarters troops. It was but natural and pardonable that depression and gloom were depicted on the faces of all, and that they should speak in subdued voices.

"Though anxious to give the same loyalty to their new commander, they could, for the moment, think only of the past. They were losing their chief to whom they owed everything, and whom they had followed during 9 months of constant fighting.

"The departing general was the only cheery one of the lot. Whatever he may have felt when leaving the soldiers he loved and who loved him, he did not betray, nor did he give the least sign of his private sorrows, for sudden news had just brought grief into his heart in the death of two that were very near to him—his own daughter, and an aide who was like an own son. This we all know. But private grief was not allowed to weigh with duty. He was a soldier through and through.

"A few routine details had to be finished, papers had to be signed. Then came the presentation of his staff to the new commander, with a generous word of commendation for each; a word of good-bye and a grasp of the hand with one another; the same with a kind word to each enlisted man at headquarters; then he sprang into the motor car. At his invitation: I was privileged to accompany him, and with a wave of his hand and a last cheery good-bye we were off, leaving sad faces behind us.

"The next day after a night at the main working headquarters a final good-bye was said by the remainder of the staff, and as we turned back from where the departing motor left us we heard the explosion of a great 14-inch shell that dropped its fragments close to the car as it sped away, as if the German in a last vain effort sought to destroy, in impotent rage, the man who had beaten them on many a field, and there came to us from a distance the cheers of the soldiers wishing their general God-speed.

"There is not a soldier or officer in the division that does not take the general's departure as a personal loss."

Thus does Dr. Prince in fitting language describe the feelings of all YD men toward their commander.

General Edwards was a West Pointer. He had all of the virtues inculcated into the youth of our land who graduate from Uncle Sam's Military Academy. Yet he escaped what many West Pointers did not escape—that false sense of caste and antagonism toward the National Guard and National Army which at times exhibited itself so strongly in our Army during the war.

He rather followed the rule of the generals of France who were firm disciplinarians yet could see no sense in the signs invariably displayed in all American camps, barracks, and posted in cafes and restaurants, "For officers only."

He combined fine gentlemanly instinct with a rare sense of the fitness of things. His humor was contagious. His courage unquestioned. He was a man's man. He loved his men. His men idolized him.

I have searched the records of the War Department and nowhere in the record of his private life and military service can one blot be found upon his escutcheon.

We Yankee Division men who live in this beautiful section of Massachusetts are proud, and justly so, of the action of our Governor and our legislature in naming this bridge the General Clarence R. Edwards Bridge. It will be an ever-present reminder to us, to our children, and our children's children, of the great deeds of a great man, the leader of a great fighting Yankee Division, the man who put a soul into that division, the man who alive captured the imagination of 40,000 soldiers, the man who dead holds their undying, eternal loyalty and love. General Edwards, today, in the name of all of your living stout-hearted fighting Yankee Division men, in the name of all of our comrades who have gone to the Great Beyond, we salute you.

TWO LETTERS ON MATTERS OF PUBLIC CONCERN

Mr. EAGLE. Mr. Speaker, I ask unanimous consent to extend my own remarks by including copies of two letters I have written on matters of public concern.

The SPEAKER. Is there objection?

There was no objection.

GUFFEY COAL BILL

Mr. EAGLE. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following letter written by me with regard to the Guffey coal bill:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., May 26, 1936.

Mr. D. D. PEDEN,
President, Peden Iron & Steel Co., Houston, Tex.

DEAR DEE: Your wire of 25th to hand and noted.

I have not yet read the new Guffey bill. I note that you ask me to vote against it.

I voted for the other one, and if this one keeps the greedy fingers of the coal operators off the necks of 450,000 coal miners who are shamefully used, oppressed, mistreated, as the other Guffey bill did, I shall vote for it. It is far better, far more American, far more human for those coal-mine workers (450,000 of them—meaning 3,000,000 men, women, and children) to have proper working hours, working conditions, and pay than for extra, extra dividends to be collected at their expense by the inhuman and greedy coal corporations of Pennsylvania and other coal States. Besides the humanities involved, purchasing power which makes for universal prosperity is gained by treating workers right.

I shall, as usual, give this bill careful study when or if it comes up, and vote for it or against it on these principles. I will never confiscate or overtax or punish capital, but I will not by my vote allow the chiselers in industry (like these greedy coal companies) to starve, wreck, and oppress men, women, and children merely to send bigger and bigger extra dividends up to Wall Street.

There are both capital and labor: each indispensably necessary to industry and prosperity. Each such bill must be considered and enacted in the light of doing right by both capital and labor. Of course, all of this big industry in the Pennsylvania and New York section tries to use its relations with all of its business connections throughout the country to ask all Congressmen to vote as these vast and selfish corporations desire in order that they may enslave their workers again as before the present regime, and I hope you yourself will give study to the very matter you lay before me. With me the welfare and justice to men and women who toil comes before extra big dividends to the chiseling portion of big business and industry up here in the East which considers men as natural serfs.

As requested, this new Guffey bill will have the best study, thought, and decision of which I am capable, when it comes up, but I shall be guided by the above sentiments, facts, and views.

With personal regards.

Sincerely yours,

JOE H. EAGLE.

S. 3822: RESALES PRICE—H. R. 8442: CHAIN STORES

Mr. EAGLE. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following letter written by me:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., January 29, 1936.

Dr. W. J. DANFORTH,
Plaza Hotel, San Antonio, Tex.

DEAR DR. DANFORTH: I received today your interesting and welcome letter of January 25, and have read and considered it with care.

(1) I am familiar with the bill originally introduced for Senator TYDINGS as S. 3518 on January 6 of this year, and later introduced by Senator TYDINGS as S. 3822 on January 16. I favor that bill and will support it. In substance it merely is a measure to promote national fair trade. Dumping and price cutting are of no permanent value to any class but a constant menace and injury to all classes. The measure will not prevent fair competition because that will be maintained by the manufacturers. When a retail merchant cuts prices it is merely a dumping process. It breaks the uniform standard of prices. What he loses in such transactions he makes up by adding to the sales price of another article. For this reason the buying public never achieves advantage through cut-price purchases. Therefore, I regard that the bill, S. 3822, is fair to manufacturer, jobber, retailer, and the public.

(2) I am heartily backing the Patman bill, H. R. 8442, to amend section 2 of the Clayton Antitrust Act. I am familiar with the

details of that bill, and I think it will accomplish what it is designed for, that is, to protect the independent merchant and the public as buyers as well as the manufacturer from exploitation by chain-store competitors. The small independent merchant has a perfect right to demand the same opportunity to make a living as the largest chain enjoys. Yet by the methods employed in purchasing by the chains, the small man is denied equality of opportunity. The wealth of chains enables them to buy on their own terms and practically at their own prices, and also enables them to sell at far below cost at any place where necessary to bankrupt their independent competitor. The independent man must be by law guaranteed the right to the same prices and terms and discounts any manufacturer accords to any chain if the small man is to live in business at all. After a chain destroys the independent merchant it will have no competition and can exploit the public by prices at its pleasure. It is therefore in the interest of the public, as well as to safeguard the legitimate rights of the independent small businessman, that the chain groups be not allowed by virtue of their strength and what they can do by their tremendous buying power to put the independent out of business.

This bill (H. R. 8442) makes it unlawful for any person engaged in commerce to discriminate in price or in terms of sale between the chain-store groups and the individual merchant as to like grade and quality; and also prohibits rebates to the chain under pretense of paying commissions and brokerage to their dummies; and the same as to pretended advertising allowances. And it is sound in providing for a presumptive measure of damages for its violation, because such damages to an independent by these unfair chain methods while known to that merchant to ruin him gradually is still difficult to prove, hence the bill properly provides for a presumptive measure of damages in certain cases.

As far back as 1914, when I was then a Member of Congress, I supported and voted for the Clayton Antitrust Act. I approved our work then and approve it now in that act so far as it went; but it has not gone, and I think is not capable of going, far enough to protect against the calamity of this new giant chain-store plan which is ruining small businessmen, and hence I will find deep satisfaction in helping to enact H. R. 8442 to strengthen rather than weaken the Clayton Antitrust Act.

With highest considerations, I am

Sincerely yours,

JOE H. EAGLE.

AMERICA, THE HAVEN OF LIBERTY-SEEKING IMMIGRANTS

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent to extend my own remarks by including my own speech delivered on the floor of this House.

The SPEAKER. Is there objection?

There was no objection.

Mr. SIROVICH. Mr. Speaker, under the leave to extend my remarks in the RECORD I include the speech which I delivered on the floor of the House a number of years ago.

Mr. Speaker, ladies and gentlemen of the House, comets were regarded in ancient times as presages of evil, forecasting the death of kings and the destruction of nations. Edmund Halley, an English astronomer, the friend of the great Newton, observing the comet of 1682, checked back on previous appearances of comets and decided that this comet had a definite orbit about the sun covering 75 years, and predicted the return of this comet in 1737. His forecast was derided, but when 1737 came in the course of time Halley's comet appeared again, and has since that time made its route according to the schedule of Halley. Its latest appearance was in 1910. Superstition faded before knowledge and understanding.

Depressions and panics seem to have cyclic orbits, and with them also seem to come cycles of bigotry and persecution, as if both were parts of some cosmic disturbance. Like the lag of the tides after the meridian passage of the moon, these cycles of bigotry are not always immediate with the economic cycles, but, nevertheless, they seem concomitant with them. I could cite you many instances which seem to bear out this thought, but will not take the time now to do it, except to call attention to the fact that great wars seem to be followed by deep economic depressions, and during these depressions nationals of one nation try to put the blame for the situation on nationals of another nation, and often on minority groups within their own nation.

This latter case is the situation in Germany between the Austrian dictator, Hitler, and native Germans of Jewish religion. Germany had failed in the World War. She had lost her colonies; her Navy lay at the bottom of Scapa Flow; her foreign markets had been taken away; a loaf of bread sold for a billion paper marks; and the financial condition of the people in general was appalling, so those who had assumed power looked about for a scapegoat. The Jewish element of the German people provided such a scapegoat by the dictatorship and those behind it. Jews had led in steel making, shipping, foreign trade, and domestic commerce out of all proportion to their numbers compared to other Germans; nor were the Jews behind in music, the arts and sciences, and philosophy. This state of affairs first led to jealousy, then to bigotry, and finally to persecution, with all of which the world is familiar.

There could be no escape to asylum elsewhere in the world, though longing eyes were cast on America, since Jewish money and goods had been commandeered by the Nazis, and families once well to do or in comfortable circumstances were herded into ghettos and denied expatriation.

In other generations persecution because of political or religious differences has given some of its best immigrant stock to the United States of America. The Pilgrims and Puritans, Huguenots, Lutherans, and Irish, German, and English Catholics were striking examples. It is also true that love of liberty, freedom of conscience and speech, and a desire to better their economic condition brought many fine men and women to America whose descendants are a credit and an honor to our Nation.

For almost 150 years America has been the haven, the mecca, to which the proscribed, the persecuted peoples of occidental civilization have longed to migrate. Every cycle of bigotry, economic depression, and racial intolerance in continental Europe drove millions to our shores. America, the land of liberty and opportunity; America, the land where they cradled religious respect for all faiths; America, the land of freedom and equality! That America was their destination.

From the west coast of Ireland to the eastern shores of the Black Sea these emigrants sought America. From the White Sea in the north to the Straits of Messina in the Mediterranean they set sail for America. In the last 15 decades America was the one word in the minds and on the tongues of millions of all the nationals within these regions. America, the land of hope and faith; the land where a man could be a man, free and independent, no matter what tongue he spoke or what his racial stock might be; a land where wages were high, worktime short; a land open for settlers, jobs for all workmen; the land of promise and plenty.

So the adventuresome took ship, in the steerage, at as low as $15 a head, providing their own food and bedding. They came in millions and spread all over the land of plenty, from Maine to Oregon, and from the Great Lakes to the Gulf of Mexico. They built the railroads. They manned the river steamboats. They built the wharves and docks. They did anything to which they could turn their willing hands. Coal and iron mines, rolling mills, textile mills, blast furnaces, coke ovens, tunnels, subways, bridges, roads, commercial and domestic buildings, all these and much more they dug down, laid down, or built up.

All who came to the land of plenty were not brawn; also came brains, fine brains, the seat of great minds. The list is too long to name them here, but Carl Schurz, Joseph Pulitzer, Jacob Schiff, Prof. Abraham Jacoby, Steinmetz, Einstein are not the lowest on the list. A roster of those whose thought, rather than their hands, helped mold this Nation to one of the greatest in the world would fill multiple pages of the CONGRESSIONAL RECORD. To this roster would be added many names besides those recorded of the Jewish race, as well as names of Irish, Scotch, Welsh, English, German, French, Italian, Austrian, Hungarian, Polish, Scandinavian, Russian, and Balkan derivation.

There is much discussion these days of the alien immigrants to the United States of America and their effect on the ethical, political, economic, industrial, and employment present-day status of the Nation. Some of this discussion has been vitriolic in its denunciation of the immigrant. In order to get a true viewpoint it may be well to have a look backward at the situation as it existed in the Original Colonies and in the United States of America in the nineteenth century.

America was not settled by a homogeneous race, Nordic or otherwise—the original settlers came from many lands—nor were the English settlers in the various Colonies all of one blood and religious or political thought. Florida was settled by Spaniards, as was California and other parts of the west coast. Louisiana and the lower tributary valleys of the Mississippi were settled by the French, who also penetrated the Great Lakes region, the upper Mississippi region, and the adjacent territory.

Swedes settled in Delaware and along the Delaware River. German colonists occupied the fertile valleys of eastern Pennsylvania, where later they were joined by Scotch-Irish, Irish, English, and Welsh. Scandinavians, including Swedes, Norwegians, and Danes, took possession of fertile homesteads in Delaware, Wisconsin, Minnesota, and the then Territories west. Poles came to Pennsylvania, as did Letts and Lithuanians. New York, originally called New Amsterdam, was settled by Hollanders, Flemings, and Walloons. Massachusetts Bay and Plymouth Colony were settled by English from the southwest of England.

Maryland was settled by English Catholics, Virginia by English Anglicans. Great rivalry existed between these two Colonies, and Maryland still calls itself the free state because of its early attitude toward liberty of conscience and thought. Georgia was founded by James Edward Oglethorpe. It became a refuge for persecuted Protestant sects, then opposed to the Anglican Church, and unfortunate debtors, but worthy classes of England. The early Georgian colonists were English, German Lutherans, Piedmontese, Scottish Highlanders, Swiss, Portuguese, and Jews.

Portuguese and Spanish Jews were among the first settlers of the now exclusive Newport, R. I., and one of the oldest cemeteries in the United States of America is the Jewish Touro Cemetery in Newport. In my district in New York is an ancient Jewish cemetery, just off Sixth Avenue, and another near the Bowery and Chatham Square, containing a few graves of early Manhattan Islanders who were Jews and settled in New York City in 1654.

Persecution is not new in what is now the United States. Witch trials were common in Salem. The ostracism of Roger Williams from Massachusetts founded Rhode Island. Virginia cavaliers harassed the Catholics of Maryland. Anglicans scouted Lutherans. Mormons were driven from Palmyra to Fayette, to Kirtland, to Jackson County, Mo., to Nauvoo, and finally established Utah under Brigham Young.

Persecution need not be physical or depend upon personal harm. It may be by ostracism, terrible to sensitive souls. It may be by boycott. It can take many forms, developed over centuries of practice by baiters of a people whose ideals are not understood by their antagonists. Persecution is not always a conflict of races. It may and has existed between elements of homogeneous races, usually duty to differences in religion and politics.

History repeats itself by generations, by centuries, and by millenia. Thomas Torquemada, the sadistic inquisitor in the Spain of King Ferdinand and Queen Isabella, having driven out the Moors from Spain, turned his attentions to the Jews, and, after royal consent to their expulsion, expatriated 800,000 Jewish families, who fled to Holland, Russia, the Balkans, Italy, the Dutch East Indies, Tunis, Tripoli, Morocco, and other countries that granted them shelter. These countries of refuge profited greatly by the arrival of the new Jewish immigrants, but Spain lost her commanding position among the nations of that time and has been on the downgrade ever since. The great Empire of Spain has disintegrated.

Today in Germany the same conditions obtain that did in Spain under Torquemada. Hitler is the modern Torquemada. Today the same conditions obtaining in Germany under Hitler will produce the same results that occurred in Spain under Torquemada. I repeat this to emphasize it. The next world war will destroy Germany; southern Catholic Germany will secede as a nation from northern Protestant Germany.

Civilization was said to have been thrust into Spain on the point of a Moorish lance. The famous Giralda Tower of Seville was built by the Moors and used by them as an astronomical observatory. When the Spaniards drove the Moors out they did not know what use to put the beautiful tower to, so they let it stand idle. Much of the so-called kultur of Germany is, like the culture of Spain, not indigenous to German soil but has been borrowed from other sources, with the possible exceptions of Goethe's and Schiller's works.

Prior to 1700 Germany did not figure in the culture of Europe to the extent that she later achieved. The new Europe of the Renaissance was born in Italy, nurtured in France, developed in England, and thence spread to the rest of Europe, Germany being the last to accept the new culture. Leonardo da Vinci, Michelangelo, Raphael, Titian, Dante, Descartes, Rabelais and Montaigne, Columbus, De Gama, Copernicus, Galileo, and Magellan were not German. The mothers of Rabelais and Montaigne were Jewesses.

René Descartes preceded Immanuel Kant as a philosopher, and his work was of great aid to Pascal and Newton, and Descartes was not a German. Immanuel Kant was of Scotch descent. Latins, not Germans, led the way in the new civilization. Dante, Cervantes, Rabelais, Shakespeare, and the lesser authors are well known outside of their native lands, but the best of German poets, Goethe, is not read much outside of Germany. Shakespeare competes with Goethe on the German stage, but Goethe does not compete with Shakespeare on the English-speaking stage. Schiller's dramas deal more with non-German subjects than with those concerning his own nationals. Schopenhauer, Kant, and Nietsche drew their inspiration from non-German sources. German culture was influenced by foreign sources more than the culture of any other race in Europe.

Baruch Benedict Spinoza, the distinguished Portuguese-Holland Jew, has been the brilliant, gifted, dominating, intellectual figure of German philosophic culture for the past 200 years. Such talented writers as Goethe, Lessing, Schiller, and Herder were inspired by Spinoza's contributions and their works were profoundly influenced by his conceptions and ideals. Nietzsche was of Polish descent. Whenever and wherever we find Nietzsche dilating upon the superior qualities of his superman we find him always drawing his inspiration from the great foreign, oriental prophet of the Persians, Zoroaster. The great pessimist Arthur Schopenhauer was of Dutch descent and propagandized the Buddhistic-Hinduistic philosophy into Germany. His object was to replace the Biblical influence of the New and Old Testaments. Neander is universally considered the most distinguished and representative German church historian. He, too, was a baptized Jew. Heinrich Heine, the supreme lyric poet of his day, was a Jew. Karl Marx, the avatar of Soviet Russia and the author of the world-famous Das Kapital, was of Jewish extraction. Wassermann, the great serologist; Ehrlich, the world's most famous biochemist; Henle, one of the greatest anatomists of his time; Albert Neisser, the greatest bacteriologist of his day, discoverer of the gonococcus and the leprosy bacillus, were all Jews.

In the realm of physics what names are comparable to the four outstanding Jewish-German physicists, such as Hertz, of the Hertzian or X-ray fame, Helmholz, Einstein, and Plank. Max Reinhardt, the greatest theatrical impressario, is a representative German member of the Jewish faith. The most important modern German poets, such as Zweig, Werfel, Hoffmanstahl, and Wassermann, are members of the Semetic race. Emil Ludwig and Leon Feuchtwanger are two of the world's most famous modern German-Jewish novelists. The three greatest German publicists of the last century, Maxmilian Harder, Alfred Kear, and Ludwig Boerne, were non-Aryans, disciples of Judaism. The founder of Germany's modern merchant marine and the North German Lloyd Steamship Co. was the Jew, Alfred Ballin. The Junker Party, the great political reactionary party of Germany, was founded by a baptized Jew, Fritz Stahl. Mendelssohn is considered one of the most foremost musical composers of the world; he, too, was of Jewish extraction. The greatest tenor that Germany produced in the last 5 decades was Yadlowker, a Russian Jew. One of the most brilliant statesmen of modern Germany was the distinguished Rothenau, Minister

of Foreign Affairs, who was assassinated by the Nazis. His father was the founder of the general electric industry of Germany.

A brief cursory of the facts that I have presented proves conclusively that neither German culture, so-called, nor modern German civilization are of purely German creation. German kultur is the cumulative contribution of the creative effort of a conglomeration of different races, religions, and peoples from all over the world, who lived in Germany and were inspired by the creative geniuses of the world to ennoble mankind by the product of their mentality.

A pure-blooded German kultur and civilization is a myth, an aspersion, and an insult upon the intelligence of any liberal-minded citizen of the world.

The list of great ones in German history, in art, music, science, biology, medicine, and surgery is saturated with non-German names and with countless Jewish names too numerous to mention. Because of religious bigotry, intolerance, and racial persecution by Germany's modern Torquemada, Hitler, Germany will disintegrate. Its empire will suffer the fate of medieval Spain. The Prussian-German Empire will be succeeded by a German confederation based on southern Catholic Germany, as Bavaria, Saxony, and Württemberg, united with Austria, of which Vienna may yet be the titular capital. Northern Prussian Germany, or Protestant Germany, has always been militaristically inclined. Prussian Germany has given to Germany its great warriors. It has oppressed its neighbors in war and peace. It has given to a unified Germany the autocracy of the Hohenzollern dynasty, against which Woodrow Wilson and Congress declared war. No great names in science, art, and literature have come from its bowels. On the other hand, southern Germany and the Rhineland have contributed to Germany on the altar of its culture and civilization its most eminent scholars, savants, scientists, musicians, painters, and philosophers.

After the next world war a ring of Catholic nations will surround Prussian-Hitler Germany. Catholic nations, such as Belgium, France, Czechoslovakia, southern Catholic Germany, Austria, Hungary, Poland, Rumania, and Yugoslavia, will destroy Prussian junkerism, Hitlerism, and militarism and make the world safe for free men to exist.

Mr. Speaker, ladies and gentlemen of the House of Representatives, on May 17, 1929, a distinguished, gallant, and lovable personage, a Representative of the great Commonwealth of Virginia, the Honorable Henry St. George Tucker, delivered an address in this House on the subject of reapportionment. It was a masterpiece of verbal elegance and forensic legal lore. In his peroration this brilliant scholar stated that—

Children from the sons of the covenant were never intended by our forbears to participate in the Government of the United States.

It was my privilege to respond to that address. When I concluded my remarks that great personality arose and clarified his expressions, so that no one could misconstrue or misinterpret them. It was a sublime effort, worthy of the great statesman that he was. Since that memorable occasion the Honorable Henry St. George Tucker has made his eternal pilgrimage to that "bourne from whence no traveler ever returns." To commemorate that heroic and immortal event in my congressional experience I now desire to call to your attention that address and Mr. Tucker's response thereto. Henry St. George Tucker's answer is a ringing challenge to anti-Semitism, racial bigotry, and religious intolerance wherever it may be found.

The address and response are as follows:

Mr. Speaker, ladies and gentlemen of the House, the Commonwealth of Virginia has contributed some of the most distinguished names to the history of our Nation. Out of 56 men who signed the Declaration of Independence, 7 of them came from the great Commonwealth of Virginia.

In the early history of our Government the Old Dominion gave four of its most eminent sons as President of the United States—George Washington, Thomas Jefferson, James Madison, and James Monroe. A quartet of famous names that have never been equaled or been surpassed by any State in the Union. [Applause.]

Next to the founder of our country, George Washington, stands the name of Thomas Jefferson, the founder of the great Democratic Party of our Nation.

The life and character of Thomas Jefferson symbolizes, to my mind, all the ideals and virtues that prompted our forefathers to establish this great democratic-republican Government of ours. [Applause.]

When the sage of Monticello passed beyond the Great Divide he left a will in which he requested that when a tombstone was erected to commemorate his memory only three sentiments should be expressed thereon. First, that he was the author of the Declaration of Independence; second, that he was the founder of the University of Virginia; and third, that he was the author of religious liberty and freedom of worship in the Commonwealth of Virginia.

What an extraordinary trinity of ideals to which Thomas Jefferson consecrated his life: First, education; second, the right of worshiping in conformity with a man's own conscience; and third, as author of that immortal document, that great charter of human rights, worthy of God himself, the Declaration of Independence. [Applause.]

Mr. Speaker, ladies, and gentlemen, picture to yourselves the modesty of that extraordinary intellectual giant, Thomas Jefferson, the greatest man of his day. He never put upon his tombstone that he was twice President of the United States. He never had inscribed upon his eternal shaft that he was Vice President of the United States. Never did he declare to those who might read his epitaph that he was first Secretary of State in the administration of George Washington. Nor did he state that he was Ambassador of the United States to France and helped to bring to a successful conclusion the great Revolution which brought liberty and freedom to our forbears through the assistance of France in aiding the American cause in its hour of need. [Applause.]

Seven famous names are penned to the great Declaration of Independence from the State of Virginia—George Wythe, Richard Lee, Thomas Jefferson, Benjamin Harrison, Thomas Nelson, Jr., Francis Lightfoot Lee, and Carter Braxton. Where is there a schoolboy today throughout the length and breadth of our country who has not heard of the militant Maccabean sentiments of Patrick Henry in his clarion call to the people of our Nation when he said, "Give me liberty or give me death"? Such is the contribution of the Commonwealth of Virginia to the early history of our country. [Applause.]

A century has passed since the death of Thomas Jefferson. The great Commonwealth of Virginia has 12 distinguished men who represent that great State in the House and Senate. Let me have them pass before you in panoramic fashion as their names come to my mind. Andrew Jackson Montague, former Governor of Virginia, and named after the militant and aggressive leader of democracy, Andrew Jackson; R. Walton Moore, a descendant of Lewis Morris, the New York signer of the Declaration of Independence, and also a descendant of the Walton family, of New York, a family of merchants in the old days, one of whom was mayor of New York, and all of whom are buried in the churchyard at Trinity Church; Schuyler Bland, Patrick Henry Drewry, Clifton Alexander Woodrum, Senators Carter Glass and Claude Swanson, and last but not least Virginia's illustrious son, Henry St. George Tucker. [Applause.]

Where is there a State in our Union that can match these names for brilliancy in their accomplishments, and for extraordinary manifestations in service to our people? [Applause.]

For 14 decades the distinguished family of Tucker has been represented in the Congress of the United States. The original Thomas Tudor Tucker served as a Member of Congress during the administration of Gen. George Washington. George Tucker, a kinsman of St. George Tucker, our friend's great-grandfather, was a Member of this historic forum. In 1825 Thomas Jefferson appointed him as professor of moral and intellectual philosophy in the University of Virginia. Henry St. George Tucker served from 1815 to 1819 in the Congress of the United States.

Thus we behold the picture of great-grandfather, grandfather, father, and son serving the best traditions of our people and our Nation.

The present Henry St. George Tucker, in my humble opinion, is one of the greatest constitutional lawyers in the Congress of the United States. [Applause.]

As former acting president of Washington and Lee University, as former president of the American Bar Association, as a Member of this House on and off since 1889, and as professor of law, he is one of the outstanding and distinguished representatives of the great Commonwealth of Virginia. [Applause.] He comes from the town of Lexington, Va., Lexington that was the home of Robert E. Lee, the illustrious general and distinguished soldier of the Southern Confederacy, Lexington, Va., where that distinguished soldier, Stonewall Jackson, taught mathematics.

In the center of that community is the city of Staunton, which is the birthplace that cradled and nurtured the greatest exponent of the philosophy of democracy, one of the greatest Presidents of all times, Woodrow Wilson. [Applause.]

Since the inception of our Government, four successive generations of Tuckers have represented the State of Virginia in the House. Henry St. George Tucker, the present incumbent, carries in his vest pocket a watch, an heirloom from colonial days, whose ticks and beats were heard by John Randolph, of Roanoke, its original owner. Edmund Randolph, of this distinguished family, was the first Attorney General in the administration of George Washington.

Surely, with all these antecedents that I have enumerated, anything that Mr. Tucker would say on the floor of this House

carries great weight. Our distinguished colleague delivered a speech in this historic forum on the "power of Congress to exclude aliens in the enumeration of the population of the United States for Representatives in Congress." It was a brilliant effort. A masterpiece of forensic lore. A debatable constitutional question. His main contention being that when the Constitution was adopted in 1787 aliens were not present. Therefore he infers they should not be counted now.

As a matter of fact, immediately after the Revolution, proportionate to its population, we had as many aliens then as we have now. In our midst were the Tories, hillbillies, the Hessians, English troops, and other soldiers of fortune, who fought against our forbears in their desire to establish a republican form of government. But when the Constitution was adopted, a general amnesty was declared and everybody was permitted to participate as citizens of our Republic. That was why we had so few aliens.

However, when the fourteenth amendment to the Constitution was passed, after the abolition of slavery in 1868, section 2 declared—

"Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed."

Surely, in 1868 we had millions of aliens then as now, and it was the intention of our forefathers to count all of its people. They left nothing to be inferred and only excluded Indians not taxed. Therefore, it is my contention that an alien is a person under the fourteenth amendment to the Federal Constitution, and should be included upon the basis of fixing representation, excluding only "Indians not taxed." As a matter of justice, all the people living in our country are aliens or the descendents of aliens. The only true Americans are the Indians, whom we have deprived of their land and even disfranchised by not permitting them to vote. [Applause.]

While we are on the subject of the aliens I would like to state that there are 45,000,000 people in the United States today who are the sons and descendants of former alien immigrants, who, since their entrance into this country, have contributed to our happiness, glory, and prosperity in times of peace and have fought upon every battlefield in defense of our country in times of war. For almost 100 years these aliens, through their sweat and blood, have helped to built our great American railroads, have perfected our great American industries of steel and iron, have worked in the mills, in the looms, and in the factories. They have gone down into the bowels of the earth to bring forth the hidden mineral resources of our Nation, have dug the subways, have built the great skyscrapers and dwellings, which have made our Nation and our people the most wonderful, the most respected, and the richest of all the world. [Applause.]

Directly in front of the home of the President of the United States there are monuments on each corner erected to perpetuate the name and fame of five aliens who gave up everything they held near and dear to help our Colonial forefathers establish this mighty Republic of ours.

Pulaski, a Polish count, who organized the Foreign Legion, marching these soldiers through Maryland, Virginia, North and South Carolina, fighting all the way for our cause, until he fell wounded in the Battle of Savannah and was buried at sea. Gen. Baron von Steuben, the great German strategist, who trained and disciplined the American soldiers at Valley Forge and made it possible for Washington to win his subsequent victories. Rochambeau, the great French soldier, who, in conjunction with Lafayette and Washington, was responsible in lowering the colors of Cornwallis at Yorktown, that brought victory to the arms of America. Kosciusko, the great Polish engineer, who designed and built West Point and was wounded at the battlefield of Saratoga, that caused to bring about the defeat of Burgoyne. And last, but not least, the distinguished and gifted General Lafayette, who brought the aid of the French people to the cause of the American Revolution, that made success possible. Everywhere, throughout the length and breadth of our land, there are humble shafts that commemorate the lives of these alien immigrants who worked for our happiness in times of peace and were ready to die for our Republic in times of war. [Applause.]

Mr. Speaker, ladies, and gentlemen, my purpose in addressing the House today is to take exception to the peroration of my distinguished colleague, Mr. Tucker. In his concluding remarks he said "aliens from the commonwealth of Israel and strangers from the covenants of promise were never intended to be given participation in the Government of the United States." If this figure of speech, this Biblical sentiment of Mr. Tucker were literally interpreted, exclusive of its text, it would cast aspersions upon one of the most patriotic and loyal groups of citizens in our country.

Since no religious test is required by our Constitution to hold public office to serve our people, why pick out one group of people and say "aliens from the commonwealth of Israel and strangers from the covenants of promise were never intended to be given participation in the Government of the United States"?

Let me tell my colleague, Mr. Tucker, who these strangers from the covenant of the land of promise are.

For 25 centuries these covenanted people from the land of promise have been persecuted and been proscribed. They have been pillaged. They have been plundered. They have been burned at the stake. They have been driven from the land that God covenanted as their own. As wanderers in the world, they have gone through pogroms, massacres, and inquisitions, and while all these monarchs, emperors, and others who have persecuted them have been forgotten in the ashes of time, these aliens from the commonwealth of Israel lived on, and will continue to live wherever the influence of civilization and humanity exists, because Judaism stands for three ideals that it has preached from the time of Abraham. First, the belief in one ever-living God. Second, the belief in the inspiration of the Holy Bible containing within it the Ten Commandments given by God to Moses on Mount Sinai. Third, the belief in the immortality of the soul. For these reasons the Jewish race will and must continue to live. [Applause.]

When the Assyrian king destroyed the commonwealth of Israel, many of these people settled in Phoenicia. Prior to the Christian era the Phoenicians were the Yankees of the East. Living near the forests of Lebanon, they hewed down the trees and converted them into ships. They settled in Greece, the lower part of Italy, and particularly Venice, which is called Venetia, derived from Phoenicia, and Carthage.

As their ships plowed through the Mediterranean and through the Straits of Gibraltar, they went to England. There they went down into the mines and brought back tin, which they used to alloy copper, and were among the first bronze makers of the world. It was these Phoenicians, the most civilized and cultured people of their day, who called England British. The term "British" comes from two Hebraic words, "brith", which means covenant and "ish", which means son. Therefore, "British" means the covenanted son.

In 1492 two of these sons of the covenant, Spanish Morranos, Louis St. Angel and Gabriel Sanchez gave 20,000,000 maravedis, which amounts to about $200,000, to Queen Isabella to finance the expedition of Christopher Columbus. On the three ships, the *Pinta*, the *Niña*, and the *Santa Maria*, that set sail with Columbus for a northwest passage to India were 108 men; 18 of them were Jews—sons of the covenant. Dr. Maestral and Dr. Marco were physician and surgeon, respectively, on the ships. Rodrigo Sanchez was superintendent of the vessels. The first man to sight land was Rodigro de Triana. The first man to set foot on American soil was Louis de Torres, who Christopher Columbus took along with him to act as interpreter with the Grand Kahn of India. All these men were of Jewish extraction. Jehuda Cresques, a Jew, was the man who perfected the compass for the first time that made it possible for Columbus to sail away from the harbor and guide his destiny. Abraham Cecuto presented Christopher Columbus with the astronomical charts that made it possible for him to follow the North Star and wend his way westward. So you see, fellow Members of the House, it was aliens from the commonwealth of Israel who not only financed the expedition of Columbus but were present with him in those strenuous and frightful months that he must have gone through ere he discovered this wonderful country of ours that our forefathers and divine Providence decreed should be the haven and home for all the oppressed of the world. [Applause.]

When Washington was at Valley Forge, and the cause of the American colonists looked helpless and hopeless, General Washington sent his emissary to one of the sons of the commonwealth of Israel in the person of Chaian Solomon, who was an immigrant from the city of Lodz, Poland. Mr. Solomon was one of the richest men of his time. He took out $675,000, all the money he had in the world, and sent it to General Washington to help our colonial forbears. For this act of generosity a servant betrayed him to the British. He was imprisoned, court-martialed, and sentenced to be hanged. Chaian Solomon died in prison, but his money helped to save the cause of the American Revolution. This money was never returned to his wife and children, who were left penniless.

In the city of Charleston, S. C., in 1777, Col. Emanuel M. Noah gathered together 100 sons of the covenant, who fought under the leadership of Captain Lushington, with General Moultrie as their presiding officer, all throughout the American Revolution. Since that time the children of Israel—first, last, and all the time true American citizens and patriots—have contributed to every line of human endeavor to make our Nation the greatest, the most glorious in the world. In science, in art, in literature, in philosophy, in journalism, in medicine, in law, in jurisprudence, in banking, and in statesmanship the Jew has contributed his all upon the altar of our Nation. In every war, from the American Revolution, the War of 1812, the Mexican War, the Civil War, the Spanish-American War, the allied war, Jewish blood has saturated and hallowed the soil of our country and of Cuba, the Philippines, and France that our institutions might be preserved. [Applause.]

I appeal to you, Mr. Henry St. George Tucker, an illustrious citizen of the State of Virginia, distinguished Member of the greatest representative body in the world, the Congress of the United States, to name any group of citizens within the confines of our country who are more loyal, patriotic, sincere, and devoted to the institutions of our Nation than are the children of the covenant, the Jewish people. [Applause.]

During the Civil War your sainted father was a soldier of the Confederacy. During the darkest hour of this fratricidal war Judah P. Benjamin, a son of Israel, was attorney general, secretary of state, and secretary of war of the southern Confederacy. He dined in your home and took from his back his own coat to give to your honored father. You have served in the Congress of the United States with many men who were members of the Jewish faith, such as Isidore Strauss, who was your devoted friend and broke bread in your home.

In view of the respect and regard that everyone has for you, Mr. Tucker, I contend it is your privilege, nay, I should say it is your duty, in justice to your name and fame, to define what you

meant when you said that—"aliens from the commonwealth of Israel and strangers from the covenants of promise were never intended to be given participation in the Government of the United States."

[Applause.]

I yield now, for a reply, to my friend from Virginia [Mr. Tucker]. [Applause.]

Mr. TUCKER. Mr. Speaker, I have been greatly distressed to learn from my eminent and distinguished friend from New York [Mr. SIROVICH] that the remark made by me in what was a legal argument has been construed by some a reflection on the great Jewish race. It gives me pain. I know that there is no man who knows me who will say that I ever could have been guilty of such a thing.

Mr. Speaker, I would be false to the tenderest memories of my life, I would be false to some of the most ennobling companionships of my life if I could ever, by word or act, say or do anything to reflect upon the great Hebrew race. [Applause.]

All through my argument I spoke of aliens as "unnaturalized foreigners"—applying to all races. This was a mere figure of speech and in no sense was it intended to diminish the accomplishments of the Hebrew in the march of human progress in science and law, in philosophy and theology, and in the highest development of family life known in American life.

I thank my distinguished friend, Dr. WILLIAM IRVING SIROVICH, for giving me this opportunity to explain the expression used by me in the close of my speech referred to by him. I deeply regret that anyone has seen in that phrase any evidence of any intention to disparage or criticize the Jewish race. Nothing could be further from my thought. No act or word of mine would ever be so construed by you who know me. To do so I would have to forget some of the sweetest friendships and most ennobling associations of my life with Hebrews. The words used were from the Apostle Paul—it was his language, not mine.

Mr. Speaker, I desire to reiterate, in closing, my profound respect for the citizenship of our Nation of every race and creed, and especially for those of the Jewish race. [Applause.]

Mr. SIROVICH. In behalf of the Jewish race I want to thank you for the manly way in which you have corrected the sentiment that you have expressed and for the great regard and respect that you have for the citizenship of the Jewish race.

In this country we pledge allegiance to one flag and to one nation. As an American, I extend to you, Henry St. George Tucker, the hand of brotherly love, and sincerely hope that you will live far beyond the Biblical threescore and ten in happiness and in contentment with your people.

Within the great Liberty Bell in Philadelphia there is a sentiment taken from the Third Book of the Holy Testament which says: "Thou shalt proclaim liberty and freedom to all the inhabitants of this land." When that bell rang it spread liberty and freedom to all the people of our country. Your manly and courageous sentiments today will bring happiness and contentment to the descendants "from the commonwealth of Israel and strangers from the covenants of promise." [Applause.]

Mr. Speaker, all religions are the result of the accident of birth, place, time, and circumstance, modified by the racial tendencies of the peoples among whom the worship arose. The solitary Jehovah of the Jews, the Trinity of the Christians, the polytheism of the gods of ancient Greece, and of surviving Buddhism and Brahmanism; Mohammed, the prophet of Moslemism; Confucius, the analector and interpreter of ethics; the Code of Hammurabi; the Great Spirit of the North American Indian; the many gods of the Mayans, Toltecs, and Incas; Mithraism, Molochism, idolism, fetishism, totemism, and all the varieties of figure worship had their beginning and continued being in the search of many peoples for knowledge of a supreme being, of an all-powerful one, omnipotent in all things, as revealed to them by one or more prophets of their own race or adjacent races. That such conditions continue to exist through milleniums indicates that the true God cares little about the form of worship, over which mankind has fought so long and bitterly. Bigotry and intolerance are solely human characteristics and have no place in the truly divine scheme of things. The true God is so tolerant that it behooves humanity to imitate this quality of godliness. Let every true American, therefore, be ever ready to offer up everything he holds near and dear in life to bring about the brotherhood of man and the fatherhood of God.

AGRICULTURAL IMPROVEMENT IN MISSOURI

Mr. NELSON. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. NELSON. Mr. Speaker, cash receipts from the sale of principal farm products in Missouri increased from $158,702,000 in 1932 to $238,363,000 in 1935, including $23,397,000 in rental and benefit payments. This is an increase of 50 percent.

Price changes on certain selected commodities, which brought about a considerable share of the increased cash receipts to which I have just referred, are shown in the following table:

TABLE 1.—*Average prices received by Missouri farmers for commodities listed on dates specified*

Commodity	Aug. 15, 1932	Mar. 15, 1933	Dec. 15, 1935
	Cents	*Cents*	*Cents*
Wheat, per bushel	39	39	91
Corn, do	31	20	61
Oats, do	15	17	34
Barley, do	26	28	57
Rye, do	37	39	62
Buckwheat, do		40	57
Flaxseed, do	68	80	125
Potatoes, do	45	55	80
Sweetpotatoes, do	80	55	90
Cotton, per pound	6.5	6.3	11.2
Hogs, per hundredweight	410	325	880
Beef cattle, do	530	400	740
Veal calves, do	470	495	880
Lambs, do	440	440	920
Milk cows, per head	2,900	2,500	4,200
Chickens, per pound	10	7.2	14.8
Eggs, per dozen	11.8	7.4	25.5
Butter, per pound	20	17	30
Wool, per pound, unwashed	9	9	25
Apples, per bushel	65	115	80

For the United States as a whole the yearly average price of all groups of farm products increased from 65 percent to 108 percent of the pre-war level during the period 1932–35, an increase of 66 percent. The low point occurred in March, 1933, when prices were only 55 percent of the pre-war level, whereas in December, 1935, they averaged 110 percent of that level. These figures do not include rental and benefit payments. The gain in exchange value of farm products per unit was somewhat less than the gain in farm prices, since prices farmers pay for commodities used in living and production also advanced about 17 percent during the period. The exchange value per unit of farm products increased from 61 percent of the pre-war level in 1932 to 86 percent in 1935, a gain of about 41 percent.

FARM REAL-ESTATE APPRECIATION

A new appreciation of farm real estate in Missouri has been one result of increased farm income. The number of forced farm sales per thousand declined from 59.8 for the year ending in March, 1933, to 35.8 for the year ending in March, 1935. Voluntary sales and trades of farms for the year ending in March, 1932, stood at a low of 18.2 per thousand compared with 22.6 per thousand for the year ending in March, 1935. For the first time since 1920 the decline in value of farm real estate per acre halted in the year ending March, 1933, when it hit a low of 55, the State average value from 1912 to 1914 being 100. From this low of 55 in 1933 the estimate value per acre rose to 58 for the year ending March, 1935.

IMPROVED CONDITIONS FOR HIRED FARM LABOR

Estimates by the Bureau of Agricultural Economics indicate that on January 1, 1933, the demand for farm labor in Missouri was 53 percent below the standard accepted as normal and the supply 24 percent above. At the same time the average farm wage rate per person with board was $16.25. Three years later, in January, 1936, the farm-labor demand was only 27 percent below normal, and supply was 4 percent below. The average farm wage rate per person with board was $18, having advanced 11 percent above its 1933 level.

SOIL-CONSERVATION PRACTICES UNDER THE A. A. A.

The programs of agricultural adjustment, from their launching in the spring of 1933, were concerned with good use of the land of cooperating farmers, as well as with adjustment of crop acreage in line with effective demand. Farm leaders and administration officials recognized from the start that relieving a proportion of farm land from the soil-exhausting burden of major crop production created an

unprecedented opportunity for putting this land to the soil-conserving uses which farm specialists for many years have been advocating.

Adjustment contracts include provisions encouraging beneficial uses for acreage taken out of surplus crops. The first corn-hog contract, offered farmers in 1934, authorized use of the rented acreage only "for planting additional permanent pasture; for soil-improving and erosion-preventing crops not to be harvested; for resting or fallowing the land; for weed eradication; or for planting farm wood lots." The cotton contract for 1934–35 specified use of the rented acres only for "soil-improving crops; erosion-preventing crops; food crops for consumption by the producer on his farm; feed crops for the production of livestock or livestock products for consumption or use by the producer on his farm; or fallowing; or such other uses as may be permitted by the Secretary of Agriculture or his authorized agent." Food and feed crops for home use were authorized on rented acres in the South, because it was recognized that the standard of farm living in that region, which contains half of the farm population of the country, might thereby be improved. The tobacco and wheat contracts carried similar provisions.

In the 1934 crop year, the first in which the adjustment programs were in full swing, farmers agreed to shift their production on nearly 36,000,000 acres. These acres represented one out of every nine of cultivated land in the country. Of the shifted acres it has been estimated that about one-third was put in pasture or meadow crops, one-third in acres of emergency forage crops and in crops that supplied food and feed for home use, and the remaining one-third was fallow to conserve moisture and control weeds, planted to farm wood lots, or left idle. Farmers in Missouri shifted nearly 1,344,000 acres from the production of corn, cotton, wheat, and tobacco in 1934.

A marked trend toward increased pasturage of all kinds is apparent in Missouri. According to the Bureau of the Census, the acreage devoted to pasturage increased by about 3,241,000 acres from 1929 to 1934.

DAIRY CATTLE DISEASE ERADICATION

Milk has been an important source of farm income in Missouri. For the past few years more than $25,000,000 has been returned to milk producers annually. They are therefore interested in steps taken by the Government to safeguard the health of their herds.

Approximately $50,000,000 of Agricultural Adjustment Administration funds have been made available for cattle disease eradication in the United States, primarily bovine tuberculosis, Bang's disease, and mastitis. This work is being done in cooperation with the Bureau of Animal Industry. As of December 31, 1935, some 1,447,700 head of cattle had been given the tuberculin test and about 308,690 the agglutination test for Bang's disease. Of the $350,000 allocated the State for the eradication of bovine tuberculosis, $342,570.55 had been expended in indemnities and operating expenses at the close of 1935. Of the $966,000 allotment to the State for the eradication of Bang's disease, $867,500 had been spent in indemnities and operating expenses through December 1935.

EXTENT OF FARMER PARTICIPATION IN ADJUSTMENT PROGRAMS

From the inauguration of the adjustment programs in 1933 through January 6, 1936, 279,773 contracts signed by Missouri farmers were accepted by the Agricultural Adjustment Administration. Of this number of contracts 201,372 were corn-hog, 46,439 were wheat, 29,855 were cotton, 2,106 were tobacco, and 1 was rice.

Missouri farmers have evidenced their cooperation in A. A. A. programs by their votes in five referendums on these and related measures. During the first 2 weeks of October 1934, corn-hog producers were asked whether they favored an adjustment program for 1935. In this referendum Missouri producers numbering 34,319 voted for a program, while 19,342 voted against.

In the Bankhead referendum conducted on December 14, 1934, to decide upon the applicability of the Bankhead Act to the 1935–36 cotton crop, 12,466 votes were cast in the State, of which 10,552 favored application of the act. A Nation-wide wheat referendum was conducted on May 25, 1935, in which producers were asked, "Are you in favor of a wheat-production program to follow the present one, which expires with the 1935 crop year?" In Missouri, 18,913 votes were cast, of which 15,647, or 83 percent, favored such a program. During the summer of 1935, producers of different types of tobacco were asked whether they favored a production-adjustment program to follow the one which expired with the crop year 1935. Burley producers in Missouri favored a program for 1936 by a vote of 647 to 126. The last referendum in this State was conducted on October 26, 1935, in which corn-hog producers were asked whether they favored a corn-hog program for 1936. Official returns indicated that 69,391 favored such a program, while 9,386 opposed.

RENTAL AND BENEFIT PAYMENTS IN MISSOURI

As of December 31, 1935, rental and benefit payments in Missouri aggregated $42,522,601.29. Of this amount cooperating corn-hog farmers received $32,834,304.31; cotton raisers, $5,277,584.36; wheat growers, $4,128,541.49; tobacco producers, $280,238.07; and rice farmers, $1,933.06.

Until January 6, 1936, funds to provide these rental-benefit payments were raised through processing taxes. As of December 31, 1935, processing-tax collections made in Missouri totaled $38,574,390.76. Processing taxes were collected through the medium of first processors, or converters of the raw agricultural products—millers, packers, cotton, and tobacco manufacturers—wherever these processing establishments were located. They were paid by consumers throughout the country wherever the processed articles were sold.

FARMERS' MONEY GOES TO TOWN

The increased income of cotton, corn-hog, tobacco, and wheat farmers did not remain out in the country where those products were raised. The farmers' money found its way to town and to the industrial centers of the country, where it put people to work.

The extent to which increased farm income during the past 3 years enabled farmers to increase their purchases of city-made goods and services is reflected in several ways.

New automobile registrations in Missouri were approximately as follows:

1932	46,663
1933	54,308
1934	68,505
1935	91,115

The increase from 1932 to 1935 was 95 percent.

According to Automobile Facts and Figures, a publication of the Automobile Manufacturers' Association, the 1934 retail automobile sales gain in Missouri was greatest in small towns and on farms. From 1933 to 1934 new-passenger-car registrations on farms and in towns under 10,000 in population, increased 31 percent, whereas in cities over 10,000 the increase was 18 percent.

New-automobile purchases, among other things, have meant an increased gasoline consumption. In Missouri consumption rose from 458,672,000 gallons in 1932 to 489,401,000 gallons in 1934, and to 509,061,000 gallons in 1935. From 1932 to 1935 the increase amounted to 11 percent.

Fertilizer tax tag sales indicate that 32,422 equivalent tons of fertilizer were purchased in Missouri in 1933. During 1934 sales increased to 52,259 equivalent tons, and during 1935 to 59,398. The increase from 1933 to 1935 was 83 percent.

Improved banking conditions are further indications of increased business activity. Monthly statements issued by the Federal Reserve System indicate that debits to individual accounts increased greatly from 1932 to 1935. For 1932, debits in the St. Louis district amounted to $7,831,981,000, and for 1934 they advanced to $8,491,398,000. Preliminary figures indicate that for 1935 they increased to $9,666,517,000, or 23 percent over the 1932 figure.

Individual deposits, including savings, time, and commercial deposits, in banks in Missouri, aggregated $921,587,000, an advance of $171,244,000, or 22 percent for the year closing June 29, 1935, in comparison with the year ending June 31, 1933, according to reports received by the American Bankers' Association.

The number of all commercial failures showed a rapid decline from 1932 through 1935. From 713 such failures in Missouri in 1932 the figure dropped to 198 in 1934 and to 163 in 1935. Hence, commercial failures in the latter year amounted to 23 percent of those in 1932.

PERMISSION TO ADDRESS THE HOUSE

Mr. NELSON. Mr. Speaker, I ask unanimous consent that on Monday next, following the disposition of business on the Speaker's desk and the reading of the Journal and other special orders, I may be permitted to address the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. BANKHEAD. Mr. Speaker, reserving the right to object, under the peculiar circumstances that have been submitted to me by the gentleman from Missouri I shall not object, but already we have an hour and a half of time devoted to speeches on Monday. That is Consent Calendar day and a great many Members are anxious to have that calendar considered. The gentleman from Missouri has advised me that it is barely possible he may not have to leave the city and for that reason I shall not object to his request, but I shall be compelled to object to any other requests so far as Monday is concerned.

Mr. RICH. Mr. Speaker, reserving the right to object, I may say that if we get a lot of speeches on Monday we will save the country a lot of money.

The SPEAKER. Is there objection to the request of the gentleman from Missouri [Mr. NELSON]?

There was no objection.

POSTMASTER GENERAL FARLEY AT GRAND RAPIDS, MICH.

Mr. BROWN of Michigan. Mr. Speaker, I ask unanimous consent to extend my own remarks and include therein a speech made by the Postmaster General at Grand Rapids, Mich., to the Michigan State postmasters' convention.

The SPEAKER. Is there objection?

There was no objection.

Mr. BROWN. Mr. Speaker, I ask unanimous consent to have printed in the RECORD the following address by the Postmaster General at the State convention of Michigan postmasters, Grand Rapids, Mich., Wednesday, May 20, 1936, at 4 p. m.:

It is indeed a pleasure to participate with the postmasters of Michigan at a meeting of this nature. I want to take this opportunity to congratulate you on your splendid organization, which is most helpful, not only to the postmasters but to the Postal Service generally throughout the State.

Many of the postmasters assembled here today received their appointments through President Roosevelt, and it gives me particular pleasure to bring to you the personal greetings and best wishes of our great leader, whom history will record as one of the most humane and understanding of all our Presidents.

It is my feeling that you should, and I am quite sure that you do, cherish the opportunity to serve under such capable leadership. The President has a keen personal interest in the affairs of the Post Office Department and he fully appreciates the great service that is being rendered by this, the largest and most far reaching in its influence, of all of the Government departments.

Postmasters must be great believers in organization. Postal employees' organizations and gatherings are of themselves most beneficial and worth while to both the employees and the Postal Service, and it is through postmasters' conventions of this kind that new ideas and plans are exchanged, all of which have as their sole object the rendering of a more efficient service to the patrons of the Post Office Department.

The employees in all branches of the Service have contributed in no small degree to the many improvements that have been made in the Postal Service. Their alertness and sense of responsibility have been an important factor in the according of the prompt and efficient service which the Post Office Department is rendering to the American public every minute of the day and night.

It costs approximately $700,000,000 a year to operate the Postal Service, and approximately $4,000 is paid into post offices each minute of every business day by those who use its facilities. Last year the Department handled over 22,000,000,000 pieces of mail.

Owing to their intimate relationship to the interests of all of the people, postal receipts are most indicative of changing business conditions and trends. For that reason the volume of matter coming into the mails, as shown by postal receipts, has long been regarded as a most reliable barometer of business conditions.

Business throughout the country is steadily improving and your own State of Michigan is among those States that are setting the pace. One has only to glance at the daily newspapers to be apprised of the marked improvement in conditions throughout the Nation, and this upward swing is best attested to by the increasing volume of postal receipts.

As representatives of the Postal Service in this great State, I feel sure that you will be most pleased to know that postal receipts in Michigan for the first 4 months of the present calendar year were $7,355,000, as compared with but $6,741,000 for the same period a year ago. This represents a gain of more than 9 percent, which is the best indication of the steady improvement in business and industry that has and is now taking place in every section of this State.

For the month of April just passed, postal receipts for Michigan amounted to $1,930,000, as against $1,769,000 for April 1935, also a gain of more than 9 percent.

Here in Grand Rapids the postal receipts for the first 4 months of this year were $405,416, in comparison with receipts of $376,874 for the first 4 months of 1935, or an increase of more than 7 percent.

The preliminary report of postal receipts for the month of April, covering the entire country, shows a gain of more than 8 percent over the same month a year ago, and for the first 10 months of the current fiscal year a gain of approximately 7 percent over the same period in 1935 is reflected. I have every reason to believe that the final report for the year will reveal an even greater increase.

These increases in postal receipts in Michigan and throughout the country have not been confined to the metropolitan and industrial areas. It was only a few days ago that I had the pleasure of advancing 532 fourth-class post offices to the Presidential grade as a result of increased postal receipts which placed them within that category. Of these 532 post offices throughout the country which were thus advanced, 17 were here in the State of Michigan.

I feel that you will concur with me in my belief that the 40-hour-week law for postal employees, which it was my pleasure to endorse prior to its passage during the first session of the Seventy-fourth Congress, has largely solved what was a very acute problem regarding substitute employees. Before its enactment we had a large number of substitutes who had for years waited in vain for regular appointments. These substitutes have now, in most instances, obtained regular jobs and regular positions have been provided for many others who were unemployed. Nothing since I became Postmaster General has given me more happiness and satisfaction than the relief which has come to these faithful employees. In this connection, I want to commend the postmasters for the careful supervision that they have exercised in the application of the 40-hour-week law, which has in no way interrupted or impaired the Postal Service.

In addition to rendering improved service to the patrons of the Postal Service, the Department has, within the past 3 years, conducted a vigorous and widespread campaign to protect the people of the country from numerous fraudulent enterprises conducted through the mails. Investigations into these fraudulent schemes of varying natures were made by the Postal Inspection Service and wherever the facts warranted, fraud orders denying the use of the mails to the perpetrators were promptly issued. It is a certainty that the issuance of these orders has saved the American public millions of dollars annually. Reports of post-office inspectors in only 47 of the mail-fraud investigations brought to a close during the past fiscal year by the arrest, indictment, or conviction of the swindlers involved, revealed a loss to the victims of the schemes of $49,000,000. There has also been conducted a vigorous and successful drive on the senders of obscene matter.

There has been a steady improvement and development of the Air Mail Service since the first air-mail route was established between Washington and New York in 1918, but it is within the past 2 years that the greatest strides have been made in the Air Mail Service.

The present domestic air-mail system, which was set up in the spring of 1934, is the finest in the history of the service, embracing as it does 29,000-route and 40,000,000-scheduled miles. Under the old system which was in operation prior to 1934, there were but 25,248-route and 35,000,000-scheduled miles. At the present time, 215 cities throughout the Nation have direct air-mail service as compared with 167 cities under the former system. Before 1934 the States of Maine, New Hampshire, Vermont, and West Virginia had no air-mail service whatever, whereas today these States are traversed by routes, which form an integral part of the new air-mail system, which serves directly 46 States and indirectly the remaining two.

The cost to the Post Office Department of this new and greatly improved air-mail system for the fiscal year which ended on June 30, 1935, was $8,880,000, and it is estimated that the cost for the present fiscal year, including $1,300,000 allowed by the Interstate Commerce Commission for increased compensation to the air-mail contractors, will be approximately $12,000,000. In 1933, the fiscal year prior to the establishment of the present system, the cost of the air-mail service was $19,400,000 for a much more limited service than is available today.

All records for the volume of mail transported by air, passengers carried, passenger-miles flown, and pounds of air express carried were broken last year, and present indications are that these records will again be bettered this year. Planes flying over the Post Office Department's domestic and foreign air-mail system last year

carried more than thirteen and one-half million pounds of air mail, a gain of 76 percent over 1934, and more than 863,000 passengers, a gain of 53 percent. The passenger revenues of the air-mail companies for the calendar year 1935 amounted to more than $15,800,000 as compared with passenger revenues for 1934 of about $8,600,000, or an increase of 83 percent.

The most recent and certainly one of the most significant developments in the history of mail transportation was the inauguration of the trans-Pacific air-mail service last November, when the first scheduled flight on the Post Office Department's 8,700-mile air-mail route between San Francisco and the Orient took off from the Alameda, Calif., airport.

The establishment of this great transoceanic service across the broad expanse of the Pacific Ocean by way of Honolulu, Midway, Wake, Guam, and the Philippine Islands has reduced the time consumed in transporting mail from the United States to the Far East from 18 days to but 5½ days.

Plans for the inauguration of a similar transoceanic air-mail service across the Atlantic are now being formulated and there is every reason to believe that the first experimental flights between the United States and Europe will be conducted this summer.

The Post Office Department, in addition to its strictly postal operations, has been called upon several times within the past 3 years to assist other Government departments and agencies. The recent enactment of the veterans' bonus-payment legislation provides for the handling of the payment of the bonus bonds through the Post Office Department and, in accordance with this provision of the law, post offices at the principal points throughout the country are now being designated for this purpose.

Grand Rapids is one of the 12 post offices in Michigan that have been selected as direct bonus-payment offices. The 11 other Michigan post offices selected are Bay City, Battle Creek, Dearborn, Detroit, Flint, Jackson, Kalamazoo, Lansing, Muskegon, Pontiac, and Saginaw.

Plans for a prompt and expeditious handling of these bonds are now being completed. Payment on the bonus bonds becomes effective by law on June 15, 1936, on and after which date they will be received at the 45,000 post offices of the first, second, third, and fourth classes throughout the Nation. After a thorough study of the situation, I am convinced that it will be possible, through the cooperation of the Post Office and Treasury Departments and the veterans themselves, to make payment on the great majority of these bonds within 1 week after June 15, the first date of payment.

Payment of the bonus bonds will be made only after the proper identification and certification by the veterans. The payments will be made by Government check, and in the larger cities this will be done directly through the local post office. In the smaller communities the bonds will be forwarded immediately to a designated central post office within the State for payment by mail.

It is my intention that the handling of these bonus bonds be accomplished without inconvenience to the veterans and with a minimum of delay. Complete instructions as to the method of handling the bonus bonds will be forwarded to postmasters within the near future. On June 13 I plan to deliver, over a Nation-wide radio hook-up, a special message to the veterans, in which I will convey to them full and complete information concerning payment of the bonds and what they will be required to do in identifying themselves.

Among the several nonpostal operations which the Department performs for other Government departments and agencies are the handling of internal-revenue stamps for the Treasury Department and migratory-bird-hunting stamps for the Department of Agriculture.

In March of last year United States savings bonds were placed on sale at post offices throughout the country for the Treasury Department. The Post Office Department, as you all know, handles all the transactions involved in the sale of these bonds with the exception of payment, which is made through the Treasury Department direct. For the first 9 months of this sale, bonds with a maturity value of $200,000,000 were sold to the public through the various post offices of the country.

Time will not permit even a reference to all of the improvements that have been made in the Postal Service nor to the many functions of the Post Office Department, such as the Railway Mail Service, the Rural Delivery Service, the Parcel Post Service, the Star Route Service, and the like, all of which have played such a prominent role in the expansion and development of the United States Postal Service, and, indeed, the country itself.

The success that has been achieved in providing better postal service to the people of the country is due chiefly to the earnest efforts and loyalty of those who make up our great organization.

In my official capacity as Postmaster General I am required to do extensive traveling. Wherever I have gone I have availed myself of the opportunity to visit the post offices and have personally greeted thousands of our employees. In this way I have learned at first hand of the problems of the Department and our employees throughout the Nation. Of course, I am delighted with the progress that has been made in the Postal Service under the Roosevelt administration. The morale of the Department has never been finer in our whole history.

Needless to say, I fully appreciate the splendid cooperation of the postmasters and all our postal employees for the unwavering support which they have extended to me since I became Postmaster General. I shall never forget the loyalty and devotion which they exhibited under trying conditions a few years ago when business conditions made it necessary for us to enforce certain restrictions regarding employment.

In conclusion, I wish to express my grateful thanks to you and to the postal employees everywhere for all they are doing to make the United States Postal Service the greatest in all the world.

THE SALES DEPARTMENT OF THE LIVESTOCK INDUSTRY

Mr. RYAN. Mr. Speaker, I ask unanimous consent to revise and extend my own remarks.

The SPEAKER. Without objection it is so ordered.

There was no objection.

Mr. RYAN. Mr. Speaker, farmers and producers of livestock, from colonial times to the present, learned that it was of great importance to sell their stock at points where the greatest buying competition could be obtained. At an early date in our history, the public livestock market was created by the producers, themselves, and developed and maintained by their patronage and support. It has proven to be the most practical and efficient marketing system yet devised.

EARLY HISTORY OF THE MARKET

About the middle of the eighteenth century, a market which is still in operation was established at Brighton, Mass. As the frontier was extended westward after the Revolutionary War, stockmen and farmers established similar markets at convenient and strategic points. They would drive their stock on the hoof to these markets where buyers from many parts of the surrounding country gathered to bid for the animals. Just before the Civil War, for instance, many such markets developed around Chicago. In 1865 these were consolidated to form the Chicago Union Stockyards, which have been in operation continuously since that time.

As livestock production moved on westward and railroads were extended into the Middle West and Far West, other public markets were established, including the one at South St. Paul, Minn., which next year will celebrate its fiftieth year of operation.

NEED OF SALES DEPARTMENT

Producers early recognized the need for skilled salesmen to cope with the expert buyers representing packers and others. This need gave rise to the commission firm and selling agencies. These selling agencies provided expert salesmanship, offering to producers the services of men thoroughly trained and experienced and as capable of feeling the pulse of the trade as the buyers themselves. In short, the public market, with its facilities for buying and selling, its keen competition and its alert, aggressive salesmen to represent producers, became the sales department of the livestock industry and so continues to this day. No manufacturer would think of giving his whole attention merely to the production of goods but would organize a strong sales department to dispose of the product of his factories, and that, in effect, is what the livestock producers of the country have done in setting up and maintaining public markets for their stock.

No other form of marketing has been found which affords the producers the buying competition or the selling efficiency which the public market offers; nor does any other system provide the protection and safeguards to producers which Federal and State supervision gives, together with the voluntary rules and bonding practices of concerns doing business on the public markets.

THE STOCKYARDS' FUNCTION

The function of the stockyards company is to provide the chutes, pens, scales, feeding, watering, and other handling services necessary in loading and unloading stock. These various facilities are made available every day in the year by the stockyards company, while they never engage in buying or selling any livestock or having any part in the transactions between buyers and sellers. This is a phase of the public-market system which is frequently misunderstood and misrepresented.

The investment in the stockyards property necessary to provide these facilities is large. The company's two principal sources of revenue to meet these costs are from feed

and yardage charges, which charges must be approved by the Secretary of Agriculture.

Since the livestock industry is the backbone of Northwest agriculture, and that agriculture, in all its phases, is the basis of business prosperity in that region, its welfare is of paramount interest to all citizens. The patronage of the public market must be maintained, its personnel must have continued developments and its functions must become more widely known and used.

VOCATIONAL EDUCATION HAS MEANT MUCH TO THE STATE OF WEST VIRGINIA

Mr. RANDOLPH. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD and to include correspondence upon the subject of the bill under discussion this afternoon.

The SPEAKER. Is there objection?

Mr. RICH. Reserving the right to object, how much correspondence is there?

Mr. RANDOLPH. I believe I might say I will include a part of one or two letters.

Mr. RICH. It will be confined to a page or not more than a page?

Mr. RANDOLPH. Yes.

The SPEAKER. Is there objection?

There was no objection.

Mr. RANDOLPH. Mr. Speaker, the further and increased development of vocational education certainly has much to commend it to the membership of this House. The program has been most successful and has brought material benefit to not only youthful groups of students but to the older folk as well. This measure provides for a permanent system, and our Federal assistance will mean that the various States can continue their activities in agricultural education, home-economic training, and scientific instruction in trades and vocations.

I am particularly interested in the good which is being accomplished in West Virginia through the avenue of vocational education. I have had much correspondence which is interesting and indicative of the need and popularity of this type of training. I shall, however, invite your attention to short excerpts from two communications which I have received.

The first comes from my good friend and distinguished educational leader, the Honorable J. F. Marsh, president of Concord State Teachers College, West Virginia. Under date of May 1 he writes as follows:

> Having served for many years as State director of vocational education, I am in a position to appreciate the great need and the value of that special type of training, especially in these times of so much vocational need on the part of young folks.

West Virginia is the largest bituminous-coal-producing State in the Nation, and located within my district at West Virginia University is the school of mines. Its director, Mr. Charles E. Lawall, wrote me on May 4 the following:

> This bill would aid vocational education in the State of West Virginia and would particularly aid mining-extension work, as we are now conducting it throughout the State. We here in the school of mines are particularly interested in its passage.
>
> I need not tell you about the work that the mining-extension department has been doing throughout the State of West Virginia for the past 24 years, because I am aware that you are familiar with it. We have already had over 25,000 men in our mining-extension classes since this work was started. The work this year will be conducted at three centers throughout the State so that it will be available to practically every mining man that wants to take this work. During the past year we have had enrolled in our evening mining classes 1,657 men throughout the State, so we feel that this work is reaching those men for whom it is primarily intended.

Money spent through the vocational education program will be returned in the form of citizenship dividends to our Republic. Our boys and girls and men and women will be better equipped for life's work.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. LANHAM, indefinitely, on account of important business.

To Mr. BROOKS, for 5 days, on account of illness.

HOUR OF MEETING MONDAY

Mr. BANKHEAD. Mr. Speaker, in view of the fact that several special orders have been granted for next Monday, and our desire to get through the Consent Calendar as far as possible, I have conferred with the minority leader.

Mr. Speaker, I ask unanimous consent that the House meet at 11 o'clock on Monday next.

Mr. RICH. Mr. Speaker, reserving the right to object, I may say to the majority leader that it is well to convene early on Monday if an hour and a half is to be taken up with special orders, but just remember that every day you keep this House in session it is going to be detrimental to the welfare of this country; and I want to warn the majority leader he should get Congress out of here just as quickly as possible.

Mr. WOLCOTT. Mr. Speaker, reserving the right to object, can the majority leader inform us whether it is contemplated to bring up any suspensions on Monday following the Consent Calendar?

Mr. BANKHEAD. I may say to the gentleman from Michigan that is a matter entirely within the discretion of the Speaker, and I have not consulted with him; but I know of none at this time.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the House meet at 11 o'clock on Monday. Is there objection?

There was no objection.

SENATE CONCURRENT RESOLUTION REFERRED

A concurrent resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. Con. Res. 38. Concurrent resolution authorizing the appointment of a joint committee of Congress to make the necessary arrangements for the inauguration of the President-elect on January 20, 1937; to the Committee on Rules.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 3118. An act to provide for the creation of the Perry's Victory and International Peace Memorial National Monument, on Put in Bay, South Bass Island, in the State of Ohio, and for other purposes;

S. 4023. An act to provide for the continuation of trading in unlisted securities upon national securities exchanges, for the registration of over-the-counter brokers and dealers, for the filing of current information and periodic reports by issuers, and for other purposes; and

S. 4448. An act to authorize the coinage of 50-cent pieces in commemoration of the one hundred and fiftieth anniversary of the issuance of the charter to the city of Lynchburg, Va.

BILLS AND A JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee did on May 25, 1936, present to the President, for his approval bills and a joint resolution of the House of the following titles:

H. R. 8069. An act for the relief of Mr. and Mrs. A. S. Mull;

H. R. 8599. An act to provide for a change in the designation of the Bureau of Navigation and Steamboat Inspection, to create a marine casualty investigation board and increase efficiency in administration of the steamboat-inspection laws, and for other purposes;

H. R. 8766. An act to authorize municipal corporations in the Territory of Alaska to incur bonded indebtedness, and for other purposes;

H. R. 11747. An act extending the time for making the report of the commission to study the subject of Hernando De Soto's expedition; and

H. J. Res. 439. Joint resolution authorizing the erection in the Department of Labor Building of a memorial to the officers of the Immigration and Naturalization Service and Immigration Border Patrol who, while on active duty, lost their lives under heroic or tragic circumstances.

ADJOURNMENT

Mr. BANKHEAD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 59 minutes p. m.) the House adjourned until tomorrow, Wednesday, May 27, 1936, at 12 o'clock noon.

COMMITTEE HEARING

COMMITTEE ON IMMIGRATION AND NATURALIZATION

The Committee on Immigration and Naturalization, room 445, will hold public hearings at 10 a. m., Wednesday, May 27, on a group of private bills relating to fraudulent birth certificates and visas at time of entry.

EXECUTIVE COMMUNICATIONS, ETC.

852. Under clause 2 of rule XXIV, a letter from the Chairman of the Federal Trade Commission, transmitting the latest report of the Commission, entitled "The Textile Industries in the First Half of 1935, Part I, the Cotton Textile Industry", was taken from the Speaker's table and referred to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. SMITH of West Virginia: Committee on Mines and Mining. H. R. 12374. A bill to amend the act entitled "An act for the relief of unemployment through the performance of useful public work, and for other purposes", approved March 31, 1933; without amendment (Rept. No. 2779). Referred to the Committee of the Whole House on the state of the Union.

Mr. VINSON of Georgia: Committee on Naval Affairs. House Concurrent Resolution 50. Concurrent resolution expressing the appreciation of Congress for a bequest of a collection of naval and other medals from the late Dr. Malcolm Storer, of Boston, Mass.; without amendment (Rept. No. 2780). Referred to the House Calendar.

Mr. SAMUEL B. HILL: Committee on Ways and Means. House Joint Resolution 589. Joint resolution to authorize the Secretary of the Treasury to permit the transportation of bonded merchandise by other than common carriers under certain conditions; without amendment (Rept. No. 2781). Referred to the Committee of the Whole House on the state of the Union.

Mr. FADDIS: Committee on Military Affairs. H. R. 11419. A bill to establish additional national cemeteries; with amendment (Rept. No. 2785). Referred to the Committee of the Whole House on the state of the Union.

Mr. WALTER: Committee on the Judiciary. S. 4457. An act authorizing the appointment of an additional circuit judge for the third circuit; without amendment (Rept. No. 2786). Referred to the Committee of the Whole House on the state of the Union.

Mr. BLAND: Committee on Merchant Marine and Fisheries. H. R. 10313. A bill to provide for hurricane control in the Gulf of Mexico and environs during the hurricane season; with amendment (Rept. No. 2787). Referred to the Committee of the Whole House on the state of the Union.

Mr. WALTER: Committee on the Judiciary. H. R. 3043. A bill to provide for the appointment of an additional district judge for the northern district of Georgia; without amendment (Rept. No. 2788). Referred to the Committee of the Whole House on the state of the Union.

Mr. FADDIS: Committee on Military Affairs. S. 4390. An act to amend the National Defense Act relating to the Medical Administrative Corps; without amendment (Rept. No. 2789). Referred to the Committee of the Whole House on the state of the Union.

Mr. DOUGHTON: Committee on Ways and Means. H. R. 12793. A bill to amend certain administrative provisions of the internal-revenue laws, and for other purposes; without amendment (Rept. No. 2818). Referred to the Committee of the Whole House on the state of the Union.

Mr. RAMSPECK: Committee on Merchant Marine and Fisheries. S. 2127. An act to amend section 4471 of the Revised Statutes of the United States, as amended; with amendment (Rept. No. 2819). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. HARTER: Committee on Military Affairs. S. 4115. An act for the relief of Charles D. Birkhead; without amendment (Rept. No. 2783). Referred to the Committee of the Whole House.

Mr. FADDIS: Committee on Military Affairs. S. 823. An act for the relief of Benjamin H. Southern; without amendment (Rept. No. 2784). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. H. R. 864. A bill for the relief of Bernard Knopp; with amendment (Rept. No. 2790). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. H. R. 890. A bill for the relief of Oscar L. McCallen; with amendment (Rept. No. 2791). Referred to the Committee of the Whole House.

Mr. EKWALL: Committee on Claims. H. R. 2120. A bill for the relief of Mr. and Mrs. Charles F. Carter, parents and guardians of Louise Marie Carter, a minor; with amendment (Rept. No. 2792). Referred to the Committee of the Whole House.

Mr. McGEHEE: Committee on Claims. H. R. 5618. A bill for the relief of Floyd Gatton; with amendment (Rept. No. 2793). Referred to the Committee of the Whole House.

Mr. KENNEDY of Maryland: Committee on Claims. H. R. 5759. A bill for the relief of Marie B. Neale; with amendment (Rept. No. 2794). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. H. R. 5829. A bill for the relief of Daniel J. Hagerty; with amendment (Rept. No. 2795). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. H. R. 7209. A bill for the relief of Nannie D. Harding; with amendment (Rept. No. 2796). Referred to the Committee of the Whole House.

Mr. NICHOLS: Committee on Claims. H. R. 7361. A bill for the relief of Mary W. Carson; with amendment (Rept. No. 2797). Referred to the Committee of the Whole House.

Mr. McGEHEE: Committee on Claims. H. R. 7496. A bill for the relief of William E. Jones, Walter M. Marston, William Ellery, Richard P. Hallowell, 2d, and Malcolm Donald as executors under the will of Frank W. Hallowell; and Malcolm Donald as executor under the will of Gordon Donald; with amendment (Rept. No. 2798). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. H. R. 8257. A bill for the relief of Catherine T. McNally; with amendment (Rept. No. 2799). Referred to the Committee of the Whole House.

Mr. CARLSON: Committee on Claims. H. R. 9191. A bill for the relief of the dependents of James B. Kiley; without amendment (Rept. No. 2800). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. H. R. 9390. A bill for the relief of Walter T. Karshner, Katherine Karshner, Anne M. Karshner, and Mrs. James E. McShane; with amendment (Rept. No. 2801). Referred to the Committee of the Whole House.

Mr. SOUTH: Committee on Claims. H. R. 9502. A bill to confer jurisdiction upon the Court of Claims to hear, determine, and render judgment upon the claims of W. J. Nolan, L. Jacobson, J. A. Higuera, C. H. Damsted, R. Galleguillo, F. G. Grigsby, K. H. Johnson, R. Dupouy, C. J. Degen, W. L. Nolan, R. C. Jensen, M. J. Roderick, L. K. Moore, C. Lederer, M. Kelley, R. Dinkel, A. J. Mouchou, C. R. Taylor,

M. Knull, S. W. Ligon, C. C. Johnson, W. P. Brennan, C. F. Siebert, and J. T. Weeks; with amendment (Rept. No. 2802). Referred to the Committee of the Whole House.

Mr. KENNEDY of Maryland: Committee on Claims. H. R. 11123. A bill for the relief of Edward A. Foote, Jr., and others; with amendment (Rept. No. 2803). Referred to the Committee of the Whole House.

Mr. DALEY: Committee on Claims. H. R. 11668. A bill to credit the account of Everett P. Sheridan; with amendment (Rept. No. 2804). Referred to the Committee of the Whole House.

Mr. KENNEDY of Maryland: Committee on Claims. H. R. 12522. A bill for the relief of Grier-Lowrance Construction Co., Inc.; without amendment (Rept. No. 2805). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. S. 1435. An act conferring jurisdiction upon the United States District Court for the District of Connecticut to hear, determine, and render judgment upon the claim of Elizabeth Kurau; without amendment (Rept. No. 2806). Referred to the Committee of the Whole House.

Mr. McGEHEE: Committee on Claims. S. 3371. An act for the relief of John Walker; with amendment (Rept. No. 2807). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. S. 3441. An act for the relief of C. T. Hird; with amendment (Rept. No. 2808). Referred to the Committee of the Whole House.

Mr. EKWALL: Committee on Claims. S. 3607. An act for the relief of T. H. Wagner; with amendment (Rept. No. 2809). Referred to the Committee of the Whole House.

Mr. EKWALL: Committee on Claims. S. 3608. An act for the relief of Vinson & Pringle; with amendment (Rept. No. 2810). Referred to the Committee of the Whole House.

Mr. CARLSON: Committee on Claims. S. 3824. An act for the relief of Maud Kelley Thomas; without amendment (Rept. No. 2811). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. S. 4052. An act for the relief of W. D. Gann; with amendment (Rept. No. 2812). Referred to the Committee of the Whole House.

Mr. SMITH of Washington: Committee on Claims. S. 4140. An act for the relief of Homer Brett, Esq., American consul at Rotterdam, Netherlands, as a result of money stolen from the safe of the American consulate; with amendment (Rept. No. 2813). Referred to the Committee of the Whole House.

Mr. EVANS: Committee on Claims. S. 4233. An act for the relief of William H. Brockman; without amendment (Rept. No. 2814). Referred to the Committee of the Whole House.

Mr. SMITH of Washington: Committee on Claims. S. 4379. An act for the relief of the Indiana Limestone Corporation; with amendment (Rept. No. 2815). Referred to the Committee of the Whole House.

Mr. HOUSTON: Committee on Claims. S. 4444. An act directing the Court of Claims to reopen certain cases and to correct the errors therein, if any, by additional judgments against the United States; without amendment (Rept. No. 2816). Referred to the Committee of the Whole House.

Mr. RAMSPECK: Committee on the Civil Service. H. R. 12730. A bill to authorize the payment of an annuity to William H. Moran, Chief of the Secret Service Division of the Treasury Department, upon his retirement, in recognition and appreciation of his services to the United States; without amendment (Rept. No. 2817). Referred to the Committee of the Whole House.

Mr. SMITH of Washington: Committee on Claims. H. R. 11867. A bill for the relief of Michael E. Sullivan; with amendment (Rept. No. 2820). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MAAS: A bill (H. R. 12847) to provide further for the national defense; to the Committee on Naval Affairs.

By Mr. MAY: A bill (H. R. 12848) to provide an additional place of holding terms of the United States District Court in the Eastern District of Kentucky, and to amend section 83 of the Judicial Code as amended; to the Committee on the Judiciary.

By Mr. SUMNERS of Texas: A bill (H. R. 12849) to penalize procuring of or attempts to procure the escape of any prisoner in the custody of an officer of the United States: to the Committee on the Judiciary.

By Mr. LORD: A bill (H. R. 12850) authorizing the Interstate Bridge Commission of the State of New York and the Commonwealth of Pennsylvania to reconstruct, maintain, and operate a free highway bridge across the West Branch of the Delaware River between a point in the vicinity of the village of Hancock, Delaware County, N. Y., and a point in the town of Buckingham, Wayne County, Pa.; to the Committee on Interstate and Foreign Commerce.

By Mr. GOODWIN: A bill (H. R. 12851) authorizing the Interstate Bridge Commission of the State of New York and the Commonwealth of Pennsylvania to reconstruct, maintain, and operate a free highway bridge across the Delaware River between points in the village of Barryville, Sullivan County, N. Y., and the village of Shohola, Pike County Pa.; to the Committee on Interstate and Foreign Commerce.

By Mr. HARTLEY: A bill (H. R. 12852) to authorize the Secretary of the Navy to dispose of material to the sea scout department of the Veterans of Foreign Wars, of Belleville, N. J.; to the Committee on Naval Affairs.

By Mr. LEA of California: A bill (H. R. 12853) to amend the Emergency Farm Mortgage Act of 1933 in order further to provide for emergency loans to farmers; to the Committee on Agriculture.

By Mr. RANKIN: A bill (H. R. 12869) to liberalize the provisions of Public Law No. 484 Seventy-third Congress, to effect uniform provisions in laws administered by the Veterans' Administration, to extend the Employees' Compensation Act with limitations to certain World War veterans and other persons, and for other purposes; to the Committee on World War Veterans' Legislation.

By Mrs. ROGERS of Massachusetts: Resolution (H. Res. 525) requesting certain information from the Secretary of the Treasury; to the Committee on Ways and Means.

By Mr. McCORMACK: Resolution (H. Res. 526) providing for consideration of H. R. 6427, a bill to prohibit statements and publications advocating overthrow of the Government by violence, and for other purposes; to the Committee on Rules.

By Mr. BLAND: Joint resolution (H. J. Res. 597) authorizing an investigation by the Bureau of Fisheries of the California sardine (pilchard) fishing industry; to the Committee on Merchant Marine and Fisheries.

By Mr. ELLENBOGEN: Joint resolution (H. J. Res. 598) proposing an amendment to the Constitution of the United States relative to taxing of income; to the Committee on the Judiciary.

By Mr. KOCIALKOWSKI: Joint resolution (H. J. Res. 599) to provide for the appointment of a committee to study the question of Puerto Rican independence; to the Committee on Rules.

By Mr. IGLESIAS: Joint resolution (H. J. Res. 600) to provide for the appointment of a commission to study the economic and social conditions prevailing in Puerto Rico and inquire into present and future political and economic relations between the United States and Puerto Rico; to the Committee on Rules.

By Mrs. NORTON (by request): Joint resolution (H. J. Res. 601) to exempt from the tax on admissions amounts paid for admission tickets sold by authority of the committee on inaugural ceremonies on the occasion of the inauguration of the President-elect in January 1937; to the Committee on Ways and Means.

Also (by request), joint resolution (H. J. Res. 602) to provide for the maintenance of public order and the protection of life and property in connection with the Presidential inaugural ceremonies in 1937; to the Committee on the District of Columbia.

Also (by request), joint resolution (H. J. Res. 603) to provide for the quartering, in certain public buildings in the District of Columbia, of troops participating in the inaugural ceremonies; to the Committee on Public Buildings and Grounds.

Also (by request), joint resolution (H. J. Res. 604) authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President-elect in January 1937, and for other purposes; to the Committee on the District of Columbia.

By Mr. FISH: Joint resolution (H. J. Res. 605) authorizing the Secretary of Agriculture to expend funds of the Agricultural Adjustment Administration for participation by the United States in the 1936 Sixth World's Poultry Congress; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of New York, regarding a tariff duty on coconut oil; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARRY: A bill (H. R. 12854) for the relief of Joseph D. Gigante; to the Committee on Naval Affairs.

By Mr. CHURCH: A bill (H. R. 12855) for the relief of Bridget Della Cawley Ebbole; to the Committee on Immigration and Naturalization.

By Mr. COSTELLO: A bill (H. R. 12856) for the relief of Vincent Ford; to the Committee on Military Affairs.

By Mr. CURLEY: A bill (H. R. 12857) for the relief of Raymondo Bentivegna; to the Committee on Immigration and Naturalization.

By Mr. DELANEY: A bill (H. R. 12858) for the relief of Fannie Sarah Platt; to the Committee on Immigration and Naturalization.

By Mr. EKWALL: A bill (H. R. 12859) to correct the immigration status of Joseph Bryan Grant Ingoldsby; to the Committee on Immigration and Naturalization.

By Mr. LUNDEEN: A bill (H. R. 12860) for the relief of Victor Engstrand, father of Darwin Engstrand, a minor; to the Committee on Claims.

By Mr. MONAGHAN: A bill (H. R. 12861) for the relief of Burr A. Davison; to the Committee on Claims.

By Mr. O'BRIEN: A bill (H. R. 12862) for the relief of Rachel or Rochel Bursk; to the Committee on Immigration and Naturalization.

By Mr. PETERSON of Florida: A bill (H. R. 12863) for the relief of George T. Stonebraker; to the Committee on Claims.

By Mr. PETERSON of Georgia: A bill (H. R. 12864) for the relief of Gus Smith; to the Committee on Claims.

By Mr. REECE: A bill (H. R. 12865) for the relief of Ralph Hart; to the Committee on Naval Affairs.

By Mr. SMITH of Connecticut: A bill (H. R. 12866) for the relief of Manuel Joaquim Ferreira; to the Committee on Immigration and Naturalization.

By Mr. STEWART: A bill (H. R. 12867) for the relief of John W. Watson; to the Committee on Claims.

By Mr. WHELCHEL: A bill (H. R. 12868) for the relief of Fred Robert Craig; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10977. By Mr. CONNERY: Petition of the General Court of Massachusetts, urging the Congress of the United States to afford the privilege of entry into this country to those persons who are being discriminated against and persecuted in Germany on religious or racial grounds, by a suspension of the present immigration laws for a period of 2 years with reference to such persons; to the Committee on Immigration and Naturalization.

10978. Also, petition of the General Court of Massachusetts, urging the Congress of the United States to enact such legislation as may be necessary to make the Civilian Conservation Corps permanent; to the Committee on Labor.

10979. By Mr. DEROUEN: Petition of the Louisiana Cattlemen's Association, adopted at their May 14, 1936, meeting at Lake Charles, La.; to the Committee on Ways and Means.

10980. By Mr. FITZPATRICK: Petition of the New York State Legislature, urging that the tariff duty on coconut oil should not be reduced below a minimum of 3 cents a pound; to the Committee on Ways and Means.

10981. By Mr. FORD of California: Resolution of the city planning commissioners of the city of Los Angeles, endorsing the housing bill (S. 4424) of Senator WAGNER; to the Committee on Banking and Currency.

10982. By Mr. GAVAGAN: Petition of the Legislature of the State of New York, regarding a tariff on coconut oil; to the Committee on Ways and Means.

10983. By Mr. HILDEBRANDT: Resolution of the Faulk County Board of County Commissioners, Faulkton, S. Dak., urging that additional appropriations be made for continuing the works of the Resettlement Administration; to the Committee on Appropriations.

10984. Also, resolution of the Wilson Townsend Club, of Mitchell, S. Dak., relative to Townsend investigating committee; to the Committee on Rules.

10985. By Mr. JENKINS of Ohio: Petition signed by 197 voting citizens of Meigs County, Ohio, opposing the granting of discretionary power to any department in connection with the deportation of aliens at present residing illegally in the United States and urging that influence be exerted against the passage of the Dickstein and Kerr-Coolidge bills and that all possible be done to pass the Dies bill (H. R. 5921); to the Committee on Immigration and Naturalization.

10986. Also, petition signed by 65 voters and railroad employees of Ironton and Coal Grove, Ohio, and 7 voters and railroad employees of Columbus, Ohio, requesting Members of the Seventy-fourth Congress to use their best efforts to secure the enactment of the Wheeler-Crosser bills (S. 4174 and H. R. 11609); to the Committee on Interstate and Foreign Commerce.

10987. By Mr. KENNEDY of New York: Petition of the Legislature of the State of New York, regarding a tariff on coconut oil; to the Committee on Ways and Means.

10988. By Mr. PFEIFER: Petition of the Senate and the Assembly of the State of New York, Albany, that tariff duty on coconut oil should not be reduced below a minimum of 3 cents a pound; to the Committee on Ways and Means.

10989. Also, petition of the Navy Post, No. 16, American Legion, New York, urging support of House bills 11681 and 11682; to the Committee on Naval Affairs.

10990. By Mr. REED of Illinois: Petition signed by Dr. Coughlin and 20 residents of Harvard, Ill., requesting passage of House bill 11609 and Senate bill 4174; to the Committee on Interstate and Foreign Commerce.

10991. Also, petition signed by Ruth Livingston, president, Harvard (Ill.) Townsend Club, No. 1, and by 56 members of the club, requesting passage of House bill 7154; to the Committee on Ways and Means.

10992. By Mr. SADOWSKI: Petition of Farmers and Manufacturers Beet Sugar Association, of Saginaw, Mich., endorsing Senate bills 4423 and 4560, and House bills 12225 and 12295; to the Committee on Ways and Means.

10993. By Mr. SISSON: Petition of the board of directors, Utica Chamber of Commerce, opposing tax legislation; to the Committee on Ways and Means.

10994. By the SPEAKER: Petition of the Tennessee Federation of Labor; to the Committee on the Judiciary.

SENATE

WEDNESDAY, MAY 27, 1936

(Legislative day of Tuesday, May 12, 1936)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

THE JOURNAL

On request of Mr. ROBINSON, and by unanimous consent, the reading of the Journal of the proceedings of the calendar day Tuesday, May 26, 1936, was dispensed with, and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its reading clerks, announced that the House had passed without amendment the joint resolution (S. J. Res. 209) authorizing the presentation of silver medals to the personnel of the Second Byrd Antarctic Expedition.

The message also announced that the House insisted upon its amendments to the bill (S. 3531) to amend the act entitled "An act for the control of floods on the Mississippi River and its tributaries, and for other purposes", approved May 15, 1928, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. WILSON of Louisiana, Mr. WHITTINGTON, Mr. GRISWOLD, Mr. RICH, and Mr. ENGLEBRIGHT were appointed managers on the part of the House at the conference.

The message further announced that the House had passed a bill (H. R. 12120) to provide for the further development of vocational education in the several States and Territories, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H. R. 11454) to incorporate the Veterans of Foreign Wars of the United States, and it was signed by the President pro tempore.

CALL OF THE ROLL

Mr. LEWIS. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Clark	Keyes	Radcliffe
Ashurst	Connally	King	Reynolds
Austin	Coolidge	La Follette	Robinson
Bachman	Copeland	Lewis	Russell
Bailey	Couzens	Lonergan	Schwellenbach
Barkley	Davis	Long	Sheppard
Benson	Donahey	McAdoo	Shipstead
Bilbo	Duffy	McGill	Smith
Black	Fletcher	McKellar	Steiwer
Bone	Frazier	McNary	Thomas, Okla.
Borah	George	Maloney	Thomas, Utah
Brown	Gerry	Metcalf	Townsend
Bulkley	Gibson	Minton	Truman
Bulow	Glass	Murphy	Tydings
Burke	Guffey	Murray	Vandenberg
Byrd	Hale	Neely	Van Nuys
Byrnes	Hastings	Norris	Wagner
Capper	Hatch	O'Mahoney	Walsh
Caraway	Hayden	Overton	Wheeler
Carey	Holt	Pittman	White
Chavez	Johnson	Pope	

Mr. LEWIS. I announce the absence of the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], the Senator from Nevada [Mr. MCCARRAN], and the Senator from Mississippi [Mr. HARRISON], caused by illness.

My colleague the junior Senator from Illinois [Mr. DIETERICH], the Senator from Oklahoma [Mr. GORE], the Senator from New Jersey [Mr. MOORE], and the Senator from Kentucky [Mr. LOGAN] are unavoidably detained from the Senate.

Mr. AUSTIN. I announce that the Senator from New Jersey [Mr. BARBOUR] and the Senator from Iowa [Mr. DICKINSON] are necessarily absent.

The VICE PRESIDENT. Eighty-three Senators have answered to their names. A quorum is present.

SENATOR FROM FLORIDA

Mr. FLETCHER. Mr. President, the Governor of the State of Florida has appointed Mr. SCOTT M. LOFTIN to fill the vacancy occasioned by the death of my late colleague, Senator Trammell. I present the credentials of Mr. LOFTIN, and ask that they may be read.

The VICE PRESIDENT. The clerk will read the credentials of the Senator-designate.

The Chief Clerk read as follows:

STATE OF FLORIDA.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that pursuant to the powers vested in me by the Constitution of the United States and the laws of the State of Florida, I, David Sholtz, the Governor of said State, do hereby appoint SCOTT M. LOFTIN a Senator from said State to represent said State in the Senate of the United States until the vacancy therein caused by the death of Park Trammell is filled by election as provided by law.

Witness: His Excellency our Governor, David Sholtz, and our seal hereto affixed, at Tallahassee, the capital, this the 26th day of May, A. D. 1936, and of the independence of the United States of America the one hundred and sixtieth year.

[SEAL] DAVID SHOLTZ, *Governor.*

By the Governor.

Attest:

R. A. GRAY, *Secretary of State.*

The VICE PRESIDENT. The credentials will be placed on file.

Mr. FLETCHER. Mr. President, Mr. LOFTIN is present in the Chamber and ready to take the oath of office.

The VICE PRESIDENT. If the Senator-designate will present himself at the Vice President's desk the oath of office will be administered to him.

Mr. LOFTIN, escorted by Mr. FLETCHER, advanced to the Vice President's desk; and the oath of office having been administered to him, he took his seat in the Senate.

STUDY OF HERNANDO DE SOTO'S EXPEDITION (S. DOC. NO. 250)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a draft of a proposed provision pertaining to an existing appropriation for the Department of State for the commission to study the subject of Hernando De Soto's Expedition, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATE, TREASURY DEPARTMENT (S. DOC. NO. 246)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States transmitting, pursuant to law, a supplemental estimate of appropriation for the Treasury Department, fiscal year 1936 (for the erection of a memorial to persons killed in the wreck of the Navy dirigible *Shenandoah*), amounting to $2,500, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATES, DEPARTMENT OF THE INTERIOR (S. DOC. NO. 245)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States transmitting supplemental estimates of appropriations for the Department of the Interior, fiscal years 1936 and 1937, amounting to $1,087,500, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

DEFICIENCY AND SUPPLEMENTAL ESTIMATES, DEPARTMENT OF THE INTERIOR (S. DOC. NO. 249)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States transmitting deficiency and supplemental estimates of appropriations for the Department of the Interior for the fiscal year 1937 and prior years, amounting to $650,613.21, together with drafts of proposed provisions pertaining to existing appropriations, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

COMPLETION OF SOIL SURVEY OF HAWAIIAN ISLANDS (S. DOC. NO. 247)

The VICE PRESIDENT laid before the Senate, draft of a proposed provision pertaining to an existing appropriation

of the Department of Agriculture to make available to the Bureau of Chemistry and Soils the funds necessary to complete a soil survey of the Hawaiian Islands, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATE, DEPARTMENT OF COMMERCE (S. DOC. NO. 251)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a supplemental estimate of appropriation for the Department of Commerce, Bureau of Marine Inspection and Navigation (salaries and expenses), fiscal year 1937, amounting to $205,000, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATE—UNITED STATES HARVARD UNIVERSITY TERCENTENARY COMMISSION (S. DOC. NO. 248)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a supplemental estimate of appropriation for the expenses of the United States Harvard University Tercentenary Commission for the fiscal year 1937, amounting to $3,000, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

PETITIONS AND MEMORIALS

Mr. COPELAND presented a concurrent resolution adopted by the Legislature of the State of New York, favoring retention of the tariff duty of 3 cents a pound on imported coconut oil, which was referred to the Committee on Finance.

(See concurrent resolution printed in full when laid before the Senate by the Vice President on the 25th instant, p. 7832, CONGRESSIONAL RECORD.)

Mr. COPELAND also presented a resolution adopted at the annual meeting of the District of Columbia League of Women Voters, Washington, D. C., opposing any reorganization of the Washington school management which would reverse the tradition of an independent, nonpolitical status for the public-school system, and favoring the enactment of the so-called Sisson bill, repealing what is known as the "red rider" in connection with the public schools of the District, which was referred to the Committee on the District of Columbia.

He also presented resolutions adopted by Local Union No. 112, United Association of Journeymen Plumbers and Steam Fitters, of Binghamton, and the Bookkeepers', Stenographers', and Accountants' Union, No. 12646, of New York City, both in the State of New York, favoring the prompt enactment of Senate bill 4424, known as the Wagner-Ellenbogen low-cost housing bill, which were referred to the Committee on Education and Labor.

He also presented a resolution adopted at a mass meeting of citizens of Rockland County assembled at Nyack, N. Y., favoring the enactment of mandatory neutrality legislation laying embargoes against all belligerents on arms, ammunition, and raw materials essential for war purposes, and protesting against increased appropriations for the Army and Navy, etc., which was referred to the Committee on Foreign Relations.

He also presented a resolution of the Grand Jurors Association of Westchester County, Yonkers, N. Y., favoring the enactment of the so-called Reynolds-Starnes bill, being the bill (S. 4011) to further reduce immigration, to authorize the exclusion of any alien whose entry into the United States is inimical to the public interest, to prohibit the separation of families through the entry of aliens leaving dependents abroad, and to provide for the prompt deportation of habitual criminals and all other undesirable aliens, and to provide for the registration of all aliens now in the United States or who shall hereafter be admitted, which was referred to the Committee on Immigration.

He also presented a resolution adopted by Pierstown Grange, No. 793, Patrons of Husbandry, Cooperstown, N. Y., protesting against the enactment of the so-called Pettengill bill, being the bill (H. R. 3263) to amend paragraph (1) of section 4 of the Interstate Commerce Act, as amended February 28, 1920 (U. S. C., title 49, sec. 4), which was referred to the Committee on Interstate Commerce.

He also presented a resolution adopted by the Fourteenth Convention of the Young Women's Christian Associations of the United States of America, favoring the prompt enactment of the so-called Costigan-Wagner antilynching bill, which was referred to the Committee on the Judiciary.

He also presented a resolution adopted by Navy Post, No. 16, the American Legion, of New York City, N. Y., favoring the enactment of pending legislation pertaining to the better organization, administration, and maintenance of the United States Naval Reserve and the Marine Corps Reserve, which was referred to the Committee on Naval Affairs.

He also presented a resolution adopted at a meeting of the Peace Institute held in Syracuse, N. Y., favoring peace and the maintenance of only defensive armaments, which was referred to the Special Committee on Investigation of the Munitions Industry.

He also presented a resolution adopted by Pierstown Grange No. 793, Patrons of Husbandry, Cooperstown, N. Y., favoring the enactment of the so-called Frazier-Lemke farm refinancing bill, which was ordered to lie on the table.

He also presented resolutions adopted by Local Union No. 2090, United Brotherhood of Carpenters and Joiners of America, and Local No. 1, Journeymen Tailors Union of the Amalgamated Clothing Workers of America, both of New York City, N. Y., favoring the enactment of the so-called Frazier-Lundeen workers' social insurance bill, being the bill (S. 3475) to provide for the establishment of a Nation-wide system of social insurance, which were ordered to lie on the table.

REPORTS OF COMMITTEES

Mr. McKELLAR, from the Committee on Civil Service, to which was referred the bill (S. 4659) to authorize the payment of an annuity to William H. Moran, Chief of the Secret Service Division of the Treasury Department, upon his retirement, in recognition and appreciation of his services to the United States, reported it without amendment and submitted a report (No. 2104) thereon.

Mr. BULOW, from the Committee on Civil Service, to which was referred the bill (S. 4552) to extend the retirement privilege to the Director, Assistant Directors, inspectors, and special agents of the Federal Bureau of Investigation, reported it without amendment and submitted a report (No. 2105) thereon.

Mr. BACHMAN, from the Committee on Military Affairs, to which was referred the bill (H. R. 11164) for the relief of Arthur Van Gestel, alias Arthur Goodsell, reported it without amendment and submitted a report (No. 2106) thereon.

Mr. ADAMS, from the Committee on Banking and Currency, to which was referred the bill (H. R. 12168) to authorize the coinage of 50-cent pieces in commemoration of the seventy-fifth anniversary of the Battle of Antietam, reported it with an amendment and submitted a report (No. 2107) thereon.

He also, from the Committee on Appropriations, to which was referred the bill (H. R. 12624) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1936, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1936, and June 30, 1937, and for other purposes, reported it with amendments and submitted a report (No. 2108) thereon.

Mr. COOLIDGE, from the Committee on Military Affairs, submitted a report (No. 2109) to accompany the joint resolution (H. J. Res. 570) authorizing the President of the United States to award posthumously a Distinguished Service Medal to Maj. Gen. Clarence Ransom Edwards, heretofore reported by him from that committee without amendment.

Mr. NEELY, from the Committee on the Judiciary, to which was referred the bill (S. 4664) authorizing the ap-

pointment of an additional district judge for the eastern district of Pennsylvania, reported it without amendment and submitted a report (No. 2110) thereon.

PRODUCTION COSTS OF WOOLEN KNIT GLOVES AND MITTENS

Mr. LA FOLLETTE, from the Committee on Finance, to which was referred the resolution (S. Res. 270) for an investigation of the production costs of woolen knit gloves and mittens (submitted by Mr. COPELAND on Mar. 31, 1936), reported it without amendment.

ADDRESS ON CENTENNIAL CELEBRATION OF THE BATTLE OF SAN JACINTO

Mr. FLETCHER, from the Committee on Printing, to which was referred the manuscript of an address delivered by Hon. George A. Hill, Jr., entitled "The Centennial Celebration of the Battle of San Jacinto" before the Kiwanis Club of Houston, Tex., reported favorably thereon with the recommendation that the address, with the accompanying papers, be printed as a Senate document.

On motion by Mr. FLETCHER, it was

Ordered, That the address delivered by Hon. George A. Hill, Jr., entitled "The Centennial Celebration of the Battle of San Jacinto" before the Kiwanis Club of Houston, Tex., on the eve of the celebration of the one hundredth anniversary of the Battle of San Jacinto, be printed as a Senate document, with the accompanying papers.

ENROLLED BILLS PRESENTED

Mrs. CARAWAY, from the Committee on Enrolled Bills, reported that that committee presented to the President of the United States the following enrolled bills:

On May 26, 1936:

S. 4448. An act to authorize the coinage of 50-cent pieces in commemoration of the one hundred and fiftieth anniversary of the issuance of the charter to the city of Lynchburg, Va.

On May 27, 1936:

S. 3118. An act to provide for the creation of the Perry's Victory and International Peace Memorial National Monument on Put in Bay, South Bass Island, in the State of Ohio, and for other purposes; and

S. 4023. An act to provide for the continuation of trading in unlisted securities upon national securities exchanges, for the registration of over-the-counter brokers and dealers for the filing of current information and periodic reports by issuers, and for other purposes.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. LONERGAN:

A bill (S. 4697) relating to the filing of claims for compensation under the United States Employees' Compensation Act, approved September 7, 1916; to the Committee on Claims.

By Mr. SHEPPARD:

A bill (S. 4698) to authorize appropriations for construction at military posts, and for other purposes; and

A bill (S. 4699) to provide a commissioned strength for the Corps of Engineers, United States Army, for the efficient performance of military and other statutory duties assigned to that corps; to the Committee on Military Affairs.

By Mr. COPELAND:

A bill (S. 4700) to extend the definition of an alien veteran, for naturalization purposes only, so as to include certain alien enemies and nationals of Turkey and Bulgaria who rendered active service in United States armed forces with personal record of loyalty to the United States, and for other purposes; to the Committee on Immigration.

By Mr. RUSSELL:

A bill (S. 4701) to amend section 11 of the act of March 1, 1919 (40 Stat. 1270); to the Committee on Printing.

Mr. HATCH. Mr. President, yesterday at a meeting of a group of western Senators a possible amendment to the Soil Conservation Act was suggested as perhaps being necessary. It was not concluded that the amendment was necessary; but in view of the approach of the end of the session, it was suggested that the proposed amendment should be submitted and referred to the Committee on Agriculture and Forestry for study. In response to that request, I now ask consent to introduce a bill proposing to amend the Soil Conservation and Domestic Allotment Act, and ask that it be referred to the Committee on Agriculture and Forestry.

The VICE PRESIDENT. Without objection, the bill will be received and referred as requested by the Senator from New Mexico.

By Mr. HATCH:

(By request.) A bill (S. 4702) to amend the Soil Conservation and Domestic Allotment Act; to the Committee on Agriculture and Forestry.

A bill (S. 4703) conferring jurisdiction upon the United States District Court for the District of New Mexico to hear, determine, and render judgment upon the claims of Emma Gomez and the estate of Teresita S. Otero; to the Committee on Claims.

A bill (S. 4704) to correct the naval record of Leonard Phillip Frank; to the Committee on Naval Affairs.

AMENDMENT TO FIRST DEFICIENCY APPROPRIATION BILL

Mr. VANDENBERG. Mr. President, on May 12 I submitted an amendment in the nature of a substitute for the relief section of the deficiency bill, being House bill 12624. I wish to perfect the amendment. I offer it in amended form, and ask that it be reprinted and lie upon the table.

The VICE PRESIDENT. Without objection, that order will be made.

The amendment submitted by Mr. VANDENBERG proposes to appropriate $1,425,000,000, to remain available until June 30, 1937, to provide adequate home relief and/or work relief, including the cost of administration thereof, to be available for payment of grants-in-aid to the States, Territories, and possessions; $425,000,000 for emergencies, and $1,000,000,000 for regular allocations, etc., and is intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, 1936.

WITHDRAWAL OF PAPERS—WILLIAM SMITH

Mr. BONE. Mr. President, I present a motion for the return of certain papers filed with Senate bill 1486 in the first session of the Seventy-fourth Congress. This being a bill for the relief of a private citizen, and no action having been taken on the bill by the committee, I desire the return of the papers. I understand it is necessary that the Senate acquiesce in the motion.

Mr. ROBINSON. I think it is the custom to grant such a request.

The VICE PRESIDENT. No adverse report having been filed on the bill, an order for the return of the papers will be entered.

The order agreed to on motion of Mr. BONE is as follows:

Ordered, That the papers filed with the bill (S. 1486) for the relief of William Smith be withdrawn from the files of the Senate, no adverse report having been made thereon.

FLOOD CONTROL A FEDERAL RESPONSIBILITY

Mr. BILBO. Mr. President, a few days ago I attempted to present to the Senate some arguments to show why flood control is wholly a Federal responsibility. The question is still an issue before the Congress and is being fought out by the conferees on the part of the House and Senate, the conference committee having under consideration the differences between the two Houses in the Overton bill. In this connection and while it is still pertinent I send to the desk a poem, which I ask to have printed in the RECORD at this point following these brief remarks.

Mr. CONNALLY. Mr. President, is the poem a product of the Senator from Mississippi?

Mr. BILBO. I am very sorry it is not.

Mr. CONNALLY. The Senator merely sponsors it?

Mr. BILBO. Yes. It explains who owns the Mississippi River. It occurred to me that if prose would not convince the Congress, perhaps poetry would do so.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

WHO OWNS THE MISSISSIPPI RIVER?

The river belongs to the Nation,
The levee, they say, to the State,
The Government runs navigation,
The Commonwealth, though, pays the freight.
Now, here is the problem that's heavy—
Please, which is the right or the wrong?
When the water runs over the levee
To whom does the river belong?

It's the Government's river in the summer
When the stage of the water is low,
But in spring when it gets on a hummer
And starts o'er the levee to flow;
When the river gets suddenly dippy
The State must dig down in its till
And push back the Old Mississippi
Away from the farm and the mill.

I know very little about lawing,
I've made little study of courts,
I've done little geeing and hawing,
Through verdicts, opinions, reports;
Why need there be anything more said
When the river starts levees to climb!
If the Government owns the aforesaid
It must own it all the time.

If the bull you are leading should bellow
And jump over somebody's fence,
There isn't much doubt you're the fellow
Expected to bear the expense;
If it follows a Sunday-school teacher,
And chases the maid up a tree,
You're the owner the same of the creature,
Undoubtedly all will agree.

If sometime should somebody's chickens
Get into your garden and dig
And pull up the plants like the dickens,
Or somebody's bull pup or pig,
The owner thereof cannot blame it
On you or some party remote;
The owner thereof can't disclaim it,
The chick or the pup or the shoat.

If it's your Mississippi in dry time,
It's yours, Uncle Sam, when it's wet;
If it's your Mississippi in fly time
In flood time it's your river yet.
There's no other way you can make it,
And so when I give the alarm,
Come get your darned river and take it
Away from my timber and farm!

PENDING TAX LEGISLATION—ADDRESS BY SENATOR COUZENS

Mr. TOWNSEND. Mr. President, I ask unanimous consent to have printed in the RECORD an interesting radio address, on the subject of pending tax legislation, delivered last evening by the distinguished senior Senator from Michigan [Mr. COUZENS].

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Taxes are never an agreeable subject to discuss, but the assignment given me by the National Radio Forum, under the auspices of the Washington Evening Star and through the courtesy of the National Broadcasting Co., necessitates my tackling the job.

We may first raise the issue as to why new taxes should be imposed at this session of Congress. We may lay aside discussions of extravagance and waste in government and assume for the moment that all this has stopped. We would still need new taxes to take care of debts and obligations already incurred. On April 30, 1936, we had a gross debt of $31,425,440,396. From this should be deducted loans the Government has made, secured by adequate assets, in the amount of $4,328,055,114, leaving a net debt of $27,097,385,282. We should also consider that on April 30 we had in the Treasury $2,441,970,519, while ordinarily the general fund in normal times runs around $250,000,000. If we deduct this Treasury balance, which would be the practice in ordinary commercial accounting, we would show a net debt of $24,655,414,763. This does not take any account of what some persons call the profit through gold devaluation of approximately $2,000,000,000, which is now maintained in a stabilization fund.

This large debt has been brought about, according to the testimony of the Secretary of the Treasury, by a deficit for the fiscal year of 1934 amounting to about $4,000,000,000; in 1935 of about $3,500,000,000; in 1936, after considering revenue lost through the decision of the Supreme Court in the A. A. A. Act and putting the whole of the World War veterans' adjusted-compensation certificates into this year, aggregating about $6,000,000,000; in 1937 it is estimated the deficit will be about $2,500,000,000, the total aggregating approximately $16,000,000,000.

INTEREST RATE SLASHED

After considering all of the factors above enumerated, the national debt is approximately $2,000,000,000 less than the highest post-war debt, which was on August 31, 1919, which amounted to $26,596,701,648. We might at this time consider the interest rates paid on this enormous outstanding debt. In 1920 the average interest rate was 4.178 percent. During the first 9 months of this fiscal year the average interest rate was 2.6 percent—a very substantial reduction in interest costs to the Government, due to the plentifulness of money.

To the cost of debt service we must add the current expenses of our Government. Congress did not contemplate enacting new tax legislation at this session, and undoubtedly new taxes may have been avoided at this time had it not been for the Supreme Court's decision declaring unconstitutional the Agricultural Adjustment Act and had Congress not enacted legislation for immediate payment of the World War veterans' adjusted-compensation certificates. The loss of revenue through the Supreme Court's decision in the case of the Agricultural Adjustment Act and $120,000,000 this year to amortize the additional debt created by the payment now, some 10 years in advance of the due date, of the adjusted-compensation certificates to World War veterans, necessitates the additional taxes and, therefore, the first problem that arises is from what source this additional revenue can best be collected. There are a multitude of ways, but the difficulty arises from what source the new taxes should come so as to do the least possible harm to the country. There are many, many arguments advanced with respect to broadening the base of the income taxes. This, in theory at least, is sound, but it can only be secured by two methods, namely, reducing the exemption allowed to single and married persons with or without children to support, or by raising the rates in the $3,000 to $5,000 income group. Whatever is done in this connection obviously to some extent lowers the standard of living because families would have less to spend.

To the extent that these families have to pay income taxes, to that extent at least, they must reduce their cost of maintaining a home. Next, the issue has been raised as to the extent that corporations withhold distributing their profits for the purpose of evading high taxes for their stockholders. In an endeavor to prevent that, the administration recommended that the entire additional revenue needed be raised through the taxation of the undistributed profits of corporations. From my observations, study of the approval, and evidence of witnesses appearing before the Senate Finance Committee, the plan was the most carelessly drawn and undeveloped of any proposal I have ever seen, and especially is such a plan at this time unwise. Why do I say unwise? It is because the country as a whole is now getting out of the worst economic depression in the history of the Nation. There are hundreds of thousands of corporations, mostly small, who have been required through the long years of depression to use up whatever surplus they had accrued in earlier years. Some have gone into debt and some have had their capital materially impaired, and it therefore seems obvious that an opportunity must be given to them to accrue earnings to take care of the losses in previous years, and to restore any impairment in their capital.

RESERVES CURTAILED SUFFERING

Then, there is another very important matter, but much more difficult to evaluate, and that is, to what extent corporations should conserve a portion of their earnings to carry them over when and if another depression comes. There has, in my opinion, been an enormous curtailment in distress and suffering as a result of reserves heretofore accumulated. This is not to say that many corporations, those closely held by a few, and personal holding companies, have not retained an unnecessary and excessive amount of reserves for the purpose of saving their stockholders from coming within the high surtax brackets.

There is some merit in taxing undistributed earnings of corporations, and that was recognized by the Senate in 1924 when it did, by a substantial majority, adopt a tax on undistributed profits of corporations. It did not become a law, because the conferees of the House of Representatives refused to adopt the plan. However, there was a very clear difference in imposing a tax on undistributed earnings of corporations in 1924 and doing it now, in 1936, after, as I said before, the country has gone through the greatest economic depression in its history.

Therefore, in my opinion, this is not the time, but I do believe that a committee of Congress, in cooperation with the Treasury, should study this question for at least a year or two and then present its facts and its conclusions to the Congress. The Treasury Department, no matter what its good intentions, came before the Senate Finance Committee in support of a proposal which seemed to me to have had the least study and to be less defensible than any proposal for taxes since I have been a Member of Congress. It seemed to be the conviction of my colleagues on the Senate Finance Committee that these conclusions are substantially correct, because very shortly after the hearings had been finished they reached the conclusion that we were not ready to undertake the Treasury's proposal.

Then arose the question of how best to raise the additional taxes. This brings me to a consideration of the methods now in existing law, namely, the capital-stock tax, the flat tax on corporate earnings, and the excess-profits tax ranging from 6 to 12 percent. The proposal to repeal all of these taxes and adopt an entirely new system without adequate study, or time for adequate study, and with inadequate information as to the amount of revenue it would raise, seemed wholly indefensible. This

seemed to be the consensus of opinion of the members of the Senate Finance Committee who rejected substantially the plan to raise all of the additional revenue through a tax upon undistributed earnings of corporations and decided to maintain the existing methods of raising revenues with additions to the rates applied to corporate earnings.

LONG-TERM FINANCING DIFFICULT

To have done otherwise would, in my opinion, have had a most disastrous effect upon the small or moderate-sized corporation whose reserves and capital had been seriously affected in many cases during the depression. For example, as evidence how there is lack of coordination in the activities of the Government, I point out that in 1934 there was created what was known as the Business Advisory and Planning Council, which functioned under the guidance of the Department of Commerce. The council created what was known as the Small Industries Committee. This committee undertook a survey of the small industries of the Nation with relation to credit needs and under date of April 15, 1935, the Department of Commerce released a digest of the report, which contains the following:

"As a matter of fact, long-term financing for small industry has always been difficult. It is not simply a depression problem. Through private investment bankers it has been available only to concerns of sufficient size and standing to warrant the investment banker in bringing out an issue as small, as for instance, $1,000,000, and so it may be said that this facility has been practically denied small concerns. Such enterprises have been obliged to develop their capital structure gradually and out of undistributed earnings, or to attract the participation of individual capitalists. They have not received the benefits of recourse to the capital markets for their long-term requirements."

Then, further on in the report is stated, "That of the total manufacturing establishments in the United States, 97 percent employ 250 wage earners or less, and that the percentage of wage earners so employed is approximately 48 percent of the wage earners in industry."

The report further clearly indicates the serious financial condition in which most of the small industries find themselves, not only as to working capital but also current and long-term capital requirements.

That situation is serious, and, unless protection is provided, national disaster for industry impends. Now certainly the Treasury Department, in advancing its proposal, seems to have entirely overlooked the conclusions of another part of the Government, namely, the Department of Commerce. In addition to that records clearly indicate that very large corporations with enormous reserves already accumulated can and sometimes do disburse all of their current earnings in dividends. They obviously would have secured enormous advantage in the escape from the enormous taxes proposed on undistributed earnings. Not only would they have saved the 18 percent now proposed as a flat tax on corporate earnings, but they would save the 7 percent now proposed on undistributed earnings of corporations. Then, again, they would have been in a most advantageous position in competition with their competitors.

EARNINGS NOT ALWAYS IN CASH

There is another phrase which seems to have been absolutely overlooked by the Treasury Department, and that is, they have assumed apparently that all corporate earnings at the end of any year are in cash, and therefore could conveniently be paid out in dividends or in the form of taxes. Those who have had any experience in industry know that rarely are all corporate earnings at the end of the year in cash. These earnings may all be in inventory, accounts receivable, or have been invested in capital assets. Let me give you just one example presented by the Tanners' Council of America, which appears in part 7 of the hearings on the tax bill, page 598. I quote:

"The value of that inventory which must be maintained if the tanners are not to go out of business—and our statistics show that the physical quantity of inventories in the tanning industry has changed remarkably little in the past 10 years—that must be maintained if tanners are to continue in business. The value of that inventory is subject to sharp change. The raw material processing of our industry—hides and skins—are notorious as sensitive commodities. That fact, taken in conjunction with the absolute necessity for the maintenance of large inventories and the slow turn-over, means one thing—that inventories have an extraordinarily important role in the determination of income. Profits and losses in the tanning industry, in other words, are determined to a very great extent by price changes in the raw material."

Certainly, Congress should not enact a tax bill without complete detailed information as to its effect upon industry, the possibility of collecting the taxes, and a sound estimate of the probable yield of revenue. Then again, I do not believe that the Treasury Department has—or if it has, it did not submit it to the committee so that I understood—any adequate information as to what brackets of income the dividends would fall in, if and when distributed by the corporations. In view of these facts the committee agreed to retain existing and tried taxes, to increase the rates somewhat, and to add a 7-percent tax on the undistributed earnings or corporations—and this without any provisions for relief, should the corporation find its capital impaired or under contract to not pay dividends until the corporation had liquidated its debts. There are States which prohibit dividends whenever the corporation's capital stock is impaired. There are corporations who have contracted with their creditors to not pay dividends until the debt has been liquidated, and while the 7-percent tax on undistributed earnings was assumed to be small, it is nevertheless a substantial tax to debt-burdened corporations or those who have lost their surplus during the depression years. There may be justification for a small tax, say 2 to 4 percent, on undistributed earnings of corporations for the purpose of building up statistical information as to the revenue obtained from such a tax and to what extent there are corporate surpluses.

TAXES NOT ALWAYS PASSED ON

With adequate experience and study, I think it is entirely practicable to work out a graduated tax both on individuals and corporations which would be based on the ability to pay. This is desirable because we will have high taxes for many, many years to come. I cannot pass from the subject of corporate taxes without recalling the statement commonly made, that all such taxes are passed on to the consumer. They may be under certain conditions, but they also may not be. If the corporations are in a competitive field, they do not have the freedom to pass on all taxes. If the corporation is in a field which is a monopoly, it may pass on the taxes, but the corporation in a monopolistic field fixes its prices as high as possible and the elimination of corporate taxes would not cause a reduction in prices to the consumer. With regard to the so-called manufacturers' sales tax and now existing tax on certain commodities, it must be agreed that it is an unwise form of taxation to put impediments in the way of moving, in great volumes, the necessities of life. There are certain excise or sales taxes which are very lucrative, such as, for example, tobacco sales taxes which in 1935 brought in about $478,333,000 and which it is estimated cost each individual smoker about $21.90 a year, yet the smoker has not complained. Then again, the gasoline sales tax certainly is based on the use made of the highways. If there is no use made of the highways, there is no tax and the more use is had of the highways, the more tax. Now, there are excise taxes which are not so equitable.

To deal with the question of ability to pay, consideration must be given to the tax-exempt Federal, State, county, and municipal bonds. I think everyone will agree that as a matter of public policy there should be no tax-exempt securities of any kind. The States voluntarily make their issues tax exempt. Likewise, the counties and municipalities. The Federal Government, under our Constitution, has no power to tax these securities or the salaries of employees of any State or its political subdivisions. It does have the power to, and it does tax, its own employees, with certain exceptions where the Constitution provides against it, such as in the cases of the judiciary.

There is a question that naturally arises which I am not able to answer because of lack of statistical information as to what savings the States and their political subdivisions make as a result of their ability to secure money at lower rates than what they might have to pay if the tax-exempt provision was eliminated.

Now, the Federal Government, of course, has to compete in the money markets for the same money as the States and their political subdivisons, but the Federal Government, in spite of this, has made practically all of its bonds subject to surtaxes as well as subject to gift and estate taxes. Let me give you, roughly, an example of an individual who falls, say, for example, in a bracket which requires him to pay 43 percent. He would only receive a net return in buying Government bonds of 1½ percent. This is not true, however, of State and municipal bonds because they are not subject to income taxes, although they are subject to estate and gift taxes.

POWER TO TAX, POWER TO SAVE

While everyone admits that the power to tax constitutes the power to destroy, it is also a self-evident fact that the power to tax constitutes the power to save. The purpose of government is to save, and therefore a fair and just tax is the most essential force of government. Had Congress the foresight to have seen the coming depression, it would not have been justified in making the enormous reductions in taxation during the previous decade. However, this is a case of your hindsight being better than your foresight.

In a large measure we have become a nation of phrase makers, and when repeated often enough they become a doctrine of infallibility. We frequently hear the phrase or doctrine expressed to the effect that we must not use our tax program for social purposes and yet every tax proposal has its social consequences; it cannot be avoided. You have heard much of another phrase, "Soak the rich." The country, I believe, has almost universally approved the policy of the graduated income tax based on the ability to pay, so we might examine that to see what happens to an individual with a million-dollar taxable income. The taxpayer would be in the highest surtax bracket and on his whole income would pay an average of 67.90 percent, or, in other words, $679,000. Let us see what he has left after paying his tax—it is $321,000 net income. Many men have contributed just as much to society as most of these million-dollar-income taxpayers and are pleased with much less income.

Let me say in this connection I know of no Member of Congress who gets pleasure out of placing taxes. Some old trained politicians say that it is a sound policy for a Member of Congress to vote for all appropriations and against all taxes, and by so doing, of course, he does not offend any of his constituents.

The late lamented Lincoln once said: "Honest statesmanship is the wise employment of individual means for the public good." Burke said: "The great difference between the real statesman and

the pretender is that the one sees into the future, while the other sees only the present; one lives by the day and acts on expediency, the other acts on enduring principles and for immortality." May I state in this connection that we insist on thinking of statesmen as men in public life, but the man in business or the man who has any power to direct or control any number of his fellow men may well be a more important statesman than are many of the men in public life. He may have far more opportunity to exercise policies of statesmanship than have any officials in the highest branches of our Government.

When great industrialists or private men of power use it in a statesmanlike manner they accomplish a greater purpose and a greater good than public officials and should be commended. However, when they do not do this or when they devise ways and means to avoid taxation, or, in other words, avoid paying their share of the cost of government, they are really in the same class as politicians who adopt expedients to be reelected.

OUR NEED FOR FOREIGN TRADE—ADDRESS BY SECRETARY HULL

Mr. TYDINGS. Mr. President, I ask unanimous consent to have printed in the RECORD an address delivered by Hon. Cordell Hull, Secretary of State, at the Foreign Trade Luncheon at the Hotel Astor, New York City, May 22, 1936, on the subject of Our Need for Foreign Trade.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

It is with special pleasure that I welcome this opportunity to come to New York and address a joint meeting of those who are giving unstintingly of their time and energy to make the Foreign Trade Week the success it deserves to be and of those who are more particularly concerned with the message and meaning of the National Maritime Day. As the great gateway of our Nation to and from the world, New York is a peculiarly appropriate spot in which to take stock of some of our vital needs in the field of foreign trade. Its magnificent harbor is the starting point from which ships, large and small, carry their cargoes to other countries and the terminal to which these same ships bring cargoes from abroad. The loading and unloading which take place at its miles of piers constitute an integral part of the throb of your city's and of the whole country's business activity. New York knows and feels all too keenly the difference between periods when ships leave and enter its harbor fully laden and when they come to and fro all but empty of their freight.

Ships are indispensable tools of world commerce. The degree to which these tools are utilized denotes the difference between active and stagnant foreign trade. Clearly, for all those who own and operate ships, for all those whose livelihood depends upon shipping, the difference between active and stagnant foreign trade inevitably spells the difference between prosperity and depression.

No less directly and no less significantly, the difference between activity and stagnation in foreign trade spells a difference between satisfactory prosperity and both uncertain and depressed business conditions for our whole Nation. This basic proposition, which is so crystal clear to those of us who have the need and the opportunity to deal with the problem of foreign trade, is, unfortunately, not always and not universally recognized, either in our country or abroad.

There are among our fellow countrymen some who believe, in all sincerity, that our national prosperity could be enhanced if all American citizens would buy nothing or next to nothing produced in other countries. They accordingly proclaim the slogan "Buy American" and attempt, in the same spirit of sincerity, to dramatize the idea that it is unpatriotic to use any foreign commodities, if the same or similar or substitute articles can possibly be produced in the United States. There are also some who exploit this slogan, for less sincere and unselfish reasons, by making it serve as a cloak for the promotion of special interests through the imposition and maintenance of unreasonable and embargo tariffs.

We all agree that our domestic economy should be developed to the fullest extent justifiable from any practical business standpoint. It goes without saying, also, that under any policy or any conditions, the overwhelming bulk of what we buy and consume will be our domestic products. If the slogan "Buy American" were meant to imply this, it would be constructive and beneficial. But it assumes a wholly different aspect when it is carried to impracticable extremes and—whether for sincere and misguided, or for selfish and predatory reasons—is made synonymous with a policy directed toward a virtual elimination of all imports.

Clearly, such an elimination of imports could be brought about only if the American people themselves were to produce every commodity needed—regardless of quality, cost, or use, and regardless of whether it is an extremely poor or even wholly undesirable substitute. A policy directed toward this end is better known as that of autarchy or economic self-containment. Carried into full effect, it would require our Nation to resort—as some nations already have resorted—to synthetic substitutes, manufactured at three or five or even more times the cost of producing the superior and more desirable natural articles.

In contemplating such a policy it is necessary to envisage its effect upon our whole economic life. A large number of vitally important branches of production in our country are geared to an output far in excess of our domestic requirements. These surpluses must be marketed abroad, if the industries producing them are not to stagnate. But trade is a two-way affair. Our sales to foreign countries must inevitably become reduced as we reduce our purchases from abroad. A policy directed toward economic self-containment is inescapably a policy of economic isolation.

I, for one, cannot assent to the view that our national interests would be promoted, rather than irreparably injured, if we were to isolate ourselves from the great stream of world trade. In my opinion, only a broad and liberal policy, combining a domestic with a suitable international economic program, can fully and satisfactorily promote the welfare of the American people.

Such a policy contemplates the supplementing of domestic trade by a steadily expanding and mutually beneficial interchange of commodities among nations. Under such a policy, we would not as a Nation deprive ourselves, as we would under a policy of isolation, of goods which we find it desirable and profitable to purchase abroad. Rather, we would receive such goods in exchange for our own surpluses, which must become dangerously burdensome unless foreign markets are found for them. Only by exchanging surpluses created by their respective national effort can nations achieve a full and stable measure of prosperity; full employment of their labor, equipment, and resources; and friendly and peaceful relations with each other.

This broader and more liberal program is based upon a practical middle course which avoids the extremes of both isolationist and internationalistic economic policies. Its cornerstone is mutually profitable trade, based upon equality of trade rights and fair and friendly trade methods and practices.

Under such a program foreign markets would provide outlets for the surpluses of our farms, our mines, and our factories, whereas under a policy of economic self-containment such surpluses would have to be destroyed or else they would accumulate and produce the kind of disorganizing and impoverishing effects that have been only too tragically evident during the past few years. Carried to its logical conclusion, a policy of economic isolation means that this Nation notifies all other nations not to buy our corn and hog products, wheat and flour, apples, and other fruits, tobacco, cotton, automobiles, copper, oil, machinery, and a long list of other commodities normally produced in our country in quantities exceeding domestic consumption by 10 to 50 percent.

To eliminate this surplus production would be equivalent to throwing millions of farmers and industrial wage earners out of employment. To continue full operation of these branches of production in the face of closing and closed foreign markets would lead to stagnation and price slumps resulting at home from dammed-up surpluses. Depression in these branches of production would lead to stagnation and unemployment throughout the entire economic and financial structure of the Nation. Our national prosperity is directly and tremendously affected by the ability of these great industries to sell their surpluses in the foreign markets.

Moreover, by making impossible these sales abroad of our farm and other surpluses, a policy of economic self-containment would destroy our ability to purchase from other parts of the earth an immense amount of raw materials and other commodities, which we cannot produce at all or, at best, can turn out in inadequate quantities and qualities, yet without which many of our industries cannot operate and many of our accustomed needs must go unsatisfied. By embracing a policy of economic isolation we would also deprive ourselves of a large range of specialities, novelties, and other articles differing materially or entirely from our own production in quality, or use, or pattern, or texture, or design, or price, which we habitually purchase from other countries.

To a great surplus-producing nation like ours a policy of economic self-sufficiency would inevitably mean a fundamental and sweeping readjustment and reorganization of the whole domestic agricultural, industrial, commercial, and general economic structure. It would involve restriction of output in the relatively more effective lines of production and encouragement of those lines in which domestic production can replace imports only at a much higher cost to the consumer, if at all. The result would be an inexorable decrease in the capacity of our people to purchase and consume. Our Nation would decline in economic strength and efficiency, and our population would definitely be doomed to a lower standard of living.

Regimentation on an ever-increasing scale, with large and growing unemployment and a constant expansion of subsidies and doles, is an inevitable accompaniment of economic isolation. In many parts of the world the pursuit of this extreme course has had disastrous consequences in the form of acute distress and far-reaching dissatisfaction. During recent years many countries have attempted to move noticeably in the direction of autarchy of self-containment, and this narrow economic policy must bear a major share of responsibility for the recent reduction of world trade from sixty-eight to twenty-three billion dollars a year; for unprecedented unemployment; for unstable governments; and for the more or less disrupted and chaotic economic and political conditions prevailing during a number of years following 1929.

The view that one nation should not buy from another anything even indirectly or remotely competitive suggests a game at which all nations can play with disastrous results to each. The operation during recent years of every conceivable method of obstructing and choking trade, such as quotas, tariffs, exchange restrictions, clearing arrangements, embargoes, and numerous others, has furnished an irrefutable demonstration of this. As the world's greatest producer and consumer our paramount interest as a nation lies in a removal of the extreme portions of these trade

barriers, rather than in their perpetuation and increase through a policy of economic isolation.

What the experience of this Nation would be under a policy of autarchy can well be indicated by our course in recent years toward Canada and Canada's course in return toward us. In 1929, when this country had been selling to Canada nearly $900,000,000 of our commodities annually and buying about $500,000,000 in return, some of our isolationists decided that we could cut down very much, by means of virtually embargo tariffs, the $500,000,000 of imports from Canada, and at the same time could continue to sell Canada $900,000,000 of our commodities. Under their influence our tariffs were raised on every remotely competitive commodity which was being imported from Canada, upon the theory that we would not permit a penny's worth of anything in the least degree competitive to trickle into this country.

But this complacent theory did not long stand up. Thoroughly aroused and bitterly resentful, Canada hastened to raise her tariffs against us. Within a few months a new administration in Canada again raised its tariffs and introduced a discriminatory valuation system and other drastic measures designed to shut out a large portion of our exports.

This extreme policy of isolation and resulting retaliation was the most important single factor in reducing our sales to Canada from nearly $900,000,000 to something less than $300,000,000, and our imports from Canada from nearly $500,000,000 to about $200,000,000. Both Canada and we were badly hurt in the process.

Destructive and economically suicidal practices of this sort have been carried on in every part of the world during recent years. Shall we profit by experience?

Happily, our broad economic program, based on a practical middle course, is neither a theory nor a mere pious hope. It is a living and heartening reality.

In less than 2 years we have concluded trade agreements with 14 nations. By providing for reciprocal concessions and by reasserting the vital principle of equality of treatment under the most-favored-nation policy, these agreements are designed to pave the way for a larger and mutually beneficial interchange of goods between us and other countries. As time goes on, evidence is rapidly accumulating to show that they are having precisely this effect.

This determined effort to reopen the channels of international trade and thus to stimulate employment and general prosperity is frequently attacked by those who would have our Nation withdraw into an economic shell and cut all ties with the outside world. These critics seize particularly upon the fact that recently there has been an increase in our agricultural imports. They make loud accusations that our farmers are being injured, because—as they would have others believe—a stream of foreign agricultural products is pouring into the country. Some of these critics undoubtedly act in perfectly good faith and make their statements on the basis of insufficient knowledge and understanding of the facts. Others, actuated by less worthy motives, clearly distort the facts in an effort to confuse and mislead our people.

Let us look at things as they are. The usual method of attack is to compare the trade figures for 1935 with those for 1932 and to draw, from that comparison alone, conclusions which appear to be damaging to the idea that foreign trade is beneficial and is necessary for the establishment of a satisfactory prosperity. But if the year 1932 is to be fairly compared with the year 1935, other factors as well must be taken into account.

The value of all our agricultural imports was, in 1935, $400,000,000 greater than it was in 1932, when it reached the lowest point in a generation. More than half of this increase was accounted for by the following three factors: (1) An expansion of our foreign purchases of such indispensable raw materials as rubber, silk, hides, and skins, wool, et cetera; such increased purchases are clearly indicative of a growth of industrial activity and employment; (2) an expansion of our foreign purchases of such foodstuffs as coffee, tea, spices, sugar, and tropical fruits, which are indicative of a growth of consumption of these products, resulting from rising employment, wages, and profits; (3) a sharp rise in our imports of alcoholic beverages, resulting—I am sure no one will deny—solely from the demise of the eighteenth amendment.

Less than half of the total increase in our agricultural imports was accounted for by what under normal conditions would have been more or less competitive commodities. Almost the whole of this abnormal and temporary increase occurred in 1934 and 1935, the years during which our country experienced the devastating effects of one of the worst droughts in its history. To make up some of the ravages of this holocaust, we brought in from abroad some feedstuffs and other agricultural products urgently needed in the drought emergency. What did these increased emergency importations mean in terms of our own production?

The imports of corn represented, in 1935, about 2 percent of our average production; of wheat, a little over 8 percent; of beef, 8 percent of average slaughter; of pork, one-tenth of 1 percent of average production; of butter, 1 percent. The peak of the importation of all these products was passed last winter, as the effects of the drought have gradually worn off.

It is these temporary and already diminishing imports, which have an almost trivial significance in relation to our own enormous production, that are recklessly described as a vast in-pouring stream of foreign agricultural products.

Nor is this the whole story. In 1932 corn was selling for about 10 cents a bushel; in 1935, farmers received an average of 58 cents a bushel. Wheat has risen from 30 cents to a dollar a bushel; hogs, from $3 to $10 a hundred; butter, from 14 to 30 cents a pound. Cash farm income has gone up from four and a half billion dollars in 1932 to almost seven billions in 1935.

Three weeks ago, in an address which he delivered at the University of Nebraska, the Secretary of Agriculture marshaled these and other facts bearing upon our agricultural situation in its relation to foreign trade. These facts should be made known throughout the breadth and length of our country to confound those who attempt, so vociferously and so persistently, to mislead and confuse the farmers and everyone else. They should be blazoned forth from every housetop, together with Secretary Wallace's epitome of the whole situation when he said: "Back in 1932 I believe farmers would gladly have let in a few imports, if at the same time they could have increased their cash income by 60 percent."

Apart from the extraordinary and wholly exceptional increases of imports brought in to repair the ravages of the drought, the general growth of our imports is being matched by a corresponding rise of our exports of both agricultural and industrial products for which our trade-agreements program is opening the way. Far from exercising a depressive influence upon our general economic situation, as the proponents of isolation have so often predicted, this increase in foreign trade goes hand in hand with the general economic improvement in our country, unmistakable signs of which are only too clear on every side.

I have dealt at some length with the relation of our foreign-trade program to the agricultural situation in our country not only because of the crucial importance of that particular phase of the problem but also because I myself have long been intensely interested in the special plight of our farming community. For 22 years I represented in Congress an agricultural district of my native State. During that long period constant and intimate contact with my constituents taught me to appreciate one cardinal fact, namely, that the factors which determine the prosperity of our farmers transcend the limits of any locality and even of our whole country. They are world-wide in scope and operation, and among them none is more important than an active and flourishing exchange of surpluses among the nations of the world through the mechanism of an effectively functioning international trade. Whatever else needs to be done to reestablish full and durable prosperity of our country as a whole and of its agricultural community in particular, a restoration and expansion of foreign trade constitute an indispensable element in the process of economic rehabilitation.

It is my firm conviction that just as disruption of international trade played an important role in bringing on the depression from which we are emerging, so the more hopeful outlook for a restoration of international trade is now a powerful factor in the process of recovery. The world was never more ready than it is today for an unprecedented expansion of all types of production and trade, for which only an unshackling of international commerce from its present-day paralyzing restrictions can provide an adequate stimulus.

Our foreign trade program is a reality not only because we in this country are earnestly engaged upon it, but also because the principles which underlie it increasingly command advocacy and adhesion in other countries. Were we to turn back and to shape our course once more in the direction of isolation, we would be pushing the world onto the road that inevitably leads to economic distress, and, through it, to political and governmental chaos and military adventure.

Let us not deceive ourselves. We must awaken to the fact that the world is at a parting of the ways. In one direction lies the road of fair and practical cooperation among the nations in the field of their commercial relations, the road of expanding international trade. It leads to increased employment, rising standards of living, internal political and economic stability, and durable world peace. In the other direction lies the road of economic warfare inherent in the policy of national self-containment, the road of contracting and vanishing trade. It leads to a progressive economic impoverishment everywhere, internal political instability, and constant fear of armed military conflict among nations. Which way shall we go?

ROOSEVELT, THE BUILDER—EDITORIAL FROM NATIONAL YOUNG DEMOCRAT

Mr. BULOW. Mr. President, I have had the pleasure of reading in the National Young Democrat an excellent editorial entitled "Roosevelt, the Builder." A young constituent of mine, Mr. Frank Wickhem, of Sioux Falls, S. Dak., is president of the Young Democratic Clubs of America, of which this newspaper is the official publication. This editorial I should like to commend to the people of America.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the National Young Democrat]

ROOSEVELT, THE BUILDER

To build or rebuild something worthy is progress. To provide a sound foundation for posterity is provident.

Americans accustomed to the miracles fashioned by science and industry may overlook or miss the true perspective of the vast activities for the Nation's betterment.

The greatest program ever planned by government for social, cultural, and economic improvement of its people, for the conservation of the country's natural resources, and for the prudent

preparation for the future has been initiated and is under effectuation through the earnest and thoughtful guidance of our great President.

Like the Four Horsemen of the Apocalypse, the four horsemen of the depression—chaos, misery, destitution, and fear—unleashed by the god of greed, were riding roughshod throughout the country when President Roosevelt came into office.

To bring order out of chaos, the President inspired and Congress enacted effective economic reforms, broadened lending powers of Government institutions to reestablish private industry, ransomed railroads from ruin, and saved banks from bankruptcy.

To eliminate human misery, he established the programs of public works and works progress.

To relieve destitution, the farm-credit program and the Federal Housing Administration were created. To the unfortunate youth he gave the C. C. C. camps, restoring their morale and confidence.

To eliminate fear for the future of the jobless and the aged, the administration has given old-age pensions and unemployment insurance.

Through the Tennessee Valley Authority Act, one of the most notable achievements in constructive legislation, has been inaugurated the greatest movement in the history of the United States to conserve the Nation's water power, prevent ruinous and costly floods, conserve land resources, and provide widespread and economical use of electricity. To this great measure may be added other highly beneficial congressional acts providing for irrigation and reclamation, levee and drainage; soil conservation and prevention of soil erosion; rural electrification; highways, roads, and grade-crossing elimination.

By establishment of the Securities Commission, the insurance of bank deposits, and a strict supervision of financial institutions, the administration has planned to prevent possible panics of the future.

These essentials have been established and put on a firm, progressive foundation. In his acceptance address, the President said: "The way to meet that danger (radicalism) is to offer a workable program of reconstruction." His administration has been one of reconstruction.

Students of political science and future statesmen may well look to our President as an outstanding example of idealism, character, and perseverance.

Some world monuments of industry have been the Tower of Babel, the Hanging Gardens of Babylon, the Pyramids of Egypt, the Colossus of Rhodes, the Appian Way, the temples of the ancient world, the palaces of bygone kings, but the tribute to Franklin Roosevelt will be the monument of a rebuilt Nation.

Washington won the Nation its freedom; Jefferson gave us laws of construction; Madison defended the Nation against invasion; Lincoln weathered the trials of civil strife; Wilson mastered the fortunes of a World War; Franklin D. Roosevelt salvaged and rebuilt the Nation. His name goes to posterity as Roosevelt, the builder.

"Most of them built for glory
Or worship or war, but Fame
Has written in golden letters
Great King Asoka's name
For the peace and good of his people
Was that just builder's glorious aim."

FREE TEXTBOOKS—ARTICLE BY J. BUHL SHAHAN

Mr. HOLT. Mr. President, I ask that an article, entitled "Free Textbooks", by Hon. J. Buhl Shahan, of Elkins, W. Va., be printed in the RECORD.

Mr. Shahan has been one of the most active and influential members of the legislature in West Virginia, and is particularly interested in problems affecting the schools. This article is very timely due to the pendency before the United States Senate of a resolution to investigate the schoolbook monopoly.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FREE TEXTBOOKS

By Hon. J. Buhl Shahan, of Elkins, W. Va.

The time has come when West Virginia must provide free textbooks. The Book Trust has for years been reaping a golden harvest from the people of the State. This trust must be broken and the grafter repelled. The grafter will not stay where there is no graft. Take the profit out of textbooks and you remove the grafter and destroy the Book Trust. The people of West Virginia are paying exorbitant and excessive prices for school books. Here is what a parent must pay today in West Virginia for new books to fit his child for school:

First grade	$1.48
Second grade	1.92
Third grade	3.85
Fourth grade	4.78
Fifth grade	5.91
Sixth grade	4.88
Seventh grade	8.14
Eighth grade	11.14

If the child goes to high school, he must pay the following:

First year	$5.75
Second year	6.40
Third year	6.05
Fourth year	6.25

It costs the parent today on an average of $5.26 per year for each student in the elementary grades if new books are purchased, and an average of $6.22 each year in the high school. West Virginia, unlike our neighboring States, does not have free textbooks. Pennsylvania, for example, furnishes the books free to the children. I have a letter from Pennsylvania showing that in 1934 it cost but $1.22 per year per pupil for free textbooks. They have had this great reform since the year 1893, almost a half century.

Over an 8-year period, 1921–28, the average cost was only $1.53 per year for each student. Free textbooks remove the profit, and when the profit is removed the grafter leaves, for he has nothing on which to live. We can no longer delay the progressive act of legislation that will make free textbooks available to all the children of the State.

A great percentage of the people of West Virginia are not able to buy textbooks for their children. Through no fault of their own, earnings have been reduced to a minimum and in many instances the family income has been cut off altogether. Thousands of people, although honest and willing to work, have been compelled to depend upon charity for subsistence. Under such circumstances it would be utterly unfair to parents and students alike to compel them to provide schoolbooks. The problem now facing the teachers of the State is: How shall textbooks be provided? Let us observe how other States have solved the same problem.

In 1884 Massachusetts provided free textbooks; Maine in 1839; Nebraska in 1891; Pennsylvania and Rhode Island in 1893. By 1910, 10 States had joined the procession; by 1925, 19 States had made free textbooks mandatory; and at the present time 25 States and the District of Columbia provide free schoolbooks. The movement was started, however, more than a hundred years ago when the city of Philadelphia inaugurated such a plan. Now all of the larger cities and more than half of the States provide free texts.

In 1928, 58,089,967 separate volumes of textbooks were purchased in the United States for use in public and private elementary and high schools. Some 65.5 percent of the expenditures for such books in the public schools came from State and other agencies providing free texts for pupils. To show the comparison of the small cost of textbooks to the total school budget, we note that in 1928 the total textbook budget throughout the United States could have been wiped out and the saving would not have been more than 2 percent of the total school expenses. In 1913 the expense for all other school purposes was 36 times the cost of textbooks. In 1928 the proportion had grown. Other school expenses were 61 times that of textbooks. According to a recent study made by the National Education Association and covering some 39 cities that furnish free textbooks and supplies, only 0.9 percent of the school dollar was used for textbooks in 1932–33. Supplies furnished amounted to 1.2 percent—a total for both supplies and textbooks of only 2.1 percent of the school dollar. Considering, therefore, the comparatively low cost of free texts and the valuable service they render, no legitimate excuse can be made for not instituting free textbooks in West Virginia.

The Supreme Court of the United States settled the matter of the constitutionality of free textbooks when it upheld, in April 1930, the Free Textbook Act of Louisiana, affirming that the taxing power of the State was exercised for a public purpose.

Free textbooks are in line with free schools and free instruction. Textbooks are a vital part of the school work. Free textbooks help in sustaining attendance. They eliminate the unnecessary delay in starting the term of school which is often due to lack of books. Unpleasantness with parents, which sometimes arises from misunderstanding of the cost and kind of books required, may be avoided by the use of free textbooks. The 20-percent profit of the dealer would be eliminated.

In our present age of easy travel there is an increasing tendency for citizens to change occupations and locations. When a family moves from one section of the State to another, new books must be bought for the children. It not infrequently occurs that much time is lost from school as a result of the parent's inability to make such purchases at the time, and often pupils lose interest and drop out of school entirely. If the State furnished free textbooks, the new student could get his books arranged the first day and start off without loss of time. In many instances lack of textbooks gives the student an opportunity and excuse for doing poor work. Such a situation tends to defeat efficiency in education. If our educational system is to progress, we must provide at least the necessary equipment for the learning process. No better expenditure of money could be made than by providing free textbooks.

How is this to be done? Many times the needs of education are clearly seen by those in the field, but from the legislative standpoint these needs are not always realized. The writer was firmly convinced that free textbooks would be approved at the last regular session of the legislature. There seemed to be strong sentiment for such a proposal, although some conflict existed among

the legislators as to the type of program which should be enacted. In the waning days of the session, however, it became evident that other matters had crowded out the enactment into law of a free-textbook measure. Political logrolling and other influences, notably the powerful weapon of delay, prevented this needed reform from becoming a reality.

Most opponents of free textbooks take the stand that the State cannot afford to spend the amount of money needed to finance such a program. The State, however, can provide the money to finance a program of free textbooks. There are many ways whereby West Virginia can easily raise the needed money. For example, a small depletion tax on oil and gas would easily bring in enough money to take care of the entire program of free textbooks and provide in addition for the institution and growth of a small library fund in each county.

According to figures compiled by the West Virginia Geological Survey, more than 5,800,000,000,000 cubic feet of natural gas had been taken from the soil of our State prior to 1933. Almost two-thirds of this gas has been sold outside of the State, and in many instances at a price lower than residents of West Virginia pay for their own product. A depletion tax of but 1 cent per 1,000 cubic feet would have, in the short history of West Virginia, brought in more than $58,000,000. It seems only reasonable that the State would be justified in placing a small depletion tax on a product which, once removed, cannot be replaced. This would but represent a sum equal to the interest due the State for such exploitation. In using the money for free textbooks, the returns of such a tax would be reinvested in protecting our State's greatest resource—the children of our Commonwealth.

KEEPING OUT OF WAR—EDITORIAL FROM WASHINGTON DAILY NEWS

Mr. BONE. Mr. President, I ask unanimous consent to have printed in the RECORD an interesting editorial observation from the Washington Daily News on the subject of war.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Daily News]

KEEPING OUT OF WAR

By R. W. H.

International trade is one of the major obstacles in the path of a comprehensive neutrality policy. That was obvious during the fight at the last session of Congress to frame such a policy. It cropped up again at the present session and was largely influential in defeating a broad program designed to keep the United States out of war.

The importance of trade in this respect is now confirmed in one of the most ambitious studies of neutrality ever made. The history of efforts to write a code of international law that would include a vital and effective respect for neutrality is presented in four volumes by the Columbia University Council for Research in the Social Sciences. It is published by Columbia University Press.

It begins with the origins of the neutrality idea, goes into the Napoleonic period, takes up the problem during the World War, and in the final volume by Philip C. Jessup, professor of international law at Columbia University, discusses the current problem and the future.

Professor Jessup says: "The trouble with neutrality * * * is that it has been based on the idea of protecting trade with belligerents without interfering with belligerent operations. With fault on both sides, neutrality has developed in a situation where commercial rivals have sought to pervert it, each to his own end. It has been suggested above that neutrality should be reconsidered in the light of this fact. It has also been suggested that neutrality is not antisocial; that it can play its part in the current development of the process of international cooperation. With a realistic base and with cooperative application, it may avoid some of its past weaknesses."

In his conclusion, Professor Jessup says:

"In cutting the pattern it will be well to keep in mind two important points. * * *

"The first point is that the primary objective of a neutrality policy is to keep out of war. If war can be prevented, well and good; if it breaks out between other countries, the United States should seek to stay out. Neutrality should cease to be a road to war. The second important point is the realization that a neutrality policy cannot achieve the first objective if neutrality is still regarded as a period of prosperity. * * * Slogans are dangerous in their simplicity, yet 'Profits or Peace' is not a wholly misleading description of the alternatives which must be faced in framing a national neutrality policy for the United States. If we choose profits today, we may well find that we will have neither profits nor peace tomorrow."

VOCATIONAL EDUCATION

Mr. GEORGE. Mr. President, I ask the Chair to lay before the Senate House bill 12120, which came over from the House earlier today.

The VICE PRESIDENT laid before the Senate the bill (H. R. 12120) to provide for the further development of vocational education in the several States and Territories, which was read twice by its title.

Mr. GEORGE. Mr. President, on the calendar day of April 28 the Senate passed Senate bill 2883, known as the vocational-education bill. The House yesterday, in considering the same subject, struck out all after the enacting clause of House bill 12120 and substituted the language and substance of the Senate bill, with only two slight changes. One change was the omission of the words "including public and other service occupations", and the insertion of a new section which is not at all objectionable and which does nothing that is not done under existing law. Inasmuch as the House bill is practically identical with the Senate bill, I move that the Senate concur in the amendments of the House.

Mr. NORRIS. Mr. President, I want to understand the parliamentary situation. Would the action the Senator is asking have the effect of passing the House bill?

Mr. GEORGE. Yes; it would.

Mr. NORRIS. I should like to appeal to the Senator. I have talked with the Senator about the matter. I know how he feels about the proposed legislation and particularly about one change which has been made in the House bill. I think the Senator ought to take the matter to conference. I am satisfied I am not in disagreement with the Senator in his attitude on one particular amendment which I think is very vital. I should not like to give up any possible hope of getting that provision in the law. I do not understand why the Senator does not ask for a conference on the disagreeing votes of the two Houses.

Mr. GEORGE. I do not see how we could get the matter into conference, because the House did not pass the Senate bill. The House struck out all after the enacting clause in the House bill and inserted the text of the Senate bill with two slight amendments. Really there is only one amendment of any consequence.

Mr. NORRIS. If we accept the action of the House, we surrender all possibility of getting that particular language in the bill.

Mr. ROBINSON. Mr. President, if the Senator desired to do so, he could have the House bill taken up for consideration and move to strike out the provision that is objectionable or offer an amendment to accomplish the purpose desired.

Mr. NORRIS. I would not have any objection to pursuing that course. I think the Senate ought to resort to all proper legislative means to retain the particular clause which the House has stricken out.

Mr. ROBINSON. What are the amendments to which objection is made?

Mr. GEORGE. There is really only one amendment. The amendment of the House inserted by way of a separate section is as follows:

No part of the appropriations herein authorized shall be expended in any industrial-plant training programs, except such industrial-plant training be bona fide vocational training, and not a device to utilize the services of vocational trainees for private profit.

I think no one objects to that provision being in the bill. Of course, under the law the funds could not be utilized for such purpose, but it is very well to hedge against it.

The amendment to which the Senator from Nebraska refers may be described in this way: Among the subjects to be taught for which money is authorized to be appropriated are "trade and industrial subjects, including public and other service occupations." The House amended by omitting the words "including public and other service occupations."

Mr. NORRIS. That is the issue, just those few words.

Mr. GEORGE. Very well. I ask unanimous consent that the Senate proceed to the consideration of the House bill.

There being no objection, the Senate proceeded to consider the bill (H. R. 12120) to provide for the further development of vocational education in the several States and Territories.

Mr. GEORGE. I move to amend the text of the House bill, on page 3, in line 5, by inserting after the word "subjects" the words "including public and other service occupations."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed, as follows:

Be it enacted, etc., That for the purpose of providing for the further development of vocational education in the several States and Territories there is hereby authorized to be appropriated for the fiscal year beginning July 1, 1937, and annually thereafter, the sum of $12,000,000: *Provided*, That the several States and Territories shall be required to match by State or local funds or both 50 percent of the appropriations authorized under the provisions of this section until June 30, 1942, 60 percent for the year ending June 30, 1943, 70 percent for the year ending June 30, 1944, 80 percent for the year ending June 30, 1945, 90 percent for the year ending June 30, 1946, and annually thereafter 100 percent of the appropriations authorized under the provisions of this section. One-third of this sum each year shall be allotted to the States and Territories in the proportion that their farm population bears to the total farm population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is made, and shall be used for the salaries and necessary travel expenses of teachers, supervisors, and directors of agricultural subjects in such States and Territories. One-third of the sum appropriated for each fiscal year shall be allotted to the States and Territories in the proportion that their rural population bears to the total rural population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is to be made, and shall be used for the salaries and travel expenses of teachers, supervisors, and directors of home-economics subjects in such States and Territories. One-third of the sum appropriated for each fiscal year shall be allotted to the States and Territories in the proportion that their nonfarm population bears to the total nonfarm population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is to be made, and shall be used for the salaries and necessary travel expenses of teachers, supervisors, and directors of trade and industrial subjects, including public and other service occupations in such States and Territories: *Provided further*, That the allotment of funds to any State or Territory for each of the three purposes enumerated in this section shall be not less than a minimum of $20,000 for any fiscal year, 50 percent of which shall be matched by State or local funds or both, and there is hereby authorized to be appropriated for the fiscal year beginning July 1, 1937, and annually thereafter the sum of $175,000, or so much thereof as may be needed, which shall be used for the purpose of providing the minimum allotments to the States and Territories provided for in this section.

SEC. 2. In addition to the sum authorized to be appropriated by section 1 hereof, there is hereby authorized to be appropriated, and required to be matched in the same proportions as such sum, the sum of $1,200,000, to be allotted to the States and Territories in the proportion that their total population bears to the total population of the United States and Territories, according to the United States census last preceding the end of the fiscal year in which any such allotment is made, and shall be used for the salaries and necessary travel expenses of teachers, supervisors, and directors of, and maintenance of teacher training in distributive occupational subjects in such States and Territories: *Provided, however*, That the allotment of funds to any State or Territory for the purpose of this section shall be not less than a minimum of $10,000 for any fiscal year after July 1, 1937, and there is hereby authorized to be appropriated for the fiscal year beginning July 1, 1937, and annually thereafter the sum of $54,000, or so much thereof as may be needed, which shall be used for the purpose of providing the minimum allotments to the States and Territories provided for in this section.

SEC. 3. That for the purpose of cooperating with the States and Territories in preparing teachers, supervisors, and directors of agricultural, trade and industrial, and home-economics subjects there is hereby authorized to be appropriated for the use of the several States and Territories for the fiscal year beginning July 1, 1937, and annually thereafter the sum of $1,000,000. Said sum shall be allotted to the several States and Territories in the proportion which their population bears to the total population of the United States and Territories, according to the last preceding United States census: *Provided*, That the allotment of funds to any State or Territory shall be not less than a minimum of $10,000 for any fiscal year. And there is hereby authorized to be appropriated for the fiscal year beginning after the enactment of the act and annually thereafter the sum of $54,000, or so much thereof as may be needed, which shall be used for the purpose of providing the minimum allotments to the States and Territories provided for in this section.

SEC. 4. For the purpose of carrying out the provisions of this act there is hereby authorized to be appropriated to the Office of Education, Department of the Interior, for vocational education, for the fiscal year beginning July 1, 1937, and annually thereafter the sum of $350,000, to be expended for the same purposes and in the same manner as provided in section 7 of the act approved February 23, 1917, as amended October 6, 1917.

SEC. 5. The Secretary of the Treasury, through the Division of Disbursement of the Treasury Department, shall, upon the certification of the United States Commissioner of Education, pay, in equal semiannual payments, on the 1st day of July and January of each year, to the custodian for vocational education of each State and Territory designated in the act approved February 23, 1917, the moneys to which the State or Territory is entitled under the provisions of this act.

SEC. 6. The appropriations made by this act shall be in addition to, and shall be subject to the same conditions and limitations as, the appropriations made by the act entitled "An act to provide for the promotion of vocational education; to provide cooperation with the States in the promotion of such education in agriculture and in the trades and industries; to provide cooperation with the States in the preparation of teachers of vocational subjects; and to appropriate money and regulate its expenditures", approved February 23, 1917, except that the appropriations made by this act for home economics shall be subject to the conditions and limitations applicable to the appropriation for agricultural purposes under such act of February 23, 1917, with the exception of that part of section 10 thereof which requires directed or supervised practice for at least 6 months per year; that such moneys as are provided by this act for trade and industrial subjects, including public and other service occupations, may be expended for part-time classes operated for less than 144 hours per year; that the provisions of section 11 of the act of February 23, 1917, requiring at least one-third of the sum appropriated to any State to be expended for part-time schools or classes shall be held to include any part-time day-school classes for workers 14 years of age and over, and evening-school classes for workers 16 years of age and over; except that the appropriations made by this act for distributive occupational subjects shall be limited to part-time and evening schools as provided in said act of February 23, 1917, for trade, home economics, and industrial subjects and as qualified by the provisions of this section; and that the appropriations available under section 4 of this act shall be available for expenses of attendance at meetings of educational associations and other organizations and for expenses of conferees called to meet in the District of Columbia or elsewhere, which, in the opinion of the Commissioner, are necessary for the efficient discharge of the provisions of this act.

SEC. 6a. No part of the appropriations herein authorized shall be expended in industrial-plant training programs, except such industrial-plant training be bona-fide vocational training, and not a device to utilize the services of vocational trainees for private profit.

SEC. 7. The appropriations authorized by this act shall be in lieu thereof and not in addition to the appropriations authorized in sections 1 and 2 of Public Law No. 245, Seventy-third Congress, approved May 21, 1934.

SEC. 8. As used in this act the term "States and Territories" means the several States, the Territories of Alaska and Hawaii, the island of Puerto Rico, and the District of Columbia.

REGULATION OF COMMODITY EXCHANGES

The Senate resumed the consideration of the bill (H. R. 6772) to amend the Grain Futures Act to prevent and remove obstructions and burdens upon interstate commerce in grains and other commodities by regulating transactions therein on commodity futures exchanges, to limit or abolish short selling, to curb manipulation, and for other purposes.

The VICE PRESIDENT. The question is on the amendment, which the clerk will state.

The CHIEF CLERK. On page 31, after line 13, it is proposed to insert section 12, as follows:

SEC. 12. The Grain Futures Act is further amended by adding at the end thereof the following new section:

"SEC. 13. (a) The provisions of this section shall apply only with respect to cotton and cotton-futures exchanges or similar institutions.

"(b) Notwithstanding the foregoing provisions of this act, the trading limits on the amount of trading in cotton under or with respect to contracts of sale for future delivery on or subject to the rules of any cotton-futures exchange shall be fixed by the commission with respect to any one person trading either directly or indirectly for his own account at a total of not more than 100,000 bales for delivery in any one delivery month with respect to all exchanges and at a total of not more than 600,000 bales for delivery in any 12 consecutive months with respect to all exchanges (said bales being of the approximate weight of 500 pounds each). Such trading limits shall apply to all types of futures trading transactions, including bona-fide hedging transactions, and shall also apply to both 'market position' and 'market interest' as herein defined. For the purpose of this section, the term 'market position' means a contract of purchase or sale made on any cotton-futures exchange which has not been fulfilled or completed either by actual delivery of cotton or by an offsetting contract of sale or purchase on the same exchange prior to the time specified for delivery; and the term 'market interest' means any outstanding contractual obligation relating to cotton,

which is or may be affected in any manner by the advance or decline in the price on any exchange of cotton futures for delivery in some specified month, and such 'market interest' shall be deemed to be held in the month so specified. In computing any such market position or market interest there shall be included therein any market position on or any market interest held with respect to any and all foreign exchanges.

"(c) All trading in cotton futures on any exchange shall cease as to each delivery month on a day not later than the last business day of the preceding month, after which the seller shall have 10 business days within which to give to the buyer written notice of the date and place of delivery, and the buyer shall have 5 business days after receipt of such notice in which to take delivery and make payment. The Secretary of Agriculture, in his discretion, may extend the time to the seller for giving notice of delivery and to the buyer for taking delivery and making payment whenever in his opinion such action is warranted. In making payment in settlement of any contract of sale for the future delivery of cotton in any delivery month the actual commercial differences above or below the contract price which the receiver shall pay for cotton or grades above or below the basis grade shall be determined as of the day on which trading ceased with respect to such delivery month and in accordance with the provisions of section 6 of the United States Cotton Futures Act, as amended.

"(d) All charges and expenses incident to any delivery of cotton in fulfillment of any contract of sale made at, in, or on any exchange shall be borne by the seller.

"(e) Any person who shall purchase, sell, or carry any cotton futures for any other person on any exchange or pursuant to any contract made at, on, or in such exchange for the account of such other person, shall demand and receive from such other person as a minimum margin an amount equal to at least 10 percent of the current market price of such cotton, but in no case less than $5 per bale, which minimum margin shall be maintained at all times with such reasonable allowance for price fluctuation as may be prescribed by the commission. In computing such minimum marginal requirements, all fractions of a dollar shall be brought to the nearest full dollar.

"(f) Each cotton-futures exchange shall make available to the public each day the volume of trading in cotton futures for each delivery month and the total volume of trading in cotton futures for all delivery months, and shall also make available to the public at least once each month the total of all open and outstanding contracts of sale of cotton for future delivery in each delivery month, made at, on, or in such exchange.

"(g) All cotton which shall have been inspected, graded, classed, and certified as tenderable under the provisions of the United States Cotton Futures Act, as amended, shall be deliverable, on any contract of sale made at, on, or in any cotton-futures exchange, at and for the grade and staple thus certificated: *Provided*, That when such cotton is removed from certificate the final receiver thereof on a contract made at, on, or in a cotton-futures exchange may, if he so desires, call for a review by the United States Department of Agriculture, and in the event such cotton shall be found to be of a lesser grade or staple and of a lesser money value than the certified grade and staple, such final receiver on contract may make claim for any monetary loss so found, and all such claims shall be made on and against a guaranty fund which shall be established and maintained by each exchange by adding to the original inspection fees such amount per bale as in the opinion of the Secretary of Agriculture may be necessary for the purpose of such fund, such additional amount to be held and retained by the exchange on which the original inspection is applied for, and to be paid out only on claims passed on and approved by the United States Department of Agriculture or its duly authorized representative."

Mr. CONNALLY. Mr. President, I am extremely anxious that the pending bill shall be enacted. In the closing days of the session, congested as is the calendar, and with the business program of the Senate and the House clogged and jammed, it is going to be very difficult to secure the enactment of legislation controlling the commodity exchanges if the Senate engrafts upon the House bill any controversial amendments which in conference would afford another opportunity for delay and procrastination. Therefore, permit me to say that my attitude is one of support of the House bill as it came to the Senate without endangering the passage of that measure by tying on to it the amendments offered by the Senator from South Carolina [Mr. SMITH].

Mr. President, Senators from the cotton States and Senators from the grain-producing States have for years advocated the regulation and control of the commodity exchanges by placing them under Government supervision. That policy has been in force for a number of years with respect to grain, but other than through the Cotton Futures Act, which has been in operation through the Department of Agriculture for some years, we have never been able to secure real control and real regulation of the cotton exchanges in order to guarantee that the producer of cotton might have a full and fair market for the products of his toil.

Mr. President, when we have an opportunity now to put cotton in the Grain Futures Act along with oats, wheat, corn, and other grains, I do not want to see the enactment of the measure absolutely imperiled by a controversy in the conference committee over the provisions of the amendments submitted by the Senator from South Carolina. By reason of the attitude of the House and the attitude of Members of the House who would be members of the conference committee, I feel assured that that is exactly what we are going to face in the event the amendments tendered by the Senator from South Carolina are placed in the bill.

I submit this simple, elementary principle. Why should cotton be dealt with by law any differently than wheat and corn and oats? We have here a bill which has run the gantlet of the House. The subject has been investigated by the Senate Committee on Agriculture and Forestry. The bill provides that cotton shall be placed in the law and handled from a legislative standpoint exactly as corn and oats and wheat and other commodities of that character.

But the Senator from South Carolina, who does not want cotton incorporated in the bill, insisted in the Committee on Agriculture and Forestry that cotton be not included in the commodity-exchange bill. Let me suggest to Senators that the advice of a Senator who does not want cotton controlled in the main bill ought not now to be followed by Senators if they really want to control the operation of cotton exchanges.

Mr. President, let me invite attention for a moment to the provisions of the amendment now pending. On page 31 of the new print of the bill the proposed amendment appears as section 13 (a). What does it provide? It provides for a limitation of the amount of cash purchases which any operator, any corporation, any association of persons may make on the commodity exchanges. So far as I am concerned all hedges may be abolished. I care nothing about them. If they are wrong they ought to be abolished. But if they are to be approved as legitimate, as is proposed by the bill, if hedging operations against actual purchases or actual sales of a commodity in order to stabilize the price and assure the seller of a fixed sale price are desirable, then why in the name of common sense should we limit the amount of purchases which any one cotton buyer or cotton seller may make on the exchanges?

Mr. POPE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Texas yield to the Senator from Idaho?

Mr. CONNALLY. I yield.

Mr. POPE. May I ask the Senator whether he regards hedging, which is a form of insurance to protect the price of a product, in the same way that he regards speculating in futures when there is no actual corn or actual commodity against which a hedge may be placed? Are they not in a different category?

Mr. CONNALLY. I readily agree with the Senator from Idaho that a fictitious transaction, where it is not contemplated that there shall be any actual delivery of cotton or oats or wheat or corn or anything else, is purely a gambling transaction and ought to be outlawed. I understand that under the terms of the bill power is given the Secretary of Agriculture to outlaw that kind of transaction. But as I understand the practice which the committee calls a legitimate hedge is that if today I buy a thousand bales of spot cotton, actual cotton, and I want to be secured in that price, I may hedge that cotton on the cotton exchange by selling an equal number of bales. Then if the price goes up I am protected, and if it goes down I am protected. I buy it on a theoretical margin of profit and I am guaranteed then at least an approximate realization of the price at which I purchased. Is that correct, may I ask the Senator from Idaho?

Mr. POPE. That is exactly my understanding of the matter. May I suggest that if legitimate cases are to be limited below the amount of actual commodity purchased, then there would be a portion of the actual commodity that would not be insured, and the owner of that commodity must insure it in some other way, either by increasing the price to the grower of the commodity so as to protect him from

fluctuations of price or by limiting his sale to the amount of the commodity which he can actually hedge. That is the only way he can secure himself and insure himself against losses.

Mr. CONNALLY. That is correct.

Mr. POPE. In that process, either by limiting the amount of the commodity he may purchase or by trying to insure himself in some other way, does not that reflect right back on the grower of cotton or grain so as to reduce the price to the grower?

Mr. CONNALLY. Mr. President, it seems to me that the statements of the Senator from Idaho answer themselves. In other words, if a legitimate hedge is of benefit to the market, in that it gives the buyer an opportunity to insure the price which he paid, then, of course, it stimulates activity in that particular commodity; but if the buyer can be insured only as to 100,000 bales or 50,000 bales, when he exceeds that quantity he will not buy the spot cotton, because he has not the element of security which the hedge gives him in the first instance.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield to the Senator from New Mexico.

Mr. HATCH. The Senator has also heard, I presume, of excessive hedges tending to depress the market, has he not?

Mr. CONNALLY. Oh, yes; but I do not see how there could be an excessive hedge if a legitimate hedge represents the real transaction. I pointed out a moment ago that I am absolutely opposed to, and, as I understand, the bill condemns, the speculative hedge or the speculative operation where there is no actual transaction in the commodity.

Mr. HATCH. In fairness to the Senator from Texas, I should say that I so understood his remarks.

Mr. CONNALLY. I thank the Senator.

Mr. HATCH. But the colloquy which has gone on indicated to my mind that it is contended that hedging always tends to produce a better price for the producer, which is not true.

Mr. CONNALLY. Oh, no; I do not mean to say that hedging would produce a better price. A thing that may be utilized to pry something up may also be utilized to pry something down. Of course, that necessarily follows; and I am not advocating hedging. I do not know enough about the mechanical and technical operations of the exchanges to say whether or not hedging is desirable; but hedging has been recognized in the bill. It is advocated, as I understand, by the Secretary of Agriculture; and all I am contending for is, if it is legitimate, if it is desirable, why limit it and say that after a man has bought a certain number of bushels of wheat or a certain number of bales of cotton he may not buy another? We thereby reduce the market; we take out of it bidders who might bid the market up, and we narrow the opportunity for the producer to find an outlet for his commodity.

Mr. HATCH. I started to suggest to the Senator from Texas that it is true that all the witnesses who appeared before the committee, I think without exception, testified that hedging is desirable and legitimate and necessary to a certain extent and for certain purposes.

Mr. CONNALLY. And that is why the committee approves it in the bill. I am not a member of the Committee on Agriculture and Forestry, but I am accepting the House bill as it was considered by the committee as reflecting the matured judgment of the Agricultural Committees of both Houses that legitimate hedges, made only where there are actual spot transactions, are desirable.

Mr. BARKLEY. Mr. President——

Mr. CONNALLY. I yield to the Senator from Kentucky.

Mr. BARKLEY. While it may be true, as I understand, that hedging itself may not bring about an increase in the price of cotton or any other product, it tends to stabilize the price; it minimizes the effect of abrupt fluctuations in the price; and is it not true that a hedging transaction as the Senator is talking about it presupposes that the man who is hedging has already engaged in a legitimate transaction with respect to the purchase or sale of cotton and that he simply is protecting himself against sudden fluctuations?

Mr. CONNALLY. Exactly.

Mr. BARKLEY. For instance, if he has bought cotton at a certain price, in order to protect himself against a sudden decline of that price and the decline of the price of the product produced from the cotton, he simply hedges, and therefore protects himself against his previous transaction.

Mr. CONNALLY. Exactly; and let me suggest to the Senator from Kentucky that a parallel would be found in this case:

Suppose a man bought wheat or cotton at a certain price, and there were no hedges, but he could walk across the street and take out an insurance policy in Lloyds, or in some other company engaged in that sort of business, to the effect that he would not suffer loss on the cotton below a certain price. That is exactly what a hedge is. It is an insurance that what the purchaser loses on his spot he will gain on his hedge.

Mr. POPE. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield to the Senator from Idaho.

Mr. POPE. And if there is no way for the purchaser to insure himself by hedging or in any other way, then necessarily will he not pay a lower price to the producer of cotton, the man out in the cotton field who raises the cotton, in order that he may be insured against fluctuations in price?

Mr. CONNALLY. Exactly. Now, let me ask the Senator from Idaho a question.

Under this bill, in the case of grain, there is no limitation on hedges. Does the Senator advocate that?

Mr. POPE. I should not advocate a fixed amount of hedging more than the actual amount of grain on which a hedge might be based.

Mr. CONNALLY. I understand; but what I mean is, hedging operations as to grain are not limited in the bill so long as they represent a bona-fide transaction.

Mr. POPE. Not only are they not limited, but it is provided that the growth of the commodity for a year on land owned by the hedger may also be hedged against, and its products and byproducts; but that represents actual or potential grain in the hands of the hedger, and the hedge is strictly limited to that.

Mr. CONNALLY. Oh, yes; I understand that; but what the Senator from Texas has in mind is, if we are not going to limit legitimate hedging in grain and corn and oats, why should we limit it in cotton? The amendment of the Senator from South Carolina has a tendency to weaken and to dilute the effects of the House bill insofar as it relates to cotton.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield to the Senator from Kentucky.

Mr. BARKLEY. A moment ago the Senator said that if no hedging is permitted, or if hedging is restricted as provided in the amendment, the purchaser of cotton in all likelihood will not pay so high a price, because he will not wish to take so great a chance. Is it not also true that he will buy less because he will not wish to take a greater chance?

Mr. CONNALLY. Exactly. In other words, the market will be narrowed; there will not be so many competitors in the market, because some of the competitors will be limited, and when they buy their limit they are out of the market.

Mr. BORAH. Mr. President——

Mr. CONNALLY. I yield to the Senator from Idaho.

Mr. BORAH. I desire to ask the Senator from Texas a question. I know nothing about cotton, in one respect, but I should like to be able to vote intelligently, if possible.

Mr. CONNALLY. I will say to the Senator that I know very little about it.

Mr. BORAH. In what respect does the amendment offered by the Senator from South Carolina weaken the terms of the bill as it came from the House, insofar as dealing with the monopolistic control of cotton is concerned?

Mr. CONNALLY. I will say that the amendment weakens the effect of the House bill in this respect: The House bill permits legitimate hedging in all commodities. The amendment of the Senator from South Carolina limits that op-

eration in the case of cotton. The amendment takes cotton out of the general classification, and says that in the case of cotton no operator may hedge more than a certain amount. The colleague of the senior Senator from Idaho [Mr. POPE] has just pointed out that in the case of grain it is not desired that hedging be limited, except to actual bona-fide operations, on the theory that a limitation would lessen the market; on the theory that the purchaser, if he should buy more than his limitation, would encounter a greater hazard as to price, and therefore would not pay so much. If those are sound arguments and sound reasons why no limitation should obtain in the case of grain, why should it obtain in the case of cotton?

Mr. BORAH. The Senator from South Carolina [Mr. SMITH] contends that unless there is a limitation, some two or three operators will control the entire market.

Mr. CONNALLY. Yes; and I shall answer that contention.

Mr. SMITH. Mr. President, I desire to have the Senator and the Senate advised that the reason brought out in the committee for not putting a limit on hedging was because it was thought that it would limit the operation of the cooperatives. In the grain-exchange bill, power is given to the Secretary of Agriculture to control the limits in all commodities.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield.

Mr. ROBINSON. I should like to be informed how there can be a monopoly on the buying of cotton. The only way in which a purchaser can obtain cotton is by paying more for it than anyone else is willing to pay.

Mr. CONNALLY. Exactly.

Mr. ROBINSON. And the position of the Department of Agriculture is that if large purchasers are denied the right to compete with other buyers, it will lessen the opportunity of producers to get a fair price for their products.

Mr. SMITH. Mr. President, if the Senator will allow me just a minute, that seems to be in contravention of the action we took the other day on chain stores.

Mr. CONNALLY. We are not now dealing with chain stores.

Mr. SMITH. We are dealing with identically the same principle, because certain manufacturers found it more profitable to sell their entire product to certain purchasers, who distributed that product to the detriment of the local retail merchant.

Mr. ROBINSON. Yes; but the present proposition is just the reverse. In the instance which the Senator cites, by rebates, by concessions in the nature of discounts, by quantity discounts, the large purchaser was able to obtain a price which was to his advantage and which was discriminatory; but this is the reverse of the proposition. Here it is proposed to cut off the right of someone to purchase in the open market when the only way in which he can secure cotton is to buy it at a better price than anyone else is willing to pay, or at least at a price comparable to that which someone else is willing to pay.

Mr. SMITH. That sounds very strange to me, in view of the fact——

Mr. CONNALLY. Mr. President, I cannot yield for a speech. I shall be glad to yield for a question.

Mr. SMITH. All right; I will answer the Senator from Arkansas in my own time.

Mr. CONNALLY. I must answer some of these questions, because I have a committee meeting very shortly.

Mr. SMITH. I shall be very glad to take the floor later.

Mr. CONNALLY. The Senator from Arkansas has very aptly and very clearly pointed out the fact that when we limit the operations on the actual spot market or on legitimate hedges, we are lessening the incentive of purchasers to buy. How can an operator get a bale of cotton? He has to pay more than somebody else will pay, or he will not get it. When you withdraw the dealers, the operators, from that active market, by limiting the amount in which they can deal, you make it easier for those who are left in the market to buy the same cotton at a lower price.

What does the Secretary of Agriculture say about this? The Secretary of Agriculture is opposed to the limitation of actual legitimate hedging. The Senator from Idaho, perhaps was not here awhile ago when the Senator from Texas observed that, so far as he is concerned, all hedging may be abolished.

Mr. BORAH. I heard the Senator.

Mr. CONNALLY. And trading may be restricted to actual spot operations. I say to the Senator that I have often wondered whether that were not a really sound position for us who are interested in the sale of commodities to take.

Why should we differentiate between commodities? Other spot commodities are sold, and, so far as I am concerned, that may be done; but we are not dealing with that. The responsible committees of the two Houses of Congress and the Secretary of Agriculture all advocate legitimate hedges, confined to the offsetting of actual purchases of spot cotton, in order to give the purchaser an opportunity to insure himself against loss.

If that is to be the policy with regard to wheat, and oats, and corn, and other grain, and the members of the committee say that there should not be any limitation as to those products, why should we pick out cotton, and, when it comes to cotton, say that the farmer's opportunity for selling it in his market shall be narrowed, but as to wheat and corn and oats the market shall be full and free; that they may buy all they want to buy; that they may hedge all they wish to hedge, but that when it comes to cotton, as I have said, that we shall provide that when a purchaser has bought a certain amount he shall not buy another bale? If that is desirable, why limit it to 600,000 bales a year? If it is desirable to limit operations, why not make it a hundred thousand bales a year, why not make it 5,000 bales a year, if that is sound? I do not think it is sound.

I desire to point out to the Senator from Idaho that the cotton cooperatives, the voluntary organizations of the farmers themselves who are making an effort to market their product, are the greatest single operatives in the cotton market. They buy and sell more cotton, as I understand it, than any other one concern.

Mr. SMITH. Oh, no, Mr. President; the Senator does not want to go on record as saying that. I have the reports here showing the facts.

Mr. CONNALLY. They are among the largest buyers and sellers, are they not?

Mr. SMITH. They are about the fourth.

Mr. CONNALLY. They are among the large ones. I do not care whether they are the largest, but they are one of the largest, I will say.

Mr. SMITH. One concern buys and sells as much as all the other three combined.

Mr. CONNALLY. Mr. President, I wish to say to the Senator from South Carolina that cotton is an export crop. We ship abroad 50 percent of what we produce. It is dealt with on the Liverpool exchange, it is dealt with on the great exchanges in all the cotton-consuming countries of the world. There are great foreign firms in the United States, Japanese firms, Italian firms, French firms, engaged in the buying and selling of cotton, mostly in buying, because they export it to their own countries. If some of this business be driven out of the hands of the American dealers, it will simply be placed in the hands of foreigners. Some of these operations will be transferred to the Liverpool Cotton Exchange, or to some other foreign cotton exchange.

Let me quote what the Secretary of Agriculture says about the limitation of hedges. In a letter to the Senator from South Carolina, the chairman of the Committee on Agriculture and Forestry, under date of May 18, 1936, the Secretary made known his position in regard to this matter. I ask that the letter may be incorporated in the RECORD at the end of my remarks.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

(The letter appears in the RECORD at the conclusion of Mr. CONNALLY's remarks.)

Mr. CONNALLY. What does the Secretary of Agriculture say about the matter? His Department has administered the Cotton Futures Act for the past 20 years. The Secretary refers to section 14, which, as I understand, is now section 12, and he says:

> Section 14 fixes definite limitations by law upon the amount of cotton futures that may be held by any person in any one future or in all futures combined.

I may say to the Senator from Idaho that this refers to page 31 of the bill. This is the Secretary of Agriculture speaking, and the Secretary of Agriculture does not own a bale of cotton, so far as I know, and is not interested in cotton, except to see that the producers of cotton receive a fair chance for the sale of their commodity.

Mr. President, I wish to say that the Secretary of Agriculture, in the case of cotton, in the administration of the Agricultural Adjustment Act, has rendered to the cotton farmers of the South a real and a substantial service. For the first time in the history of this Republic, the cotton farmer, burdened, as he has always been, with the costs of the tariff and things of that kind, selling his own product in a world-free, unprotected market, has been able to receive back from the Government at least a tithe of benefit to offset the burdens which he has borne. I desire to pay a tribute to the patriotism and to the fairness and to the enlightened public policy of the Secretary of Agriculture, who, coming from the corn and the hog section of the country, but with a vision broad enough to take in all the sections of the United States, so administered the Agricultural Adjustment Act as to render the cotton farmer and the cotton producer an outstanding public service. So it is from that sort of viewpoint that the Secretary of Agriculture approaches this problem; and what does he say? Let me read:

> The limitation in the case of any one future is 100,000 bales, and in the case of all futures 600,000 bales.

That is what the Senator from South Carolina now proposes to do.

> The limitation applies to hedgers as well as speculators. In the commodity exchange bill proper bona-fide hedging transactions are specifically exempted from trading limitations.

He points out that in the regular bill affecting grain and cotton and everything else hedging operations, legitimate operations, are removed from any limitation. But the amendment does put the limitation on as to cotton.

> This limitation as to the quantity of cotton futures which could be held by any single person or firm would, of course, materially reduce the amount of hedging by some of the larger merchants and the cooperatives.

In other words, they could not buy so many hedges. The inference, to my mind, is they would not buy so many spots. These are the words of the Secretary of Agriculture:

> The Department has definitely approved the limitation of speculative accounts.

I agree with the Secretary; we ought not to permit purely gambling transactions at all; but he says:

> But it does not favor limiting legitimate hedging.

That is the official attitude of the Secretary of Agriculture, who has administered the Cotton Futures Act over the years.

This morning, without my solicitation, two representatives of the Department of Agriculture who are working in the cotton section came to me in the interest of removing this limitation and letting the Department go ahead under the bill as it passed the House, just as the law will be administered as to wheat and oats and other grain.

Mr. President, why limit a legitimate operation? No man can buy a bale of cotton unless he pays more than his competitor will pay; and when he has bought merely a hundred thousand bales, why should it be said that he shall not buy another bale, because when he is denied the right to buy another bale, someone else is denied the right of selling another bale.

Mr. BORAH. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield.

Mr. BORAH. Is it practicable, under the circumstances which exist as to cotton, for 3 or 4 of the large companies to make a combination and agree as to how much they will pay, and hold the market at that price?

Mr. CONNALLY. Mr. President, I wish I knew. I do not believe that that would be possible, in view of the fact that cotton is an export crop. There are foreign merchants in this country all the time buying cotton for export. Half of what we produce moves into foreign markets, and I do not believe any combination of domestic dealers, unless they controlled practically the entire crop, could arbitrarily fix the price of cotton.

Mr. SMITH. Mr. President, I do not desire to interrupt the Senator, but I hope the Senator from Idaho will ask the same question in my time.

Mr. CONNALLY. I shall be very glad if the Senator from Idaho will renew the question. The Senator from South Carolina can give him an answer; I cannot. I am going to be frank and say that I do not know. Nor do I know just how many operators in the steel business can absolutely fix the price of steel.

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield.

Mr. NORRIS. I think the Senator will admit what I am about to say. As I understand the object of the amendment, this limitation is to prevent the very thing about which the Senator from Idaho propounded his question. If not limited by some specific statement in the law, could not 3 or 4 of the large operators have it in their power to corner the market and fix the price?

Mr. SHEPPARD. Mr. President, may I make a suggestion?

Mr. CONNALLY. In just a moment. The Senator from South Carolina of course says the purpose is to prevent that possibility, and I do not challenge the sincerity of his assertion. I yield to my colleague.

Mr. SHEPPARD. Why is it that the grain interests are not willing to accept a limitation of this kind?

Mr. CONNALLY. Of all the things which supposedly have been cornered in the history of the world the thrilling chapters of the Chicago wheat pit in past years furnished the most outstanding example, when one man, not many, but, the story is, one man, Patton, the great wheat king, not a combination, but one man, mastered the wheat market.

Mr. NORRIS. Will the Senator permit me to answer specifically the question propounded by his colleague?

Mr. CONNALLY. I shall be glad to have the Senator do so.

Mr. NORRIS. I think history shows that the board of trade itself, in order to give some semblance of regularity, has sometimes by rule prohibited, and they do now prohibit, under the regulation of the Secretary of Agriculture, one or two persons cornering the market as to any commodity.

Mr. SHEPPARD. Why was not a specific provision brought in by the committee with respect to grain?

Mr. NORRIS. So far as I am concerned, I have no objection to including a specific limitation as to anything.

Mr. CONNALLY. Mr. President, I thank the Senator from Nebraska. I know he approaches these public questions in the spirit of fairness and liberality, and that his motives are always of the highest.

Mr. NORRIS. Mr. President, the question I propounded to the Senator was asked with the idea of getting information on the subject. I am listening now to a debate on the cotton amendment, dealing with a subject concerning which I concede the cotton men know a great deal more than I do. However, I have been impressed during the hearings and while the subject has been under discussion in the Senate with the reasonableness of the proposed limitation with respect to cotton.

I confess that the proposed limitation impresses me. If I am wrong about it, I should like to find out wherein I am wrong. If the limitation is too small or if it is too great,

whichever it is, we ought to change it. However, it seems to me that the purpose of the amendment is very good.

Mr. CONNALLY. Mr. President, did the Senator from Nebraska urge limitation in the general bill as to wheat and other products also?

Mr. NORRIS. No, Mr. President. I did not urge it with respect to cotton, either. I am willing to be instructed by those who are more expert about the matter than I am.

Mr. CONNALLY. Mr. President, I make no pretenses to expertness. I never bought a bale of cotton or sold one on an exchange in my life. I never bought on the exchange a bushel of wheat or sold one in my life. I know something about making cotton, and planting it, and plowing it, and picking it down on my knees in the hot sun. The men engaged in that work are the ones for whom I am speaking here today. I am speaking for the man who goes out and works in the broiling sun.

Mr. ROBINSON. Mr. President, will the Senator from Texas yield for a question?

Mr. CONNALLY. I yield.

Mr. ROBINSON. Is there any direct limitation in the pending bill on the quantity of spot cotton that may be purchased?

Mr. CONNALLY. No, Mr. President; I understand not.

Mr. ROBINSON. Then there is no limitation applicable to the combination to which the Senator from Idaho [Mr. BORAH] referred; namely, a combination between corrupt purchasers of cotton who desire to control the market? They may still, so far as this bill is concerned, enter into any arrangement they think will be effective to regulate the price of spot cotton?

Mr. CONNALLY. That is correct.

Mr. ROBINSON. And no limitation on hedging—no limitation on speculation, for that matter—would directly, at least, accomplish that purpose?

Mr. CONNALLY. The Senator is correct.

Mr. ROBINSON. It may be true that in denying them the right to insure the price at which they purchase spot cotton, they might be deterred from attempting to control the market as to spot cotton; but if the combination were powerful enough they could still enter into an arrangement by which they could control it to the extent that they were able to get possession of the cotton.

Mr. CONNALLY. I thank the Senator from Arkansas for that interjection. It is a very valuable one.

Let me point out to the Senator from Nebraska and to the Senator from Idaho that there is, as the Senator from Arkansas suggests, no limitation in the bill on the amount of actual spot cotton which may be bought. Let us see what will happen. If the condition existed which the Senator from Idaho suggested, if three or four great firms, because of their financial strength, were able to monopolize the cotton market—and they could do so under this bill just as well as without it, because there is no limitation on their spot markets—they would not need any hedges, because they would have all the spot cotton and they would thereby control the market. But if their competitor, who could not control the market, had a hedge, they could not crush him out, because he would have something to guarantee and insure his price.

Mr. ROBINSON. But if he could not hedge, they could put him in a position where he would immediately have to go out of business.

Mr. CONNALLY. Exactly. I thank the Senator from Arkansas. He put his finger right on the point involved. I wish to call particularly to the attention of the Senator from Nebraska what I am now about to state.

Let us suppose the great operators were able actually to corner the spot cotton. There is nothing in the bill to prevent it. They do not need any insurance. They do not need any hedges. They carry their own hedges on their own persons; they carry their own insurance in their pockets, because they have the actual spot cotton to put out on the markets of the world. Who are the masters of the price then? They are the masters of the price. They ask no one's consent for what they do. What difference does the exchange make, or what does it amount to? It amounts to nothing, because the great operators have the actual cotton in their warehouses. But the little buyer, the little cotton merchant in Texas, the little country storekeeper who buys cutton from his patrons, and they settle their bills by turning over their cotton, if he has no opportunity to wire in and hedge against a spot purchase, may be crushed by the combination of the great spot operators on the market.

Mr. BENSON. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield.

Mr. BENSON. Would not operators be more apt to be able to control the market if they had the privilege of both buying and selling in an unlimited amount, rather than merely the privilege of buying spot cotton in an unlimited amount?

Mr. ROBINSON. Mr. President, there is no restraint in the bill on either buying or selling spot cotton.

Mr. BENSON. That is what I am asking.

Mr. ROBINSON. There is no limitation in the bill on either buying or selling spot cotton. One may buy or sell as he pleases.

Mr. CONNALLY. Exactly.

Mr. BENSON. If one is going to buy 600,000 bales of cotton, and he does not have the privilege of hedging beyond that, is not that one thing, and is it not another thing just to be able to go on buying?

Mr. CONNALLY. Of course, there is a difference. If there were no difference, there would not be an amendment here.

Mr. BENSON. That is what I am asking the Senator.

Mr. CONNALLY. There is a difference, of course. What I am trying to point out is that in the case referred to by the Senators, of concerns sufficiently strong financially to master completely the spot market, this question becomes academic with them; but it does not become academic with the man who cannot corner the market, who wishes to buy a few hundred or a few thousand bales of cotton to guarantee himself against loss by taking a hedge.

As I said a moment ago, and I do not like to repeat it, I am not here defending hedging. I should not care if all hedging were abolished. However, if permission to hedge is to be the policy of the Government with regard to wheat and corn and other commodities, why should cotton be singled out, and those who deal in it be told, "As to you fellows, we are going to make a different rule, and you cannot sell and buy freely, and you cannot protect your sales and your purchases with hedging"?

Mr. President, I shall later ask to put into the RECORD some telegrams and letters I have received with regard to the cotton amendments. There are not a great many of them. One comes from the Texas Cooperative Council of Agriculture. Others come from representatives of cooperatives and other farm organizations.

This morning I received a letter from the master of the Texas State Grange, opposing the Smith amendment and asking that the bill become a law by letting it pass the Senate in the form in which it was passed by the House. I ask to have that letter printed in the RECORD at this point.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The letter is as follows:

WASHINGTON, D. C., *May 27, 1936.*

Hon. TOM CONNALLY,
United States Senate.

DEAR SENATOR: On behalf of the Texas cotton farmers, Texas State Grange opposes the Smith amendments to the Commodity Exchange Act. Limitation of hedges will materially curtail their operation.

RALPH W. MOORE,
Master, Texas State Grange.

Mr. CONNALLY. My information is that the cotton cooperatives or organizations of the farmers themselves actually handle each year about a million and a half bales of cotton. If I am in error in that respect, I hope some member of the committee will correct me. They handle that cotton, and they have to market it just as a buyer markets it. They are now handling one and a half million bales of cotton.

Under the pending bill they are told, "You can hedge only 600,000 of those bales." What will be the result? The result will be a tendency to reduce their operations, because they will not be able to go on the exchange and hedge against transactions, and they will have a tendency to stop when they have 600,000 bales.

Mr. President, cotton is marketed in 3 months of the year, so far as the farmer is concerned—October, November, and December. Under the pending bill no more than 100,000 bales may be hedged against in 1 month. So far as the little country dealer is concerned, it practically amounts to a limitation of 300,000 bales reflected in his market.

I have no concern with reference to the bill except to try to secure some legislation to regulate the cotton exchanges, which we have sought to do for 30 years. We ask no special privilege for cotton. All we ask is that cotton be placed in the commodity-exchange bill on the same terms and under the same conditions as are other agricultural commodities. The House has passed the bill. It has sent it here; and if now we engraft upon the bill amendments which the House does not favor, and it goes to conference in the last few feverish days of the session, will we get legislation? Very likely not.

If those interested in grain want legislation, they had better let the cotton interests be dealt with just as the grain interests are dealt with, otherwise they may have no legislation.

I am not a member of the Committee on Agriculture and Forestry, and I do not mean to make these suggestions from any peculiar knowledge of mine; but I know that the Secretary of Agriculture is strongly against the Smith amendment now pending. I know that the cotton cooperatives of my State are against it. Here is a telegram from Homer D. Wade, Texas Cooperative Council. Here is another telegram from the Texas Cotton Growers' Association. Here is a letter from the master of the Texas State Grange. Here is a telegram from someone else—I do not know whether he is a cotton merchant or not, but I assume he is.

I will say for the benefit of the Senator from Idaho that the master of the State Grange came to my office. I did not know he was in town and did not solicit his visit; he came there to discuss this and other agricultural problems; and when he told me his attitude I said, "Sit down and write me a letter about it, so that I can put it in the RECORD." He did so. His statement was that the Texas State Grange, a farm organization, in the main cooperated with and acted with the Texas Cotton Cooperatives, that they had the same general policies, and the Texas cooperative associations were opposed to these amendments because they will limit their own operations, the operations of the farmers themselves, through their voluntary cooperative marketing agencies.

Mr. President, for years Congress has been enacting legislation to stimulate the organization of farmers' cooperative societies, legislation to enable the Federal Government to extend them loans for the production and marketing of their commodities. All they ask is to be allowed to act for themselves on the commodity markets. They have built up their business until now, I understand, they do a business to the extent of a million and a half bales of cotton, and yet, under the terms of these amendments, they would be limited in their legitimate hedging.

Mr. BORAH. Mr. President——

Mr. CONNALLY. I yield to the Senator from Idaho.

Mr. BORAH. It is the contention of the Senator, then, that if this limitation is placed in the bill, it will reflect itself finally in a lower price for the producers of cotton?

Mr. CONNALLY. That is my fear, for this reason——

Mr. SMITH. Mr. President, I do not care to interrupt this discussion, but, in my own time, I will attempt to show that the situation is exactly the opposite.

Mr. BORAH. I asked if that was not the contention of the Senator from Texas? He is seeking to protect the producers of cotton?

Mr. CONNALLY. I am. Let me give an illustration. A number of men are sitting around a table; they are bidding, trying to buy a certain commodity. They have all got money; they have all got funds; they have the ability to buy, and they all want the commodity, but tell one of them, "You are through now; you have bought all you can buy; get out of the game." In that event, instead of six men being at the table, only five would be left. Would five men have as much motive to buy and as much economic power to buy as six men? Then, when the fifth man bought all he could buy under the law, suppose it should be said to him, "Here, you get out of the way." By such processes, there would be a lessening of the market; there would be a lessening of the desire of the remainder to pay a higher price, because the chances are that a man who has already bought a large amount is a more daring individual and is willing to take a greater hazard because he is already in the market.

These are only fundamental principles, to my mind. If we presuppose a free market and a free flow of commerce, the supposition is that the man who bids the most for a commodity will get it; and when he bids the most for a commodity the producers of the country will get more than they otherwise would.

Mr. President, I ask to have read from the desk a letter from a farmer, a member of one of the cooperatives in my State. He writes on the letterhead of the Producer-Consumer Publishing Co., Inc., from a little town called Kress.

The PRESIDENT pro tempore. Without objection, the clerk will read, as requested.

The legislative clerk read as follows:

Senator TOM CONNALLY,
Washington, D. C.

DEAR SENATOR: I hear rumors that the long silent commodity-exchange bill will be lifted from the calendar and presented to the Senate for disposition. I know you are for the bill, but opposed to the Smith amendments. I hope that you will use your talents in ridding the bill of its objectionable features. Somebody must ride down the power which the chairman of the Agricultural Committee is using to the damage of the individual producer and the cooperative marketing associations. If the Congress does not cooperate in the passage of this bill, public sentiment will assume the responsibility. This is one particular, in the interest of both the producer and consumer, that requires no tax levy. Perhaps there would be no just ground for criticising a Senator from Rhode Island if he did nothing more than vote; but a Senator from Texas can have no relief from responsibility unless his influence can be felt by a dozen Senators less fortunately situated. You have the reputation in Texas and elsewhere of being able to do that very thing once you have accepted the challenge, which should be done in the name of justice and equality.

Sincerely yours,

L. T. MATHUGH.

Mr. CONNALLY. Mr. President, that letter is from a member of one of the cooperatives. I think he was here as a member of the cooperative delegation that visited Washington a year or two ago. I wanted the Senate to get his views with respect to this particular matter.

Now, Mr. President, I ask leave to have certain telegrams and letters incorporated in the RECORD.

The PRESIDENT pro tempore. Does the Senator desire the telegram read which he sent to the desk a while ago?

Mr. CONNALLY. I will ask that it go in the RECORD in connection with the other telegrams.

The PRESIDENT pro tempore. Without objection, it is so ordered.

(The telegrams and letters appear at the conclusion of Mr. CONNALLY'S remarks.)

Mr. CONNALLY. Now, Mr. President, I have about concluded my remarks so far as this amendment is concerned. I have tried to point out what I believe to be the very serious objections to the amendment. First, I think its adoption is going to imperil the passage of the pending bill. If those interested in grain, those from the West who want legislation regulating the grain exchanges, as I assume they do, and as I do, why not pass the bill as the House passed it and make sure that legislation will be enacted? But when this bill is thrown into a conference committee, it is considered in a secret chamber, a procedure of which the Senator from Nebraska [Mr. NORRIS] is so afraid that he led a great campaign to abolish one of the houses of the Nebraska Legislature and succeeded, which was a great achieve-

ment from the Senator's standpoint. When, however, the bill goes into conference we do not know what is coming out.

Mr. President, I plead simply for the same treatment for cotton that it is proposed to accord to wheat and oats and corn. Why should the law deal with the interests of the man in Kansas who raises corn and feeds his hogs in a different manner than it deals with the product of the man in Texas who raises a bale of cotton? Are they not entitled before the law to equality? Ought they not to be entitled in the markets of the world to the same freedom of opportunity? Ought they not to receive at the hands of the Government the same measure of justice? But when it comes to cotton we must make an exception, we must set up a different standard, we must say that because of a certain demand from certain members of the committee we will treat cotton in a different fashion than that which we lay down for the greatest agricultural product of the Union.

Mr. President, the cotton farmer, until the enactment of the A. A. A., as I said a little while ago, had never been the recipient at the hands of the Government of bounties or preferences or privileges. No tariff can aid the cotton farmer. When he exports 50 percent of the product of his acres he must send it out not with bodyguards and not with protective-tariff fortifications around it, but he must send it out on the highways of the sea where it must seek a market wheresoever it can be found, and that cotton must meet the competition of the cotton that comes from the banks of the Nile or the jungles of Brazil. He has no reward, no benefit except that which comes from his own toil. Today the cotton producers are only asking for the same measure of fair treatment that we are proposing to give to the corn and wheat and other grain producers. Mr. President, those who represent them in this Chamber, poorly as we may, demand that equality of treatment. We shall be satisfied with nothing less.

Mr. President, in conclusion, I wish to call the attention of the Senate again to what was placed in the RECORD yesterday by my distinguished colleague, the senior Senator from Texas [Mr. SHEPPARD], when he pointed out the views of the Farm Credit Administration and the views of the Department of Agriculture opposing the Smith amendments particularly as they affected the general agricultural situation and the interest of the Government itself in the loans and other investments which it has made for the farmer's welfare.

Mr. SHEPPARD. Mr. President——

Mr. CONNALLY. I yield to my colleague.

Mr. SHEPPARD. I wish to call the attention of my colleague and of the Senate to the further fact that the Secretary of Agriculture, in a letter to the Senate Committee on Agriculture expressing an opinion on the bill, which had been requested by that committee, said that the Department favored the inclusion of cotton in the commodities-exchange bill as it passed the House.

Mr. CONNALLY. As it passed the House; yes.

Mr. SHEPPARD. And urged that if any additional legislation was to be considered with respect to cotton, it should be handled in a separate bill. The Secretary of Agriculture pointed out that it was most important that the commodity-exchange legislation be not jeopardized by any delay in working out any new provisions which have application to cotton only and which are in addition to the provisions of the bill which passed the House.

I wish to say that I am in thorough agreement with the Secretary of Agriculture, as I think my colleague is also.

Mr. CONNALLY. I thank my colleague for his very illuminating contribution to the RECORD. The attitude of the Secretary of Agriculture, not only in writing to the committee but in personal conferences with Senators, has been that the bill ought to be passed by the Senate as it passed the House. Then we can secure legislation as to grain and as to cotton. There is no reason why the one should be treated in any manner differently from the other.

(The following letters and telegrams were ordered to be printed at the conclusion of Senator CONNALLY's speech:)

MAY 18, 1936.

Hon. E. D. SMITH,
Chairman, Committee on Agriculture and Forestry,
United States Senate.

DEAR SENATOR SMITH: Following receipt of your letter of May 14, your interview with the President, and my subsequent conversation with him, the Department commenced a careful study of title II of the proposed substitute for H. R. 6772 (committee print of May 14, 1936).

Section 2 of title II appears to be a congressional declaration intended to lay the constitutional foundation for legislation based on the commerce powers of Congress. Such an amendment to the Cotton Futures Act, now based on the taxing powers of Congress, would be desirable in legislation such as contemplated in title II. On general principles it would seem that the form of congressional declaration contained in the Grain Futures Act, and which has been upheld by the United States Supreme Court in *Board of Trade v. Olsen* (262 U. S. 1) would be preferable to new and untried language. In this connection it may be noted that the declaration of purpose in section 3 of the Grain Futures Act, and also in section 4a, added by H. R. 6772 (committee print, p. 4) emphasizes the need for preventing excessive speculation and manipulation, whereas the declaration contained in section 2 of title II, paragraph 4, subdivision (B) on page 32, seems to emphasize as of equal importance the necessity of having speculators in the futures market "dealing in large quantities of futures with a view to profit." There is perhaps no inconsistency here; I merely note the point for your consideration.

Sections 3, 4, 5 (except subsection 6), 6, 7, 8, and 9 of title II appear to be reenactments and adaptations of sections 3, 4, 5, 6, 7, 8, 9, and 10 of the present Cotton Futures Act based on the commerce power instead of the taxing power of Congress. Insofar as these sections are reenactments of what is already contained in the present Cotton Futures Act, they would be properly incorporated in legislation such as proposed by title II. They deal principally with grades and standards and the determination of price differences for delivery purposes.

Subdivision 6 of section 5 (p. 38) changes radically certain existing practices as follows:

(a) Delivery of cotton on any one contract is limited to three contiguous grades of the same color.

(b) Cotton must be delivered in standard compressed bales of approximately 22½ pounds to the cubic foot.

(c) Delivery is limited to 1 single day of the delivery month, namely the seventh business day following the tenth business day of the delivery month.

(d) Expenses incident to the tender and delivery of cotton must be borne by the seller.

(e) Delivery is limited to the place where the cotton exchange is located, and either one or two southern delivery points to be selected by the cotton exchange.

The Department has no factual knowledge on which to base either its approval or disapproval of these proposed changes in well-established practices. It is fair to say that some of the changes involve questions of a highly controversial nature at least one involves sectional interests. The elimination of certain southern cities as delivery points for New York contracts will probably be protested by the cities affected.

Limiting deliveries of cotton on cotton-futures contracts to a single day during a delivery month is a radical departure. In effect, the term "delivery month" becomes meaningless, inasmuch as a contract for the sale of cotton for October delivery becomes in effect a sale of cotton for delivery on the seventh business day following the tenth business day of October. I am wondering if this might not at times tend to reduce the amount of cotton actually delivered on futures contracts to a point where the trading would represent even more largely one of settlement by offsets than at present.

With respect to contiguous-grade deliveries, this provision would of course make deliveries more acceptable to the buyer but it would make it difficult for the small merchant to assemble contract lots which would meet the three contiguous-grade requirements. With regard to the provision against delivery of bales compressed to other than standard density of approximately 22½ pounds per cubic foot, this provision would presumably prevent delivery of other bales previously compressed to high density. The latter constitutes a substantial proportion of the cotton received at several of the southern ports, particularly Houston, Galveston, and New Orleans. It might be well to consider also the reaction of interior compresses to this provision.

Section 10, on page 44, requires all purchases and sales of cotton for future delivery to be by public outcry. However, paragraph (c) of such section authorizes the offsetting or matching of purchase orders against selling orders received simultaneously without actual execution of the orders in the exchange ring or pit provided for such trading. There may be times when better executions can be effected by commission merchants by the simple process of offsetting or matching orders, but it seems to us to be a practice fraught with temptation, and the experience of the Grain Futures Administration has suggested the desirability of prohibiting such practice by law.

Section 11 makes mandatory minimum margin requirements of 5 percent applying to all purchases and sales of cotton for future delivery regardless of whether they be hedging or speculative trades. We see no objection to such a provision. Uniformity in margin requirements is thought desirable where exchanges do

not themselves insist upon certain established minimum margins being obtained from customers.

Section 12 prohibits the purchase or sale of cotton futures in connection with the sale of spot cotton on buyer's or seller's call unless the price be fixed prior to shipment. We do not know to what extent this would retard the movement of cotton into consumptive channels, both here and abroad, but we think the matter should be seriously considered.

Section 13 prohibits spot-cotton merchants from acting as commission brokers and prevents commission brokers from acting as spot-cotton merchants. It also denies the right of spot-cotton merchants to be members of the clearing house of a cotton-futures exchange. On general principles we see no reason why a spot-cotton merchant, being a member of an exchange, should not be permitted to execute and clear his own hedging trades without paying commissions to some other member of the exchange. A cooperative association of cotton producers engaged in the spot-cotton business would be similarly denied the right to execute and clear its own trades in its own name and would have to pay some commission broker the established commission rate to members, which is one-half of the nonmember rate. You will recall, perhaps, that the United States Circuit Court of Appeals for the Seventh Circuit, in *Board of Trade of the City of Chicago* v. *Henry A. Wallace et al. and Farmers National Grain Corporation* (67 Fed. (2d) 402), held that membership in a board of trade without the privilege of clearing trades made thereon would fall far short of conferring the full advantage of a contract market. The court said: "The right to clear trades which are made on the board cannot be separated from the right to make trades on the board without seriously impairing marketing facilities." The right of cooperatives entitled to membership and trading privileges on boards of trade under the Grain Futures Act was held to include the privilege of clearing.

Section 14 fixes definite limitations by law upon the amount of cotton futures that may be held by any person in any one future or in all futures combined. The limitation in the case of any one future is 100,000 bales and in the case of all futures 600,000 bales. The limitation applies to hedgers as well as speculators. In the commodity-exchange bill proper bona-fide hedging transactions are specifically exempted from trading limitations. This limitation as to the quantity of cotton futures which could be held by any single person or firm would, of course, materially reduce the amount of hedging by some of the larger merchants and the cooperatives. The Department has definitely approved the limitation of speculative accounts, but it does not favor limiting legitimate hedging.

The remaining sections of title II are in the main enforcement and penalty provisions, as well as definitive of certain words and terms appearing in the bill.

The Department favors the inclusion of cotton among the commodities covered by title I of the bill. It respectfully urges prompt action upon the legislation embodied in title I, and suggests that if additional time is required to revise the provisions of title II, it be handled as a separate bill. It is most important that commodity-exchange legislation be not jeopardized by any delay in working out new provisions which have special application to cotton only and which are in addition to the provisions of title I.

Respectfully submitted.

H. A. WALLACE, *Secretary.*

MEMPHIS, TENN., *May 27, 1936.*

Hon. TOM CONNALLY,
United States Senator, Washington, D. C.:

On behalf of our members who collectively are trying to market their cotton through their own association, I wish to thank you for splendid effort you are making in opposing Smith amendment to Commodity Exchange Act. Limitation of hedges will materially curtail their operations, will reduce efficient competition, and will result in increasing spread between price paid to producer and price paid by mill.

E. F. CREEKMORE,
Vice President, American Cotton Cooperative Association.

DALLAS, TEX., *February 20, 1936.*

Hon. TOM CONNALLY,
United States Senate:

Understand commodity-exchange bill to have early consideration in Senate. Our study of same leads to conclusion that bill as passed by House meets demands of producers. Have serious doubts as to Senate committee amendment to bill and am therefore hopeful that you will oppose it. Regards.

HOMER D. WADE,
Texas Cooperative Council.

DALLAS, TEX., *February 20, 1936.*

Hon. TOM CONNALLY,
United States Senate:

We strongly urge your support of the commodity-exchange bill as passed by House, but urge that you oppose proposed Senate committee amendment, as we consider amendment of no benefit to producers.

TEXAS COTTON GROWERS' ASSOCIATION.

HOUSTON, TEX., *May 15, 1936.*

Hon. TOM CONNALLY,
Senate Office Building:

Morning papers carry press dispatch outlining proposed Smith amendments to commodity-exchange bill, which, in our opinion, and in opinion other cotton shippers, as recently shown at annual cotton shippers' convention, would be very detrimental to best interests of cotton merchandising business as a whole, and through increasing cost of doing business would be harmful to cotton producer. Urgently request you to use all your influence to have these amendments eliminated from bill when it is presented before the Senate.

ALEXANDER SPRUNT & SON, INC.

AMERICAN COTTON COOPERATIVE ASSOCIATION,
New Orleans, February 19, 1936.

Hon. TOM CONNALLY,
United States Senate, Washington, D. C.

DEAR SENATOR CONNALLY: We understand Senator ROBINSON has announced today that the Commodity Exchange Act, as passed by the House during the last session and as amended by the Senate Agricultural Committee during the last session, will be brought up in the immediate future for consideration.

At a recent meeting of the board of directors of A. C. C. A. they unanimously went on record as favoring the passage of the Commodity Exchange Act as passed by the House, but strongly opposed the amendment to the act as reported by the Senate Agricultural Committee.

We feel that the interest of the cotton producer should be considered in any proposed changes in the rules of the cotton exchanges. Narrowing the contract, permitting manipulation between months and markets, and increasing the cost of handling are detrimental to the cotton producer, the consumer of cotton goods, and the cotton mills.

The amendment, we believe, narrows the contract, encourages manipulation, increases the cost of handling cotton without appreciably benefiting the cotton producer or the cotton mills, but will result in materially benefiting cotton futures brokers.

Statement of our position in this matter is attached hereto. On behalf of the cotton producers of the South and the mills with whom we do business throughout the world, we feel justified in asking you to look into the matter closely, and we hope when you do so you will feel the Commodity Exchange Act should be passed, but the Senate amendment should be rejected.

Very truly yours,

E. F. CREEKMORE,
Vice President and General Manager.

NATIONAL COOPERATIVE COUNCIL,
Washington, D. C., February 20, 1936.

Hon. TOM CONNALLY,
United States Senate, Washington, D. C.

DEAR SENATOR CONNALLY: We favor the commodities-exchange bill as passed by the House. This bill, we understand, may come to the Senate floor today.

We oppose the amendments on cotton added to the bill by Senator SMITH in the Senate committee.

While we dislike to disagree with the committee chairman, the council is of the opinion that the Senate amendments are definitely against the best interests of the cotton producer. We believe they will benefit only the futures brokers.

It is the view of the council that the cost of handling actual cotton and cotton hedges will be increased by the amendments, and the price the farmer receives will rest more largely in the hands of speculative interests.

In this position the cotton cooperatives heartily concur.

May we urge that the amendments reported by the committee be stricken out and the bill be passed after such deletion. Unless the amendments are killed we prefer that the bill be deferred.

Very truly yours,

ROBIN HOOD,
Secretary-Treasurer, National Cooperative Council.

DALLAS, TEX., *May 15, 1936.*

Hon. TOM CONNALLY,
United States Senator:

We ask your favorable consideration and support of the Commodity Exchange Act, including cotton, as passed by the House, and we urge that you vigorously oppose the Smith amendment as presented to Agricultural Committee yesterday. We do not consider Smith amendment contains any provisions that will be beneficial to producer, principally for the reason it restricts the number of grades and points of delivery of future contract cotton, would cause cotton to move to New York, which is not a logical place for concentration or delivery of cotton, restricts cooperative associations from becoming members and enjoying benefits of clearing-house associations, would eliminate Houston and Galveston as delivery points, which handle more cotton than any other ports, restricts selling of call cotton, which would double cost of hedging, and unfavorably limits maximum transactions. In fact, in its entirety, it would largely benefit only the future brokers, and its provisions add an extra cost to handling of cotton, which would have to be paid by farmers. We consider it a matter of such importance that it should be defeated, or at least referred to the Secretary of Agriculture for a full and comprehensive report.

TEXAS COTTON GROWERS ASSOCIATION,
A. B. EMMERT, *General Manager.*

DALLAS, TEX., *May 15, 1936.*

Hon. TOM CONNALLY,
United States Senate:

Permit me to urge that you give favorable consideration to Commodity Exchange Act as passed by the House, including cotton.

From information received, this SMITH amendment, as presented to Agricultural Committee yesterday, would be highly beneficial to clearing-house members of the cotton exchange, but will materially increase cost of handling cotton for farmers, which of necessity will be deducted from the proceeds of their cotton. In view of hearings by SMITH committee, I am suggesting that the matter is of such importance to cotton farmers that the bill should either be defeated or referred to the United States Department of Agriculture for full and comprehensive study and report. Will appreciate your reactions.

HOMER D. WADE,
Texas Cooperative Council.

CALVERT, TEX., *May 15, 1936.*

Senator TOM CONNALLY:

We urge your favorable consideration of Commodity Exchange Act as passed by the House, including cotton, and vigorously protest SMITH amendments as presented to Agricultural Committee yesterday. It is matter of such importance to cotton farmers it should be either defeated or referred to Secretary of Agriculture for full and comprehensive report.

J. R. MCCRARY,
President, Texas Cooperative Council.

Mr. SMITH. Mr. President, may I call attention merely to one point, and then at an appropriate time, if necessary, I shall take the floor to explain some of the statements which have just been made.

I suppose there is not a matter of which the public is more in ignorance than what we call the grain or cotton exchanges. We talk about "hedging." The minute I hedge I have sold the commodity, and the man who holds the hedge owns the commodity. Suppose I am a member of an exchange and also a cotton merchant. I can have my broker hedge my own commodity, and then I own it at both ends. I own the spot commodity and I own the hedge. Every Senator knows that when I hedge I have sold the commodity. A cotton cooperative can sell its cotton. The minute the cooperative hedges it has sold the cotton and what it has is the hedge. It cannot get a nickel more for that hedge, because the man who buys the hedge owns it. If I am a cotton merchant and a member of an exchange, I can hedge my own cotton and still own the hedge and own my cotton.

There is some talk about denying the privilege of hedging to someone. If he is going to sell it, why not sell it? Why does he hedge? He hedges because some merchant has got to take the cotton when it comes from the farmer.

Mr. ROBINSON. Mr. President, in connection with his statement, may I ask the Senator whether he approves of the process of hedging?

Mr. SMITH. I approve of the process of hedging when it is not abused. It was testified before our committee that one concern had more than 2,500,000 hedges in the market, and had that much cotton.

Mr. ROBINSON. Perhaps I did not make my question clear. The intended implication of my question was that, according to the statement of the Senator from South Carolina, hedging is not a justifiable transaction.

Mr. SMITH. I think hedging is justifiable on the part of the merchant who has to buy cotton. As he buys it he sells it and that ends the transaction. For instance, if the market is 10 cents today and I buy a thousand bales at 10 cents and have no orders from the mill or from anywhere else, I have to buy if I stay in the market. Accordingly, I buy and then I immediately sell a hedge. That ends the transaction.

Mr. COOLIDGE. Mr. President, will the Senator yield?

Mr. SMITH. Certainly.

Mr. COOLIDGE. When a man hedges it is simply an assumption that he has sold?

Mr. SMITH. He has sold.

Mr. COOLIDGE. But he does not actually sell the actual cotton, does he?

Mr. SMITH. The man to whom he sells can demand the delivery of every bale he hedges. It is insurance to the small man. What happens when hedging is unlimited is that those who own the hedges are so resourceful that they not only own the hedges but they own the cotton itself, and they can manipulate the price to suit their own sweet will.

I had intended injecting into the bill a provision that a cotton merchant should not be a member of the clearing house. In other words, if he is a broker, let him be a broker; if he is a merchant, let him be a merchant, and not be both a broker and a merchant, and dominate the market with the extent of his holdings both as hedges and as spot cotton.

Mr. President, I wish I had the time to start right at the beginning and explain the workings of the exchange as it has operated for a number of years. Then they got the device of straddling—sell Europe, buy America; sell America, buy Europe, and fill in; sell one month until you put the price down, buy another month until you put it up, and then slip in your cotton where it is to your best advantage. Then they had the beautiful system of call cotton. I sell cotton for October delivery. I sell the actual spots, and the manufacturer says, "I will take them", and I say I will fix the price in October. The manufacturer thinks, "That is good. I will not have to pay any insurance", and he takes the cotton and spins it; and when October comes, if he is in the grip of one of those tremendous concerns, he will pay by the nose; and some of the manufacturers have not had sense enough to see it.

At the proper time, if it is necessary, I shall take the floor and try to give my colleagues an explanation of some of the workings of this beautiful machine as it is now constituted.

Mr. McKELLAR. Mr. President, yesterday it was stated that an amendment would be offered to exclude cooperatives from the inhibitions of this measure.

Last fall I was a member—and, in fact, chairman—of a subcommittee appointed to consider the question of cotton cooperatives, and we held elaborate hearings in the city of Memphis for that purpose.

I wish to say at the outset that I have no objection to cooperatives as cooperatives. Indeed, I voted for every cooperative measure that has ever passed the Congress. I am thoroughly for any cooperative that will be of benefit to the farmers; but the American Cotton Cooperative Association is not a cooperative association at all. It is simply and solely a cotton merchant, just as Anderson, Clayton & Co. are cotton merchants, just as McFadden & Co. are cotton merchants, just as Weil & Co. are cotton merchants; the only difference being that the American Cotton Cooperative Association is subsidized by the Federal Government, while the others are not subsidized.

The cooperatives were authorized under the law of 1922; and until 1929 they were without substantial Government subsidy. In 1929 a revolving fund of $500,000,000 was established, for the purpose, in part, of aiding the farmers through cooperatives. The fund had several other purposes; but I am now dealing not with grain cooperatives but solely and alone with cotton cooperatives.

The American Cotton Cooperative Association started out with an authorized capital of $30,000,000—I hope Senators will listen to me—of which $800,000 was subscribed and $76,950 paid in. Think of it, Mr. President. $800,000 subscribed and $77,000 paid in, of which afterward $40,600 was returned to the marketing associations, so that the actual capital of the concern in real money was $36,350. The Senate heard the Senator from Texas [Mr. CONNALLY] say, a few moments ago, that with this small capital of $36,350 the American Cotton Cooperative Association is now dealing in a million and a half bales of cotton a year, and I think it goes even beyond that; and why? Because it is subsidized by the Government and has been subsidized by the Government in almost unlimited measure.

What was the first subsidy? The first subsidy was by the Farm Board; and the A. C. C. A. lost out of that first subsidy—I have the exact figures here, and I want to be accurate about the matter—just the small amount of $79,286,384! That is the first step that was taken. The A. C. C. A. used all the money that was given to it by the Federal Government and lost $80,000,000, principally in speculation; and it has been speculating ever since.

Now, I wish to say a word or two about the membership of the A. C. C. A. It has no members except the officers and agents and servants of its various subsidiaries.

It has no other members. The subcommittee went very thoroughly into the question as to whether the A. C. C. A. had other members, and the only members it could claim were members obtained in this way.

Assume that I am a cotton farmer and the Senator from South Carolina [Mr. SMITH] represents the cooperatives in my county. I sell him a bale of cotton, just as if he were a merchant, and we agree on the price. There is not a particle of difference between him and any other merchant. When I agree on a price with him—say 10 cents a pound—he hands me a bill of sale, and in the bill of sale is a statement that by reason of his buying this cotton I become a member of the American Cotton Cooperative Association. Perhaps I am a colored man or a poor white boy and cannot read. In such a case I sign, of course, or make my mark. I have sold the cotton and wish to get the money, but I cannot get it unless I agree to sign the statement that I am a member of the American Cotton Cooperative Association; and I desire to digress long enough to show the Senate how this procedure works in the case of the poor man.

Congress has done a great work, and I wish to pay tribute to the Senator from South Carolina [Mr. SMITH] for the splendid and effective work he has done in the matter of seed loans to indigent farmers who are not able to make loans at any other place. In the case I am supposing I may be a colored man or a white man who cannot make a loan anywhere else. I make my cotton, and unfortunately the seed-loan office requires me to do business with the local so-called cooperative association. I will explain what they do to me. I took the testimony of the seed-loan office, and the figures as to the number of bales given in my published report show just exactly what the poor devil of a farmer has done to him by the cooperatives which were established to help and to aid him.

A colored farmer took one bale of cotton to the Mid-City Cotton Growers' Association at Memphis. He received for that bale of cotton $51.31. The association had made him a previous advance of $5.59 on that cotton. Then they charged him interest of 60 cents. They charged him insurance of $1.30. They charged him storage of $4.55. Other than regular seasonal charges—and what those charges are God only knows, because they have not explained them to this day, although they were asked to do so—amounted to $1.40. Then this marvelous organization, claiming 259,000 members, made this charge against that poor colored boy: Membership fee in the cooperative, $5. They are conducting a newspaper, and he was charged with a subscription to it. It made no difference whether or not he could read or write; he was charged 50 cents for a subscription to the newspaper, and interest on cash paid out for freight and storage. Freight and storage amounted to $4.55, and they charged him 40 cents for interest on that advance of freight and storage. The total was $19.34, taken out of that poor man's cotton money. If that is aid to farmers through cooperatives, then God have mercy upon the poor farmers!

Mr. LEWIS. Mr. President, did the Senator say it was taken out of the $50?

Mr. McKELLAR. The $19.34 was taken out of the return for the one bale, $51.31. Now I will take the next one.

Mr. SMITH. Mr. President, was that $51.31 the result of the price current that day?

Mr. McKELLAR. Who in the world knows? Nobody can tell. The actual expense after allowing for the advance for handling that cotton was $11.07. The ordinary rule of private dealers is to charge $1.25 a bale, and I believe it was $1 a bale at that time; but instead of having $1.25 taken out, the men who had to deal with these cooperatives had $11.07 taken.

The next one received $53.97 for his cotton, and he paid $5 for a membership fee in the cooperative, he was charged 50 cents for a newspaper, he paid the other charges, and the amount taken out of his allowance was $19.75.

I have here the proof, taken from the record, not denied, of the enormous sums that were taken out of the cotton returns of these poor people. Yet I hear on this floor the statement that we ought to help, that we ought to preserve, the American Cotton Cooperative Association.

Now I come to the next point, which I believe will astound the Senate. I know it will astound everyone who is listening to me.

About a year ago, it seems, the American Cotton Cooperative Association had a little difficulty about a money matter. I should perhaps explain that under the fake statute which the Senator from Michigan [Mr. VANDENBERG] first brought to the notice of the public several years ago, and which he and I finally succeeded in having repealed, the cooperatives were borrowing money from the Department of Agriculture at from one-quarter of a percent to one-half of a percent and lending it to the farmers at 5½ percent. After that statute was repealed they were required to pay 3 percent by law. Mr. Creekmore thereupon went to New York and made arrangements with several banks in New York to borrow what money he needed at 1½ percent, provided—and listen to the proviso—provided the Government would yield preference to the banks and subordinate the securities of the Government to the claims of the banks; that is, that the security of the Government was subordinated to the claims of the banks.

Think of it! Here is an enormous concern constantly subsidized by the Government, to the extent of more than $140,000,000 of losses to the Government, yet it comes to Washington and gets the Government to subordinate its loan from banks in New York so that the cooperative may get money at 1½ percent to lend to farmers at 5½ percent, and probably more.

Last year, when I first offered the resolution for an investigation, the Department notified the cooperatives that this arrangement could not last any longer, that they would have to get their money otherwise; and I am very glad they did notify the cooperatives to that effect.

How did they get $5,000,000 of their money? If there ever was an Aladdin's lamp, Mr. Creekmore and his associates in the so-called American Cotton Cooperative Association have that lamp. They just waved it over the Government, they waved it over us here, and we furnished the money.

Let me show how it was furnished. I took occasion to go into the matter of subsidiaries of the A. C. C. A. They have 12 or 13 regular subsidiaries. Lately all of them, with the exception possibly of two or three, have failed absolutely, and six of them have just been wound up in bankruptcy. Mr. Creekmore needed the money for his merchandising business, but he did not want to borrow it at 3 percent, so he got his subsidiaries to borrow it. He got six of these bankrupt concerns to borrow the money. Not one of them was entitled to credit. I shall give the names, and be accurate about the matter.

Think of it! The parent company wanted $5,000,000, and someone made this arrangement. Eleven of them appeared here at the Treasury and borrowed the $5,000,000 in separate amounts.

The Alabama Cotton Cooperative Association borrowed $400,000.

The Brazos Valley Cotton Cooperative Association borrowed $425,000.

The California Cotton Cooperative Association borrowed $175,000.

The Louisiana Cotton Cooperative Association borrowed $800,000.

The Mid-South Cotton Growers' Association borrowed $800,000.

The Mississippi Cooperative Association borrowed $800,000.

The Oklahoma Cotton Growers' Association borrowed $500,000.

The South Carolina Cotton Growers' Association borrowed $200,000. It was modest in its demands.

I hope the Senator from Texas is here. The South Texas Cotton Cooperative Association borrowed $200,000.

Mr. CONNALLY. Mr. President, the Senator from Texas is always here when he knows the Senator from Tennessee is going to address the Senate.

Mr. McKELLAR. The Senator is very kind. I call his attention to another one. The West Texas Cotton Growers' Association borrowed $500,000.

What did they do with the money? Altogether $5,000,000 was borrowed. Did they use it for their purposes as cotton merchants? Not at all. They immediately took stock in the American Cotton Cooperative Association, the parent company, the central company, and turned the money over to the A. C. C. A.

Let us see in what condition the 11 companies were. Some of the evidence is not clear, but most of it is very clear.

The Georgia Cooperative Association was being wound up in bankruptcy.

There was no evidence concerning the Louisiana Cotton Cooperative Association.

The Mid-South Cotton Cooperative Association, located in my own city of Memphis, explained that they were better off than the others. They had $100,000 in cash, $100,000 in United States bonds, and $35,000 in a lot on Front Street. Two hundred and thirty-five thousand dollars was the sum total of their assets. Yet the Government loaned that concern $800,000.

Mr. LEWIS. Mr. President——

The PRESIDING OFFICER (Mr. NEELY in the chair). Does the Senator from Tennessee yield to the Senator from Illinois?

Mr. McKELLAR. I yield.

Mr. LEWIS. At this point I ask the able Senator from Tennessee whether he can give the Senate the names of the officials of the Government, and the offices they held, who loaned the money of the people to these bankrupt establishments.

Mr. McKELLAR. I am unable to answer that question. I have not yet found out who it is. They all say it is done in the Department of Agriculture. I know the Secretary has never known of it, and probably he has never heard of it except through a letter which I wrote him, and I shall come to that in a little while and explain it.

Mr. LEWIS. Someone must have represented the Government to have such privilege of taking money out of the Treasury. I should like to learn who he was.

Mr. McKELLAR. Take the case of the Mississippi Cooperative Cotton Association: Its assets were not disclosed. I shall have something to say about that in a moment.

I come now to the Oklahoma Cotton Growers' Association. I am glad the Senator from Oklahoma is present. That concern has been wound up in bankruptcy, and do Senators know how much the Government lost by it? The Government lost between $700,000 and $800,000. I believe the association turned over all its property to the A. C. C. A. for the cancelation of its debt. The A. C. C. A. canceled the debt to the Government—its debt of $700,000 or $800,000—for a very small amount. Then immediately that bankrupt concern borrowed one-half million dollars. It borrowed that amount without any security except stock in the A. C. C. A., which is admittedly insolvent if the Government withdraws its support and subsidies from it. Mr. Creekmore testified—he is the $25,000 manager of the concern—that, without Government aid, without Government subsidy, they would have to fold up and quit business. Yet all the Government has for the $5,000,000 loaned to the several associations is additional stock issued in that concern, the A. C. C. A., the actual captal of which was $36,350.

The South Carolina Association, of which the Senator from South Carolina spoke a while ago, wound up in bankruptcy; and one of the causes was, I suppose, that it did not get $800,000. It got only $200,000, according to the record.

The assets of the South Texas Cotton Cooperative Association were not disclosed. Neither were those of the Texas Cotton Cooperative Association. However, the West Texas Cotton Growers' Association, the largest one of them, without a cent of assets, as testified to by one of its officials, borrowed $500,000, and immediately, having no assets of any kind, turned it over to the parent company and took stock of the parent company and put it up as security.

Mr. President, although $5,000,000 was borrowed from the Government, if I were in business today I would not give the Government of the United States $5,000 for its claim on the bankrupt concerns which borrowed that enormous sum. I would not give $5,000 for the claim of $5,000,000.

Let us see what else occurred. The Government began subsidizing these so-called cooperatives—they are not cooperatives—and it lost the first year $79,000,000 plus; and in the next 2 years, or less than 2 years, the Government had lost enough to bring the entire loss up to $140,000,000.

By the way, that brings me to the joint resolution proposed by my distinguished friend the Senator from North Dakota [Mr. FRAZIER].

Mr. LEWIS. Mr. President, what year was that?

Mr. McKELLAR. These losses began in 1929. The Government lost about $80,000,000 in 1929. If the Senate desires to know how it lost that amount I shall be very happy to tell about that. In doing so, I think I had better refer again to the joint resolution of the Senator from North Dakota.

Mr. NORRIS. Mr. President, when were the loans made?

Mr. McKELLAR. Does the Senator mean the $5,000,000 loan?

Mr. NORRIS. Yes.

Mr. McKELLAR. Last year.

Let me go back a little. In 1929 the cooperatives received their first subsidy from the Government—from the Farm Board—and they began to gamble and lost $80,000,000. After that sum was lost, of course, they were insolvent, as they had only $36,350 of capital. The Government had to come to their rescue again, and it staked them the next year. That year their losses were not so big, happily—I think they were $27,000,000—while during the Farm Board's operation the losses ran up to $140,000,000 when the money came through the Farm Board.

A year or two ago the Senator from North Dakota introduced a joint resolution proposing that the accounts of all cooperatives, grain and cotton, be adjusted by the Farm Credit Administration. In the original joint resolution the Senator simply designated grain, as I recall. Later, he was asked by the cooperatives to put in cotton, and the measure came very near to passage. Several objections to it were raised from time to time by me. On several occasions it came very near becoming law. Finally it was passed the other day, with cotton out of it. I wish to tell Senators why I desired to have cotton eliminated from it.

The cooperatives claimed that the reason they lost the $80,000,000 was because the Government Farm Board forced them to take the course which was taken. Fortunately for me and fortunately for the Government, there is in existence a letter signed by C. O. Moser, the then president of the A. C. C. A., or American Cotton Cooperative Association; it was then called the American Cotton Growers' Association, and the name was afterward changed. Mr. Moser, on October 11, 1929, wrote to Hon. Carl Williams, Federal Farm Bureau, Washington, D. C., urging Mr. Williams to come to the rescue of the cotton cooperatives and the cotton growers; and here is what he recommended. I am going to read merely the portion of the letter which gives his recommendation:

The size of the crop—

That is, the 1929 crop—

The size of the crop is fairly definitely known; the condition of business and the approximate demand or absorbing power of the world is fairly well established. Market analysts are capable of predicting, with a fair degree of accuracy, the extreme limitations to which the price may go under the reasonable expectation of future conditions. It is, therefore, at a time like this that it is possible for us to advance nearer the market price than it would be earlier in the season, when the size of the crop is less a calculable thing than it is now. I believe—

This is written by the president of the cooperative—

I believe the cotton cooperatives, with the aid of the Farm Board, may with safety—and they should immediately—advance 16 cents a point, or $80 a bale, on unfixed cotton, basis ⅞-inch Middling; and that wide publicity to such advance should be given as being the joint program of the cotton cooperatives and the Farm Board and that the difference between 65 percent (already) advanced at the time of delivery and $80 a bale should be paid

to the members as soon as weight and grade of cotton is established.

After all these years, here come the same cooperatives who advised the Farm Board, and they put in a claim for about six and one-half million dollars which was lost, so they claim, because the Farm Board forced them to operate on the basis of an advance of $80 a bale.

The Board did not force them to conduct such an operation. The cotton cooperatives recommended it. As a matter of fact, the letter from which I just read is dated October 11, 1929. The writer asks that the plan go into effect on October 15. They did not have it arranged in time, and it went into effect on October 21, and the farmers lost untold millions, while the Government lost about $80,000,000 by reason of the acts of the cooperatives and the program recommended by them; and yet now they want to come back on the Government for six and a half million dollars more. If that investigation will not accomplish anything else, it certainly will prevent the Government from ever paying the cotton cooperatives another dime on that transaction. I do not know what the facts are in reference to grain, but I do know what they are with reference to cotton.

Mr. President, I have already talked about the seed-loan borrowers and how they were robbed. I have already given the facts about that transaction. I next come to one of the most unique ways of extracting money from the Government that I have ever heard of in my life. Take the cotton that the Government has now on hand, the 16-cent-loan cotton, the 90-percent-loan cotton, and the dollar-and-a-half-a-bale cotton. In each instance the money was loaned on cotton purely to help the cooperatives and to keep them out of bankruptcy. I wish to say that they have constantly pursued a course toward the Government that has resulted in developing one of the most deft ways of extracting money from the United States Treasury that I ever knew about in my experience.

They handle this cotton for the Government—and let me show how they got paid for it; every dollar coming out of the farmer in the end or out of the Government. It comes either out of the farmer or the taxpayer. The following sums have been paid to the American Cotton Cooperative Association by the Government on Government-controlled cotton for services and expenses. Listen to this: In 1930–31, $531,000. That is a pretty good dividend on a capital of $36,350. In 1931–32, $907,000—I am just using round figures. In 1932–33, $883,000; in 1933–34, $780,000; in 1934–35, $724,000. Thus a total of more than $3,000,000 has been paid out by the Government for services. That, however, was not sufficient; they thought the money ought to come in faster; and so this sort of scheme was adopted last year. They said that the warehouses in the South were not sufficient to hold all this cotton, and they wanted to reconcentrate the cotton. The Government undertook to reconcentrate the cotton down there and employed the A. C. C. A. to do it. Others were willing to do it much cheaper, but all bids were turned down except that of the A. C. C. A. One compress man in west Tennessee offered to make all the changes in his district for nothing, but he was turned down. Let us see what the Government paid.

Let me call attention to it. It was estimated that it would be necessary to reconcentrate some 3,000,000 bales of cotton. Bids were put in to handle this cotton by the A. C. C. A., by John M. Parker & Co., and others. Mr. Parker testified that his firm put in a bid to reconcentrate this cotton at 40 cents a bale flat. The A. C. C. A. put in a bid of this kind: For the first 500,000 bales, 48 cents; for the second 500,000 bales, 45 cents; for the third 500,000 bales, 40 cents, and any additional bales at 35 cents.

How much did they reconcentrate? Just 3,000,000 bales that brought 40 cents and over. They did not reconcentrate any 35-cents-a-bale cotton. They made $665,000 out of that transaction, when it was absolutely useless and represented merely another tax on the farmer. That is all it was; nothing more or nothing less. It just took that much out of the farmer's cotton.

Now let us see how they did it. They first said that they would have to sample the cotton. The cotton had been sampled when first put in the warehouse, but it had to be sampled the second time. How much did it cost the farmer to sample his cotton? They take out about 2 pounds from each bale and sample it. Each sample is worth from 20 to 22 cents. The sample costs the farmer from 20 to 22 cents a bale. It was sampled the first time. Calculation can easily be made what that cost. But it was sampled the second time. What did they do with the samples? They threw them away. I pressed them on that point and the result can be imagined. When they were pressed about it they said that they had paid the $90,000 that came in from the sale of the samples on their debt here in Washington, and I understand they did. They paid it on their debt, not on the farmers' debts. They never accounted to the farmer for it, but paid it on their debt. Was there any use in reconcentrating that cotton? Nearly every cotton man in the South protested against the reconcentration of that cotton. Let me show how it works.

Let us suppose I am a colored farmer near Corinth, which is a railroad point. I put my cotton with the Government under the 16-cent loan provision. I think I have something coming back to me. That cotton has been there ever since. They took that cotton and sent it to New Orleans. I did not know anything about it. I do not know where it is. Nobody can tell where it is. It has got to be found again, and there is much of it that will never be found. Suppose, however, it is found, and I sell it in Boston, Mass. I have got to pay the freight on that cotton to New Orleans and pay the freight back to Corinth, Miss., and on to New York. I lose the freight from Corinth, Miss., to New Orleans and back on that cotton. That is taken out of the cotton; that is taken out of the farmer, even if he gets the cotton. It was wholly useless. There was only one purpose, according to the testimony as I read it, and that was to give to the American Cooperative Cotton Association an additional six or seven hundred thousand dollars to help them along by that kind of work.

Yesterday when I spoke of this matter my good friend from Arkansas, our distinguished leader [Mr. ROBINSON], asked me if there was not some difference of opinion about the facts. There is. The Senator from Alabama [Mr. BANKHEAD] was unable, because of other duties, to attend the hearings, except on one day, and he signed a dissenting report as to some of the views. I, myself, made the report from which I have just been reading, but I have another report to which I am going to refer in a moment. The report that was filed in the Senate I submitted. After I had made the examination, something else was done by the Department here, and I am going to give a brief digest of what the Department reports, upholding in every sense the facts as found by me after listening to probably scores of witnesses.

In August 1935, when the McKellar hearing was being arranged, Mr. Creekmore requested the Farm Credit Administration to make a survey of certain phases of set-up and operations of the A. C. C. A. and its affiliates—

"Its affiliates", half of which are in bankruptcy today—

* * *. As a result of Mr. Hermann's studies, Report No. 40—

Which is a preliminary report—

has been issued.

That report includes the following:

1. The classers at interior points accept cotton from any farmer without inquiry as to membership in the cotton cooperative association, with the result that the cotton cooperatives function largely as cotton buyers in every sense of the word.

That is exactly what I found, except that I made it just a little stronger. I think this report makes it very much stronger in other places than I made it, but in this place mine was a little stronger. What are the facts which I developed in the hearings? That not a single meeting of any cooperative had been held outside of three or four in the State of Mississippi. In my State there is not an organized cooperative in any county in the State. I am referring, of course, to cotton cooperatives. In the State of Arkansas

there is not a cooperative association doing business as a cooperative.

Let me show, while I am on that point, how they do business. Before proceeding to that, however, let me first give the summing up. A cotton cooperative association is supposed to be an organization of cotton farmers formed for their mutual benefit by means of which the profits are divided or the losses are borne equally by the members. I find from the testimony that the profits are not divided equally or proportionately. Even assuming there have been profits, and this is a doubtful assumption because they have never had any profits, they would not be divided. They have not any profits now except paper profits. Mr. Creekmore, the president of this institution, testified that the A. C. C. A. would go into bankruptcy unless the Government continued to lend to it.

The losses are not made good by any of the so-called members. The so-called members do not invest any substantial amount of their own funds and never have done so. The so-called members have not the slightest control over the business. They take no risks. They do not sell collectively. The A. C. C. A. is not owned or controlled by the so-called members. It is owned and controlled by its officers.

It is claimed that their profits are divided. At one time they did distribute to certain of their affiliates 56 cents a bale, which was a very small amount, and I think it bankrupted the concern even to do that.

Mr. President, I said the Government report was exactly in accordance with my report. I quote from the report as submitted by the agents of the Government in the Department:

> Farmers are instructed to sign documents handed to them without any explanation as to what they are signing.
>
> Accepting delivery of cotton from nonmembers and/or nonproducers is always questionable.
>
> Question can be raised as to the justification of using Government financing if cotton cooperatives handle a large volume of deliveries of nonmember cotton, as has been done in the past.

They do not confine themselves to members' cotton. They handle any man's cotton. They buy cotton just like any other cotton buyer, the only difference being that this particular concern, made up of a few men, is subsidized by the Government and their losses paid and most of their expenses paid by having them handle Government cotton.

Racketeering of the very worst type is going on in the American Cotton Cooperative Association today by which not only has the Government been mulcted of hundreds of millions of dollars in the last 5 or 6 years but the farmers by excessive charges are being mulcted in the same way, all by means of the use of Government money. Only $36,000 was ever put into this concern from the very beginning, and today, according to the Senator from Texas [Mr. CONNALLY], they are handling over 1,500,000 bales of cotton.

I come next to the directors:

> Directors, who have turned in to the cooperative cotton which was raised by tenants, have retained for themselves all of the patronage dividends received from the cooperatives instead of returning to the tenant his proportionate share of such patronage dividends. It is assumed that at least the directors of cooperative associations should be cooperators to the fullest extent.

Why should not that be so? The cooperative association has a board. As a matter of fact, Mr. Creekmore runs the whole business. He is a very able man. He runs the whole cotton cooperative association. Who comprise the board of directors? Seven of them are the managing directors of his affiliates. It is one of the closest corporations of which I have ever heard. The directors interlock. Mr. Creekmore controls absolutely the whole thing. The only kind of a cooperative they have is the cooperation of the officers, because the members do not cooperate with each other in the slightest degree. They are not compelled to pay a cent and never have been. The Government bears the losses. There never have been any profits, so all they have is a selling company.

Listen to the findings of the report as to the farmer members:

> Farmer members of the cotton cooperatives have very little idea of the operations of their respective associations in the A. C. C. A. An attempt to obtain the reactions of the farmers toward the cooperatives had to be abandoned because it was so difficult to find farmers who even have the slightest idea about the operations of the cotton cooperatives.
>
> It was recommended by the majority of the directors of State and regional cooperatives that directors should not be salaried employees of the associations, and the report concurred in this recommendation. The following remark in that connection was made in the report: "This is a 'little racket' which has long existed in a number of associations."

Of course that is wrong. It is not only a little racket, but it is an enormous racket, carried on by this merchandising concern at the expense of the American cotton farmer and at the expense of the United States Government, the Government bearing all the losses which have been involved. They have already lost over $140,000,000, and yet it was proposed here a while ago that we should except the A. C. C. A. from the restrictions of the bill. I understand the Senator from South Carolina [Mr. SMITH] to have stated that he would not accept such an amendment, and I am glad to hear it.

Listen further to a reading of the report. This is the Government expert talking:

> The majority of the directors do not attend the annual membership meetings of their respective associations.

They do not have meetings. The local associations do not have them. The association in this case according to my best judgment is Mr. Creekmore.

I continue reading:

> Cotton cooperatives are afflicted with a volume complex, measuring their success in terms of volume rather than in terms of returns to the members. The expense and methods used in obtaining this volume are often unsound and questionable. It was the observation that the "cotton cooperatives have made a determined effort to get volume in order to maintain their staffs rather than to make their staffs fit the volume."
>
> Assets and reserves, which are the property of the membership as a whole, have been used in some instances to construct and operate facilities which are entirely local in character and which can benefit, at the best, only the favored few in that locality.

I digress long enough to say that when I was in the city of Memphis last week I saw a building under construction on Front Street, and was told that it is a building of the Mid-South Cotton Cooperative Association. The lot cost $35,000, and I understand the building is to be in proportion to that figure. They are erecting a great building—at the expense of whom? It is being done at the expense of the American cotton farmer and at the expense of the Federal Government.

I continue reading:

> The development of policies and control of the various cotton cooperatives, although vested theoretically in the membership, is actually in the control of the boards of directors of the various cooperative associations; and these boards, in some instances, have become self-perpetuating bodies.

It is a monopoly. It is not a cooperative association in the slightest degree.

> The cotton cooperatives, through failure to be able to accept delivery of members' cotton at all times through the year, assume the aspect of commercial firms obtaining cotton when the basis is cheap, rather than cooperatives attempting to offer the maximum of service and price to their members at all times.
>
> The A. C. C. A. has operated at a loss for 2 successive years.

During the past 2 years it has operated at a loss, coming back to the Government by these devious means, getting $5,000,000 through its insolvent subsidiaries, and having it turned over to the A. C. C. A.; and yet it is proposed that we except the A. C. C. A. from the proposed legislation. I wish to say to the Senator from South Carolina that I hope to Heaven he will not yield to an appeal from any uninformed person to accept such an amendment.

Mr. SMITH. But they are already exempted in the other part of the bill; not in my part.

Mr. McKELLAR. I am going to move to strike out the exemption, because this so-called association never ought to be permitted to obtain another dollar from the Government, in view of its record toward the farmer and toward the Government itself.

The A. C. C. A. has operated at a loss for 2 successive years, and it has paid only one cash dividend in the 6 years of its existence.

Do you know how much that was? Fifty-six cents. Some farmer got 56 cents at an expense to the American cotton farmer of countless millions of dollars and an expense to the American Government of $140,000,000 already lost.

In view of these facts, the report recommends that the officials of A. C. C. A. analyze every operation, every department, and the duties of every employee in order to cut expenses to a minimum.

An elimination of political activity by the cotton cooperatives will enable the officials to devote more of their time to the associations' affairs and obviate the excessive traveling and other expenses incurred in the past in this respect.

Profits and losses on all the cotton turned in to the A. C. C. A. by its affiliates should not be pooled among the various State or regional associations. Each association should stand on its own and stand the losses and take the profits, according to the results obtained through handling the exact volume it has delivered to A. C. C. A.

Senators, I wish to make some further quotations from the same Government agent:

In most instances he (the farmer) was told he had to sign at a certain place on the document which was handed to him, and no explanation was made as to what he was signing.

Mr. President, at this point I ask unanimous consent to insert in my remarks excerpts from the report of the Government agent.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

A SUMMARY OF REPORT NO. 40, COOPERATIVE DIVISION, FARM CREDIT ADMINISTRATION, WHICH IS A PRELIMINARY STUDY OF A. C. C. A. AND AFFILIATES

By memorandum dated August 9, 1935, Creekmore requested the Cooperative Division of F. C. A. to make a study of certain phases of set-up and operations of A. C. C. A. and its affiliated associations.

Preliminary Report No. 40 was issued April 1936, by Omer W. Hermann, principal agricultural economist. Work to date has been confined largely to study of some phases of membership contact and assembling problems of cotton cooperatives. Sixty-two board members of nine of the State and regional associations were contacted and interviewed. It is planned definitely to make a continuation of study to include every phase of operations of cooperatives from farmer to mill.

The following excerpts are a few of the constructive comments and suggestions made in the preliminary report:

"There are only two principal avenues which will lead them to success. * * * These are the establishment of a system of marketing which will (1) enable the association to sell its members' cotton at the highest possible price and (2) perform only essential and necessary marketing services in the most efficient and economical manner, at cost * * *.

"If a cooperative association is not operated for the mutual benefit of its members but is operated for the benefit of certain individuals, agencies, farmers, or members at the expense of others, the policies of such an association are out of line with the best cooperative procedure.

"After a classer was located at a point, he was left largely to his own devises, and just as long as the class on his cotton stood up and he did not lose money for the association, he received very little attention from the headquarters office. * * * The result was that they (the interior classers of the cooperatives) have turned out to be largely cotton buyers in almost every sense of the word. The tactics used by these men are almost identical to those used by cotton buyers. * * *

"Many classers felt it was their duty to buy cotton as cheaply as possible, and a number of them have boasted that they had bought a cheap list of cotton, forgetting that they are the representatives of the farmer and that cooperation is based upon equity and justice.

"Interior classers are generally not concerned with whether the farmer is a member of the association when he brings a sample into the classing office * * * no inquiry whatsoever was made as to the farmer's membership in the association.

"In most instances he (the farmer) was told he had to sign at a certain place on the document which was handed to him, and no explanation was made as to what he was signing.

"Accepting delivery of cotton from nonmembers or nonproducers is always questionable. This has been a common practice at various times in the past.

"Some question can be raised as to the justification of using Government financing if they (the cotton cooperatives) handle a large volume of deliveries of other than member-grown cotton, in spite of the fact that from a legal point of view, they may handle up to 50 percent of their cotton from members.

"Payment of patronage dividends to landlords and tenants in proportions other than their rental arrangement is not a sound cooperative principle, although from a practical point of view it offers many perplexing problems. * * * It is assumed that directors should be cooperators to the fullest extent but we found that they are often guilty of keeping all of the patronage dividends rather than passing them back to the tenants in proportion to the amount of cotton they produced.

"In connecion with our field study we prepared a questionnaire from which we attempted to obtain reactions of members toward the cotton cooperatives. This work was abandoned after a short time because it was so difficult to find farmers who had even the slightest idea about the operations of the cotton cooperatives.

"The study revealed that nearly one-half of the total (directors) interviewed did not attend a single membership meeting during the 1934–35 season.

"We do not believe that a director should be a field-service man or a salaried employee of an association. This is a little racket which has long existed in a number of associations.

"Unfortunately most of the State associations, as well as A. C. C. A., are afflicted with the volume complex. It appears that they often measure their success in terms of volume rather than in terms of returns to the member. The expense of acquiring this volume and the methods and practices used in obtaining it are often unsound and questionable. * * * In other words, it does seem to be more logical to begin with an idea of service, followed by volume instead of beginning with volume in mind, and doing anything, regardless of its soundness, to get that volume. * * * It has often appeared to us that the cotton cooperatives have made a determined effort to get volume in order to maintain their staffs, rather than make the staff fit the volume, which they could soundly and properly obtain by economical operation on a cooperative basis.

"We doubt the advisability of associations using their assets and reserves, which are the property of the membership as a whole, to construct and operate facilities which are entirely local in character and which can at best benefit only the farmers in a local community. (Refer to Senator's remarks about the $75,000 building of Mid-South in Memphis.)

"The control of the cotton cooperatives, according to the by-laws, is theoretically vested in the membership. Practically the membership has had very little to do with the development of policies and with the control of the various associations. It is true that the membership selects the board of directors of the State association; but, in some instances at least, these boards have become self-perpetuating bodies not fully in tune with the desires and wishes of their constituents. * * * An examination of the minutes of the boards of directors of State and regional associations will further substantiate that they have every function and practically no responsibility.

"It must be noted that the managers who are on the American Cotton Cooperative Association board are hired jointly by the State association and the A. C. C. A. and receive half of their salary from the A. C. C. A. Over four-fifths of the directors are not in favor of this policy.

"Staff members of agricultural colleges and extension divisions, as well as the agricultural press interviewed * * * generally felt that it (A. C. C. A.) was not a farmer-owned and farmer-controlled cooperative and that a hired employee could not in every instance be depended upon to act in the best interests of the cooperative marketing cotton.

"There seemed to be a feeling among a sizeable percentage of the directors that A. C. C. A. was not a farmer-owned and farmer-controlled association.

"If it is possible to obtain more satisfactory prices through channels other than the regular channels set up in the A. C. C. A., the directors believed, and we agree, that these channels should be used.

"We found considerable complaint in the field during the past several seasons due to the fact that the A. C. C. A. basis was in line only a few weeks during the season. The remainder of the time it was necessary for farmers to dispose of their cotton through other channels.

"There seemed to be a rather general feeling among directors that the associations in these territories (Middle South and Southeast) should have an opportunity to sell cotton through channels other than the routine delivery to A. C. C. A.

"If it is possible to obtain more satisfactory prices through channels other than the regular channels set up by A. C. C. A., the directors believed, and we agree, that these channels should be used.

"We found considerable complaint in the field during the past several seasons due to the fact that the A. C. C. A. was in line only a few weeks during the season. The remainder of the time it was necessary for farmers to dispose of their cotton through other channels.

"The fact that A. C. C. A. stated they were in and out of the market at various times gave it the aspect of a commercial firm rather than a cooperative association attempting to offer the maximum of service to its members at all times.

"Due to the fact that the A. C. C. A. has operated at a loss for two consecutive seasons and has paid a cash dividend only 1 year in the past 6, it is believed that the officials of that association

should analyze every operation, every department, and the duties of every employee in order to cut expenses to the minimum.

"Another large item of expense, both in time and money, is the political and public-relations activities of A. C. C. A. * * * A cutting down of political activity will release the time of officials for their regular duties and obviate the excessive travel and other expenses which have been incurred in the past.

"Two-thirds of the board members interviewed did not believe that profits and losses on cotton should be pooled among all State associations. * * * They indicated rather clearly that each association should stand on its own and be willing to stand the losses and take the profits. We are in agreement with this opinion.

"We believe that the State associations are justified in requesting that the cotton of each association be kept separately so far as profits and losses are concerned."

In August 1935, when the McKellar hearing was being arranged, Mr. Creekmore requested the Farm Credit Administration to make a survey of certain phases of set-up and operations of the A. C. C. A. and its affiliates. This survey was started by Mr. Omer W. Hermann, principal agricultural economist for the Farm Credit Administration. As a result of Mr. Hermann's studies, it is quite evident that Mr. Hermann believes in the theory of cooperative marketing, and it is equally evident that he does not believe that the cotton cooperatives are fulfilling truly cooperative functions for the cotton farmers.

Very briefly, the report made by Mr. Hermann makes the following indictments against the A. C. C. A. and its affiliated associations as constructive criticisms:

1. The classers at interior points accept cotton from any farmer without inquiry as to membership in the cotton cooperative association, with the result that the cotton cooperatives function largely as cotton buyers in every sense of the word.

2. Farmers are instructed to sign documents handed to them without any explanation as to what they are signing.

3. Accepting delivery of cotton from nonmembers and/or nonproducers is always questionable.

4. Question can be raised as to the justification of using Government financing if the cotton cooperatives handle a large volume of deliveries of nonmember cotton, as has been done in the past.

5. Directors, who have turned in to the cooperatives cotton which was raised by tenants, have retained for themselves all of the patronage dividends received from the cooperatives instead of returning to the tenant his proportionate share of such patronage dividends. It is assumed that at least directors of cooperative associations should be cooperators to the fullest extent.

6. Farmer members of the cotton cooperatives have very little idea of the operations of their respective associations or of the A. C. C. A. An attempt to obtain the reactions of the farmers toward the cooperatives had to be abandoned because it was so difficult to find farmers who had even the slightest idea about the operations of the cotton cooperatives.

7. It was recommended by the majority of the directors of State and regional cooperatives that directors should not be salaried employees of the associations, and the report concurred in this recommendation. The following remark in this connection was made in the report: "This is a little racket which has long existed in a number of associations."

8. The majority of the directors do not attend the annual membership meetings of their respective associations.

9. Cotton cooperatives are afflicted with a volume complex, measuring their success in terms of volume rather than in terms of returns to the members. The expense and methods used in obtaining this volume are often unsound and questionable. It was the observation that the "cotton cooperatives have made a determined effort to get volume in order to maintain their staffs rather than make the staffs fit the volume."

10. Assets and reserves, which are the property of the membership as a whole, have been used in some instances to construct and operate facilities which are entirely local in character and which can benefit, at the best, only the favored few in that locality.

11. The development of policies and control of the various cotton cooperatives, although vested theoretically in the membership, is actually in the control of the boards of directors of the various cooperative associations; and these boards, in some instances, have become self-perpetuating bodies.

12. The report advances the opinion that the A. C. C. A. and its affiliates are not farmer-owned and farmer-controlled, but that the control is vested in boards of directors who are also employees of the various State and regional organizations, as well as of A. C. C. A.

13. The cotton cooperatives, through failure to be able to accept delivery of members' cotton at all times throughout the year, assume the aspect of commercial firms obtaining cotton when the basis is cheap, rather than cooperatives attempting to offer the maximum of service and price to their members at all times.

14. The A. C. C. A. has operated at a loss for two successive years, and it has paid only one cash dividend in the 6 years of its existence. In view of these facts the report recommends that the officials of A. C. C. A. analyze every operation, every department, and the duties of every employee in order to cut expenses to a minimum.

15. An elimination of political activity by the cotton cooperatives will enable the officials to devote more of their time to the association's affairs and obviate the excessive traveling and other expenses incurred in the past in this respect.

16. Profits and losses on all the cotton turned in to the A. C. C. A. by its affiliates should not be pooled among the various State or regional associations. Each association should stand on its own and stand the losses and take the profits, according to the results obtained through handling the exact volume it has delivered to A. C. C. A.

Mr. McKELLAR. I wish next to tell the Senate how this association got their members.

A list of the members was requested by the committee, but the same was refused unless the committee would keep it confidential.

What use has an investigating committee for information if it has to keep it confidential?—

Although the committee called for a complete list, it was furnished with a list of only two associations—that of the Mid-South and the Mississippi Cotton Cooperative Associations. The list of the two associations was accepted, but has not been opened. However, there was much evidence concerning membership. That evidence is practically undisputed.

Through the fiction of the immediate fixation pool—

They do not buy cotton, so they say. If I am a cotton raiser, a farmer, and go to their agency in Memphis, and say to them that I wish to sell my cotton, and we agree on a price, say, of 10 cents a pound for the bale, the agent pays me the money for it, and I deliver to him the cotton; but he says that is not a purchase and sale. He says that is an "immediate fixation pool." Now let us see what an immediate fixation pool is.

A fixation pool is where there is a delay in paying for the cotton. An immediate fixation pool is where it is paid for right then and there. That will be news to a great many persons in the Senate and elsewhere in the country. If the Senator from Idaho [Mr. POPE] is a merchant, and I take a bale of cotton and sell it to him at a price, and deliver him the cotton, and he delivers me the money right then and there, that is not a purchase by him and a sale by me, but it is an immediate fixation pool. If he does not pay me in full for a little while, but pays me only a part of the price, that is just a fixation pool.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield.

Mr. HATCH. If the facts which the Senator has just outlined do not constitute a sale, I am curious to know what would constitute a sale.

Mr. McKELLAR. Of course, the Senator from New Mexico is exactly right. The facts I have stated do constitute a sale; and there are some further things that the Senator from Idaho, if he represented the cotton cooperatives, would do. He would say, "Here is a bill of sale of the cotton, and you must sign a statement that you are in my association"; and before paying me $50 for the cotton he would require me to sign a receipt saying that I was a member of the association. Then he would sell me a subscription to the association's newspaper and charge me a membership fee. I believe they have quit charging membership fees since this investigation, but before the investigation he would have charged me $5 for a membership fee and 50 cents for a subscription to a newspaper that is not worth the paper on which it is printed, merely exploiting the so-called cooperatives, which are not actually cooperatives; and in addition he would make all the other charges against me that any merchant would make. That is an immediate fixation pool. It does fix the farmer; there is not any doubt about that; and, in the language of the street, it fixes him good and plenty.

I continue to read from the report:

Through the fiction of the immediate fixation pool, which is in effect an outright purchase of cotton by the cotton cooperatives, they sign up as a member every individual who sells them a bale or more of cotton and the bulk of their deliveries are secured through this immediate fixation pool.

Many years before the organization of the A. C. C. A. it seems there were associations formed in various cotton localities of the United States. Since the A. C. C. A. came into existence there have been few members obtained except under what may be termed "substantial duress." Since the organization of the A. C. C. A. they have come to adopt the following methods in obtaining members: Whenever a bale or a number of bales of cotton were delivered to the cotton cooperatives, there was included in the bill of sale, and afterwards in the check by which the cotton was paid for, a statement to the effect that the seller or deliverer, by reason of his bill

of sale, and of his receipt of the money, became a member of the cooperative association.

That is the way they get their members. It is a plain case of duress. They are not actual members. They do not pretend to be members. I do not believe a man could be found in the great cotton county of Shelby who would say that he was an actual member of the cotton cooperatives or had ever attended one of their meetings.

Mr. POPE. Mr. President, will the Senator yield?

Mr. McKELLAR. Yes.

Mr. POPE. Do not these members have a right to vote, and to elect their officials, and to control the affairs of the organization, in the final analysis?

Mr. McKELLAR. Theoretically they do. Actually they do not. They do not vote, and they do not meet.

To put it in the language of one of the witnesses, after the purchase was made and everything completed except the delivery of the money, the seller would be informed by the cotton cooperatives' agent that he would be paid only by the statement in writing that he was a member, and if he dealt for others, that by the signing of the draft, he made his principals members of the cooperative association.

He has to sign the other persons' names in order to get the money. In order to get it, not only is he required to sign his own name to these receipts but, if he is acting for others, he has to sign their names.

A membership obtained in this way, in the opinion of the committee, is substantial coercion, and it is exceedingly doubtful if by any such proceeding membership in the organization could be legally or morally brought about.

Of course, we all know that it could not be.

In the absence of local organizations—

There are no local organizations anywhere except in a few counties in Mississippi. They seem to have had an old organization for many, many years in several of those counties, but nowhere else.

In the absence of local organizations where members met, and in the absence of any meeting for consideration of the cotton cooperatives' problems, it is perfectly apparent that such a membership is not real in any sense and doesn't make the seller of the cotton a member at all, although he states in his bill of sale or check that he becomes a member.

The fact is, however, that the undisputed evidence shows that with a few exceptions in certain counties in Mississippi and Greer County, Okla., and perhaps one or two more, there are no local organizations of cotton cooperatives anywhere, and even in Mississippi, judging from the testimony of the head of the A. C. C. A. in that State, whatever organizations there are were controlled by the same cotton cooperative association.

The proof shows that the actual membership of the organization is largely confined to those in the employ of the A. C. C. A. and its affiliates.

This so-called cooperative is simply a great selling corporation, selling the cotton not of its members but of anybody who has a bale of cotton to sell. It can sell it if the parties can agree upon the price, just as any other merchant can do.

A remarkable thing happened in this connection. These people wanted to get in under the provisions of the Frazier joint resolution, and what caused me to look into the matter was this:

The Senator from North Dakota [Mr. FRAZIER] is from a State which does not raise a lock of cotton. The Senator from North Dakota, who has just come into the Chamber, is, as we all know, one of the finest men in the world. There is not a more honest man anywhere. There is not a man anywhere who excels the Senator from North Dakota in the desire to do right; but when I found the Senator from North Dakota introducing a joint resolution about cotton, it aroused my suspicions.

Mr. FRAZIER. Mr. President, will the Senator yield?

Mr. McKELLAR. Yes.

Mr. FRAZIER. When I introduced the joint resolution, it dealt only with wheat.

Mr. McKELLAR. Yes; I remember that.

Mr. FRAZIER. But in the committee it was amended so as to include cotton, and I had no objection.

Mr. McKELLAR. Who put it in?

Mr. FRAZIER. I do not recall who it was.

Mr. McKELLAR. It was the cotton cooperatives.

Mr. FRAZIER. Its inclusion was requested by a Member from one of the cotton States.

Mr. McKELLAR. Yes; of course. I knew it must have been done in that way. It was desired to set aside an agreement that the cooperatives made with the Government in 1930 by which the Government took over all the losses, amounting to $80,000,000, of the cotton cooperatives, on the ground that the cooperatives had nothing in the world to do with advancing the $80 a bale on cotton. They lost their money because the Farm Board forced them to go into a transaction in which they did not believe. It was then that I produced the letter from the president of the concern, Mr. Moser, in which he set forth that it was absolutely necessary for the Government to act, and he urged the Government to act. He went further than that; he said he wanted it to be the joint action of the cotton cooperatives and the Farm Board.

Then a Senator from a corn- and wheat-producing State, instead of one from a cotton-producing State, introduced an amendment to tear up that agreement. When the cotton cooperatives found themselves in that position they appealed to the Farm Board, and the Farm Board, presided over by Mr. Legee at that time, gave up $80,000,000 to pay the losses the cotton cooperatives had sustained, and that settled the whole thing.

Nearly 6 years afterward they got the Senator from North Dakota [Mr. FRAZIER] to offer a very innocent looking amendment seeking to change that agreement, and allow them to make a claim against the Government for six and a half million dollars. That is what brought on the investigation. I dare say if it had not been for the investigation Congress would have given them the six million and a half.

Mr. POPE. Mr. President, was that a congressional investigation?

Mr. McKELLAR. It was a congressional investigation to this extent: The Committee on Appropriations, which would have had to recommend the payment of the amount, had me offer a resolution of investigation for them, which was adopted by the Senate, and the committee appointed under the resolution went to Memphis and made the examination.

I desire to call attention to the testimony. Mr. Creekmore brought Mr. Stone to the stand. There was a tobacco member of the Farm Board, Mr. Stone, of Kentucky; a manufacturing member of the Farm Board, Mr. Legge; and a cotton member, Mr. Carl Williams, of Oklahoma. The tobacco member was called on to testify. The cotton member was not called on, I do not know why, but perhaps for the same reason that this cotton cooperative association did not come to the Senator from Arkansas [Mr. ROBINSON] or my colleague, the junior Senator from Tennessee [Mr. BACHMAN], the Senator from Oklahoma [Mr. THOMAS], the Senator from South Carolina [Mr. SMITH], the Senator from Mississippi [Mr. BILBO], or any other Senator from a cotton State, but went to a Senator from away up in North Dakota, who did not know anything about the matter. The Senator from North Dakota has just stated that he did not know anything about cotton, and did not intend originally to include it. I am not criticizing the Senator from North Dakota, because I think he is a fine man, just as straight a man as I ever knew in my life. Being requested to offer the amendment, and thinking it was all right, he presented it, but finally took it out of the bill, and it is not in the law at the present time.

Mr. Stone was put on the stand to testify that he did not consider this a final settlement. He testified he did consider it a final settlement, and then afterward changed and said he was not so sure. Of course it was a final settlement, and there should not be any uprooting of that matter.

The most remarkable feature of the situation is the financial operations of this concern. It is doing millions of dollars of business, is able to get Congress to except it from the penalties imposed on ordinary persons, and does not have a genuine member except its own employees, one way or another. Yet it comes here, after all of its losses, and asks for relief. It absolutely failed twice, and the Govern-

ment had to pay it out twice, and Mr. Creekmore testified that the Government would have to pay it out again if we quit subsidizing it.

My judgment is that we have subsidized these gentlemen enough. I do not think we ought to give them another dollar. I think we will be wasting the Government's money if we do give them any more, because they gamble in cotton just as anyone else does. The greater part of the $80,000,000, practically all of it, was lost through gambling in cotton.

Is the Government going into the cotton-gambling business? I never gambled in cotton in my life, and I hope to heaven I never shall, but if I gambled with my own money, that would be all right. We have no right, however, to set up an association or corporation in this country and let them gamble with the people's money. Yet that is just what this cooperative association has done, according to the testimony, and I urge anyone who does not believe the statement to read the testimony. There are two volumes of it. If one will read it, he will come to the same conclusion arrived at by this representative of the Department of Agriculture who was sent to Memphis to examine into the facts. I ask Senators to examine the testimony.

Of all the schemes I have ever heard of to separate the farmer from his money this is the worst.

In the section of the country from which I come there are many colored people, and most of them—I dare say a large majority of them—are cotton raisers. Many years ago, when I was a boy, there used to be a saying among the Negroes themselves which ran something like this:

A nought's a nought,
A figger's a figger;
All for the white man
And none for the nigger.

This scheme, operating under the name of the American Cotton Cooperative Association, is infinitely worse than any individual wrongdoing toward the farmer and especially the colored farmers of the South. They take infinitely more from him. As I have already shown, they take nearly 20 percent of the poor man's hard-earned money and put it in their own pockets. They do not pay it to the Government; they do not give it to the farmers; they put it into their own pockets.

In closing, I cannot help returning for a few minutes to the seed-loan office which this Government established. I think we first appropriated something like fifty or sixty million dollars to set up a fund in the Department of Agriculture to be loaned to indigent farmers who could not finance themselves to make a crop in any other way. Consider the case of a poor white man or a poor colored man who had been raising cotton all his life and knew how to do nothing else. In the hard times which existed for 5 or 6 years previous to the present good times, the seed-loan fund was an actual Godsend to those poor people—to the poor cotton farmer, white as well as colored. They borrowed small sums. For instance, a colored man would make three bales of cotton, and he could borrow fifty or a hundred dollars, and would do so, from the Government agency established under that fund. He would work from sunup to sundown to raise the cotton with which to pay off the debt—and, by the way, those poor people paid off their debts to a very large extent. I think the Government lost only 1 or 2 percent and will eventually get that back. These poor people would probably have been on relief if it had not been for that fund.

The borrowers were instructed by their Government that when they got ready to pay off their loans they should take their cotton to the cooperatives. Let me take a three-bale crop as an example.

Let us take the case of a poor man who raises cotton. I know how hard it is to raise it. I know what work it requires. Let us take a three-bale crop. The farmer took it to the cooperative and sold it for $142.77. The cooperative took out $31.12, advanced, no doubt, for the ginning of the cotton, and took out $3.20 for the interest on the $31. Perhaps the poor man did not have the use of that money over 3 or 4 or 5 months. The cooperative, however, charged him $3.20 as interest for the use of the money, and then charged him $3.90 for insurance on the cotton, then charged him $13.65 for storage on the cotton, and then charged him $3.89, and could not tell what that charge was for. The cooperative accounts for it in this way: "Charges other than regular seasonal charges." I do not know what that was for. Perhaps it was to pay for automobile rides for the purchaser. I do not know. The farmer received no return for the money he paid for that item. The cooperative made a charge of $3.89, but could not tell for what purpose. Five dollars was charged for membership, which the man never wanted. Fifty cents was charged for a newspaper in which he had no interest, and which he did not want. Another charge of $1.20 was made as interest on heaven knows what. These charges make a total of $62.48 on cotton that brought $142. Can you beat it?

I said it was racketeering. It is racketeering against the poor and humble and the hard-pressed working farmers, white and colored; and I am not going to stand for it. I am here to protect those men against any such concern that will thus despoil them of the fruits of their hard labor. I know how hard it is to raise cotton, and I should be derelict in my duty if I did not stand here and ask the Senate not to subsidize a concern which thus treats the poor and the needy and the hard-working. Had we not formed the seed-loan office, those poor farmers now would all have been on relief. They have not had to go on relief, and they will not be on relief, because of what the Government has done in the way of seed loans. That is the best work the Government has done in the way of helping those poor farmers.

Mr. President, what I have said here today has been based upon facts produced by the sworn testimony of witnesses. I myself took that evidence. I have been taking evidence all my life. I think I know the value of evidence. There was practically no evidence on the other side. All the evidence, or practically all of it, came from the cooperatives themselves. The practices and transactions involved cannot be defended. No man under heaven can defend the transactions which have been related here today.

I have nothing against the cooperatives. The easiest course to take would be to say, "Oh, well, let them take it all. Let them take what the poor darkey has made. Let them take what the poor white farmer has made." That, however, is not right. This body ought not to permit such a thing. This body ought not to subsidize any concern which thus treats its so-called members. The cooperatives say these poor farmers are members. Heaven knows it is bad enough for the people who are ordinary nonmembers, but when they take 20 to 25 percent of the hard-earned money of the farmers for handling cotton alone it is going entirely too far; and I am here to say in all sincerity, as one honest man to other honest men, let us not be misled. There is no telling what may be contended; but the facts are as I have presented them to the Senate.

Mr. MURRAY. Mr. President——

The PRESIDING OFFICER (Mr. SCHWELLENBACH in the chair). Does the Senator from Tennessee yield to the Senator from Montana?

Mr. McKELLAR. I yield.

Mr. MURRAY. How are the cooperatives organized? Are they not made up of the producers of cotton in the South?

Mr. McKELLAR. No, Mr. President; they are made up of those who are engaged in buying and selling cotton.

Mr. MURRAY. Should not the remedy be applied by undertaking to reform the cotton cooperatives?

Mr. McKELLAR. To reform those who are operating under the guise of cooperatives! They are not cooperatives. They are cooperating with each other to despoil the farmer and the American Government; and when we find that the American farmer is being despoiled and the American Government is being robbed, I think we ought to put our foot down on it.

Mr. MURRAY. Why do the cotton producers permit such organizations to exist in the South?

Mr. McKELLAR. We have no control over them. The Federal Government back in 1922 first established these organizations as nonsubsidized cooperatives. It was not until after Mr. Hoover came into office, in the year 1929, when the Farm Board was established, that the Government began to give enormous subsidies to the cooperatives; and since that time they have not been molested. The Senator asks why They are permitted to continue to rob, and why the people in the South do not reform them, or why the organizations do not reform themselves. In my judgment it is the duty of the Congress not to subsidize the people who are despoiling the farmers of our part of the country.

Mr. MURRAY. I entirely agree with the Senator; but it seems to me the way to remedy the evil would be to repeal the laws under which those cooperatives are organized, and provide some method of organizing cooperatives that would really represent the interests of the cotton growers.

Mr. McKELLAR. Mr. Creekmore testified that whenever the Government withdrew its subsidies, they would go into bankruptcy.

Why should we go further? Why should we subsidize them? They are not doing the farmers any good. For handling their cotton they are charging the farmers three or four times as much, or certainly twice as much under any system of accounting for it, as the ordinary dealer in cotton would charge. Why in the world should we subsidize those who are taking from the farmer his hard-earned money? In my judgment there is no answer to that question.

Mr. MURRAY. I agree with the Senator.

Mr. McKELLAR. I hope the Senate will join the movement not to subsidize these cooperatives any longer.

Mr. SHEPPARD. Mr. President, no one in this Chamber has a higher regard for the Senator from Tennessee than I have. I am personally acquainted, however, with a number of the officials in the cooperatives in the State of Texas, and I have the highest confidence in them.

Mr. McKELLAR. Mr. President, would it discommode the Senator if I were to ask him a question?

Mr. SHEPPARD. Not at all.

Mr. McKELLAR. Does the Senator know of a single cooperative association in Texas which meets and considers its own problems in any way? When the Senator refers to officers, he refers to the officers who buy the cotton and who are running the cooperative associations.

Mr. SHEPPARD. I refer to the men who tell me they are the officers of these associations.

Mr. McKELLAR. Yes. What I wish to ask the Senator is whether he can say that he knows of a single cotton cooperative association in any county in Texas?

Mr. SHEPPARD. I know that I am told by these officials that they are in operation.

Mr. McKELLAR. I know the Senator knows the people of his State. He talks to them. He mingles with them. Did the Senator from Texas ever attend a cooperative association meeting in any county in his State?

Mr. SHEPPARD. I have never had the opportunity to do so.

Mr. McKELLAR. I am quite sure the Senator never has and never will, because they do not exist. There are no cooperative associations as cooperative associations are known. There exist only these officers and secretaries and employees of the association whom the Senator knows.

Mr. SHEPPARD. Mr. President, the fact that I have been unable to attend any meetings does not contradict at all the assertion I have made that those men whom I know to be officials of the associations are men in whom I have complete confidence, and on whose integrity, sincerity, and ability I feel that I can safely rely.

Mr. REYNOLDS. Mr. President, will the Senator yield?

Mr. SHEPPARD. I yield.

Mr. REYNOLDS. There is one matter about which I am desirous of making inquiry for my own information. We have cooperatives in my State of North Carolina, but I must confess that I do not know as much about them as I should like to know. I should like to make inquiry from the Senator from Texas or the Senator from Tennessee whether the producer of cotton is forced or required in any manner or form to deal with cooperative organizations?

Mr. SHEPPARD. Not at all. Membership is entirely voluntary.

Mr. REYNOLDS. So there is nothing in connection with the organization itself that forces the producers to deal with the cooperatives?

Mr. SHEPPARD. Not at all.

Mr. McKELLAR. Mr. President, as I have just explained, if the Senator from North Carolina represents a cooperative association of buyers—and that is what they are engaged in doing, namely, buying cotton—and I am not a member, and I go to him and sell him a bale of cotton for $50, he will give me a bill of sale and pay me the money, but before paying me the money he will say, "I want you to sign this statement showing that you are a member of the association." I say, "I do not want to be a member of it," but he says, "It does not mean anything; go ahead and sign it, anyway." If I have already agreed on the price of cotton and I want the money, the Senator knows, and everyone else knows, that the signing of the membership is not anything which makes any difference, but that is what is done; it is a species of duress; otherwise the seller cannot get the money.

Mr. REYNOLDS. It is a perfectly natural thing for a man who desires to make a sale of cotton to accept the proposition then and there by which he automatically becomes a member.

Mr. McKELLAR. If the Senator will read the record—of which there are many copies in my office, and I will be glad to send him one—he will find that he is mistaken about it and that the method they have of getting members is purely under duress.

Mr. SHEPPARD. Mr. President, I understand that the Senator from Alabama [Mr. BANKHEAD], who was a member of the investigating committee with the Senator from Tennessee, does not share the views or conclusions of the Senator from Tennessee, and that he filed minority views in which he differed from the conclusions of the Senator from Tennessee.

Mr. McKELLAR. The Senator from Alabama filed minority or dissenting views. He does not, however, disagree with the statement of facts, and cannot do so, because the Senator from Alabama attended the hearings just 1 day. As the Senator from Texas knows and as I know, the Senator from Alabama is one of the finest gentlemen in the world. He and I were classmates and I never had a more devoted friend and I do not think he has a more devoted friend than I am. The fact was, however, that he did not attend the hearings. I took the testimony and I know what I am talking about when I state the facts as I have stated them.

Of course, the officers and employees of the cooperatives have formed different conclusions, and the Senator from Alabama has joined in some of those conclusions, but I believe he never would have filed the minority views if he had either examined the record or heard the proof.

Mr. SHEPPARD. I suggest that there be placed in the RECORD at this point both the report of the Senator from Tennessee [Mr. McKELLAR] and the minority views of the Senator from Alabama [Mr. BANKHEAD]. I believe they have been published as parts of the same document.

The PRESIDING OFFICER. Without objection, it is so ordered.

The report (No. 1819) and the minority views (Rept. No. 1819, pt. 2) are as follows:

Senate Report No. 1819

Your subcommittee heretofore appointed under authority of S. Res. 185, which is as follows:

[S. Res. 185]

"*Resolved*, That the Committee on Appropriations, or any duly authorized subcommittee thereof, is authorized and directed to investigate the expenditures by the Federal Government for cotton cooperatives and their losses heretofore sustained. The committee shall report to the Senate, at the earliest practicable date, the result of its investigations, together with its recommendations.

"For the purpose of this resolution the committee, or any duly authorized subcommittee thereof, is authorized to hold hearings, to sit and act at such times and places during the sessions and recesses of the Senate in the Seventy-fourth Congress, to employ

clerical and other assistants, to require by subpena or otherwise the attendance of witnesses and the production of books, papers, and documents, to administer oaths, to take testimony, and to make such expenditures as it deems advisable. The cost of stenographic services to report hearings shall not be in excess of 25 cents per hundred words, and the expenses of the committee, which shall not exceed $1,500, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman."

Met in the city of Memphis, Tenn., on Monday, October 28, 1935, where it proceeded to take the testimony of some eighty-odd witnesses concerning the expenditures of the cotton cooperatives and the losses of such cooperatives and other matters allied, connected with, and pertaining to such cooperatives and their losses, and having considered the same, beg leave to report to the full committee as follows:

ORGANIZATION

The American Cotton Cooperative Association is a Delaware corporation and was incorporated January 11, 1930, with an authorized capital stock of $30,000,000, of which $76,950 was paid in, $40,600 of which was capital stock, this being afterward withdrawn and returned to the marketing associations, leaving an actual net capital of $36,350 (vol. II, exhibit 25). The capital was supposed to be paid in by the cotton cooperative marketing associations under the Capper-Volstead Act (vol. I, pp. 33–34 to p. 38).

Prior to that time the cooperative marketing associations had been established under a previous act of Congress. In the 1929–30 season, the A. C. C. A. handled no current cotton; it merely looked after cotton that the Government had previously acquired. The Federal Farm Board, with a $500,000,000 revolving fund created by Congress in the Agricultural Marketing Act, approved June 15, 1929, authorized the establishment of this cotton cooperative association (vol. I, p. 34).

Mr. Creekmore became associated with the American Cotton Cooperative Association in April or May 1930 (vol. I, p. 6). Previous to that time, the head of the cotton cooperatives was C. O. Moser, who acted prior thereto in a similar capacity to Mr. Creekmore (vol. I, p. 402). The plan of organization was that the several marketing associations, amounting to some 14 or 15 in number, or State or regional associations, or affiliates as they have sometimes been called, became stockholders in the A. C. C. A. (vol. I, p. 34). These marketing associations, like the Mid-South at Memphis, were rather loosely formed organizations, but each one under the practical control of its managing officer. In addition to that, the managing officer was usually a member of the board of directors of the American Cotton Cooperative Association. These other cooperative associations, some 15 in number, were all more or less insolvent when the Farm Board began making loans to them at nominal rates of interest (vol. I, pp. 303–305; vol. II, exhibit 26). The names of these several State or regional marketing associations are as follows: Alabama Cotton Cooperative Association; Brazos Valley Cotton Cooperative Association; California Cotton Cooperative Association, Ltd.; Georgia Cotton Cooperative Association; Louisiana Cotton Cooperative Association; Mid-South Cotton Growers Association (Memphis); Mississippi Cooperative Cotton Association; North Carolina Cotton Growers Cooperative Cotton Association; Oklahoma Cotton Growers Association; South Carolina Cotton Cooperative Association; South Texas Cotton Cooperative Association; Southwestern Irrigated Cotton Growers Association; Texas Cotton Cooperative Association; Texas Cotton Growers Association; West Texas Cotton Growers Association.

In exhibit G to Mr. Creekmore's deposition, the common stock of these several associations, owned by the several State or regional associations, was shown as $100 each or $1,500 in all, and this indicates, in the absence of proof, that all of the $76,950 had been returned, and in lieu thereof one share of common stock had been allotted to each constituent association; so, insofar as capital invested in the A. C. C. A. is concerned, it may have been $36,350, or it may have been $1,500, or it may have been none at all. It is true that afterward preferred stock was issued, but that will be considered later. Suffice it to say that this mammoth concern had no substantial capital paid in by those who controlled it, and only a nominal capital if any.

A. C. C. A. NOT A COTTON COOPERATIVE ASSOCIATION

The A. C. C. A. and its affiliates above named are not cotton cooperatives within the spirit and letter of the Capper-Volstead Act, or in any other sense cotton cooperatives, for the following reasons:

The commonly accepted definition of cotton cooperatives, as disclosed by the undisputed evidence, is that it is an organization of cotton farmers for the purpose of selling their cotton for better prices and at a lower handling cost, and of otherwise marketing their cotton to mutual advantage, in which organization, where there are profits all the members shall share in them, and where there are losses each member will be asssed for its or his respective share of the losses. This definition is in keeping with that stated by the National Cooperative Council, of which President Williamson, of the A. C. C. A., is a member.

"Business cooperatives are created by farmers as agencies through which they collectively sell their products or purchase their supplies. Such cooperatives, being owned and controlled by the members, should at all times have the wholehearted participation of those members in the risks, gains, and losses of the business operations. Therefore the members, in building such cooperatives, should invest therein substantial amounts of their own funds commensurate with the needs of the business (vol. I, p. 186)."

Now, under this definition and under the proof taken by your committee, it is perfectly clear that the American Cotton Cooperative Association is in no sense, except in name, a cotton cooperative association at all. This is apparent by applying the following facts to this definition:

1. The profits are not divided equally or proportionally, even assuming that there have been profits, and this is a doubtful assumption (Henry, vol. I, pp. 204–205; vol. II, exhibit 6).

2. The losses are not made good by the so-called members (Creekmore, vol. I, pp. 13, 47, 159, 282; Williamson, vol. I, p. 330).

3. The so-called members do not invest therein substantial amounts of their own funds and have never done so (membership fee only, Cannon, vol. I, p. 458; Smith, vol. I, p. 624; Stewart, vol. I, p. 336).

4. The so-called members have not the slightest control over the marketing of their cotton (Henry, vol. I, p. 228).

5. The so-called members take no risks. The only risk taken in the business at all is the risk taken by the Government (Henry, vol. I, p. 191).

6. They do not sell collectively (vol. II, exhibit 20; Henry, vol. I, p. 205; Creekmore, vol. I, p. 157).

7. The A. C. C. A. is not owned or controlled by its so-called members (Creekmore, vol. I, pp. 155–156).

8. It is owned and controlled by its officers (Creekmore, vol. I, pp. 155–156).

9. The members are not directly responsible for losses which the cotton cooperatives may incur as a result of operations (House, vol. I, p. 492; Creekmore, vol. I, p. 47).

10. Profits, if any, have not been distributed to the individual producer members except in one instance, and even then not to the members of all of the affiliated associations, during an existence of 5 years (Creekmore, vol. I, p. 26).

11. The methods of securing members are of doubtful legality and oftentimes of plain duress (Baker, vol. I, pp. 530–533; Waddell, vol. I, p. 537; Lattimer, vol. I, p. 552; Salvo, vol. I, p. 547).

12. Operating on Government money, which forms the basis of its credit, the A. C. C. A. makes loans to its affiliated associations, which have gone through an evolution as its officers claim (Hutchinson, vol. I, p. 374), whereby all cooperative features have been eliminated and the cotton cooperatives are simply operating as cotton merchants (Thompson, vol. I, p. 542; Valentine, vol. I, p. 478; Reed, vol. I, p. 483; Mitchell, vol. I, p. 544; Everett, vol. I, p. 479).

13. In dealing with its so-called members, the organization frequently resorts to what may be called duress in padding its so-called membership rolls (Creekmore, vol. I, p. 14).

14. The prices paid by the A. C. C. A. to its so-called members are not higher than those paid by private cotton merchants (Gibson, vol. I, p. 545).

15. The cost of handling is greater than when sold by private cotton merchants (Salvo, vol. I, p. 548; Henry, vol. I, p. 196).

16. The A. C. C. A. is not cooperative in fact, but is composed of a closely knit organization with an interlocking directorate largely composed of its affiliates, all of which makes it simply a cotton merchant, buying from substantially any seller at the cheapest price possible and charging the farmer a very high cost for handling his cotton (Creekmore, vol. I, pp. 155–156; Valentine, vol. I, p. 478).

17. It has no county or local organization which meets and passes on their problems, and, since the organization of the A. C. C. A., has not had (Everett, vol. I, p. 481).

18. It violates the Capper-Volstead Act in that it has bought more bales of "futures" than it has bought actual cotton, and "futures" were not bought from the so-called members (Creekmore, vol. I, pp. 107–109).

19. It violates the Capper-Volstead Act in that it has formed a closely knit corporation with its affiliates by which a minority of the members completely controls and dominates the other members of the association, and this is contrary to the first requirement that no member shall have more than one vote (Creekmore, vol. I, p. 155).

20. It is of no more value to the farmer than is Weil & Co., McFadden & Co., Anderson-Clayton & Co., or any other large cotton merchant (Reed, vol. I, p. 483; Sanders, vol. I, p. 486; Hermes, vol. I, p. 489).

21. Finally, in essence, it is simply the Government, acting through a few favored persons, engaging in the cotton business, competing with other private cotton merchants, sometimes putting such other merchants out of business and reducing many of them to penury and want, the Government taking continued, drastic, and almost inconceivable losses, due in many instances to gambling in cotton, without the slightest benefit to the farmer or to the Government, the only benefits going to the small coterie of officers and agents of the A. C. C. A. and its affiliates.

It is true that it was claimed that the so-called members were indirectly assessable for losses in that the American Cotton Cooperative Association and its subsidiaries had accumulated reserves which belonged to the farmer members, one-half of which was put in a reserve fund to be used to pay such losses if such reserve fund was sufficient. In the opinion of the committee, there were no reserves and are not now any reserves and have not been any at any time.

It was undisputed that the Government had saved these cotton cooperatives in 1929 at a cost of $79,286,384.13 and had saved them again in 1933 to the extent of $27,376,998.06, and Mr. Creekmore, the vice president and general manager, and the dominating official of that organization, testified that if the Government withdrew its

support now, all operations would practically cease. His exact testimony is as follows: "I don't see how the cooperatives could continue." Under these circumstances, the reserves can at best be called, in formal banking parlance, "window dressing."

The same is even more true of the affiliated associations.

It is quite clear that the American Cotton Cooperative Association and its affiliates are not cotton cooperates, but with the practically unlimited backing of the Federal Government constitute simply another great cotton buyer or merchant.

It may be said in closing this paragraph that the business and operation of the American Cotton Cooperative Association not only violates the definition of cotton cooperatives heretofore stated, but it is in no sense such a cooperative association as is provided for in the Capper-Volstead Act under which it was organized.

INTERLOCKING DIRECTORATES

Six of the managing directors of six of the State organizations are also directors of the American Cotton Cooperative Association. Half of the salaries of these six directors are paid by the central organization of the A. C. C. A. These are: C. C. Selden, California association; W. R. Squires, southwestern irrigated association; P. E. Harrill, Oklahoma association; A. D. Stewart, Mississippi association; J. A. Beatty, Alabama association; J. S. Hathcock, South Carolina association.

To these six must be added Mr. N. C. Williamson, of the Louisiana association, who receives no salary but a per diem of $25 is paid him, also Mr. Charles G. Henry, of the Mid-South association at Memphis, who does not draw a salary from the A. C. C. A., but who is one of the directors, and it is easy to see from his testimony and from Mr. Creekmore's testimony the close cooperation between them (vol. I, p. 155).

The other six directors seem to be beyond the pale and certainly have no potential vote, as they receive no salary either from the central association or their own organizations (vol. I, p. 156).

It thus appears that the American Cotton Cooperative Association constitutes, with its affiliates, a close corporation managed solely for the benefit of the central association and the officers and employees of the favored members of its directorate.

MEMBERSHIP

The officers of the cotton cooperatives claim that their membership in the United States in these 15 associations numbers 259,000.

A list of the members was requested by the committee, but the same was refused unless the committee would keep it confidential. Although the committee called for a complete list, it was furnished with a list of only two associations—that of the Mid-South and the Mississippi Cotton Cooperative Associations. The list of the two associations was accepted but has not been opened (Creekmore, vol. I, p. 172). However, there was much evidence concerning membership. That evidence is practically undisputed.

Through the fiction of the immediate fixation pool, which is in effect an outright purchase of cotton by the cotton cooperatives, they sign up as a member every individual who sells them a bale or more of cotton and the bulk of their deliveries are secured through this immediate fixation pool.

Many years before the organization of the A. C. C. A. it seems there were associations formed in various cotton localities of the United States. Since the A. C. C. A. came into existence, there have been few members obtained except under what may be termed substantial duress. Since the organization of the A. C. C. A., they have come to adopt the following methods in obtaining members: Whenever a bale or a number of bales of cotton were delivered to the cotton cooperatives, there was included in the bill of sale, and afterward in the check by which the cotton was paid for, a statement to the effect that the seller or deliverer, by reason of his bill of sale, and of his receipt of the money, became a member of the cooperative association (Baker, vol. I, pp. 530–531; Black, vol. I, p. 437).

To put it in the language of one of the witnesses, after the purchase was made and everything completed, except the delivery of the money, the seller would be informed by the cotton cooperatives' agent that he would be paid only by the statement in writing that he was a member, and if he dealt for others, that by the signing of the draft, he made his principals members of the cooperative association.

A membership obtained in this way, in the opinion of the committee, is substantial coercion, and it is exceedingly doubtful if by any such proceeding membership in the organization could be legally or morally brought about. In the absence of local organizations where members met, and in the absence of any meeting for consideration of the cotton cooperatives' problems, it is perfectly apparent that such a membership is not real in any sense and doesn't make the seller of the cotton a member at all, although he states in his bill of sale or check that he becomes a member.

The fact is, however, that the undisputed evidence shows that with a few exceptions in certain counties in Mississippi and Greer County, Okla., and perhaps one or two more, there are no local organizations of cotton cooperatives anywhere, and even in Mississippi, judging from the testimony of the head of the A. C. C. A. in that State, whatever organizations there are were controlled by the same cotton cooperative association (Windle, vol. I, p. 367; Orr, vol. I, p. 592; Garner, vol. I, p. 604).

The proof shows that the actual membership of the organization is largely confined to those in the employ of the A. C. C. A. and its affiliates. While the membership was challenged time and again, the cotton cooperatives made no effort to show an actual membership except in the way above stated, and while the record is not at all clear, your subcommittee believes that the actual membership in the association amounts to only a few interested people.

FINANCIAL STRUCTURE

The original financial structure of the American Cotton Cooperative Association is exceedingly interesting. The evidence of the cotton cooperatives was that $30,000,000 was the authorized capital, of which $800,000 was subscribed, and of this amount only $79,950 was actually paid in, as stated. Of the $76,950 paid in cash, the A. C. C. A refunded in cash payments of the Oklahoma and other of the affiliated associations in the aggregate sum of $40,600, so the actual paid-in capital was $36,350; however, the revolving fund of $500,000,000 had been set up by the Hoover administration to be loaned the farmers, and it seems that a capital of $36,350 was ample to get a Government loan.

When the A. C. C. A. was organized and put under the direction of Mr. Creekmore, all of the cooperatives were in financial straits, and the most of them were in actual bankruptcy, as testified to by Mr. Legge, the then chairman of the Farm Board, in January of 1931.

The first operation of the A. C. C. A. after its organization in 1930 was the Cotton Stabilization Corporation. By this operation 1,300,000 bales, in round numbers, of cotton owned by the A. C. C. A. and its affiliates were sold to the Cotton Stabilization Corporation, and that corporation agreed to hold the cotton at its original cost, plus charges, for the purpose of holding it off the market and to keep the various cotton cooperatives out of bankruptcy (Creekmore, vol. I, p. 34).

This Stabilization Corporation was a Delaware corporation, but its officers, agents, and offices were the same officers, agents, and offices as those of the American Cotton Cooperative Association. This was a matter of bookkeeping and of high finance, and in a short time about $80,000,000 was lost (Creekmore, vol. I, pp. 34–36).

Your committee will now consider these several losing operations of the American Cotton Cooperative Association.

THE STABILIZATION CORPORATION AND THE 16-CENT LOAN

The first major operation with regard to cotton after the Agricultural Marketing Act was passed on May 15, 1929, was the formation of the Stabilization Corporation and the 16-cent loan, taken together.

The Stabilization Corporation was organized in May of 1930, with an authorized capital stock of $15,000,000, all of which was advanced from the revolving fund of the Farm Board (Creekmore, vol. I, p. 35). The first major operation with regard to cotton was announced by the Federal Farm Board on October 21, 1929. Exactly 10 days before this announcement, Mr. C. O. Moser, the then president and general manager of the American Cotton Growers Exchange (the central cotton-cooperative organization which preceded the American Cotton Cooperative Association), wrote a long letter to Mr. Carl Williams, cotton member of the Federal Farm Board, in which Mr. Moser urged the adoption of 16-cent loan as the "joint policy of the cotton cooperatives and the Farm Board."

The price of cotton steadily declined, and by the early spring of 1930 the cotton cooperatives were again confronted with bankruptcy. The losses, according to Mr. Creekmore's estimate, of the A. C. C. A. in its Stabilization Corporation and 16-cent loan amounted to the enormous sum of $79,286,384.13. The Stabilization Corporation not only had this 1,300,000 bales of actual cotton, but it also had a large number of bales of "futures" which had been acquired from time to time.

THE DOLLAR-AND-A-HALF PER BALE LOANS

Although the Stabilization Corporation took over the 16-cent loan cotton at the amount of the loan plus carrying charges, it was discovered that liens of private banks and balances due farmer members had to be paid before the Government could acquire title to the cotton. In order to do this the Stabilization Corporation assumed $2,462,351.81 as an added cost of the cotton and the Farm Board loaned the cotton cooperatives $1.50 per bale, in the aggregate sum of $1,704,047.46.

Incidentally, the funds loaned under the $1.50 per bale plan were lost by the Government in making compromise settlements of indebtedness with the Oklahoma, South Carolina, and Alabama cooperatives. Thus for the second time within a few weeks the Government produced funds to save the cotton cooperatives from bankruptcy.

THE 90-PERCENT ADVANCE

Despite the efforts of the cotton cooperatives and the Farm Board, the price of cotton continued to decline; whereupon in August 1930 the cotton cooperatives and the Farm Board entered into an agreement whereby the members of the cotton cooperatives would be advanced 90 percent of the market price of cotton at the time of delivery (Creekmore, vol. I, p. 37). Although Mr. Creekmore testified at the agricultural conference and Farm Board inquiry in 1931 that he entered into the plan with a full realization of its hazards, he stated that he was optimistic as to its ultimate outcome (Creekmore, agricultural conference and Farm Board inquiry, p. 310).

The facts are that the operation again rendered the cotton cooperatives bankrupt, and in order to rescue them the Government in 1933 had to assume another loss, which Mr. Creekmore testified amounted to $27,376,998.06 (Creekmore, vol. I, p. 37). According to Mr. Creekmore, he estimates that the losses on the two transac-

tions (the 16-cent loan of 1929–30 and the 90-percent advance of 1930–31) aggregated $107,113,441.54 (Creekmore, vol. 1, p. 37). However, Mr. Creekmore's estimate is based on his exception to the statutory allowances made for the cotton donated to the Red Cross. The actual loss sustained by the Government on the two transactions has been approximately $140,000,000.

THE FRAZIER BILL

Senate Joint Resolution 38, introduced by Senator LYNN FRAZIER, of North Dakota, proposes a reopening of the settlements made by the Farm Board with the wheat and cotton cooperatives on the theory that the various stabilization operations were done on the authority of the Farm Board, which made the cooperatives, both wheat and cotton, its unwilling agents in carrying out these operations.

As far as the cotton cooperatives are concerned, such an argument is not sound, because the 16-cent loan was made at the earnest solicitation of and on the basis suggested by the cotton cooperatives; and by Mr. Creekmore's own admission he entered into the 90-percent loan with a full realization of its hazards but with the hope it would work out eventually.

Now, it must be remembered that Mr. C. O. Moser was the predecessor of Mr. Creekmore, he being president of the American Cotton Growers Exchange. The evidence discloses an announcement by the Farm Board on October 21, 1929, as follows:

"The Federal Farm Board believes that the prevailing prices for cotton are too low * * *. The Board will make supplemental loans to the cooperatives in amounts sufficient to make the average loan total 16 cents per pound."

Just 10 days prior to this announcement Mr. C. O. Moser, president of the American Cotton Growers Exchange (which was the predecessor of the A. C. C. A.), wrote a long letter to Mr. Carl Williams, the cotton member of the Federal Farm Board, setting out the conditions as he saw them in reference to cotton, and strongly urging the Farm Board order just set out above.

Among other things, Mr. Moser said:

"* * * It is therefore at a time like this that it is possible for us to advance nearer the market price than it would have been earlier in the season, when the size of the crop is less a calculable thing than it is now. I believe the cotton cooperatives, with the aid of the Farm Board, may, with safety, and they should immediately, advance 16 cents a pound, or $80 a bale, on unfixed cotton, basis ⅞-inch Middling; and that wide publicity to such advance should be given as being the joint program of the cotton cooperatives and the Farm Board, and that the difference between 65 percent advanced at the time of delivery and the $80 a bale should be paid as soon as weight and grade of the cotton is established (Creekmore, vol. I, p. 34; Williams, vol. I, p. 399 through to 402)."

The evidence discloses that the cotton cooperatives and the Federal Farm Board were consulting daily just prior to the issuance of the Farm Board order, and no person who was then connected with either the Farm Board or the cotton cooperatives has testified to the contrary.

Mr. Stone, the tobacco member of the Farm Board, who was put on the stand by the cotton cooperatives, testified that there were daily conferences. It is apparent from the evidence that this order of the Board, if not directly secured by the cotton cooperatives, was issued with the full knowledge, consent, and approval of the cotton cooperatives, and issued at the earnest solicitation of the cotton cooperatives (Stone, vol. I, p. 570). Copy of this Moser letter was sent to all members of the regional or State cotton cooperatives (Creekmore, vol. I, p. 522).

Shortly after this operation began the price of cotton began to go down. Within 6 months it had dropped from 18.23 cents per pound to 12.41 cents per pound and continued to drop. The cotton cooperatives' loss on this cotton was something like $79,000,000 on the 16-cent loan (Creekmore, vol. I, p. 35).

In view of the Moser letter, relating to the 16-cent loan, and Mr. Creekmore's statements at the agricultural conference and Farm Board inquiry, and his letter to Mr. Carl Williams, under date of November 16, 1932, with regard to the 90-percent loan, the Frazier bill must fail as far as cotton cooperatives are concerned.

It will thus be seen that every attempt of the cotton cooperatives backed by the Farm Board to benefit the farmers by increasing their prices in these various ways was a failure; however, each one, it was developed, was advertised to the whole country as a panacea for the low price of cotton, with the result that not only were the cotton cooperatives, then controlling about 15 percent of the cotton, rendered bankrupt, but the mills and the dealers and the farmers were all affected in the same way and their losses were tremendous.

These outside farmers and outside dealers and mills handled 85 percent of the cotton, and of course 85 percent of the loss fell on them, and neither the old Farm Board nor the cotton cooperatives was of any value or aid in the stabilization of the price of cotton, notwithstanding the enormous sums of money that were used in the various operations.

A year or two ago a bill was introduced by Senator FRAZIER, of North Dakota, which provided that the settlement of the Farm Board with wheat cooperatives be reopened for the purpose of giving the wheat farmers an opportunity of showing that their cooperative losses were the result of the action of the Farm Board and not of the cooperatives.

Later on another bill was introduced in which cotton was added, and that bill has been pending in Congress for some time. The bill provided as follows:

"[S. J. Res. 38, Apr. 15, 1935]

"Joint resolution for the adjustment and settlement of losses sustained by the cooperative marketing associations

"*Resolved, etc.*, That for the purpose of adjustment and settlement of losses sustained by the cooperative marketing associations dealing in grain during the stabilization operations of the Federal Farm Board in the years 1929 and 1930 when such cooperative marketing associations were induced and requested by the Federal Farm Board to withhold grain and/or cotton from the market and to make advances to their members in order to stabilize prices, the Federal Farm Credit Administration is hereby authorized and directed to make such adjustments and settlements in accordance with the understanding that such cooperative marketing associations had with the Federal Farm Board, and on the basis of a price or a sum equal to the amount directly loaned or advanced to such associations plus carrying charges and operation costs in connection with such grain and/or cotton from the date of the loans or advances to the date that such grain and/or cotton was finally taken over by the Federal Farm Board or delivered pursuant to its instructions."

This bill has delayed in the Senate from time to time.

It is perfectly apparent from the facts brought out in the investigation that the cotton cooperatives, through Mr. Moser, the predecessor of Mr. Creekmore, recommended this loan and urged the Farm Board to adopt it, and after they had urged such adoption, they cannot now be heard to say that further losses by them should be paid by the Farm Board or by the Government.

It was also developed in the hearings that this claim for a reopening of the settlements heretofore made by the Farm Board with the cotton cooperatives was first made by Mr. Creekmore on the 16th day of November 1932 when he wrote Mr. Carl Williams, cotton member of the Farm Board, making the claim that the cotton cooperatives were entitled to certain losses which they sustained on the 16-cent cotton (Stone, vol. I, p. 573.)

It is perfectly apparent, therefore, that Mr. Moser, the predecessor of Mr. Creekmore, acting for the cotton cooperatives, having in like manner recommended the settlement between the Government and the cotton cooperatives on the 16-cent loan, the cotton cooperatives are now bound by the action taken by Mr. Moser as set out in his letter. The letter of Mr. Moser was sent to all of the cotton cooperatives (Creekmore, vol. I, p. 522).

Besides, in the memorandum put in the record by Mr. Creekmore, he states:

"After many conferences regarding a settlement, a compromise agreement was reached in May 1930 by a representative of the cooperatives with the Chairman of the Farm Board, in the presence of the Vice Chairman, the cotton member, and the general counsel of the Board; whereby the cooperatives were to be reimbursed by a stabilization corporation, to be later organized, on the basis of the loan value on all cotton on hand, plus carrying charges, plus $1 per bale overhead on deliveries received during the 1929 season (Stone, vol. I, p. 578)."

This agreement was disapproved by the Attorney General and later on a settlement was made as follows:

"The general basis of settlement, as finally worked out by the Farm Board, resulted in the Cotton Stabilization Corporation taking over the cooperatives' cotton on the basis of the loan value, with an allowance of not to exceed $2.50 per bale for carrying charges, payable only to the extent necessary to meet the obligations of the cooperatives after borrowing from the Farm Board $1.50 per bale listed on prior seasons' deliveries. This loan was to be repaid by deductions of 50 cents per bale from the members' proceeds on deliveries in future years (Stone, vol. I, p. 578)."

UNDER THE NEW ADMINISTRATION

The foregoing is a history of the operations of the cotton cooperatives with the Farm Board up until March 4, 1933. The Congress meeting that year repealed the Farm Board Act and passed what is known as the Agricultural Adjustment Act, which set up the Farm Credit Administration in place of the Farm Board. At that time the cotton cooperatives owed the Government $207,418,246.48. (See McNary report, p. 35.)

At that time cotton was worth somewhere around 5 or 6 cents a pound, and the Farm Board, which had had appropriations to be used as a revolving fund of $500,000,000, and the A. C. C. A. had been financed by the Farm Board, were all in a state of bankruptcy and their debts had to be assumed by the Government, amounting to $27,376,998.06 as outlined in the 90-percent loan loss. Also the State associations benefited under the terms of the A. A. A. adjustment by additional payments authorized by Congress in connection with the settlement of the 1930–31 operations. Seven hundred and thirty-two thousand four hundred and fifty-six dollars and eighty-seven cents were paid in this adjustment (S. Rept. No. 1456, p. 22).

In other words, the new administration of Mr. Roosevelt started off by wiping the slate clean and taking over all the cotton into what was known as the Oscar Johnson pool. Thus the cotton cooperatives were again saved from bankruptcy, and the Government, through Mr. Johnson, took over about 1,300,000 bales of actual cotton and approximately another million bales of futures which the A. C. C. A. had gathered in during the years of their speculation.

AGRICULTURAL ADJUSTMENT ADMINISTRATION

The Government continued to loan money to the cotton cooperatives, but under the provisions of the A. A. A., acreage was

reduced through voluntary action, and Government rentals on land not cultivated in cotton were established.

Then the Bankhead Act was passed to regulate the number of bales produced.

Also the processing tax was put on to pay the cotton farmer for the rentals on land not used in producing cotton.

The above three enactments, passed in 1933, did what the Farm Board and the cotton cooperatives had tried in vain to accomplish since July 1929; namely, the price of cotton began to rise and the general trend has been upward ever since.

In March 1933 cotton was selling at between 5 and 6 cents a pound. By July 1933 cotton had risen to 9¼ cents. By September 1933 it was 10 cents. By January 1934 it was 11½ cents, and by March 1934 it was 12½ cents. In July 1934 it was 13.15 cents.

In the fall of 1933, under the Agricultural Adjustment Act, Secretary Wallace announced a Government loan of 10 cents a pound on cotton, and this operated throughout the year 1933–34.

In August 1934 that loan was increased to 12 cents. The 10-cent loan did not seem to interfere with the movement of cotton. Indeed, it was under that loan that the price went from 10 to 13 cents, and it was thought that if the Government made a loan of 12 cents it would still further increase the price, but it did not have that effect and cotton went down some in 1934 and 1935, and in the summer of 1935 the loan offered by the Government was reduced again to 10 cents. Cotton is now selling at figures ranging from 11½ cents to 12½ cents.

This is the history of what has been done under the Agricultural Adjustment Act.

THE A. C. C. A. UNDER THE A. A. A.

Under the Agricultural Adjustment Act the A. C. C. A. has continued to borrow money from the Government; however, it and its affiliates have from time to time discarded practically all of their cooperative features until now, through their central organization, the cotton cooperatives have become one of the largest cotton dealers in the country.

It will be remembered that Mr. Creekmore testified that the cotton cooperatives and affiliates would have failed in 1929 and 1930 and that they would have been bankrupt if the Government had not assumed their debts. He testified that again in 1933 the A. C. C. A. and its affiliates were bankrupt and would have gone into bankruptcy if the Government had not assumed their debts (Creekmore, vol. I, p. 16).

He also testified that at the present time without Government subsidies and bounties they could not continue to operate (Creekmore, vol. I, pp. 120–121).

THE A. C. C. A. UNDER THE ROOSEVELT ADMINISTRATION

The cotton cooperatives, under the present administration, have undergone what one witness described as an "evolution." No longer do they advance money to their producer members on his cotton which is pooled with other cotton of like description and character. By means of the immediate fixation pool, the cotton cooperatives buy cotton just as any other merchant does, and the immediate fixation pool is simply a fiction whereby they can make outright purchases.

Under the present administration the A. C. C. A. has made or claims to have made approximately $2,500,000 from the handling of cotton owned or controlled by the Government, but during the same period it has lost about $1,500,000 on its operations for its own account.

INTEREST RATES AND PROFITS

But the Government continued to lend money to the cooperatives in 1933 and 1934 at ridiculously low rates of interest, and they were relending the money to their affiliates at a much higher rate of interest and making great profits thereby (Creekmore, vol. I, pp. 52–53). They also made profits from the handling of the old stabilization corporation cotton and in the 10-cent loan and in the 12-cent loan, and also on what is known as the Oscar Johnson pool cotton, which was the cotton accumulated by the A. C. C. A. under the 90-percent advance in 1930–31. They now claim to have made very substantial profits in 1933–34, that they had losses in 1934–35, and for the present it isn't clear whether they are making money now or not.

The American Cotton Cooperative Association borrowed money from the Government under a joker statute—that is to say, at rates of interest ranging from one-eighth of 1 percent to 1¾ percent. A statute had been passed by the Congress allowing money to be loaned to farmers at the same rate of interest that the Government paid for money.

The purpose of this statute was this: At the time of its passage the Government was borrowing money on its bonds at from one-eighth of 1 percent to 1¾ percent, and the Congress did not wish to have the farmer charged any more for the money than the Government was paying for it; however, Mr. Andrew Mellon was Secretary of the Treasury at the time and he gave this statute a different construction from that intended by the Congress. He held that the lowest rate of interest meant any low rate, and he had been borrowing money on some classes of temporary certificates at as low as one-eighth of 1 percent; therefore, the farmers got some of their money at rates of interest as low as one-eighth of 1 percent. This was never intended by the Congress and when the matter came out an act was promptly passed allowing the cooperatives to borrow money at 3 percent. As long as this statute was on the books, however, it seems that the American Cotton Cooperative Association borrowed money from the Government, of course, but when the new statute of 3 percent was passed Mr. Creekmore looked about to see if he couldn't get the money at a small rate and he made an agreement with the Chase National and other banks in New York to borrow the money at 1½ percent (Creekmore, vol. I, p. 53).

FINANCIAL OPERATIONS

Mr. Creekmore testified that the cotton cooperatives had a line of credit with the Farm Credit Administration of about fifteen and a half millions of dollars and that he had a line of credit with private banks of something like $75,000,000 and that he had actually borrowed in 1 year $55,000,000. This Government credit, coupled with a practice by the Washington office of subordinating the Government loans to private loans, brought about an immense change in the cotton cooperatives' business.

The cotton cooperatives gave up their seasonal pools and their optional pools and their long-time holding of cotton and began what Mr. Creekmore termed the "immediate fixation pool" and the proof clearly shows that the immediate fixation pool is nothing in the world but a purchase of the cotton from the farmer by the cotton cooperatives.

It is true that it was claimed that they held out to the farmer when they bought his cotton that if there was any profit made by the cotton cooperatives the member would later receive what was called a "patronage dividend." It developed that only one patronage dividend had been declared in 5 years and that patronage dividend was 56 cents per bale in some districts, notably in Mississippi.

In one district, notably in Tennessee and Arkansas, the patronage dividend was credited on a debt due by the Mid-South (Henry, vol. I, p. 205).

It is very clear that when the farmer sold his cotton and when the cooperatives purchased his cotton under the so-called immediate fixation pool, the farmer regarded it as a sale and the cotton cooperatives regarded it as a purchase, and the American Cotton Cooperative Association and its affiliates became nothing but a huge cotton-buying concern with Government aid.

The so-called patronage dividend might well be likened to a transaction by which when a person enters a drug store or any other store and buys an article, he is frequently given a coupon with his purchase, with the statement on the coupon that when the purchaser gets a million coupons he will be entitled to a prize box of candy.

This patronage dividend did not deceive the farmers at all, as appears from the proof, because they never expected to get anything further, but apparently it has deceived the executives in charge of the Farm Credit Administration up to this time.

ALADDIN'S LAMP

The Federal Government has been a veritable financial Aladdin's lamp to the American Cotton Cooperative Association. When the cotton cooperatives could borrow money from the Government at from one-half of 1 percent to 1 percent interest and lend it out to their subordinates at from 5 to 6 percent, this was pretty easy financial picking. When the Congress passed the 3-percent loan, however, it was necessary to do some refinancing and then the plan was adopted to borrow from private banks at 1½ percent with the Government at Washington subordinating its liens to those of the private banks. By what right the Government at Washington did this has not been disclosed, but it was done and the cooperatives borrowed as much as $55,000,000 in 1 year with the Government's liens on the cotton made subordinate to those of the private banks.

Even with all this money the American Cotton Cooperative Association had to have working capital, and how to get it was the next problem. The private banks would not lend to them at 1½ percent unless the Government subordinated its liens. The Government in the second year decided it would not subordinate its liens, and thereupon the following plan was adopted: The A. C. C. A. in some manner that has not been fully explained caused its State associations, each one individually, to borrow from the Farm Credit Administration sums aggregating $5,000,000, to be turned over to the American Cotton Cooperative Association and the State associations to receive preferred stock in the American Cotton Cooperative Association for the money (Daley, vol. I, p. 93).

In other words, the American Cotton Cooperative Association did not borrow the money and, remarkable to tell, the individual State associations borrowed this money and took stock in the American Cotton Cooperative Association for it.

Exhibit C to Mr. Creekmore's testimony shows that the following companies borrowed from the Farm Credit Administration the $5,000,000 and turned it over to the A. C. C. A.:

Alabama Cotton Cooperative Association	$400,000
Brazos Valley Cotton Cooperative Association	425,000
California Cotton Cooperative Association	175,000
Louisiana Cotton Cooperative Association	800,000
Mid-South Cotton Growers' Association	800,000
Mississippi Cooperative Cotton Association	800,000
Oklahoma Cotton Growers' Association	500,000
South Carolina Cotton Growers' Association	200,000
South Texas Cotton Cooperative Association	200,000
Southwestern Irrigated Cotton Growers	200,000
West Texas Cotton Growers' Association	500,000

Now, let's analyze these transactions.

The Alabama Cotton Cooperative Association had been wound up in receivership, and, of course, it is inconceivable that the Government would lend to this bankrupt concern $400,000.

The Brazos Valley Cotton Cooperative Association had no assets of any kind, and this was admitted by its officers (McCrary, vol. I, p. 356).

The California Cotton Cooperative Association, Ltd., there was no proof about.

The Georgia Cotton Cooperative Association is now being wound up through a receivership (Creekmore, vol. I, p. 9; Williams, vol. I, p. 386).

The Louisiana Cotton Cooperative Association, there was no evidence concerning ($365,000 stock in A. C. C. A.; Williams, vol. I, p. 291).

The Mid-South Cotton Growers' Association has quite a history. It had failed in 1929 and was in an expiring condition when the Government lent money to it. It is true that Mr. Henry, its manager, stated in his testimony that the Mid-South had $100,000 of Government bonds and $100,000 in cash and a building that he had bought for $35,000, and that it had some equities in the stock of the A. C. C. A. in stock dividends; but, taking all these, it wasn't in a financial condition to borrow $800,000, and the Government will probably not get 10 percent of its loan back from the Mid-South (Henry, vol. I, p. 205).

The Mississippi Cotton Cooperative Association is supposed to be a going concern, but its assets were not disclosed (about $360,000; Stewart, vol. I, p. 342).

The Oklahoma Cotton Growers' Association had recently been sold by the Government, lock, stock, and barrel, to the A. C. C. A. itself, and the Government had lost something like half a million dollars by it, and yet this bankrupt concern was allowed by the Commodity Credit Corporation to borrow $500,000 and invest it in the stock of the A. C. C. A. (Creekmore, vol. I, pp. 27–29).

The South Carolina Association likewise had to compromise its affairs at a great loss to the Government (McCutcheon, vol. I, p. 152).

The South Texas Association, its assets were not disclosed.

The Texas Cotton Cooperative Association, its assets were not disclosed.

The West Texas Cotton Growers' Association admitted that they had no assets of any kind (Lee, vol. I, p. 361).

Thus we see that the enormous sum of $5,000,000 was loaned by the Government to the several associations, none of which were able to borrow any such sums with any expectation of paying them back, and none of which borrowed for themselves, but for the benefit of the A. C. C. A.

The whole transaction, in the opinion of your subcommittee, was a fraud upon the Government.

What was the purpose of this transaction? Although the A. C. C. A. had failed twice, costing the Government something like $140,000,000, and although it admits that it is now insolvent unless the Government continues its aid, yet it claims to have put some $4,000,000 in reserve and issued stock therefor, and that it has a line of credit, as testified to by Mr. Creekmore, of $15,500,000 with the Farm Credit Administration, and $75,000,000 with private banks; and under these circumstances the question naturally arises: Why did the A. C. C. A. have to erect this amazingly peculiar financial structure in order to obtain working capital?

It is the opinion of your subcommittee that these loans are virtually worthless, and the Government will be unable to collect them.

THE COOPERATIVE AND THE SEED-LOAN BORROWER

The Congress having passed a law that cooperatives should be encouraged in every way possible, the Federal Farm Credit Administration recommended that the seed-loan cotton should be turned over as far as possible to the cotton cooperatives, and this was done.

And look at the charges that were made: $1.30 per bale other than seasonal charges. What they were nobody knows; $5 for membership fee; 50 cents for a newspaper publication (Henry, vol. I, p. 197 through 202).

These charges were unconscionable and indefensible. Take the poor seed-loan borrower who can get credit nowhere else to make a crop, who was the poorest of the poor, and who in order to maintain himself and family had to borrow the pitifully small sum that he was allowed to borrow from the seed-loan office; and think of charges other than storage, insurance, and interest, mounting up to him of more than $11 per bale—more than 13 percent of the value of the cotton—taken out of the cotton for this enormous trust in the cotton-buying business known as the American Cotton Cooperative Association (Henry, vol. I, p. 232).

To my mind the most condemning fact brought out was the treatment of the seed-loan borrower by the A. C. C. A. and its affiliates.

GOVERNMENT BOUNTY AND FAVORITISM

Remember that the American Cotton Cooperative Association has been in existence for 5 years.

The following sums have been paid to the American Cotton Cooperative Association by the Government on Government-controlled cotton as services and expenses, by years:

1930–31	$531,710.32
1931–32	907,909.87
1932–33	883,032.84
1933–34	789,060.65
1934–35	724,499.33

Totaling $3,836,213.01, or an average per year of $767,499.33.

All of this is obtained from Mr. Creekmore's exhibit Q and his testimony.

It is true that expenses apportioned to the Stabilization Corporation out of the above, amounted to $1,278,967.43, but since that corporation was officered and serviced by exactly the same people as the American Cotton Cooperative Association, that was a mere matter of bookkeeping (Creekmore, vol. 2, p. 215).

Over and above this income the A. C. C. A. made enormous sums out of interest annually by charging the member associations more than they paid the Government for the money. The interest sheets have not yet been furnished, but Mr. Creekmore says he will furnish them and the amount that the Government gave them under interest transactions will be shown and made a part of this paragraph. Over and above the income which the American Cotton Cooperative Association made, the affiliated associations made additional interest on the loans made by them to individual members (Creekmore, vol. I, p. 57).

In other words, the farmer paid the bill, except when there was a loss, and kindly Congress assumed these enormous losses.

RECONCENTRATION OF COTTON

Much of the $3,836,213.01 was for reconcentrating and otherwise handling Government cotton. But last spring or early summer another reconcentration of cotton was ordered. Announcements were made by the Federal Farm Credit Administration that bids would be received for reconcentration of cotton on which the Government had a lien, for the purpose of making room for the new cotton crop of 1935–36. It was estimated that it would be necessary to reconcentrate some 3 millions of bales. Bids were put in to do this handling by the A. C. C. A. by John M. Parker & Co., of New Orleans, and others.

Mr. Parker testified that they put in a bid to reconcentrate this cotton for 40 cents per bale flat (Parker, vol. I, p. 495).

The A. C. C. A. put in a bid for reconcentrating the first 500,000 bales at 48 cents; the second 500,000 at 45 cents; the third 500,000 at 40 cents; and any additional bales for 35 cents (Parker, vol. I, pp. 498–499).

Up to the time of the hearing only 1,600,000 bales had been reconcentrated. Whether there would have been any more was not known. But it must be remembered that the A. C. C. A. had received 48 cents a bale on the first 500,000 bales, 45 cents on the second 500,000 bales, and 40 cents on the third 500,000 bales—and then they handled very little more. So that the average price of handling the cotton was more than 43 cents per bale, while Mr. Parker offered to reconcentrate the cotton for 40 cents per bale, and if the Parker bid had been accepted—and he represented a responsible firm—the Government would have saved some 50 to 70 thousand dollars by giving the bid to him. But the A. C. C. A. got the job.

Some question was raised as to whether the Department had the right to let this contract without advertising for bids. No bids were advertised for.

In connection with this reconcentration of cotton, Mr. R. L. Taylor, president of the Federal Compress Co., which warehouses the cotton in the Memphis district, or a large part of it, stated that he offered to reconcentrate all of the cotton in his district necessary to be reconcentrated without charge. The bid to do it for nothing was declined (Taylor, vol. I, p. 420).

Mr. Parker testified that the reconcentration of this cotton was very expensive to the farmer, and this testimony was not in any way denied (Parker, vol. I, p. 502).

When the cotton goes in the warehouse it is sampled, and when it was reconcentrated the Government required it to be sampled again, and by regulation these second samples were destroyed so far as the use of them was concerned, but it was said that the A. C. C. A. credited the value of them to the Federal Farm Credit Administration. However, Mr. Parker testified that when the cotton is sold it must again be sampled.

Now, the amount taken out at each one of these sampling operations ranges from three-quarters of a pound to a pound, and thus the farmer is deprived of these three samples, at the present price of cotton, or 3 to 35 cents per bale (Parker, vol. I, p. 501).

In addition to that, when the cotton is sold under the third sampling the cost of that sample is from 35 to 50 cents.

It will thus be seen that the reconcentration movement cost the farmer something like 65 to 75 cents per bale. But what is the poor farmer if he is not to be mulcted in this way? Who cares for him anyhow?

In addition to that, quite frequently the cotton was moved from warehouse to other points hundreds of miles away without the consent of the farmer, without the knowledge of the farmer, and how much delay and expense he may be put to to find his cotton in some far off warehouse is yet to be seen.

In connection with this last reconcentration of cotton, southern Senators, almost to a Senator, and many southern cotton Congressmen, protested as vigorously as they knew how against this reconcentration of cotton. There was in their opinion no reason for it. It is doubtful if there was any reason for it, and the only one to benefit by it was the cotton cooperatives, and the only ones to lose by it will be the farmers—unless the loss is so great that the Government will have to come forward for a third time and assume it.

FUTURES AND SPECULATION

The committee has tried very zealously to obtain figures on the total number of bales of futures that were bought or sold during the existence of the cotton cooperatives. Mr. Creekmore said it was very difficult to get these figures, but exhibits H and I of his deposition indicate the amounts that he paid the futures brokers for 2 years, namely, for 1931–32 and 1932–33. For these

2 years, commissions alone amounted to $1,246,815.24 (Creekmore, vol. I, pp. 108–109).

Each year shows futures brokers' total commissions, being separated into two divisions, namely, "Brokers' commissions" and "Brokers' commissions earned." What is meant is not shown.

The figure of $1,246,815.24 shown above constitutes commissions on some 8 million plus bales of futures based on the brokerage as testified to, of 15 cents a bale. In other words, the cotton futures dealt in by the cotton cooperatives must have been many times the number of bales of spot cotton dealt in by them. Speculation at one time was freely admitted, and, of course, cannot be denied.

COMPARISON OF CHARGES

It is undeniable, and for a large part undisputed, that the charges for handling cotton, and collected out of the cotton by the cooperatives, are considerably larger than similar charges made by private merchants and buyers. No better illustration of these charges can be given than the following typical statement from the seed-loan office:

Résumé of typical settlements made on 1931 loans by Mid-South Cotton Growers' Association
(Henry, vol. I, pp. 192–203)

Our loan no.	Mid-South contract no.	Date of payment	Number of bales	Gross proceeds	Previous cash advance	Interest on cash advance	Deductions			Charges other than regular seasonal charges	Membership fee	Association news subscription	Interest on cash paid out for freight, storage, etc.	Gross deductions
							Light bale	Insurance	Storage

KENNETH MCKELLAR.
JOHN G. TOWNSEND, Jr.

Senate Report 1819, part 2—Minority views

My approval is withheld from the report submitted by Senator MCKELLAR pursuant to the authority of Senate Resolution No. 185, authorizing an investigation into the expenditures by the Federal Government for cotton cooperatives.

The testimony taken comprises 654 printed pages. Therefore, a detailed analysis of this testimony would unnecessarily prolong this report, but the following conclusions seem to me to be warranted:

1. The American Cotton Cooperative Association and its affiliates are farmer-owned and farmer-controlled, and that they are organized and operated in accordance with the letter and spirit of cooperative marketing laws.

2. The Government twice attempted efforts in the nature of stabilization operations, once in the 1929–30 cotton season when an advance of 16 cents per pound was made on cotton delivered through the cooperatives, and again in the 1930–31 cotton season when 90 percent of the market value of cotton was advanced to growers through the cooperatives. The Government has assumed and paid some of the losses incident to these stabilization operations but has not paid all losses.

3. The record shows that in performing the ordinary functions of cooperative marketing associations, exclusive of stabilization operations, American Cotton Cooperative Association and its affiliates on the whole have rendered satisfactory service. Out of over a quarter of a million producer members, less than 20 appeared to protest any grievance or criticism.

The evidence does show that the cotton cooperatives lost certain reserves and were put in debt to the Federal Government as a direct result of stabilization efforts conducted at the instance and under the direction of the Federal Government acting through the Federal Farm Board. The record further shows that since the cessation of these stabilization activities by the Government the operation of the cotton cooperatives as a whole have been conducted in accordance with sound business and cooperative principles. As illustrative of this the evidence conclusively shows the following facts: American Cotton Cooperative Association was organized in 1930 by 13 State and regional cotton cooperative associations with a paid-up capital of only $76,950. This association has accumulated a substantial capital and surplus reserve through earnings. At the close of the 1933–34 season the capital and surplus amounted to $2,355,658.59, and all of this, except the original $76,950, was a result of earnings. These earnings are held for the benefit of the producers whose patronage has contribute to it. At the close of the 1933–34 season $480,058.20 was distributed by this association as patronage dividends. These results have been accomplished in spite of some testimony by the cotton trade to the effect that the American Cotton Cooperative Association and its affiliates were paying more to producers than the trade could afford to pay, and were selling cotton to the mills at lower prices than the trade could afford to take.

I am impelled to the conclusion that during these years the operations of the cooperatives have reduced the spread between the producer and the consumer to the benefit of both.

4. The record does not justify the assumption that capital loans to the cooperatives are worthless, or that the Government will ultimately lose thereby. I find no basis for reflecting upon the officials of Farm Credit Administration appointed by the President pursuant to the law passed by Congress. None of these officials were called by the subcommittee; and certainly there is no evidence indicating that these capital loans were recklessly, improvidently, or illegally made. I see no reason to believe that the Government's loans are likely to be lost in whole or in part.

5. As to membership relations, the element of coercion is absent. The membership contracts introduced in the record give the members the right to withdraw from membership and cancel the contract. Hence, I am unable to join in the view that the cooperatives retain their membership by coercion or duress.

6. The record shows that the cooperatives have rendered a noteworthy service. Through means of local offices and receiving agents, classing service is widely provided, to the end that farmers who do not know the grade or staple of their cotton, and may not understand its value, are advised in these respects.

A basis sheet is made available throughout the Cotton Belt, and every producer of cotton in the South can ascertain what the cooperatives will pay for his cotton on any date.

Various sales options are provided, including the seasonal pool, the daily fixation pool and other pools. In the seasonal pool, cotton is sought to be sold in an orderly manner at the average seasonal price received from sales rendered to growers. In the daily fixation pool, the current day's price is given to the farmer. Under the marketing contracts, he has exclusive option control in determining whether to sell through a daily pool or seasonal pool. There is no evidence that the judgment of the association's officials is substituted for his judgment in these particulars.

7. The immediate fixation or daily pool is a natural development of cooperative marketing. If only seasonal pool were offered, financed on a basis of advancing 60 percent of the market value at time of delivery, with subsequent distribution as sales are made from this pool, the effect would be to deny the advantages of cooperative marketing associations and their facilities, to the weakest and neediest of the producers. With more than one-half of the American cotton crop produced under landlord's lien, crop mort-

gage, or furnishers' lien, the immediate fixation or daily pool is a necessity.

8. The evidence warrants the conclusion that the cooperatives have rendered noteworthy services in the marketing of cotton. To mention only a few, they have eliminated in large areas the purchase of cotton without taking into consideration in price fixing the grade and staple of cotton. The old method is commonly referred to as hog-round buying; they have narrowed the differentials between interior country points and central marketing points; they have contributed to cutting down the spread between the price paid to the produce and the price paid by the mills; and they seek to make the marketing of cotton as direct as can be economically done. The record supports the conclusion that the cooperatives aim to pay to the producer the highest price possible, not to buy his cotton at the lowest price and sell it for the highest price.

9. The record shows that in the operation of the cotton cooperatives, there have been mistakes made. Handling never less than 1,000,000 bales per year since the organization of American Cotton Cooperative Association, it would be well nigh impossible to market so large a volume of cotton without errors and perhaps injustice. But occasional errors should not call for a sweeping condemnation of the entire cooperative marketing system in cotton.

The public policy of the United States is committed to cooperative marketing. It was endorsed in the platform of both political parties in the last presidential campaign. The cooperatives are seeking, to their credit, out of their own reserves, to build a solid financial structure. To expect the cotton producers immediately to contribute all of the capital needed to finance their operations is vain; and therefore, both major political parties pledged financial aid of the Government to the cooperatives.

It does not appear, as stated, that capital loans to American Cotton Cooperative Association and its affiliates have been recklessly or wantonly made, or that those whom the President has entrusted with responsibility for the affairs of the Farm Credit Administration have been recreant to their trust.

It is a fair deduction, as heretofore pointed out, that the cooperatives lost reserves, which they held for their farmer members, as a direct result of stabilization operations initiated by the Federal Government. The former Chairman of the Federal Farm Board, who was responsible, in part, for the policy initiated and the conduct of the operations, testified that the cooperatives and their members were penalized as a result of these operations. He frankly stated that the Federal Farm Board, at the close of the operation, was compelled to make a harsh and unfair settlement with the cooperatives based upon a legal interpretation of existing statutes. I am forced to the conclusion that the Congress, who alone can right the wrong, should by appropriate legislation restore to the cotton cooperatives and to their producer members the reserves which were thus appropriated.

J. H. BANKHEAD.

Mr. McKELLAR. Mr. President, will the Senator from Texas yield for just a moment?

Mr. SHEPPARD. I yield.

Mr. McKELLAR. If I can get permission of the Department of Agriculture, I should like to publish, right underneath the two reports just inserted in the RECORD, the report of the special examiner sent by the Department of Agriculture to examine this very matter.

Mr. SHEPPARD. I have no objection. The Senator, I presume, refers to the report of Mr. Hermann?

Mr. McKELLAR. I refer to the report of Mr. Hermann. I inquire if the Senator from Texas has a copy of his report?

Mr. SHEPPARD. I do not have his report.

Mr. McKELLAR. The Senator knows that there has been a report of that kind made?

Mr. SHEPPARD. It is my understanding that the cooperatives themselves requested the Farm Credit Administration to appoint someone to make an investigation into their affairs and to cooperate with them in curing defects and in making recommendations as to changes necessary to strengthen the whole structure of cooperatives, and that Mr. Hermann's report is now under consideration by the cooperatives themselves, and they expect great good to result from his investigation.

Mr. McKELLAR. I have a copy of that report in my hand and am only awaiting the consent of the Department, which I have tried to get for 2 days, but have not as yet been able to get, to put it in the RECORD. I am going to publish it. I know that the report has been made. It was made at the request of the cooperatives. The question has been thoroughly gone into by Mr. Hermann, and he agrees with me probably to the extent of from 95 to 98 percent.

Mr. SHEPPARD. It is quite probable that the cooperatives themselves will agree largely or to some extent at least with Mr. Hermann's recommendations and will put them into operation.

Mr. President, I have here a write-up of the investigation conducted by the Senator from Tennessee by a staff writer of the Louisiana Farm Bureau News.

Mr. McKELLAR. O, Mr. President, if I recall correctly, after my report was submitted and the A. C. C. A. found out what it was—is the publication to which the Senator from Texas has referred an A. C. C. A. publication?

Mr. SHEPPARD. It is an excerpt from the Louisiana Farm Bureau News. It is not stated that the Farm Bureau News is identified with the cooperative associations.

Mr. McKELLAR. If the Senator thinks it proper, I do not care whether or not it goes in the RECORD.

Mr. SHEPPARD. All I wish to do is to present the substance of what it says. I do not ask that it be inserted in the RECORD in its entirety.

Mr. McKELLAR. I am willing to have it go in the RECORD. If these gentlemen think that abuse will excuse them from stealing the Government's money and defrauding the farmers, it is all right with me to have it go in the RECORD.

Mr. SHEPPARD. There is no abuse in this paper, and I would be the last man in the world to place anything in the RECORD or to give weight to anything abusive of my friend, the Senator from Tennessee.

Mr. McKELLAR. I am sure of that.

Mr. SHEPPARD. He is one of the chief ornaments of this body, and I am proud of his friendship.

This staff writer says that the objections to the cooperatives can be summarized as follows, that those who object to the cooperatives contend that the cooperatives buy cotton too high, sell too low, and are forcing private cotton firms out of business; that the cotton cooperatives borrow huge——

Mr. McKELLAR. Mr. President, will the Senator allow me to say that, if I may be regarded as one of those who are opposed to the methods of cooperatives—and I think I might well be thus designated—I never made any such suggestion as that. That comes entirely from the cooperatives and not from me in any manner, shape, or form.

Mr. SHEPPARD. The writer does not say that the Senator from Tennessee makes these objections. He says that the general objections by the private trade to cooperatives are such as I am now enumerating.

Mr. McKELLAR. I am inclined to think from the evidence that was adduced before our committee, in fact, I am quite sure, that the statement is entirely without foundation.

Mr. SHEPPARD. Very well. Then he says further that another contention by those who object to the cotton cooperatives is that they borrow huge sums of money from the Government at very low rates of interest which the private trade cannot command.

That the cotton cooperatives lose money and that their deficits are made up by appropriations from Congress.

That cotton cooperatives under present operations are just another big cotton firm and not true cooperatives.

That the American Cotton Cooperative Association could not exist without contracts for handling and reconcentration of Government-owned cotton.

This writer further says that the cooperatives feel that they have established as a result of the testimony they gave that they handle cotton on the basis of grade and staple, giving the farmer a fair price and secure as much for the cotton as the world market will pay, returning any profits on the transaction to reserves and to members in patronage dividends.

They feel they have proved that they borrow only a relatively small amount of money from Government agencies, and in so doing pay the normal rate of interest charged by Government agencies to any other type of business using Government funds; that most of the money used in the operations are borrowed from private banks at a low rate of interest which can be commanded by any solvent cotton firm.

That save for the stabilization operation, which was a Government operation through the Farm Board, the cotton cooperatives have never lost Government money; the Government has not made up deficits outside of its own stabilization efforts; and the cotton cooperatives, on the contrary, have established over the years substantial reserves in operating capital for their membership.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. SHEPPARD. Certainly.

Mr. McKELLAR. Is it denied anywhere in that paper, or by anybody, that substantially the Government has paid the cooperatives out of bankruptcy twice and that the Government has lost in that transaction $140,000,000?

Mr. SHEPPARD. It is my understanding that the Farm Board, which represented the Government in dealing with the cooperatives under Mr. Hoover, who was then President, sustained tremendous losses, and the cooperatives claim that they also sustained losses. It may be—I am not entirely familiar with the transactions—that the cooperatives were driven to the edge of bankruptcy by what they were compelled to do in carrying out the arrangements of the Farm Board. I say frankly I do not for the moment recall.

Mr. McKELLAR. The letter of the manager of the Farm Board, Mr. C. O. Moser, which has already been read into the RECORD by me, absolutely denies that situation and shows that the losses were made principally by the advance of $80 a bale on cotton, and that the cooperatives urged the Farm Board to make the loans. They have lost all. They gambled on the market; they gambled in futures as well as in spots, and the result is the loss to the Government of $140,000,000, which they will not deny, and the farmers at the same time have been mulcted by these charges and losses.

Mr. SHEPPARD. I know they claim that on the whole they have been penalized by the transactions they undertook in the endeavor to stabilize the price of cotton in connection with the Farm Board, and that they have not as yet been reimbursed. This writer further says that Mr. James C. Stone, a former chairman of the Federal Farm Board, told of the negotiations leading up to the settlement with the cotton and wheat cooperatives, and that Mr. Stone confirmed the previous statement of Mr. Creekmore that the original settlement between the cooperatives and the Board, which was approved by the cotton cooperatives and approved by the Board, had been set aside by a ruling of the Attorney General, and that under the new settlement the cooperative organizations were unduly penalized.

I understand it was the purpose of the resolution submitted by the Senator from North Dakota [Mr. FRAZIER] to go into that situation; that then the Senator from Tennessee offered his resolution to investigate the cooperatives, and that action was thus suspended on the Frazier resolution.

Mr. McKELLAR. That is true with reference to the Frazier resolution. So far as Mr. Stone's testimony is concerned, his first testimony was that the cooperatives had recommended the loans to be made and that they were following the recommendations. He afterward changed his testimony somewhat on further examination, and after he had changed his testimony there was produced a letter from the A. C. C. A. showing that they had done just the opposite to what Mr. Stone testified they had done.

Mr. SHEPPARD. Resuming my statement of what the cooperatives claim they established at this investigation, they claim they proved further that the charge of being just another cotton firm is erroneous and cotton handled by the immediate fixation pool is handled no differently from an operation standpoint than that in the seasonal pool, save the fact that the producer gets the approximate value of the cotton at the time it is tendered rather than waiting for a portion of the payment later.

Further, they claimed that they established that any Government contracts being carried out by the American Cotton Cooperative Association are being carried on efficiently and at a price below what any old-line cotton firm can handle the business.

Mr. McKELLAR. If the Senator had read the statistics taken from books of the seed-loan office he would know that the charges of the cooperatives against the farmer are several times what the ordinary trade charges the farmer for handling cotton. The operations of the seed-loan borrowers were virtually highway robbery.

Mr. SHEPPARD. Mr. President, the writer who prepared this statement——

Mr. McKELLAR. Who was the writer?

Mr. SHEPPARD. His name is not given, but if I can ascertain it I shall place it in the RECORD.

Mr. McKELLAR. I think that is merely propaganda from the A. C. C. A. I do not state, of course, that the Senator is offering propaganda for anyone, because, of course, I know him too well to do that. I think he is being misled. I have seen such propaganda before. They started out with the coarsest kind of abuse of me because I brought out the facts. Later they have been a little milder when they learned that the facts to which they themselves testified were the basis of my charges, because we had very little testimony except from the cooperative officials themselves.

Mr. REYNOLDS. Mr. President, will the Senator from Texas yield?

Mr. SHEPPARD. Certainly.

Mr. REYNOLDS. If the cotton cooperatives are charging such exorbitant fees for the services which they render, I am at a loss to understand why the producers, the raisers of cotton, continue to deal with them. That is one thing I cannot clearly understand.

Mr. McKELLAR. If the Senator will listen a moment he will learn. The seed-loan people produce a very large amount of cotton in this country. They are probably the smallest cotton farmers. They are required to sell to the cooperatives. The Government requires them to sell to the cooperatives. They have no discretion in the matter. They are told they must handle their cotton through the cooperatives.

Mr. REYNOLDS. It is my understanding, as a result of an inquiry directed to the Senator from Tennessee a moment ago, that there is nothing whatsoever compulsory on the part of the producer to deal with the cooperatives. I understand there is a very strong suggestion on the part of the Government to the producer that in view of the fact he has been given substantial aid by way of finances for the purchase of seed, the Government is desirous of having him deal with the cooperatives.

Mr. SHEPPARD. I am not sure as to that.

Mr. REYNOLDS. The cooperatives, in a sense, have been financed by the Government, according to information conveyed by my good friend from Tennessee.

Mr. SHEPPARD. No; I do not think so.

Mr. REYNOLDS. It is my understanding there is nothing written in the law and nothing absolutely compulsory on the part of the Government to the effect that those who borrow money from the Government, from the Seed Loan Board, are forced to sell their cotton to cooperatives. Is that correct?

Mr. McKELLAR. No; that is not correct. The law of 1932 provided that the Department of Agriculture should favor the cooperatives. That was before we subsidized them, before the last administration came into office. Then it was that the Department used to favor them. That law is still in existence. The Department very honestly felt it was their duty to have the seed-loan borrowers deal with cotton cooperatives. I examined the record and found they had charged these exhorbitant fees, sometimes as much as $11 a bale for handling a poor darky's cotton out of which he got less than $50.

Mr. REYNOLDS. Therefore, if a farmer takes advantage of the opportunities availed by the Government to get money for the purpose of buying seed, under the law he is forced to sell his cotton to a cooperative; but it is not compulsory by way of the law itself or any particular enactment of Congress.

Mr. McKELLAR. It is remarkable that all of them did so and still do.

Mr. REYNOLDS. It is. I grant that they did, but the point I make is this. May I state to the Senator from Texas that it is foreign to me, if these people have been so outlandishly treated by way of having been occasioned to pay such exorbitant fees and charges, why they should, in the face of all that treatment, continue to deal with the cooperatives.

Mr. SHEPPARD. I agree with the Senator. This writer continues his description of the investigation by stating that many farmers appeared in behalf of their cooperative associations, and all testified that the coming of the cotton cooperatives to their communities has resulted in a better general price level for the cotton produced in their sections and all testified that the general spread between the interior markets and the central markets had been considerably lessened when the cooperatives came into the picture.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. SHEPPARD. Certainly.

Mr. McKELLAR. All the Senator has to do is to look at the record, instead of reading such propaganda, and he will find there is not a word of truth in that statement. The overwhelming proof was that these people paid more to the cooperatives than they ever had to pay to private merchants.

Mr. SHEPPARD. The writer said further that cotton cooperative members from California, Texas, Arkansas, Mississippi, Louisiana, South Carolina, and many other States testified to the benefits derived from the cotton associations in their communities.

He said further that the general level of the testimony was to the effect that the competition established by the cotton cooperatives allowed them to get a better price for their cotton; the grading and sampling of cotton by the cooperative classers in their community allowed them to know the value of their cotton before they placed it on sale.

He also said that Mr. Williamson, a State senator in Louisiana and president of a Louisiana cooperative, read into the record a large number of letters from bankers in Louisiana who told of the benefit producers in their sections had derived from the coming of the cotton cooperatives in their section.

A further statement made by the writer was that the testimony of cotton producers established definitely the fact that the grading and sampling service to farmers provided by the cooperatives has been of very great and material benefit to producers of cotton whether members of the co-ops or not.

Mr. President, my knowledge of the integrity and sincerity and ability of friends and constituents who are officials in these associations in Texas has caused me to present this summary of what took place during the investigation by Senator McKELLAR of the cotton cooperatives, a summary made by a staff writer of the Louisiana Farm Bureau News.

I have here a résumé of the testimony of Mr. Creekmore, president of the American Cotton Cooperative Association, which was given at the investigation. I shall not endeavor to read it because it is somewhat lengthy, but I ask that it may be inserted in the RECORD.

The PRESIDING OFFICER. Is there objection?

Mr. McKELLAR. Mr. President, may I inquire first whether that is the statement prepared by Mr. Creekmore?

Mr. SHEPPARD. This is the statement made before the Senator from Tennessee while he was presiding at the investigation.

Mr. McKELLAR. Instead of doing it that way, why not put all of Mr. Creekmore's actual testimony in the RECORD as it was given?

Mr. SHEPPARD. Very well, as it actually took place.

Mr. McKELLAR. Yes; not as he wrote it out. Let us have it as testified in open court, as it were.

Mr. SHEPPARD. Very well, and also the testimony of State Senator N. C. Williamson as it took place before the Senator. The Senator asks us to read the testimony. Let us have it in the RECORD as it actually took place before the Senator.

Mr. McKELLAR. Very well; I have no objection.

There being no objection, the testimony of Mr. Creekmore and Mr. Williamson was ordered to be printed in the RECORD, as follows:

E. F. Creekmore, the first witness introduced before the committee, having been duly sworn, testified as follows:

By Senator McKELLAR:

Question. Mr. Creekmore, I have a memorandum of some questions that I want to ask first. First, we had better have your identity. Of course, everybody knows you, but for the record, you are the general manager and vice president of the American Cotton Cooperative Association?

Answer. Yes, sir.

Question. And you have been during its existence?

Answer. I have.

Question. And are you president or manager of the old Stabilization Association?

Answer. I was president.

Question. That has gone out of existence, I believe?

Answer. Yes, sir.

Question. Without going further into the matter, I want you to look at this Senate Joint Resolution 38, Calendar No. 500, a joint resolution calling for an investigation of the adjustment and settlement of losses sustained by the Cooperative Marketing Association, commonly known as the Frazier resolution. Of course, you are familiar with that?

Answer. I am familiar with it; yes, sir.

Question. You are familiar with the resolution?

Answer. Yes, sir.

Question. Did your association have anything to do with promoting this resolution?

Answer. I believe that our association had nothing to do with the original preparation or introduction of it, but we have conferred with Senator FRAZIER since it was introduced 2 years ago. Senator, I have a statement which has been written out since your request has been made of us, which, I believe, covers the operations. I believe it will conserve time if I at this time be permitted to make a statement, which will cover the 1929–30 operations, or the 16-cent loan, and the 1930–31 operations, or the 90-percent loan, also by years, and the 1931–32, 1932–33, 1933–34, and 1934–35 operations.

Question. I have gone through this matter somewhat carefully, and I suggest that you permit me to ask some questions which will give the matter very succinctly, and will get in the record what we want. I do that solely so that the matter may be thrashed out while we are going over it. I would be glad to go over on cross-examination, or later, whatever you have in mind, and, of course, you will be allowed to put in the record anything that you may wish, but I hope you will let me ask a few questions about the matter first, if that is satisfactory?

Answer. Certainly, Senator, I most gladly accede to your views.

Question. Yes, sir.

Answer. I do believe that this statement which I have prepared as short as possible will give you the entire picture, so that then you will conserve time by directing the questions along certain things.

Question. We could conserve more time by following the other procedure, because I have these matters I want to ask you about, and then we will cover anything else that you have in mind.

Answer. I want you to hear me, Senator.

Question. But my mind is directed to certain things, and if you don't mind, I would like to ask that, and then, of course, I will be most glad to have your explanation or statement later.

Answer. I would be very glad to do that. As a matter of fact, of course, my attention had been directed to this matter, and I have prepared this statement, which I believe covers the matters which you and your committee has in mind, and it was with the view of conserving time that I made the suggestion.

Question. I don't think we are taking a good deal of time, and if you will let me ask you a few questions, I will get what I want. I first want to ask you about the Frazier bill. Was your corporation behind that bill, or did you seek its passage?

Answer. I am not sure, but I believe that we knew nothing about it until it was offered. When it was offered it came to our attention, and then we sought Senator FRAZIER to have cotton included in it.

Question. He introduced a bill for wheat, as I recall; that is, the bill as first introduced had been introduced to include wheat, and then you sought to have it also include cotton?

Answer. Yes, sir.

Question. And that was done?

Answer. Yes, sir.

Question. Let me ask you a further question, if you have any agency, legislative agency in Washington, acting for your association, or do you have any such agency doing anything for you whatever?

Answer. We have no regular legislative agency in Washington. Whenever there is a matter pending in Washington which we thing we should take an interest in, we will ask some of our members to go to Washington to take care of the business there.

Question. None of them stay there any length of time?

Answer. No, sir; we are affiliated with the National Cooperative Council, and are members of that, and the National Cooperative Council has a regular organization which it maintains.

Question. Well, now, who in the National Legislative Council——

Answer. National Cooperative Council.

Question. National Cooperative Council, who on that council are residents of Washington, and who stays there and looks after legislative matters?

Answer. Mr. Robbin Hood is the secretary of the National Cooperative Council.

Question. Does he devote all of his time to it?

Answer. I think so.

Question. Are there any others?

Answer. Not that I know of. He has a secretary.

Question. Who pays Mr. Hood?

Answer. Well, the Cotton Cooperative Association, through the country, I mean the various associations, form the National Cooperative Council. They all make donations to the National Cooperative Council.

Question. Now would you be kind enough—you do not have it right here at the moment, I am quite sure—but would you be good enough to give me the list of moneys which you have paid out on account of this National Cooperative Council, or for your membership therein, or if there are any others present who might be able to give it, or who might be employed by the cotton cooperative associations, as legislative agents in any way, I wish you would give me the names of those, and their concerns.

Answer. Well, I believe I can give you that general information now.

Question. That would be fine.

Answer. I think since I have been connected with the A. C. C. A.—which is the way we commonly refer to the American Cooperative Association, which connections occurred some 4 months after its organization—we became members of the National Cooperative Council; and, if my memory serves me correctly, we have paid in dues to the council $1,000 a year until perhaps this past year, at which time we commenced paying them $1,200 a year. I am glad to state that Mr. Robin Hood, who is the secretary of the council, is here today, and I am sure that he will be glad to testify, if you desire.

Question. How is that account carried on your books?

Answer. Mr. Hill, can you tell me how the account is carried? Of course, I do not know all of these details, but I think it is dues.

Mr. HILL. Dues.

Answer. Subscription and dues, I believe. I will be glad to furnish you that information exactly.

Question. I think that is all right. I have before me a newspaper called the Mid-South Cotton News, and it is published at Memphis, Tenn., and it carries the notation that it is the official publication of the Mid-South Cotton Growers Association, and this particular copy is dated "Memphis, Tenn., October 1935." Will you give me the set-up by which this newspaper is published, and who has the responsibility for its publication?

Answer. I can only give you that generally, because that is published by the Mid-South Cotton Cooperative Cotton Growers Association, which is a separate corporation from the A. C. C. A. The Mid-South publishes—the Mid-South Association, I mean—publishes it, and I understand that through subscriptions and advertisements, that those sources practically pay for it. If there should be a deficit from the funds received from its operation, I understand that would be taken care of by the Mid-South Corporation.

Question. May I ask who is the editor and publisher—I mean what individual has charge of editing and publishing the paper?

Answer. Well, of course, Mr. Henry, who is the manager of the Mid-South Association, is here. I believe he could answer any question relative to that better than I.

Question. I think you are right, and I will not ask you further about it, and I will wait and ask him. Is that the only publication that is published under the jurisdiction of the A. C. C. A.?

Answer. Well, that is not under the jurisdiction of the A. C. C. A. A. C. C. A. has a monthly paper, called the American Cotton Grower, which it publishes once a month from New Orleans.

Question. Well, how is that financed?

Answer. It is financed out of the funds of A. C. C. A.

Question. Is it charged to the cotton farmer in fixing the charges that are entered against them on your books?

Answer. The American Cotton Grower has been published for about 4 months. There are various methods of collecting subscriptions, all of which I am familiar with. The loss, if any, in the operation—and there will be a loss in their operation this year—will be taken care of out of the general funds of the A. C. C. A.

Question. Well, I read from this statement from the seed loan office——

Answer. Did you give it to Mr. Henry?

Question. Just lend it to me; I thought I had a copy of it, but I do not seem to have any. Thank you, sir. I notice that the association shows here as to subscriptions a charge of 50 cents a bale, which is charged up to the farmer. Is that the way that that matter is handled?

Answer. No; I believe no definite portion has been determined in regard to the American Cotton Grower.

Question. And as I understand you, this has just been published about 4 months?

Answer. About 4 months.

Question. Are there any other newspapers published by the A. C. C. A., or any of their subsidiaries—if I may so speak of the regional associations.

Answer. Affiliated associations.

Question. Affiliated associations.

Answer. There are no other papers published by the A. C. C. A. The Louisiana association publishes a paper somewhat similar to the Mid-South paper. The Texas association publishes a paper somewhat similar. The Mississippi association publishes a similar paper.

Question. Georgia and South Carolina and other members do not publish a paper?

Answer. Not at this time.

Question. Are you advised—I doubt if you are, but I am asking you the question—are you advised whether each of these affiliated papers is charged up to the farmers in the form of expenses on his cotton?

Answer. I think there are different systems as to prices. I would like to say that Mr. Williamson, the president of the Louisiana association; Mr. Stewart, the general manager; and Mr. Mimms, the president of the Mississippi association; Mr. Sharp, the president of the Texas association; and Mr. White, the secretary-treasurer of the Texas association, are here and will be glad to give you any information you desire about that.

Question. Yes, sir. We will be very glad to hear from them, of course. The American Cotton Cooperative Association was organized on January 13, 1930?

Answer. January 1930.

Question. Yes, sir. Did you say that you had had some previous connection with its predecessor company, the one organized previous to that?

Answer. I believe not.

Question. Or did I misunderstand you?

Answer. I believe I said that I became associated with the American Cotton Cooperative Association some 4 months after the organization of the A. C. C. A.

Question. But no one held the same position that you do, as I understand it?

Answer. No, sir.

Question. That was the first official position?

Answer. Yes, sir.

Question. Now, you spoke of the Stabilization Corporation and the fact it has gone out of existence. I want to ask you whether this is a separate organization, and just a new name—another corporation organized for convenience and officered by exactly the same personnel and employees as those who had been connected with the former corporation.

Answer. It was a separate corporation.

Question. A Delaware corporation?

Answer. A Delaware corporation, and established by the dictations of the Federal Farm Board.

Question. At Washington?

Answer. At Washington.

Question. What was the real purpose of the establishment of this corporation?

Answer. Which one?

Question. The real purpose of this Stabilization Corporation?

Answer. The real purpose of the Stabilization Corporation was to conclude the stabilization of the price, which was set about when the Federal Farm Board, on October 21, 1929—when it announced to the world that the prevailing price of cotton was too low, and through the cooperatives they would advance 16 cents a pound to cover the price.

Question. At that time did the cooperative associations owe the Government any considerable sums; and if so, how much?

Answer. On October 21—at that time I think they owed the Government practically nothing, if anything, on that day. There may have been a few small loans.

Question. Did the A. C. C. A. owe the Government at that time?

Answer. Well, the A. C. C. A. had not been formed at that time. It was formed some 4 months later.

Question. How long did the Stabilization Corporation exist?

Answer. Well, from June 4, 1930, until sometime in 1933. As a matter of fact, I am not sure that the charter has been surrendered. Mr. Daily, who is here, can tell you.

Mr. DAILY. No; because under the Delaware law they have 3 years' time to file claims before assets can be released.

Question. And that has expired?

Mr. DAILY. No; I think it has about a year and a half to run.

Question. But it is not in active operation at all?

Answer. No, sir.

Question. Has this account been settled?

Answer. No; not there. There is still a few thousand dollars held to take care of any possible claims which might be filed, and that is being held on deposit in a New York bank, and then there are probably a few other claims to be adjusted; as of November 30, 1933, however, the A. C. C. A. took over all of its assets, which it had been holding for the Stabilization Corporation—those assets which it had been holding, I mean, were turned over to the Farm Credit Administration.

Question. Who subscribed to the stock of the A. C. C. A., and in what amounts? Could you give that?

Answer. I have that in my statement.

Question. Will you just make it exhibit A to your testimony?

Answer. I will get to that later.

Question. Just answer it this way. Will you kindly furnish that and make it exhibit —, to be filed afterward with this statement?

Answer. We can give you an absolute statement of that. Do you mean the original subscription or the present subscription?

Question. I want to ask for both, but I meant the original subscription in this case.

Answer. I don't believe we have the original subscription, but we can furnish it to you.

Question. Do you remember about how much actual money was subscribed?

Answer. Yes, sir; $76,950.

Question. Was ever there any further subscriptions made; and if so, when?

Answer. During January 1935—June of 1935.

Question. June of 1935?

Answer. April or June.

Question. And how much was subscribed then?

Answer. $5,000,000.

Question. To buy what?

Answer. To buy the affiliated corporations.

Question. How much did you subscribe?

Answer. I have a list of that.

Question. And how much was subscribed?

Answer. That is exhibit G.

Question. Was the $5,000,000 money of the several affiliated corporations, or was it money that was borrowed from the Farm Board?

Answer. No; it was money borrowed from the Farm Credit Administration by the affiliated corporations, or associations, rather.

Question. Has any of that been paid back?

Answer. None of it is due yet.

Question. Then, so far as the capital of A. C. C. A. is concerned, there was $76,900 of cash that was subscribed by the various affiliates in the first instance, and then in 1935—or was it in 1935?

Answer. Yes; 2 months ago.

Question. May 1935, in the spring of 1935, the various affiliates borrowed $5,000,000 from the Government and put that in stock of the A. C. C. A.?

Answer. Correct; but A. C. C. A., through its earnings over the 4-year period from 1931 to 1935, inclusive, had accumulated a little more than $2,000,000 in earnings, which have gone to capital and surplus account. Those exhibits we have, and I am perfectly willing to continue this way; but I can, I believe, by following the other method, conserve time.

Question. I will not refer to them now, but we will take that up later on. Do you remember who constituted the first board of directors—do you have those names—of the A. C. C. A.?

Answer. I believe I could call them offhand.

Question. All right, sir.

Answer. Allen Northington, of Alabama.

Question. Is he still a member of the board?

Answer. No; he is not a member. We discovered some several years ago that Mr. Northington had been kiting checks and using the funds of the association for the use of his bank, and when that was discovered Mr. Northington was asked to resign, and he did resign. He was indicted both in the Federal court and in the State court, and he was later sentenced to Atlanta for a term of several years.

Question. Was there also a Mr. Samuel Morley?

Answer. Yes; Mr. Morley was a director from Oklahoma.

Question. State whether or not he is still with the association.

Answer. Mr. Morley is not with the association at this time, other than in a nominal capacity. Mr. Morley is one of the martyrs of cooperative marketing, in my opinion. He experienced trouble with the Federal Farm Board in the settlement of the 16-cent loan. While he is still a member of the board, he is at this time inactive.

Question. Incidentally, at this point I might add, hasn't Oklahoma been merged with the general A. C. C. A. in some way?

Answer. Well, Oklahoma is an affiliated association of the A. C. C. A., as the other associations are.

Question. Mr. Charles G. Henry. He was a director then and is now?

Answer. He is now.

Question. Of the Mid-South?

Answer. Yes, sir.

Question. And Mr. J. G. Conwell, of Georgia?

Answer. Mr. Conwell is not a director of the Georgia association. The Georgia association is now in the hands of a receiver. The association owes the Government from the $1.50 loan, and from the 16-cent price which was established sometime ago, of which I spoke, and there is now owing by that association something like $300,000. I understand from the receiver there is approximately $250,000 in cash on hand at this time, with more to come yet, so I think that association will pay 100 percent.

Question. Dr. Tait Butler?

Answer. Yes, sir.

Question. Of Memphis. He is a member of your board, was then and is now, is he not?

Answer. I am not definite about Dr. Butler; he is not a member of the board of A. C. C. A. I have suggested to the directors that he might be made an honorary director, because I personally have a very high opinion of him.

Question. I agree with you in that opinion.

Answer. Thank you. The Tennessee and Arkansas corporations were merged as the Mid-South Association, and Dr. Butler therefore went off the board.

Question. And Mr. John B. Blaylock, of North Carolina?

Answer. Mr. Blaylock has retired from the active management of the North Carolina Cooperative Association.

Question. And who has taken his place?

Answer. Mr. Mann, who is now a director.

Question. Who?

Answer. Mann.

Question. What about Mr. R. O. McCutchen?

Answer. I am very happy to state that Dr. McCutchen is here to testify, but he is not now a member—a director of the A. C. C. A.

Question. Who is the director there?

Answer. Dr. Hatchcock.

Question. And Mr. N. W. Williamson, of Lake Providence, La.

Answer. Of course, Mr. Blaylock was president, succeeding Mr. Northington, and Mr. Williamson succeeded him some years ago—2 years ago.

Question. Mr. Cowan Jones, of Texas. Is he still with you?

Answer. He is now a director. Mr. W. R. Quires and Mr. Blumenthal, I believe, are directors of the Southwestern. He resides in New Mexico. He has come to testify at this hearing, and I would be glad if he would be allowed to testify today or tomorrow, if possible, because he has a very ill baby, and I promised him that I would ask that you hear him sometime tomorrow, at least, so that he could go back.

Question. I would be glad to accommodate him in any way that we can. If you want, I would be glad to hear him this afternoon.

Answer. He said he could stay until tomorrow evening.

Question. At any time you wish we will be glad to hear from him and let him testify. Mr. Harry Williams?

Answer. He was connected with the Texas association, and is not a director of the A. C. C. A. He was some 4 years ago. He resigned.

Question. Do you recall the reason for the resignation? It is not very clear. Would you mind giving it?

Answer. Mr. Williams had borrowed some $9,000 from the Production Credit Association, a subsidiary of the Texas association, and he was asked, for that reason, to resign, as the account was some 2 or 3 years—well, I will say some 2 years overdue, or a year.

Question. Was the money repaid? Was the money you mentioned recovered?

Answer. It was paid in full.

Question. Mr. Fasberry, of New Mexico?

Answer. I don't believe New Mexico or Arizona was ever a member of the A. C. C. A. If it was, it was before my time.

Question. I have already given the names of the several presidents of the A. C. C. A., and you have been the vice president and general manager all along. Mr. C. A. Moser was the vice president and secretary?

Answer. Yes, sir.

Question. Mr. J. R. Bachard——

Answer. That is Mrs. J. R. Bachard.

Question. Is still there?

Answer. Yes, sir.

Question. Mr. H. G. Safford. If he is still there, what position does he hold?

Answer. Mr. Safford was a cotton man in Houston, Tex., whom I tried to get to come with me when I became associated with A. C. C. A. and finally succeeded. I did that, however, only upon the request of President Hoover, who wrote to him and asked him as a public service to come into the operation. He resigned 2 years ago. I think very highly of him.

Question. Mr. D. G. Hill, comptroller?

Answer. Mr. Hill is still comptroller.

Question. Mr. Surratt, the treasurer?

Answer. He is still treasurer.

Question. And Mr. Ray Epstein, assistant secretary?

Answer. When Mr. Moser resigned Miss Epstein resigned, and W. R. McCullough is now secretary, and Miss Pauline Gauss is assistant secretary.

Question. And Mr. Williamson, of Louisiana, is now the president, is he?

Answer. Yes, sir.

Question. Then the personnel at present are those whom we have just named. Is that the present set-up?

Answer. Yes, sir; that is correct.

Question. And outside of this original subscription of $76,900 that you have mentioned, I believe that all of the capital for the affiliated corporations was raised by loans?

Answer. The $76,900 was paid by the individual associations, but in connection with that, do not forget that there has been added to that the reserve accumulated in 5 years' operations.

Question. How long had it operated?

Answer. It started in 1920–21—1921–22.

Question. Practically all of the associations—this association started in 1921, and had run up until 1930, when the A. C. C. A. was formed, practically all of them had gone through bankruptcy or liquidation at that time, had they not?

Answer. That had been the propaganda circulated——

Question. I want to know what the fact is; I don't want to know anything but the facts, and nothing else.

Answer. The Georgia association, as I have stated, went into the hands of a receiver.

Question. Well, that is, as I understand it, since the year of 1930. Now, before 1930, did any of them go into the hands of a receiver?

Answer. No. Insofar as I know, no association of the present group, regardless of their present name, have ever been in the hands of a receiver. Mr. Henry, or Mr. Williamson, or Mr. Hill are here. Will you state if that is not correct?

Mr. HILL. Yes, sir.

Question. Wasn't the Oklahoma association—wasn't there some kind of an anjustment out there, or some kind of an arrangement with the Government?

Answer. Well, that is a question. I personally think it was a great loss to the Oklahoma association. I am sorry, Senator, that I am not going into this prepared statement, because this statement that I have here will cover that.

Question. Yes, sir.

Answer. It all came about by reason of the workings of this 16-cent loan. The Oklahoma association was required to turn over all of the assets to the Federal Farm Board, and to give it a loan of $1.50 a bale, and this loan amounted to some $2,150,000. Because of this loan, placed on it by this settlement—now, I am glad to go into this at this time, because I am sure you will be glad to hear the cooperatives' side of it.

Question. Oh, yes; sure.

Answer. The Oklahoma association feels that it would be unfair to continue their operation unless it could receive a settlement of their debts. Through Mr. Daley, our general counsel, arrangements were made with the proper authority, and which arrangements were approved by the secretary-treasurer, whereby a solution has been worked out whereby Oklahoma turned over all of its assets, and that is to be done, to the secretary of the treasurer, in complete settlement of the debt and the amount involved.

Question. The amount agreed upon, wasn't it?

Answer. Yes; the amount agreed upon.

Question. Will you give that amount, if you can find it, because I want to ask you another question in connection with it while we are on it?

Answer. I have an exhibit covering each of those State operations.

Question. We are just confining ourselves now to Oklahoma.

Answer. The Oklahoma association was to return to the Federal Farm Board by reason of the 16-cent loan the sum of $490,851. Now, that is to be paid, in addition to a previous payment made of $198,351.71. The statement will show the whole thing, and I would be glad to take up the statement fully, which I think is necessary to completely understand the thing.

Question. The loss in the operation of the Oklahoma association was $916,000, as shown by your exhibit?

Answer. The actual loss to the members of the Oklahoma association and the Oklahoma association, as I conceive it, as it now exists, amounts to $916,258.71.

Question. Mr. Creekmore, do you recall how much money the Oklahoma association ever subscribed—how much actual money—out of the $79,960?

Answer. No, I don't; but I imagine we can get that because that's a matter of record.

Question. While we are on the subject of that——

Answer (interrupting). We will get it from New Orleans.

Question. While we are on that Oklahoma settlement, let me ask you this about it: From General McCarl's report concerning these matters, or some of them, it develops that the Government received finally about $92,000 or $93,000. I won't be exact—I'm speaking from memory—and it also appears that the A. C. C. A., about a year ago, declared what was known as a patronage dividend, of about that sum of money. Have those two items any connection at all?

Answer. None whatever.

Question. What became of the $92,000 of money that was declared as a patronage dividend to the old Oklahoma Affiliated Association?

Answer. We have Mr. Hutchinson and Mr. Wendell here from the Oklahoma association, and they, of course, can testify to that. I can state generally that the money was distributed to the members.

Question. Do you mean the members of the Oklahoma association?

Answer. Of the Oklahoma association; yes, sir.

Question. You mean by that, the farmers composed it?

Answer. Yes, sir.

Question. Let me see if I have those figures right. It appears that on April 23, 1934, about a year and a half ago, a dividend was paid to the Oklahoma affiliate, that a so-called patronage dividend was paid to the Oklahoma affiliate of $92,908.91. As I understand you, that was distributed among the farmers who composed the old Oklahoma association?

Answer. It is all the same. There has been no change in the corporate title of the Oklahoma association. It has been continuous since 1922.

Question. My purpose is to find out, if I can, what was actually done with this $92,908.91, and I imagine that you have no personal information concerning that?

Answer. I think our comptroller, Mr. Hill, or Mr. Conroy who is here, and who have audited us each year, can make a definite statement on that.

Question. I am wondering if I have it among the papers here—whether I asked for that list. Did I, Mr. Creekmore? The gentleman over there [indicating] says I didn't ask for it.

Answer. What list, Senator?

Question. I don't think I asked for a list of the Oklahoma stockholders and the amounts due each.

Answer. The Oklahoma members?

Question. And the patronage dividend and the amount due each. When you get back, or your secretary gets back, can you give me that list?

Answer. It will be that high, Senator [indicating].

Question. How many of them are there?

Answer. I don't know.

Mr. HUTCHINSON. Thirty-five thousand.

Mr. CREEKMORE. But Senator MCKELLAR is asking, if I understand him correctly, for a list of the members who participated in the 1933-34 operation and because of that participation received a patronage dividend.

Senator MCKELLAR. That's correct.

Mr. CREEKMORE. We will furnish it to you.

Mr. WENDELL. Some of that dividend was distributed not only to members but to producers.

Mr. CREEKMORE. Nonmember producers?

Mr. WENDELL. That's right.

Senator MCKELLAR. Mr. Wendell, I would like to ask you this while we are on the subject: Was all of that distributed?

Mr. WENDELL. All but a small amount, which was withheld for paying the stenographers and secretaries and bookkeepers, etc.

Senator MCKELLAR. When was that distributed—about when?

Mr. WENDELL. I can't give the exact date. It was distributed almost immediately after we got that check.

Examination by Senator MCKELLAR (continued):

Question. Mr. Creekmore, I want to ask you if you have a copy of your charter?

Answer. Yes, sir.

Question. I believe I asked you for that?

Answer. Senator, we've got nearly everything.

Question. What we are after is facts. Let me ask you whether you recall a statement made by Messrs. Stone and Williams, a former member of the Farm Board, and yourself, that the A. C. C. A. and the various regional cooperatives were farmer-owned and farmer-controlled?

Answer. I don't recall such a statement, Senator, but I am willing to make it today.

Question. Do you know how memberships in the various affiliated associations are secured?

Answer. Generally speaking; yes, sir.

Question. I would like to know that. Can you tell us how they are secured?

Answer. Well, I think probably these various representatives of the State associations can give you more definite information, but I will be pleased to tell you generally.

Question. I will be pleased to have you do so.

Answer. We will take the Mid-South. Their contract is quite similar to Mississippi, Alabama, and other associations.

Question. I want to get that Mid-South seed-loan paper, if you please.

(Witness hands Senator MCKELLAR paper.)

Question. Excuse me. [Examines paper.]

Answer. I think I might say this, that the members of the Mid-South Association, and all other associations, in delivering cotton to their associations, on the draft either sign a membership agreement—I can't go into technical details—or it is signed for them insofar as the Mid-South is concerned—I think if it is signed by an agent the Mid-South recently has adopted a policy of mailing a membership card to the member.

Question. Suppose I have one bale of cotton and bring it to Memphis—assume I am a Tennessee or an Arkansas farmer and I bring it in on a wagon and turn it over to the Mid-South, and ask them to sell it for me; then in the receipt that I am given there is a clause in it, in small type, which declares that I am a member of the Mid-South Association—isn't that the usual way?

Answer. I think that's generally the way.

Question. Now, I notice, and I notice with some degree of interest, I want to say—take the seed-loan borrower; and that has been an institution that has been near my heart for many reasons, the principal reason being that those who borrow from the seed-loan office are usually among our poorest citizens, who are not able to finance themselves in any other way in making their crop; and I notice that on nearly every bale of cotton handled by the Mid-South those seed-loan borrowers have an item of membership fee of $5 charged against them. Many of them make only one or two or three bales, and some of them sell only one bale to the Mid-South and I am wondering if you approve of the charging of those poor farmers, unable to finance themselves in any other way, of $5 for a membership in the cooperative association, and that charge is made simply by putting in small letters a clause in the receipt declaring them to be members of the association. Is that the way the cooperative association gets its members?

Answer. Senator, I am glad to hear you say it is a matter close to your heart, because it is also a matter close to us. I think the cooperatives render a service, not alone to the members but to the United States Government cottonseed loan force, for which it has never gotten credit. The cooperatives persuaded Secretary Hyde to permit the operation of collateralized loan instead of selling the cotton outright. The question as to the $5 a bale has caused me some concern, but as I remember, and Mr. Henry will be glad to testify—I think I am trying to cover too much ground—but as I remember it, 50 cents per bale; if a man delivered only one bale he paid only 50 cents. I am not sure about that, but it is my recollection.

Question. I have given him the typical cases and he can explain that.

Answer. I say this: That the service the cooperatives rendered at a very great cost to themselves was such that if it was necessary the seed-loan members could and should be able to well

afford to pay $5 for the services received. There has been too much of an attitude on the part of the cooperative's directors themselves to do too many things for the benefit of the cooperatives as a whole at a cost to the memberships. Of course, somebody must pay the expense.

Question. Now, I may say that I began life as a cotton farmer and I was a one-horse or, rather, a one-mule man, and I borrowed money from a merchant to make my crop and paid him back when the crop was ginned and hauled to the county seat, and I have been very greatly interested in these charges, and I want to ask you about it. Here's a man that so far as the seed-loan books show, turned over one bale of cotton on the 27th of February 1934, and that was sold by the Mid-South Cotton Growers Association for $51.31. Previous to that time evidently the Mid-South had done just what you mentioned a moment ago. Instead of settling it at once, they had advanced him $5.59 in cash, and, of course, that's a proper deduction, and he was charged interest on that cash advance of 60 cents. I don't know how long it was or what the rate was and I haven't had time to go into the figures.

Answer. I would say about 2 years.

Question. I will have to get you to explain and probably have to ask Mr. Henry to get it for me. The next charge is $1.30 insurance, and the next charge $4.55 storage, and then here is a most remarkable charge to the seed-loan man that borrows $50 or $75 or $100 or $150. I believe the limit is $200—it charges him $1.40 other than regular seasonal charges. I don't know what that is. I am sure Mr. Henry will explain that when he goes on the stand. And then a membership fee of $5 and then a charge for this paper [referring to newspaper] of 50 cents on that one bale of cotton, and then his interest on cash paid out for freight and storage—that I suppose is the $4.55—40 cents more, making gross deduction of $19.34 on a bale of cotton.

This leaves an enormous charge against that farmer—if it is correct—a charge much larger than I paid when I was a young man cotton farmer on a one-horse or one-mule cotton farm. These figures are to me somewhat distressing, because I voted for all cooperative associations and the cooperative movement generally, and I wanted to see it do what we expected it to do; therefore I am asking you this question: Don't you think those charges are out of line?

Answer. I will be very glad, Senator, to go into it. I will have Mr. Hill and Mr. Hays, our auditors, go into it.

Question. That will be fine, and I thank you very much for it. Now, not speaking technically at all but just speaking generally, the Government has canceled the indebtedness that the cooperatives have owed it on several occasions heretofore?

Answer. As you say, not speaking technically, my answer is that morally they have canceled nothing. They owe us money.

Question. Let's look at the figures a moment. The Government furnished all the money that has been put in the various cooperatives, except the $76,950. The Government has had, on three different occasions, to cancel the indebtedness owed by the cooperatives. Wait a minute, I want to correct that. On two different occasions. Didn't they virtually cancel the obligation by means of stabilization—formation of the stabilization operation and then provide for the absorption of the losses? That was in 1930.

Answer. Technically, this is generally what the Government did in the settlement of the 16-cent loan—1929 stabilization operation—they took all of the assets, which I estimate amounted to two and a half million dollars at that time. They put the cooperatives in debt to them $1,700,000 and took over the cotton which morally they should have taken over without any loss to the cooperatives. I say "morally", because I hope to be given an opportunity to state just what happened and convince you that I am right.

Question. I will be very happy to have you do so—to have you put everything before us, because we desire nothing else but the facts, and I know you will give them to the best of your ability, but here's what the books show—that in 1930, when the stabilization corporation was formed, in substance the balance as shown by the books was absorbed by the Government.

Answer. Yes, sir; and I have a statement showing just what that loss is.

Question. We will be glad indeed to have it and for you to discuss it. Now, then, in 1933, there was another cancelation, wasn't there, of old debts?

Answer. By an act of Congress in 1930–31, a 90-percent loan, which was another stabilization operation of the Federal Farm Board, was settled by the Farm Credit Administration taking over all of the cotton on hand of the 1930–31 operation at really the loan value, plus carrying charges, plus the operating costs, plus the profits we had made.

Question. And the A. C. C. A. and affiliated associations were given another chance to proceed, were they not? They couldn't have proceeded at that time unless they had had this prior indebtedness wiped out?

Answer. Technically, I think you are right.

Question. That's twice that the Government has accepted the losses and the associations, or the members, have not borne any of the losses, isn't it?

Answer. I don't think so. It is twice that the Government has settled with the cooperatives, where they knew the cooperatives were agents, but the cooperatives were penalized heavily by the settlement.

Question. Be that as it may, I will now read this bill which was introduced January 21, 1935, by Senator FRAZIER. It reads as follows:

"*Resolved, etc.*, That for the purpose of adjustment and settlement of losses sustained by the cooperative marketing associations dealing in grain during the stabilization operations of the Federal Farm Board in the years 1929 and 1930 when such cooperative marketing associations were induced and requested by the Federal Farm Board to withhold grain and/or cotton from the market and to make advances to their members in order to stabilize prices, the Federal Farm Credit Administration is hereby authorized and directed to make such adjustments and settlements in accordance with the understanding that such cooperative marketing associations had with the Federal Farm Board, and on the basis of a price or a sum equal to the amount directly loaned or advanced to such associations plus carrying charges and operation costs in connection with such grain and/or cotton from the date of the loans or advances to the date that such grain and/or cotton was finally taken over by the Federal Farm Board or delivered pursuant to its instructions."

If that bill had become the law, then for the third time during the history of the A. C. C. A. and its affiliates the Government would have absorbed their losses?

Answer. The Government would have absorbed the losses, but the losses were incurred by the Government through the Federal Farm Board.

Question. Of course, that's a matter to be argued; but I might suggest it is claimed by the Government that it lent vast sums of money. Have the cooperatives themselves put up $76,950 as against these very generous loans by the Government to carry on their business? The Government having done that much, and put it all in the hands of the American Cooperative Association and its affiliates, why should the Government ever have done all that for the cooperatives? Why should the Government be required to bear all the losses?

Answer. It is just simply, as I see it, whether the Government wishes to stand back of the Agricultural Act.

Question. In other words, you don't think the bill goes far enough. Has any cooperative, any member, or any subsidiary company, or any member of the A. C. C. A., ever had to pay a single dollar in the formation or operation of these various associations?

Answer. Well, as I have stated, as I estimate, we haven't got to the point of making an exact statement as to that, because it will cost a good deal and will take a lot of time to do it. As I state, in the 1929–30 operation, the 16-cent loan, in the settlement it cost our cooperatives $4,000,000, in round figures, by the appropriation of the assets, and by putting the cooperatives in the debt of the Farm Board $1,700,000. In addition to that the members lost their equity in patronizing the 16-cent loan, and that caused a loss of $5 a bale, or $6,500,000, and, in my opinion, the members of the cooperatives and the cooperatives lost in the 1929–30 operation a total of some $10,500,000.

Question. Well, however that may be, the fact remains that there have been three general payments—one in 1931, 1933, and now there is this one, which requires the Government to be soaked with the loss—the third one is the Frazier bill. During that time has a single member of any cooperative association, affiliated, or any of your associations, ever been called on to put up $1 for any reason?

Answer. Yes, sir. In actual operation the member associations of 1929–30 were called upon to put up out of their assets, on the basis of this $1.50 a bale, of which I have spoken, or $1,700,000, and considering that there has been about $4,000,000 of the farmers' money actually taken in this operation.

Question. Now, I want to come back to my original question. Has any association ever assessed against a member—a cooperative member, a member of any cooperative association, or affiliate—has any farmer member—if I may put it that way, to make my meaning perfectly clear, it makes no difference where it came from—but has any farmer member—that is, any member of any of these cooperative associations—been assessed by your association or by any affiliate with any loss in any way?

Answer. In the 1929–30 and 1930–31 operations.

Question. The members were.

Answer. I am trying to get it clear.

Question. Yes, sir.

Answer. In the 1929–30 operation, and again in the 1930–31 operation, no member, insofar as I know—and I believe I would know if they had been assessed—was not assessed for any loss incurred in those particular operations.

Question. Well now, has any member ever at any time been assessed for any loss, however incurred, under any circumstances?

Answer. Yes; I think so, Senator; but I can't testify, only generally, on that.

Question. Can you tell me? I want to get this clearly, and I ask you if at any time you can tell me anyone connected with any association, or if any of your assistants can tell me whether any member has ever been assessed?

Answer. Well, I am sure that there are some of the members here who could answer that.

Question. Maybe Mr. Henry could tell me.

Answer. I think so.

Question. I would like to call on him for that, because I know him and I esteem him highly, and I want to find out what the facts are. Well, now, let me ask another thing. Have you got a statement showing how much money your association, and the various

affiliates of your association, have borrowed from the Government during the time that it has been in existence? Have you got that made up? If you have, I would like to look at it. Do you have a statement made up that will reflect that?

Answer. Senator, there are only a very few things that you can ask us that we haven't got prepared. There are some that were impossible to get in the time that we had; or else, if we do not have them, we did not understand the request.

Question. Well, of course, we merely want to get at the facts in this connection, so that we may be able to reach the proper conclusion.

Answer. Here is a summary of the loan obtained from the Federal Farm Loan. Here is a complete statement of that.

Question. How much was it?

Answer. Here is the summary of it made up in full. I will let you see the statement. Now, details of that loan—Mr. Hill can tell you about that.

Question. I would like for Mr. Hill to do that.

Answer. Yes, sir.

Question. I notice that the Cotton Stabilization Corporation—that is, from June 4, 1930, until October 15, 1935—in financing loans received $12,526,447.34, and in cotton equity there is shown loans of $29,388,723.26. Now, there is a revolving loan shown here of $221,255,474.84, making a total of $263,179,648.44; is that correct?

Answer. 263,170, Senator, 648. You gave that as a "nine."

Question. Now, I notice on the same page, this repayment of renewals, this item here, that that aggregates $169,711,177.05. Now, then, I find from the same page cancelation of indebtedness arising from donation of cotton to the American National Red Cross, and that was done pursuant to the passage of a resolution of the Seventy-second Congress of the United States of America, $78,250,-714.30, and the remaining indebtedness pursuant to the passage of the Agricultural Adjustment Act, approved May 13, 1931, $15,208,-757.09; is that correct?

Answer. Yes, sir.

Question. Those are the several items?

Answer. No; that is wrong. Mr. Hill, will you explain that?

Question. Well, excuse me, Mr. Creekmore, I do not mean to get away right now, and we will ask about that later on. We have found out how much money the cooperatives have actually put in this business, namely, $76,950. Now, I would like to know how much the Government has put in during this time?

Answer. Well, of course, you concede, I suppose, that where you withhold reserves from your members, and that is retained by the cooperatives, that the cooperatives have put that amount in the business. If you had a $50 bale of cotton, and if you held out of that 50 cents, and at the end of the season you put that in the reserve, then it would seem to me that the cooperatives have put the 50 cents in the business.

Question. If they have made money?

Answer. Yes. Well, we will show you that we have made money.

Question. All right.

Answer. I believe I can sum this up and that I can give you the information that you want to know about. The Federal Farm Loan Board, or the revolving fund, in the 1929–30 and 1930–31 operations, lost $107,000,000; $27,000,000, approximately, in the 1930–31 operation and some seventy-odd million dollars in the 1929–30 operation, taking the value of cotton donated to the Red Cross as of the date of donation. Against that the cooperatives and their members have lost $20,500,000, as I estimate it.

Question. Did the A. C. C. A. also deal in spot cotton all during that time? Well, the answer will be "Yes", I imagine?

Answer. In the 1929–30 season, the A. C. C. A. was organized just about after the big rush of the 16-cent loan, and it handled the cotton in the 1929–30 season. Then it was after that time that they wound up with the 10-cent loan.

Question. Did it buy any futures is the question?

Answer. The A. C. C. A.?

Question. Yes, sir.

Answer. It bought futures for its member associations as a gift, and spot cotton was sold.

Question. During the history of the A. C. C. A., or any of the cotton associations, was any money ever paid out for that purpose?

Answer. I can tell you about——

Question. I am talking about this board.

Answer. During the 1929–30 operations and the 1930–31 operations, at the direction of the Federal Farm Board, and in the 1930–31 operations, and to some extent in the 1929–30 operations, with my approval, in order to maintain the position of 1,240,000 bales long for stabilization and some 2,000,000 long for the 1930–31 season, we went in the market and made purchases. That was not hedging.

Question. What do you mean by "maintaining your position"?

Answer. I mean if I have 1,300,000 bales of cotton of the Cotton Stabilization Corporation, and we think it is advisable or necessary to sell spot cotton, then to maintain our position of 1,300,000 bales we must buy some other cotton, and we buy futures to maintain the position.

Question. Why was it necessary to maintain a position by buying futures?

Answer. That was the position of the Federal Farm Board. They wanted that done, and it was, therefore, necessary to maintain the position of 1,300,000 bales.

Question. Did they ever by resolution direct that such a position be maintained?

Answer. I can't tell you whether by resolution or not, Senator McKELLAR.

Question. Who gave you those instructions, if you remember?

Answer. Mr. Legge.

Question. Mr. Legge?

Answer. Yes, sir.

Question. He is now dead?

Answer. He is now dead.

Question. Do you know whether you have any written document from Mr. Legge about it?

Answer. Well, I don't know, but the Federal Farm Board report for 1930, 1931, and 1932 covers the question, where they make the statement that that was done.

Question. Oh, what I was trying to find out was who it was that authorized it to be done; that is, who directed that such a position be maintained. I can understand how futures can be bought to hedge spots, but I cannot understand how they would be bought for any other purpose, except hoping that cotton would go up.

Answer. This is the third annual report of the Federal Farm Board.

Question. Yes, sir. Give the page, please, sir.

Answer. Page 74 [reading]:

"Stocks had been acquired originally in an effort to protect farmers from the full force of the decline in prices due to the depression. Loans on cotton at 16 cents per pound to cooperatives in the fall and winter of the 1929–30 season, did serve to hold the price of the commodity above the 16-cent level during the period when growers were marketing about nine-tenths of their 1929 crop. When these loans were made it was expected that the depression would soon be over, and that cotton could be sold for well above the amount loaned. The price finally declined, however, to a level where values were less than the loans made by the Board."

Now I am going to leave out a few sentences and then will continue:

"It was decided, therefore, to hold the stabilization cotton off the market during the remainder of the crop year 1930–31. In accordance with this policy net holdings of stabilization cotton were not reduced during the fiscal year 1930–31, although from time to time sales were made to spinners from stabilization stocks. Such sales were immediately replaced by the purchase of other spot cotton or of futures, the latter being converted into spot cotton as opportunity developed. The total unhedged position was maintained at 1,241,509 bales as closely as possible until December 1930, when a small addition was made to stabilization stocks. As a result of a 2-cent decline in the cotton market between November 1 and December 15, 1930, which threatened to go still further, the corporation purchased 78,300 bales of futures on the New York Cotton Exchange in a few days during December 1930, and later transferred this to spot cotton."

The investigation of the committee is invited to this report to which I have referred.

Question. You think that establishes the fact that the policy of the Farm Board, and the policy of your association was brought about to maintain that position, do you?

Answer. Yes; and I think that was being done then and is being done today by the Government.

Question. It is being done?

Answer. Yes, sir.

Question. With the cotton cooperatives?

Answer. No, sir. The cotton cooperatives, since the stabilization operations, concluding July 31, 1931, have not speculated in the advance or decline of the market. As cotton was received, and the price fixed by the members for the contract, the cotton was sold to a certain amount. As the cotton was sold by us and the price fixed by the mill, those contracts have been repurchased. That is a hedge.

Question. Of course I understand, and you say you have done that for maintenance purposes, but what I had in mind is if you would hedge as it is usually referred to, if you know what I mean.

Answer. That is true, yes; I understand, and it has been automatic, Senator, since the beginning of the 1931–32 season. We have automatically hedged. Sometimes we have failed to hedge a very small percentage of our low grades. As a rule, however, we hedge, with the exception of one time, which I will be glad to give you. When the 10-cent loan was announced in 1933 by the Commodity Credit Corporation, for a period of 10 or 12 days that policy was lifted, and then when the definite policy was later announced, it was again renewed and has been continued since. With those two exceptions, the A. C. C. A. has not speculated in the advance or decline of the market.

Question. Now let me ask you, does the A. C. C. A. or its membership own a membership on the New York Cotton Exchange?

Answer. It does.

Question. When did you buy that, at the beginning of its operations?

Answer. No; at the beginning of its operations I agreed to use my membership, and give them the advantage of that, and that was continued for 2 years. Perhaps 6 months or a year later there was a membership purchased for the association and is in the name of one of the vice presidents down there.

Question. Now, do you remember what that cost?

Answer. About $12,000.

Question. Now, I will ask you this. Have you got a statement showing how much in commissions that your association or the auxiliary associations have paid for commissions for buying futures?

Answer. No, sir.

Question. Or selling futures?

Answer. No, sir. That is one of the things we could not get up because our auditors state it will take 6 weeks to do that.

Question. Let's see what you have there.

Mr. HILL. We do not have anything about that.

Question. You do not have anything at all? Well, will you please have something? Just one moment and I will see what you have on that subject. Suppose you refer to it in order to refresh your memory. I see on the balance sheet given you by the Comptroller General's report of July 31, 1932, "margin deposits." Doesn't that show what you put up to cover on cotton?

Answer. I presume it would; that would be a way you could describe it.

Question. It is set down here as $3,549,458.69. Could you say whether or not that figure is correct as reported by the Comptroller General?

Answer. Now, is that for the Cotton Stabilization Corporation?

Question. No; that is the A. C. C. A. That is the balance sheet of the A. C. C. A. which is dated July 31, 1932, and this has on it, "marginal deposit, $3,549,458.69." That indicates, if that is correct, that indicates very large future transactions, does it not?

Answer. I don't think so. Of course, I don't know what season.

Question. This is the balance sheet, and I will show it to you here. It shows as an asset in this statement, as follows: "Marginal deposit, $3,549,458.69." Does that not mean that you were carrying a pretty large amount of cooperative cotton?

Answer. Let me make this statement.

Question. Yes.

Answer. First, the Cotton Stabilization Corporation, while I was president—I was, nominally, president. The Federal Farm Board dictated and directed its policy. I followed orders. The bylaws will show that. The record will show that. Around the 1930–31 operations, it was agreed by the Farm Credit Administration and A. C. C. A. that this was to be done, and that is that we were to carry on our stabilization operations apart from our regular business. Now, I don't know, of course, which operations that has reference to. I will say this: For some time we would put up $5 a bale margin on our outstanding futures, and with $3,000,000, that would be 600,000 bales, and I would not be able to differentiate that statement at this time from the operations of the Federal Farm Board. Mr. Hill, of course, can correct me on that.

Question. What do you have to say about it?

Mr. HILL. I do not know the amount from memory.

Answer. I think when Mr. Conway takes the stand that he can give you a statement of what we had out on margin, I think.

Mr. CONWAY. Yes.

Senator MCKELLAR. All right, sir; that will be fine.

Question. I find here market difference, and this is from the balance sheet for July 31, 1932, and you show here, right here, Mr. Creekmore, the figure of $1,582,355.68. Could you explain what that there has reference to?

Answer. Well, I think we had that covered at one time. It has to do with the market difference.

Question. What does it mean?

Answer. The difference between the value of the futures sold, or the price sold to the mill, and the value as of the day the inventory was taken.

Question. Assume that to refer to the value of cotton. In other words, cotton rose after it was sold?

Answer. It might have risen or declined, one way or the other.

Question. But that is an item of that kind?

Answer. One way or the other. It might be a debit or it might be a credit.

Question. Well, on this particular occasion it was a liability, and I imagine that was a loss?

Answer. I imagine it was if it is carried as a liability, and of course there was a corresponding profit as to the A. C. C. A. operations in the enhancement or value of spot cotton.

Question. Mr. Creekmore, I now want to ask you what is an immediate fixation pool as used by the association and set up.

Answer. Immediate fixation pool is where a member is offered an advance against what is considered a world market value, less overhead, less the cost of delivery.

Question. Well, now, suppose I am a seed-loan borrower, and I bring you a bale of cotton, and you advise me that the immediate fixation-pool value—I am a member, and I have proof of that, and I bring you my cotton, and the immediate fixation-pool cotton, say, is 10 cents, and afterward you sell the cotton for 11 cents. What becomes of the difference?

Answer. It would not be possible in the operation to make a profit of $5 a bale.

Question. Well, suppose it is 10¼ cents, or 10¼ cents, for instance. Suppose I am the farmer, and I tell you to sell it to the fixation pool, say, for 10 cents a pound—I am not describing exact conditions, understand, I am using figures for illustration. I take it you sell the cotton for 10 cents, and you take it over, or your affiliates take it over at that price. Now, suppose 2 weeks later, or a week later, or the next day cotton goes up one-fourth of a cent. Does your member get the quarter of a cent, or does the affiliate get it?

Answer. I would like to suggest, in order that the Senator may understand this, Mr. Henry, you give us a statement of your membership, and I know, Senator, he can give you the details of it. The affiliated corporation turns over to us the immediate fixed pool cotton, and then it is automatically sold against that price, that is, futures, in order to guard against a decline in the market. Then if there is an advance, and if we get more, to answer your question, the proceeds, if any, resulting from the operations are distributed back to our members on the basis of approximately 50 percent of the profits to the members, and approximately 50 percent is withheld as a reserve. Now, if there was a 25-point advance in the market, that would have no bearing on the operations.

Question. In other words, for instance, suppose you bought from me a bale of cotton for $50, and you paid me for it, and then it was sent on to the Mid-South, we will say, and then afterward cotton sold actually for 11 cents, or even 12 cents. I, as a member, would not get any advantage out of this increase in price of the cotton, would I; but you say, as I understand you, that that would be credited in some way, and it would go in some fund for the—or party for the—payment of dividends to members and also to increase their reserve; is that right?

Answer. We do not follow the individual member's bale through.

Question. Yes, sir.

Answer. We do not distinguish that. It would be impossible to handle Senator MCKELLAR'S bales separate from those of the other members. The expense would be far too heavy. What we do is to pool the cotton, and we average it, and take average profits per bale. On a $5 profit a bale you would be returned approximately $2.50 a bale in cash, on a baleage basis; $2.50 would be held as reserve. I don't know, Senator, whether you understand me or not.

Question. I don't think I do.

Answer. That is all right. I hope I can make it clear. A. C. C. A. has increased its capital stock by $2,000,000 because of the withholding of a part of its earnings, which is simply a reserve to be used to take care of possible losses, or to increase its capital in order to enlarge the business.

Question. Well, now, you have been in business about 6 years, nearly 6 years. How many dividends have you declared in that time?

Answer. Well, I have a statement here of the dividends and the equities distributed. I think it amounts to a total of $6,000,000.

Question. Six million or sixty?

Answer. Six. Don't give us too much credit.

Question. Six million. If you have a statement of that, I would like to see it.

Answer. Member associations—this includes stock dividends we have made to our members.

Question. That is meant to members, is it?

Answer. Member associations. Equities distributed to member associations during the period.

Question. This is the statement here?

Answer. Yes, sir.

Question. January 11, 1930, date of the corporation, to June 30, 1935, or the season of 1931–32, $2,015,259.29; 1932–33, $1,531,511.40; season of 1933–34, $480,058.27, and so on. Now, that distribution was made to the various members or to the affiliates, in other words?

Answer. That is true.

Question. There was also distributed in capital stock, season of 1931–32, $825,254.65; season 1932–33, $303,095.55; or a total of $6,150,153.44. That distribution was all made to affiliates, as I understand.

Answer. That is correct.

Question. I am wondering about the farmer, and I want to know about that because I am particularly interested in the farmer. I want to know where that came in in the matter. How much has been distributed to them by your association or its affiliates?

Answer. I think there is a statement there which will show the results before distribution to farmers, after withholding the reserve on the part of the affiliated associations.

Question. What I wish, I would like for you to give us the amount that had actually been distributed to members of the association in all of the years.

Answer. Well, I am sorry that I do not have that at the moment, Senator.

Question. Can you get it?

Answer. I think we can supply it to you from the exhibits from the representatives we have here.

Question. All right, sir.

Answer. I think I might call your attention to this distribution in capital stock of $1,125,000, and in addition to that we have accumulated reserves of some $900,000.

Question. Has your association made money this year?

Answer. We can't tell until the end of the year. We can't tell that now.

Question. Did you make money last year?

Answer. Lost $212,000.

Question. And the year before how did you come out?

Answer. We made money. We have a statement here of the operations.

Question. Well, if you have it, I would like to have it for just a minute.

Answer. I have the other statement, also. I can get it quicker than I thought I could get it.

Question. All right, sir. According to your records, from January 11 to July 31, 1930, you made $501.36. The fiscal year ending July 31, 1931, $37,122.80. Fiscal year ending July 31, 1932, $1,143,451.84. Fiscal year ending July 31, 1933, $610,307.17. Fiscal year ending July 31, 1934, $1,875——

Answer. No.

Question. $875,686.10. Fiscal year ending June 30, 1935, loss of $212,663.87, or a total profit or gain for the 6-year period of $2,454,405.40. Well, now, I want to ask the question: If the gain shown for the 5 or 6 years was a little over $2,000,000, how

could you divide up six millions in profits to your affiliate companies, I mean a little over six millions?

Answer. We were paying equity and patronage dividends.

Question. After making $2,454,405.40, after you had made 6 millions plus, then you had this other?

Answer. No; that is not correct.

Question. I am just wondering how those figures work.

Answer. You will remember that of the $6,000,000, it included $1,300,000 distribution in capital stock from our earnings, or a gain to that extent. Because of this $2,445,405 in earnings we have distributed in patronage dividends and capital stock, or in cash dividends, approximately $1,500,000.

Question. Well, here is what is troubling me, and I am sure that I just don't see it. You have divided up among your affiliates some six million plus dollars in stock, or whatever you may call it, in capital stock.

Answer. Yes, sir.

Question. Or a dividend, or whatever it may be called.

Answer. That is correct.

Question. And then you show earnings of $2,505,000, and my difficulty is finding just how you paid out six millions in dividends to these people when you made only two and one-half millions.

Answer. Approximately $5,000,022 of the $6,150,000 mentioned was paid to member associations in cash for equities or patronage dividends, on the basis of their operations during the year. In addition to that, A. C. C. A. in earnings withheld from the operations, showing a gain of some $2,000,000 in the operations.

Question. Actual operations of the company?

Answer. Actual operations of the company.

Question. Now, I can understand that, but I can't understand whether you got four million, or nearly four million, or some three million plus.

Answer. Well, the gain of the A. C. C. A. and distinguished from the equities and patronage dividends paid. We did not keep our earnings, or the balance due our members at the end of the year for the account of the A. C. C. A. but the equities were to be paid and the patronage dividends under our bylaws to be paid amounted to about 50 percent.

Question. Well, I apologize for being stupid, because I don't know what you are talking about, Mr. Creekmore.

Answer. I am sorry of my inability to explain it to you.

Question. What is this $2,000,000 figure here?

Answer. The $2,000,000 is the reserve withheld from the operations by capital funds.

Question. That is after having paid the $6,150,000?

Answer. No.

Question. Haven't you got more than you think you have? Haven't you made, instead of having made $2,454,450.40, isn't it $8,650,000, or thereabouts?

Answer. No, sir. The gain must be considered. The profits from the operations of A. C. C. A. must be considered separate and apart from the equities and the patronage dividends paid.

Question. Will you explain to me first how the patronage dividends are paid. Are they paid in money?

Answer. They are paid in cash to the members of the association in the territory.

Question. Distributed entirely to members?

Answer. With one or two exceptions.

Question. But how do you arrive at paying patronage dividends, what is the patronage dividend?

Answer. $480,058.27 on the 1933–34 season.

Question. You paid $2,000,000 in the 1931–32 season, didn't you?

Answer. That was in a different operation. That was figured on a different basis entirely.

Question. Of course if you paid it out, this $2,151,251.29 for 1931–32, you must have got that money from somewhere. Did you get it from income, or out of a Government loan, or did you get it out of your future operations, or just where did you get the money? That is what I am interested to know.

Answer. We got the money, that is the difference between the price at which the cotton was received, and then the final net price, and it amounted to $2,000,015, and of that amount A. C. C. A. withheld a certain amount of the reserve, which went to operating expenses. The amount withheld in the various seasons can all be shown there.

Question. Well, now, Mr. Creekmore, as I say, you will find that I am a little dusty about the matter, but here is your statement for this year's operations, which is dated July 31, 1932, and it shows $1,143,451.84.

Answer. Yes, sir.

Question. And on that same year, at this same time, you paid out to your affiliates 2,105——

Answer. $2,150,000.

Question. $2,150,000.

Answer. That is right.

Question. You must have made that money, or you could not have paid it out to your affiliates. I do not know how you could have paid it out to your affiliates unless you had made it from some source, and I do not see how you got it.

Answer. Well, Senator, if you will let me make this statement.

Of course, I am glad to proceed as you wish. I am here to give you whatever information possible, but this statement which I have prepared, I think it would clear up everything.

Question. I wanted to get these other matters off.

Answer. Well, I have spent a good deal of time on it, and I think that covers things.

Question. Suppose we take an adjournment until 2:30.

Answer. Let's make it 2, if it pleases the Senator.

Question. Sure, I will be delighted to; I want to suit your wishes.

Answer. We have some 50 or 75 people up here, and they would like to get finished as soon as possible.

Mr. McKELLAR. Let's start at 2 o'clock, and we will now take a recess until 2 o'clock.

(Noon adjournment.)

The hearing reconvened at 2 p. m., October 28, 1935.

E. F. CREEKMORE resumed the stand and testified as follows:

Examination by Senator McKELLAR (continued):

Question. Mr. Creekmore, just before you begin reading your statement, I want to clear up one or two matters. The first I want to refer to is the Oklahoma Cotton Growers' Association. On April 4, 1934, as appears from report of the Comptroller General of the United States, the Oklahoma Cotton Growers' Association owed the Government $585,366.15, and it appears from that report that on or about that date the Oklahoma Cotton Growers' Association wrote to the Secretary of the Treasury and the Farm Credit Administration, setting out an indebtedness of $585,366.15 and showing that the association had on hand $14,859.20 and the following assets:

"1. 2,402 shares of stock in American Cotton Cooperative Association, New Orleans, La., of par value of $100 per share, which it estimates to be of actual value $24,020.

"2. 11,133 shares of stock of the Oklahoma Agricultural Credit Corporation, estimated value $10,520.53.

"3. Accounts receivable in the amount of $3,618.50.

"4. Accounts receivable from American Cotton Cooperative Association, New Orleans, La., for the sale of loose cotton, $6,944.51.

"5. Accounts receivable from American Cotton Cooperative Association, New Orleans, La., representing $1 per bale on cotton handled for the Oklahoma association after the 1932–33 pools were closed and before July 31, 1933, $2,052.

"6. Accounts receivable from American Cotton Cooperative Association, New Orleans, La., for reserve equity in seed-loan cotton, $6,840.03.

"7. Membership fees notes totaling $60,409.85, being past due and uncollectible, and of no value whatever.

"8. Accounts receivable from A. E. Kobs and A. F. Duk for cash advances totaling $312.59.

"9. Due from hotels for advertising in cooperative newspaper in the amount of $115. Uncollectible and considered of no value.

"10. Accounts receivable from R. C. Poston in the amount of $6.42. No value.

"11. Real estate and buildings having a depreciated book value of $59,586.85, which represents cost less depreciation to July 31, 1933. Valued at $22,000.

"12. Office furniture and fixtures and equipment and automobiles having a depreciated value of $12,553.33, valued at $4,600."

Question. That's a total estimated value of $95,767.36, and that letter contains the following—that letter from the Oklahoma Cotton Growers Association:

"We offer the above assets in settlement of the above notes and interest thereon. We understand that the United States of America cannot receive property in settlement of a debt. We have made arrangements to convert all of the above assets into cash for the amounts set opposite each, and we offer to pay said amounts, plus the cash now on hand, in settlement of said debt. In order to do this it will be necessary for us to sell and convey the assets listed above. There are practical and legal difficulties which make it impracticable to do this prior to approval of this order of settlement. We have, however, secured a purchaser who has agreed and is able to pay the amounts set opposite each of the said items on approval of this settlement. Upon approval we shall promptly forward a check for the total amount offered above, namely, $95,767.36, which includes cash on hand in the amount of $14,859.20."

Now, then, the Comptroller General's report also shows that the Secretary of the Treasury approved that settlement. Was that settlement made?

Answer. The settlement was made, Senator. During luncheon I telephoned my office for a statement, which will be here tomorrow morning. On a whole, as I remember it, the statement is correct except for the amount. I understand the amount of the debt was not as large as shown there. I, of course, am just speaking from memory in connection with something that happened 2 years ago.

Question. If the Oklahoma Cotton Growers' Association sold every dollar of its assets to the Government in compromise of a $585,000 debt—assume that figure to be correct for the moment—for $95,767.36, how would the Oklahoma Cotton Growers' Association get started again, because, as I remember, you said the Oklahoma association still existed and there had never been any interim?

Answer. That is correct. It continued to go, through financing its operation through the A. C. C. A.

Question. Then this statement in the letter of the Oklahoma Cotton Growers' Association isn't true? It says, "We have, however, secured a purchaser who has agreed and is able to pay the amounts set opposite each of the said item on approval of this settlement." Who was the purchaser?

Answer. The A. C. C. A., under the approval of and after the appraisal of the assets by the Farm Credit Administration, acting for the Secretary of the Treasury.

Question. The the A. C. C. A. now owns the Oklahoma Cotton Growers' Association?

Answer. Oh, no.

Question. Why? If the A. C. C. A. took over the assets, or bought the assets and paid $95,767.36 for them, and transmitted that sum to the Government, why isn't the A. C. C. A. the owner of the Oklahoma Cotton Growers Association?

Answer. Because, Senator, it is just like a merchandise establishment making a settlement with its creditors. They might turn over all of their goods for cash and take that cash and make a settlement with the growers, and the people who had had dealings with them—the jobbers—might well finance them and let them build up another stock of goods; but we must remember that this cooperative is a nonprofit movement, but a farmer movement to help collect their cotton. After the Oklahoma association settled its indebtedness with the Government, the A. C. C. A. probably sold it one share of stock on which probably some director put up a hundred dollars and the A. C. C. A. granted it credit because it felt it was a good organization and it would not have been in that trouble had it not been for the very unjust settlement of the 1929–30 operation which put them so much in debt to the Government.

Question. Do you hold the Oklahoma Cotton Growers Association note for $95,767.36?

Answer. No, sir; they had that many assets. They transferred the assets to us for $95,000.

Question. Did that go to the Government?

Answer. If that was the amount, that went to the Government.

Question. How long was it before you declared a dividend and turned over ninety-two-thousand-and-some-odd dollars to the Oklahoma Cotton Growers Association?

Answer. $92,000, if that's the correct figure, was probably paid during the month of August or September, in 1934.

Question. And when was that trade made?

Answer. You said, I believe, that it was made in April of 1933 or 1934. I cannot recall.

Question. Why did the Oklahoma Cotton Growers Association conceal from the Government at the time it was dealing with it that they had this dividend coming to them from the A. C. C. A.?

Answer. The Oklahoma Cotton Growers Association—I believe you are unjust to them, Senator, in saying that they tried to conceal anything.

Question. My reason for saying that it was a concealment is because I read the Comptroller's report in reference to this matter, and there is not one single, solitary word said in there about an asset, or a dividend, or an expected dividend from the A. C. C. A. That's why I used the word "conceal."

Answer. It wasn't concealed——

Question. Just a moment. If I go into bankruptcy and I list all of my assets except my interest in a corporation, and that corporation afterward pays me a dividend, which I have not listed in my bankruptcy proceedings, the court can come and collect that dividend from me.

Answer. Perhaps, if you really conceal an asset, that's true.

Question. By concealment, what I mean is if they fail to make a statement as to that asset.

Answer. No statement could have been made as of the date this letter was written, because no assets were known until the end of the year, when the cotton had been handled and the books closed, and a profit ascertained.

Question. How much profit did the A. C. C. A. make that year?

Answer. I think in the 1933–34 season it made a profit for itself of $800,000 and in addition paid a patronage dividend to its members of some $95,000.

Question. That's quite a remarkable sum, and it seems to me it was certainly the best asset that the Oklahoma association had, and in all of these proceedings there wasn't a word said about it.

Answer. May I look at the dates over your shoulder?

Question. Yes, sir. April 4, 1934. That's nearly the close of the cotton year?

Answer. They couldn't possibly have known whether any operating profit—or gains, rather than operating profit—would result from the operations until the end of the season July 31.

Question. That's true; but Mr. Creekmore, just as a businessman that you are, and I once was—we had a reason to know something about the business of the association of which we were members, and the president of this Oklahoma association was one of the directors of the A. C. C. A., and if he didn't know what was going on in that association, then nobody under heaven did know; and just as a businessman, and to leave out an asset of $92,000, does that seem to be treating the Government fair, or don't you think that's treating the Government a little shabbily?

Answer. In the first place, as of April 1933, or April of any other year, it would be very difficult for the A. C. C. A. management or the directors to tell just how their operations for the year were coming out. That's the cotton business. It is difficult, and we generally try to carry a stock of cotton on hand throughout the summer to take care of our mill customers when no cotton is moving. I would like to suggest, if I may, that Mr. Daily be permitted to explain to you this settlement. I suppose it was under consideration for several months. I presume the correspondence will show that it was discussed prior to the beginning of that session. [Addressing Mr. Daily.] Do you remember how long, Mr. Daily?

Mr. DAILY. Six months.

Answer. Six months.

Question. Let me see. Perhaps we can fix it [examines papers]. I am looking for the Secretary's letter. Apparently it began January 26 and was closed sometime in April, but an inchoate asset of that kind—now, here's the Government: I'm representing the Government for the moment, and I want to get the facts. Here's the Government that makes a compromise offer with the Oklahoma association, and by the terms of that offer apparently that association sells its entire assets to the A. C. C. A., and in a few months thereafter the Oklahoma association obtains in cash from an asset that it does not disclose to the Government as much money as it paid to the Government in compromise for about a half-a-million-dollar debt. Is that fair to the Government?

Answer. If your understanding is correct, Senator, I don't think it would be fair, but I am going to ask Mr. Daily to explain that. Is there not a statement enclosed in there where he says he has gone into the record and that he recommends this settlement?

Question. I see a statement——

Answer. I will give it to you tomorrow morning.

Question. Here is a statement here from Dr. Myers—Governor Myers of the Commodity Credit—dated January 30, 1934. I won't read it all. It is addressed to the Secretary of the Treasury [reading]:

"This offer of compromise, together with supporting documents, is transmitted to you for your acceptance or disapproval. I shall be glad to be advised of the action taken in regard thereto."

And somewhere is a letter from the Secretary, if I remember right. This is a letter of March 13 to the Governor, Farm Credit Administration, from Secretary H. Morgenthau, Jr. [reading]:

"In view of the facts in the case and the recommendations made, the offer in compromise is hereby accepted, pursuant to the provisions of section 194, title 31, United States Code."

I don't know what that is, and I haven't looked at it. I don't know what those sections of the code are; but apparently, from reading those letters, not only do I consider it as a failure to report the properties belonging to the company in the offer of compromise, but the Comptroller General seems to have exactly the same view, and I am wondering if he and I may be mistaken.

Answer. I would like to let Mr. Daily testify. This is Mr. Daily, general counsel of the A. C. C. A., who discovered this statute you mentioned.

(The witness, Creekmore, was excused.)

* * * * * * *

(E. F. Creekmore resumed the stand.)

Mr. CREEKMORE. I have gone over so much that I expected to be corrected about that 2 percent. That was in our bylaws until they were changed. At the beginning of the 1933–34 operation a sales pool was adopted whereby the A. C. C. A. would make no other charge on interest rate than the rates that we paid.

Question. That was in 1932?

Answer. Subsequent to 1932—August 1, 1933. Subsequent to the change in our bylaws and our operation, where we loaned any money to the State association our general charge was 5 percent, but it was nominal.

Question. Five percent is nominal you say?

Answer. Amounts were nominal and considering the fact that in 1933–34 we were paying 4 percent.

Question. I want you to tell me how we can get an accounting of the interest charges?

Answer. We have them here.

Question. Does that include the loans?

Answer. There were no loans after July 1, 1933, except the public loans. In 1930–31 operations and 1929–30 operations, the interest rates we charged as well as the spread in interest charge, was taken away from us by passage of the Agricultural Adjustment Act.

Question. I can understand that if you borrowed your money from the Government, but it looks like it was fifty or fifty-two million dollars that you didn't borrow from the Government and you were not restrained by any Congressional act. You could lend any money where you pleased. Just take this year: At what rate of interest have you been lending money to the State associations?

Answer. 1933? That's their individual States.

Question. I would like to have the amounts.

Answer. Mr. Conroy can tell you.

Mr. CONROY. Here is a loan under date of May 30, 1935, made to the South Texas Cooperative Cotton Association of $34,900.34. The interest rate provided on the loan is 5 percent. We have collected no interest as yet on the loan.

Senator MCKELLAR. But you will collect it? You will collect it when the note is paid? You have charged 5 percent.

Answer. We have not charged them anything as yet.

Question. It appears that you have.

Answer. That is the rate of interest provided in the note.

Question. How in the world can you provide a rate of interest except in a note. You are not telling me you can provide for interest except by putting it in the note. When I put it in a note I have to pay it. That is on account of the note.

Answer. Give me another one. Here is a loan we made February 20, 1933, to the South Carolina Cotton Growers Association in the amount of $7,000, rate of interest 4½ percent, and we collected $155.84.

Question. You mean you collected all of that?

Answer. Yes, sir; principal as well as interest.

Question. There is one at 4½ percent and the other at 5 percent. Here is half a dozen at 5 percent.

Answer. That is correct.

Question. Here is one at 5⅜ percent.

Answer. This one at 5⅜ percent is way back in 1930—May 23, 1930—at which time we were charging that spread of 2 percent. The Farm Board rate was 3⅜ and we charged the cotton growers 5⅜ percent.

Question. After Congress got that appropriation it settled that.

Answer. That has been absorbed in our operations.

Mr. CREEKMORE. As a matter of fact, Congress should repay because under the Farm Board this clause was put in [reading]:

"Clause A of the bylaws on page 22 provides for the 2 percent spread in order to take care of the losses of the A. C. C. A.

Senator MCKELLAR. Mr. Creekmore, let me give you the history of that provision. You may not know it, but I have been in Congress for a good many years, and anybody will learn if they continue to stay there. We waked up to the realization that the Shipping Board has been lending the Government's money to shipping companies under an old statute that had nothing to do with the shipping companies. They had been lending money—not millions, but hundreds of millions—at one-eighth of 1 percent, and one-fourth of 1 percent, and three-eighths of 1 percent. If I remember right—I am dealing purely with memory—there were some $85,000,000 that had been lent to shipping companies at from one-eighth to three-fourths of 1 percent, and it was caught by Senator VANDENBERG. He just ran across it one day by pure accident. He brought it up, and we had an investigation of the Shipping Board, and we found that these enormous sums of the people's money had been lent to these shipping companies, with practically no security, on 20 years' time, at rates ranging from one-eighth of 1 percent to three-eighths of 1 percent. My recollection is that we called Mr. Mellon in to explain it, because he had lent the money. He said there was an old provision in the Agricultural Act that permitted farmers to be loaned money at that rate of interest, and that it was upon the basis of a very doubtful provision in the Agricultural Act that money had been loaned out by the Shipping Board in that remarkable way, and the bringing out of the old Agricultural Act, together with the action of the Shipping Board, brought about the change in the Government rate, and it did not do any good, because Government officials have allowed you to borrow money at 1½ percent.

Answer. I stated in my statement that we have paid the Government the sum of $700,000 in interest during the last 4 years.

Question. That is a very small sum in comparison with what you have borrowed from the Government in the last 4 years.

Answer. It may be, but with the cotton business as it is, it is very difficult.

Question. Well, I imagine that is true from what you tell me about it.

Answer. Well, to that extent, in comparing our operations with the cotton factors, we are handicapped because the cotton firm has its own capital. The Government is providing the capital, and that is done not for the beneficials of the A. C. C. A. but for the benefit of the farmers, and I do say that we have made a profit after 4 years' operations. After eliminating stabilization, as of June 30, 1935, we paid every cent we owe, and we paid them $700,000 plus interest, and we have paid our members $4,000,000 in equities and patronage dividends, and are holding as a reserve $2,000,000, and still are operating at a profit. Now, I am not much of an accountant, but the information as to interest is shown there. As a matter of fact, the interest reserves, under our original bylaws, adopted now in January 1930, provide that we should have 2 percent in excess of the rate, and that rate was established——

Question. It was the rate fixed by Congress. Pardon the interruption.

Answer. And it happens to be at this time one-eighth of 1 percent. I don't know how it was worked out even. Those reserves, so I understand, are reserves of the State associations, and since that time have been distributed either in cash or patronage dividends. All of that, I think, is shown here.

Question. Here is the thing that strikes me with a good deal of force. The Congress, and I suppose through the advice of some of its bureaus in Washington, thought it wise to fix the rate of interest, the money to be loaned the A. C. C. A. at 3 percent, and authorized you to charge a differential of 2 percent. Then the Department permits you to waive—or to subordinate—the Government lien in some of those matters, and permits you to borrow money as a first lien at rates of 1½ percent, and since that rule don't apply to you, and if it be a simple calculation, you take $55,000,000, and suppose you did not do anything but lend this $55,000,000 out to your subordinate, and got the difference between the 1⅜ which the Government permits you to get from your affiliates and what you actually have to pay for the use of this money, that would amount to over $1,000,000, which is a good sum.

Answer. Well, unless you run it right down to the member, the interest rate which we have to pay, that has been charged against the cotton at whatever the interest rate was. The total interest paid to the Farm Credit Administration, plus the total interest and operation, less the interest on nominal loans to State associations for facilities, or to help them out over a period of 2 or 3 months, have been charged directly to the cotton.

Question. Now, if I recall what you stated awhile ago, what was the necessity of making the borrowing from private banks, what was that money used for, if you can recall?

Answer. It went into the operation of the cotton business.

Question. Your cost of operation is largely your personnel in your office, and that was over $1,000,000, was it not?

Answer. No; but there is not this large profit to the A. C. C. A. to begin with.

Question. You charge the regular rate of interest, don't you?

Answer. The actual rate of interest.

Question. Six percent?

Answer. The actual rate of interest is not 6. That is since the 1932–33 operations.

Question. Do you keep an interest account on your books? I would like to know that?

Answer. Do you keep an interest account?

Mr. CONROY. Yes.

Question. I would like to have a copy of that.

Answer. Have we got that as an exhibit?

Mr. CONROY. We have a summary.

Question. Well, I do not want a summary.

Answer. I am not familiar with it; I did not keep it.

Question. I would like to have a copy of the interest account, so we will have it in the record, and so we can get at just what you charged. Now you want to step aside?

Answer. Yes, sir.

Question. And some gentleman wants to be examined this afternoon?

Answer. Mr. Fredenthal, representing the Southwest Irrigation Cotton Cooperative Association.

(Witness excused.)

* * * * * * *

E. F. Creekmore resumed the stand and testified as follows:

By Senator MCKELLAR:

Question. Mr. Creekmore, I want to ask you some questions in reference to, I believe, the last exhibit, headed [reading]: "Summary of expenses apportioned to and service fees received from the United States of America—various agencies during the period from August 1, 1930, to June 30, 1935." Have you got that before you?

Answer. Yes, sir.

Question. Yesterday you said that your association had paid the Government about $700,000 in interest, all told, I believe?

Answer. For the 4-year period with the end of the stabilization operation.

Question. Now, during that period, how much money in fees and commissions and expenses did you charge the Government with?

Answer. $3,600,000.

Question. I will see if we can't be a little more accurate. In 1930–31 you charged expenses apportioned to stabilization, $531,710.32. In 1931–32 expenses apportioned to stabilization, $388,951.18. In 1932–33 expenses apportioned to stabilization, $358,305.93.

Answer. May I interrupt you?

Question. Let me get the total and you can. Total expenses apportioned to stabilization in 3 years amounts to $1,278,967.43. Are those figures correct?

Answer. The figures you have read are correct. I have not the totals here.

Question. Assume that they are. Now, I call your attention to the same exhibit, 1931–32 expenses apportioned to F. C. A., in parenthesis, $518,958.69; 1932, like expenses and like apportioned, $424,512.76; 1932–33, receiving, handling, warehouse seed loan pools, $100,214.15, making a total expense for 3 years of $1,043,685.60, and total expenses apportioned to stabilization and F. C. A. cotton during the 3 years is the sum of $2,322,653.03. Are those figures correct?

Answer. Senator, I am sorry I lost you on the last statement and the one before.

Question. You will find them on the pages of the exhibits here for 1931, 1932, 1933, and 1934 of your exhibit. You have the exhibit before you?

Answer. I am familiar with it, but you have asked me if that is correct. On the first statement you made, the amounts check. However, during the 1931 session, 1,240,035 bales handled for the Cotton Stabilization Corporation at 42.88 per bale, amount to $531,710.32.

Question. That's right.

Answer. In the 1932 season ending July 31, 1933, we handled for the Cotton Stabilization Corporation 1,311,035 bales, at 29.67 cents, amounting to $388,951.18. In 1933, ending July 31, 1,311,035 bales handled for the Stabilization Corporation, amounting to $358,305.93. Now, in 1932, 1,776,961 bales, at a cost of 29.20 cents per bale, amounting to $518,958.69. In the 1933 season ending July 31, 1933, 1,529,838 bales, at a cost of 27.75 cents per bale, amounting to $424,512.76. Now, during 1933 we also handled for the Secretary of Agriculture 117,899 bales. That cost the warehouse seed loan pool $100,214.15. That covered the reconcentrating, reclassing, and so forth. That makes a total for 1931 of $531,710.32. The total for 1932, $907,909.87, and I think that's where we have made a mistake, but I didn't follow you in the 1933 total of $883,032.84. You mentioned, I believe, a million dollars.

Question. Now, the expenses apportioned to the stabilization, as I get the idea and as I get the figure which I have before me, amounted to $1,238,967.43. What is your figure?

Answer. My figure for 1933, a total of $833,000; for 1932, a total of $907,903.87; 1931, a total of $531,710.32.

Question. What is that total?

Answer. As I get the total, which I believe is correct, it is $2,322,652.03.

Question. 652 or 653?

Answer. 653 is correct.

Question. Those were the expenses for the 3 years?

Answer. Yes, sir. Now, one moment. I want also to call your attention to an item of 1930 and 1933–34, service charges for handling A. A. A., C. C. C., F. C. A. cotton, and warehouse seed-loan pool, $789,060.65; is that correct?

Answer. Yes, sir.

Question. And in 1934–35, for like services, $724,449.32; is that correct?

Answer. Yes, sir.

Question. That makes a total for services for the 2 years, $1,513,559.98; is that correct?

Answer. $1,513,559.98.

Question. That is my figure exactly.

Answer. Yes, sir.

Question. Now, the total expense of the service for the 5 years collected by the A. C. C. A. from governmental agencies, which money was received from the Government of the United States, is $3,836,213.01, is it not?

Answer. I get $3,836,212.01. I was adding, Senator, while you were reading.

Question. There is a difference of just a dollar.

Answer. Just a minute.

Question. That is immaterial.

Answer. Let me give it again.

Question. Yes, sir.

Answer. $3,836,213.01.

Question. Now, that is an average per year to the—or that the A. C. C. A. has received from Government for expenses and during the last 5 years of $767,243.20, isn't it?

Answer. You will have to bear with me a minute.

Question. Yes, sir.

Answer. How much, Senator?

Question. $767,243.20.

Answer. $767,242.16.

Question. $243.20, I have it. That is 60 cents out. Maybe I made that error.

Answer. It is 50–50 now, Senator.

Question. No; yours was $1, and the other was 60 cents. So that your association received an annual average income of $767,000-plus from governmental agencies alone, did it not, since your association was organized?

Answer. For services rendered; yes, sir. I would like to put in the record at this time what those services were.

Question. I would like for you to put that in there.

Answer. During this period of 5 years you mentioned A. C. C. A. handled 5,997,772 bales for the Government; but the cotton in the stabilization operation, of that 1,240,000 bales were handled in 1931, or in 1930–31. 1,311,035 bales were again handled in 1932, and 1,311,035 bales were again handled in 1933. That required the services of concentration, where necessary to secure proper warehouse rates, the insurance, the general accounting payments, and warehouse charges, and all services incident to the handling of the cotton. So while the net total of 5,997,000 bales is shown, the 5-year average, we handled the 3 years of stabilization in effect 3,840,000 bales, in general figures. In other words, that is the proper charges made, and Senator BANKHEAD, when I made the statement that we handled through a period of 5 years a total of 5,997,000 bales, I think for your information I should call your attention that this does not include the carry-over, and the incidental services rendered as operations by the Government.

Senator BANKHEAD. Mr. Creekmore, I would like to have a little further explanation of the statement of what you mean in regard to the handling of the cotton, what acts are involved?

Answer. Well, in the handling of stabilization cotton—I will have to take them by terms, because the services were made for each group——

Question. Before you answer that question, that is in reference to these costs incident to handling the Stabilization Corporation's cotton, and this bookkeeping account that you refer to, is it not a fact that the officers and agents of the Stabilization Corporation were expressly the same as the A. C. C. A.?

Answer. I believe that is a mistake, Senator.

Question. I thought I understood that from your statement of yesterday.

Answer. Senator MCKELLAR, that was probably my fault in the statement yesterday. You said the Stabilization Corporation was only a bookkeeping account.

Question. It was in reference to the items we are talking about. I think it had another purpose, really, and that was to have the Government assume the losses, but I am getting away from that now.

Answer. I am not going into the policy as decided upon by Congress through the act it passed; I am just trying to give you the proper picture.

Question. All right.

Answer. It was not a bookkeeping account; because taking over the stabilization cotton, we had to establish records of the cotton, just as if we had received it from an outside source. As a matter of fact, that is what we did.

Senator BANKHEAD. Yes, sir. They had records, did they? Did they have records of cotton?

The WITNESS. The stabilized cotton?

Senator BANKHEAD. Yes, sir.

The WITNESS. No, sir.

Senator BANKHEAD. No records at all?

The WITNESS. No, sir.

By Senator MCKELLAR:

Question. Of course, the records that you had there—it was in the hands of the A. C. C. A., and after the Stabilization Corporation came in and was established, the cotton remained in your hands, just as it did before. What changes did you make?

Answer. That is not correct, probably from my failure to properly testify on yesterday. A. C. C. A. did not have the cotton. The cotton was in the hands of the State associations. The Stabilization Corporation was organized on June 4, 1930. Arrangements were made with the Federal Farm Board for the A. C. C. A. organization to handle the accounting and handling the matter of the cotton for the Stabilization Corporation. A. C. C. A., for the Stabilization Corporation's operations, took over the cotton from the individual State associations who had participated as agents, in effect, of the Farm Board during the 1929–30 operations. That required just as much effort as it would have to have taken it over from some other source. All of the records had to be made—permanent records, books. The insurance on stabilization had to be paid. I suppose it amounted to half a million dollars during the year, maybe more.

It amounted to—oh, I don't know. The warehouse had to be accounted for and paid. When stabilization took over the cotton it found it was in some warehouses which were charging very high prices. It was necessary to reconcentrate or ship this cotton from one point to another—from one point to another point, to secure lower warehouse rates, lower insurance rates. The account during these years was more or less active, at the direction of the Federal Farm Board. There was some of the cotton sold to the trade, just exactly as the A. A. A. pool sold its cotton, and the farmers also, because of the great shortage of the proper class of cotton, and the repurchase of this cotton was made in the form of futures. Then later those futures were sold and spot cotton was repurchased. Then, finally, 466,000 bales of the cotton, more or less, were sold in the channels of trade; and 866,000 bales, more or less—844,000 bales, I believe—were delivered to the Red Cross, upon instructions from the Federal Farm Board. The accounting had to be looked after, and the delivery had to be, just the same as if the cotton was sold, and the charges for this service were $42.88 per bale for the first year, $29.67 per bale for the second year, and $27.33 per bale for the third year, based on an agreement reached with the Federal Farm Board, and perhaps the Farm Credit Administration in 1933; I don't recall just whether the Farm Board had gone out at that time or not. And those figures were considerably less than the Farm Board or any governmental agency could have handled the cotton for.

We do say that because of our own operation it did result to a benefit to our members as well as to the Government; it resulted in a mutual satisfactory operation, because handling that volume of cotton for the Stabilization Corporation to some extent reduced our overhead. In the years 1930–31 operations 1,796,961 bales were turned over to us by the Federal Farm Board, and an agreement was reached at the conclusion of that stabilization operation that the Farm Board would have to pay the expense. As a matter of fact, in my statement made yesterday, the Farm Board—when we went into the operation they knew that the expense of the operation, any loss, would have to be paid by them.

Question. Was there any agreement to that effect?

Answer. No; there was no written agreement to that effect. Mr. Legge, in urging me to adopt this 85- and 90-percent loan, stated he would finance us for a period of 3 years. I called his attention to the fact that the A. C. C. A. had no capital—$76,000 at the time—which I am glad to testify to, Senator BANKHEAD, the earnings withheld as surplus has been increased to over $2,000,000 capital and surplus alone, and the $5,000,000 from the Farm Administration increased that capital and surplus to $7,000,000; but I told Mr. Legge, "You have wiped out the cooperatives on the 1929–30 basis; A. C. C. A. has no money." He said, "You are going to finance it. This operation must be at your responsibility." Mr. Legge is dead, but Mr. Stone, vice chairman of the Farm Board, is alive, and he was present, as I recall, at these various conferences, and I know will be glad to testify if the committee thinks it necessary. This cotton was carried for the year ending July 31, 1932, and for the year ending July 31, 1933, and was then turned over upon the direction—certain sales were made under the Agricultural Act passed in 1933, and the cotton was turned over to the Farm Credit Administration at the cost of the loan value, plus the operating costs, plus carrying charges, less any profits we may have made in the operation.

Senator BANKHEAD. It was turned over to the Farm Credit Administration?

The WITNESS. Yes, sir.

Senator BANKHEAD. What was the average cost?

The WITNESS. I think the market at that time was 9¼ at the time it was turned over. I think that was the agreement reached at that time with Governor Morgenthau and Secretary Wallace, and I hope you will read my statement showing the loss in operations to the revolving fund.

Senator MCKELLAR. That loss was borne by the Government, of course?

The WITNESS. Yes, sir; the whole question is whether the additional loss of $10,000,000 borne by the members should be taken care of. So on the 1930–31 operation we handled 1,776,961 bales; the next year, 1,529,838 bales, on which we were paid, respectively, 20.20 per bale and 27.33 per bale. There were no profits, in my opinion, made in the operation. I think it was a very cheap cost to the Farm Board or the Farm Credit Administration, but if there were any profits made they were taken back in the settlement. I think in the two operations we rendered a very great service to the Government.

Senator BANKHEAD. Do you figure you saved the Government money by that service?

The WITNESS. My statement there will show that it did. I believe this, Senator: That the Government itself couldn't have gone out and gotten an organization to handle any of these operations at the cost at which we have handled them, but I say frankly that in handling them it has to some extent reduced our overhead. My salary—the salaries of all of our executives are decreased because of the additional volume handled; but regardless of the efficiency of our organization, the volume handled decreased

the A. C. C. A.'s overhead, the volume decreasing the cost to the various governmental agencies.

By Senator MCKELLAR:

Question. Now, Mr. Creekmore, in addition to this income of $3,836,213.01 for the 5 years for handling the Government's cotton, it has been estimated that the American Cooperative Cotton Association made about a million dollars annually, did it not, by charging member associations a minimum of 2 percent more interest than the A. C. C. A. paid the Government?

Answer. No; that's a mistake, and, for the sake of time, we are working on that to try to present a picture, and I would like to go into that later.

Question. Just assuming for the instant, however, that these figures are substantially correct—and I am not present advised as to their correctness—but assume for the moment that they are substantially correct, then that $5,000,000 added to the $3,836,213.01 would make the enormous sum of $8,836,213.01 received as heretofore set out by your company from the Government during its operations—received by your association from the Government?

Answer. Well, of course, I say that your estimate is entirely wrong, but assuming that it is correct, then to that extent the Government has been benefited by a very satisfactory service and the farmers of this country have received the benefit of any earnings made by the A. C. C. A.

Question. At a cost to the Government of about $1,670,000 a year if that estimate is correct; $1,670,000 a year assuming the interest received amounts to a million dollars a year.

Answer. I don't follow you, Senator, on the cost to the Government.

Question. The various agencies of the Government, including interest, paid you $8,836,213.01, and by a simple division by 5 years, you have been operating at about $1,670,000 a year—a pretty good income from one customer.

Answer. An income, of course, depends on the gross and the net. The income we have received from the Government has no net to it. It would be very difficult to make a definite statement, but I don't think you could consider it was a cost to the Government, in view of my statement. We had performed a service which was, in my opinion, cheaper than the Government itself could have performed it. Are you going to charge, Senator, the Government up with the losses of the interest of a million dollars for 5 years?

Question. I am trying to find out where you made these profits and it seems to me this is one method of finding it out. You spoke of the farmers getting the benefit of the profits. You never lend a farmer money—neither you nor the affiliated associations lend the farmer money at 1½ percent or 1½ percent or even 3 percent. The farmer paid from 5 to 6 percent.

Answer. You lose sight of the fact that any profits we make belong to the farmer.

Question. Of course, if they get them. What do they get back? You said you declared a dividend one year and got back 50 cents a bale. That's just enough to pay the charge of the newspaper you are running.

Answer. We have never charged 50 cents a bale on any newspaper we are running.

Question. Wait a minute. Mr. Marshall, will you get me my little box. I may be mistaken, so I will get the record. [Examines papers.] I have got Mr. McCarl's report here. I have here that on February 27, 1934, one of my seed loan friends in Memphis turned over to the Mid-South one bale of cotton and he was charged a membership fee of $5 on that cotton and association news subscription of 50 cents and there are 49 typical cases as shown on this statement, and 50 cents for association news subscription was charged on every one of them.

Answer. We discussed that yesterday. There are 49 typical cases out of 150,000 real cases. Mr. Henry, I understand, will testify on that and can make his own statement regarding it.

Question. I am looking at this matter from the farmer's interest; first, because that, as you know, is the bedrock upon which all of us were bringing this procedure. What was the largest dividend per bale that any of the members ever received?

Answer. I am unable to answer that question, because the records have not been prepared in that way.

Question. Did they ever receive as much as 75 cents?

Answer. Some of the members in some of the State associations have received more than that.

Question. More than that per bale?

Answer. In equity payments, but I am not prepared now to show that.

Question. I see here Mr. Henry's company has an item of $1.40 for charges other than regular seasonal charges. What that means I don't know, and Mr. Henry will explain that when he comes on the stand. That's an outside charge for some purpose, and I am sure your association never paid that dividend to the farmers—$1.40. You say the farmer got the benefit of it, and I am showing you two items of a farmer bringing one bale of cotton in and paying 50 cents for an association news subscription, and another $1.40 per bale for charges other than regular seasonal charges, which would more than cancel any dividend that the farmers might have gotten. How do you explain that?

Answer. You are speaking of seed loan. I think Mr. Henry can testify about that, and I couldn't state what another man is going to testify to.

Question. While we are talking about the farmer's adjustment I want to see what the records show as to what they got out of it. It is easy enough to charge them additional fees like association news subscription for newspapers, and, in my judgment, your association has no right on earth to publish that newspaper. I think you are entirely without the law in publishing it, if I remember the law right. I don't believe you have a right to publish a newspaper in the interest of your association, but, be that as it may, you are charging the farmer for that newspaper, are you not? It comes out of the farmer's pocket eventually?

Answer. We are perfectly willing to meet that question legally when brought up. We think we have the right to publish a paper and the members seem to want them, so I don't suppose we had better get into that discussion.

Senator BANKHEAD. Is this a compulsory subscription?

Answer. In some States it is, and I understand in the mid-South the provision is that every member is a subscriber, but, as I say, Mr. Henry will testify about that, and I am testifying only from general knowledge.

Question. I want to ask you this about that particular thing: Do you approve of the Mid-South's action in requiring members to take a newspaper and charge them for it, whether they want it or not?

Answer. I am rather inclined to approve of anything the members of cooperative marketing want. I may disagree with their views to some extent, but I believe the cooperative movement is good with regard to the newspaper, because it has so little proper publicity, and for that reason I am inclined to think we should go into it more.

Question. Well, take a member of this seed-loan organization—I mean a borrower from the seed loan—and let us assume he is a colored man—and we have dealings with colored men as well as white men—and suppose this colored man can't read your paper, and he sells one bale of cotton to the Mid-South Cotton Growers Association, and he is charged up with 50 cents per bale and is compelled to take the paper. Is that the way to help the farmer?

Answer. Senator, as you know, you can't have a dividing line on any provision. There may be some injustices done, but we have a great number of Negro members of which I am proud. I was in Mississippi last year; and if it would be of interest to this committee, I believe 10 or 12 of them will come up and testify on that thing about cooperative marketing and the paper.

Question. If it would help get at the facts, I would like for them to come. Have you finished with that?

Answer. No; I haven't followed you on the interest.

Question. We can't go into it unless we have a copy of your interest accounts taken from your books.

Answer. I think it would be proper at this time, since the question of what governmental agencies have paid us for services in handling cotton has come up, that I should read a letter and make it a part of the record.

Question. All right.

Answer. Dated February 23, 1935, from the Commodity Credit Corporation, Washington. [Reading:]

"Mr. E. F. CREEKMORE,
"Vice President and General Manager,
"American Cotton Cooperative Association,
"New Orleans, La.

"DEAR MR. CREEKMORE: Your letter of January 25 was received during my absence from the city, and I have just had an opportunity of going over the statements which you sent to me"—

That's the statement filed a few minutes ago.

Question. Exhibit 1?

Answer. Yes, sir. [Continuing reading:]

"The statement on reconcentration of Commodity Credit Corporation's cotton makes a very fine showing, and I feel that American Cotton Cooperative Association did a good job for us in handling the details of this work.

"I am very glad to have the statements for our information and files, and I appreciate your sending them to me.

"Yours very truly,

"LYNN P. TALLEY, *President.*"

Here is a letter I got on October 10, 1935, and I called the official who wrote it to me and asked if I could present it if the situation so required, and he said he would be glad to have me do so. This is dated October 10, 1935, Scott, Miss. [reading]:

"Mr. E. F. CREEKMORE, *Vice President,*
"American Cotton Cooperative Association,
"New Orleans, La.

"DEAR JERRY: Thank you very much for your letter of October 8, enclosing a memorandum of the same date from Willman, covering the question of pending claims arising out of pool sales.

"Without doubt, you and your associates have rendered not only a splendid but a truly wonderful service in connection with the marketing of this cotton. The transactions have not only apparently given complete satisfaction to hundrdes of customers who have purchased pool cotton but have, at the same time, complied with the rigid and technical requirements always imposed in connection with the handling of governmental property. I cannot too highly commend Mr. Willman and his associates for this job"—

Mr. Willman is an assistant to me—

"Nor can I begin to tell you and your associates just how much I personally appreciate the way in which the whole transaction has been handled."

Question. Signed by whom?

Answer. Oscar Johnson, manager, A. A. A. cotton pool.

Question. You speak of saving the Government money in warehousing charges and insurance. Couldn't anyone handling that for the Government make those same savings?

Answer. If they had an equal amount of ability; yes, sir.

Question. You spoke of the handling of the 1931 pool and the cotton operation handled for the A. A. A. Wasn't there a duplication in some of that cotton?

Answer. There was a duplication to this extent: That 1930–31 operation, by the act of Congress in passing the Agricultural Adjustment Act, was turned over to the Farm Credit Administration. The Farm Credit Administration sold it to the Secretary of Agriculture.

Question. I hate to interrupt you, but could I ask you, did anybody get a commission for the sale of the cotton from the Farm Credit Administration to the Secretary of Agriculture?

Answer. I can only testify insofar as the A. C. C. A. is concerned, that they did not.

Question. I am glad there was one transaction where there wasn't a commission.

Answer. You don't object to commissions, do you, Senator, if they are earned?

Question. If they are earned, I do not.

Senator BANKHEAD. Who fixed the storage rates on the recent movement of cotton to concentration points?

The WITNESS. On the 12-cent loan?

Senator BANKHEAD. Yes, sir.

The WITNESS. This loan the Commodity Credit itself handled the contracts in arranging for restorage of the cotton much along the same plan that we handled during the 1933–34 movement, whereby we handled 179,000 bales. The reconcentration of the cotton, the warehousing, the point to which the cotton was to be shipped rested with the Commodity Credit Corporation.

By Senator MCKELLAR:

Question. Who designated these various reconcentration places?

Answer. Are you speaking of the same question that Senator BANKHEAD spoke about?

Question. Yes.

Answer. When the cotton couldn't be sold under the policies of the Agricultural Adjustment Administration, as it was apparently their desire to continue the loan until February 1 and withhold the cotton from competition unless cotton went to 15 cents a pound; for that reason the concentration of the cotton was evidently because there was a 12-cent loan maintained in small warehouses and Senator BANKHEAD stated that he was advised, I believe, by Governor Talley, when it was suggested that there would be 300,000 bales moved in Alabama, it would be better to leave the greater part of it where it was.

Question. This cotton wasn't for the purpose of sale, but just for reconcentration purposes, whatever such purposes were; in Tennessee a great deal of it would move out of the warehouses and I believe some would move to other States, making the cost of freight, storage and handling, cost of insurance, and that was done over the very vigorous protest of both Senator Bachman and myself, to which I recall we never had the courtesy of a reply. Why was that done, because I am really wondering why all this cotton was moved from one warehouse to another over the protest of representatives—the Senator from Alabama and the Senator from Tennessee?

Answer. And you, Senator, are you asking me?

Question. Yes; I am asking you.

Answer. This job of a cooperative manager has been a responsible one. I think it was moved to provide arrangements to take care of the coming crop.

Question. When they don't have a loan it doesn't stay in a local warehouse?

Answer. No, sir; I have felt that an unnormal situation was created by the rules pertaining to the 12-cent loan, which holds the cotton at its first point of location rather than allow it to move in its normal way; but I was vetoed on that by Mr. Johnson and Mr. Talley; but, Senator, storage charges were not increased. I am only generally familiar with it, but I believe I can make the definite statement that at no time was any cotton moved unless the rate of storage and, in most instances, the insurance rate, was materially reduced.

Senator BANKHEAD. I know of cases where the warehouse agreed to meet the competitive rates and still move the cotton.

The WITNESS. If so, it was done against my general advice.

Senator BANKHEAD. I handled some cases with Mr. Rathell of that kind, and they said, "Well, we have a contract with the A. C. C. A. to move it, and we have moved it."

By Senator MCKELLAR:

Question. What would you charge for moving that cotton?

Answer. There was a total charge, a sliding charge—I think I have the contract here. I think there has been a good deal of misunderstanding about the movement of the 12-cent cotton—the 12-cent loan cotton. As I have stated, the A. C. C. A. acted only as agents. We were told that the Commodity Credit Corporation would attend to the warehousing. I know nothing about the instances mentioned by Senator BANKHEAD.

Question. The same thing occurred in Tennessee. I remember in particular a case, I think it was in Lawrenceburg, where they offered to meet any charges and they had a good warehouse, the way they informed me.

Answer. But I think as a whole where it moved the rates were reduced and, frankly, I have been for a reduction in the rates, although I want to see the warehouse make a fair rate. We were representing the farmer.

Senator BANKHEAD. The thing I complain about is why, when the local warehouse and conditions are satisfactory, another warehouse offered to meet the rates and still move the cotton.

By Senator MCKELLAR:

Question. How much did your association receive as a commission for moving this cotton and reconcentrating it?

Answer. Of course, there are more services as to that. For the first 500 bales or any part thereof, 48 cents per bale, and then on down to 35 cents per bale.

Question. That's all been done?

Answer. It is all in the course of being done.

Question. What will it cost the Government to reconcentrate this cotton, just for the expense of handling it—I am not talking about freight. Are you authorized to pay freight on cotton to new concentration points?

Answer. We audit the bills and forward to the Commodity Credit Corporation. I think there is a total of 1,600,000 bales and one and one-half million bales.

Question. How much would the 1,600,000 bales cost the Government for your charge alone?

Answer. About 43 cents.

Question. I would like to get that in money. Forty-three cents a bale, and how many bales? One million six hundred thousand bales. I am a poor mathematician. That amounts, according to my multiplication, and it may be wrong, just a tidy sum of $688,000.

Answer. Well, that depends on how you look at it. It is a nice little sum from one viewpoint, but when you take in consideration the expenses incurred, it doesn't seem so big.

Question. That's just for the handling of it. What is the cost of the freight? Have you any idea about that?

Answer. I think the cost of the freight can be eliminated in considering the cost, because generally the cotton moves in the direction in which it is going and that expense would be incurred. There might be a little penalty. If you move the cotton from one point in Alabama to another point, going to Mobile, I think you could get the benefit of the transit rate, or moving it from one point in Alabama to another I think you could get the transit rate from Georgia to North Carolina, but I am not quite up in freight rates. There have been changes.

Question. Suppose the Government finds that the Red Cross should need some more cotton to manufacture, and suppose we would put a provision in the law that may not be there—I have telegraphed for the law to be sent to me—but suppose it was necessary for Congress, in order to help the agricultural interest, to have to buy 1,600,000 bales of cotton and turn it over to the Red Cross, like we did the 800,000 bales, then the reconcentration charges of all kinds would be a total loss to the Government?

Answer. I don't think so. I think the saving in storage would be——

Question. Could you give us what would be saved in storage?

Answer. Not on this operation, because it hasn't been completed.

Question. Could you give it to us on the 1,600,000 bales that has been completed?

Answer. No, sir.

Senator BANKHEAD. The difference in storage is 12 cents?

The WITNESS. Twelve cents a bale.

By Senator MCKELLAR:

Question. If the various warehouses that then had the cotton were perfectly willing to meet these storage charges—and I have been advised that they were—then there isn't any saving at all?

Answer. That's true.

Question. I have curiosity as to why this 1,600,000 bales was moving at all. Offhand, it looks like a very peculiar proposal, and I am wondering who headed the movement to reconcentrate this cotton in another warehouse. Could you tell us? I am going to ask our good friend and associate if he can tell us [referring to Senator BANKHEAD]?

Senator BANKHEAD. I don't know who proposed it, whether it was Mr. Creekmore or the Commodity Credit.

The WITNESS. I am in no way connected with the Commodity Credit, and you do me a great honor, Senator, by linking me with it. That's the first compliment I have had.

Senator BANKHEAD. Who made that contract representing the Commodity Credit Corporation?

The WITNESS. The contract was discussed first by Governor Talley and myself. He said he was considering moving the cotton.

By Senator MCKELLAR:

Question. Did he initiate it or did you?

Answer. I am sure I can't say, Senator. I am rather inclined to think he initiated it, because they asked us several times if we would go ahead and make a bid on the services, and it was so difficult we considered a long time before we decided to do so. Mr. Rathell asked us if we would make a bid. He asked us to make a bid, and I went to Washington and reached an agreement with Mr. Talley on the services that we were to perform.

Question. Have you got that paper? The contract, I mean.

Answer. I have it here.

Question. Will you make it an exhibit to your testimony?

Answer. Our executive——

Senator BANKHEAD (interposing). I don't blame you for making the contract.

The WITNESS. Well, I do not deserve any credit for making it.

Senator BANKHEAD. I do not blame the Commodity Credit Corporation, because as this matter was announced it became apparent immediately that every warehouse would meet the rates. I think every warehouse that has anything to do with cotton in my section immediately took it up with me, and they promptly agreed to meet the rates.

The WITNESS. If there is any criticism, it should not be directed to the A. C. C. A.

Senator BANKHEAD. I don't blame you. I think you were clearly within your rights to take advantage of a business opportunity.

The WITNESS. There were a number of warehousemen, when this was announced, who offered to hold it at the same rate.

Senator BANKHEAD. I think practically every one of them met the rates.

Senator MCKELLAR. I have no doubt of that.

Senator BANKHEAD. Everyone that had cotton in my territory immediately got in touch with me, and that included a very large number.

Mr. CREEKMORE. You heard my statement, and I am sure you must be cognizant of the situation. The Commissioner of Agriculture went to Washington, as I understand, and after having made a survey of the situation, the Commodity Credit Corporation wanted to get rid of 300,000 bales of cotton in order to make room for the new crop.

Senator BANKHEAD. Yes; but that was at a time when they thought they would have another 12-cent loan, and if that had been continued, then that crop would not have been liquidated; but when the other policy was announced, and when cotton again entered into the world markets, the cotton was sold rather than being held. It was the announcing of the program on the loan that made this movement.

The WITNESS. Well, I don't want to take the time to discuss this contract.

By Senator MCKELLAR:

Question. Put it in the record.

Answer. I will make the statement that this contract gives the Commodity Credit Corporation the entire liberty of deciding how many bales shall be moved, and how many shall not be moved.

Senator BANKHEAD. That is the reason that I have been condemning them, and I have condemned them to their face, because they did have the power to quit, and that should be stopped right now.

The WITNESS. And this I would like to have go in the record in connection with the contract. In a number of instances the warehouse receipts were sent to us for reconcentration, and then for some reason or other best known to the Commodity Credit Corporation we were asked to withdraw and return to them, and that is what was done.

By Senator MCKELLAR:

Question. How much of that was done?

Answer. I don't know.

Question. Let me get this in my mind. You mean to say that after you received the order to reconcentrate the cotton and you carried out the order——

Answer. No; I did not say they were carried out.

Question. You have the memorandum of that?

Answer. Yes, sir.

Question. Don't you know that the Commodity Credit Corporation, at the last session of the Congress, I believe it was an amendment offered by you, Senator——

Senator BANKHEAD. No; by RUSSELL.

Question. By Senator RUSSELL, of Georgia, that he offered an amendment to the deficiency bill which prohibited by law the Commodity Credit Corporation, or anybody else, from reconcentrating cotton further, and that that passed the Senate unanimously, as I remember——

Senator BANKHEAD. Yes, sir.

Question. Or was unanimously reported out of the committee, passed by the Senate, and it only failed to be kept from being law by the ridiculous filibuster that the late Senator Huey Long inaugurated; isn't that so?

Answer. I don't think, as I remember the situation, that is correct. It did not pass the House.

Question. The conference report was held up in the Senate. All of the cotton Senators, every single cotton Senator, so far as I remember, and I mean by cotton Senators, Senators from cotton States, were in favor of this bill and voted for it?

Answer. On behalf of the farmers we represent I wish to go on record as saying that I consider it is the duty of the Commodity Credit Corporation, when we are carrying cotton of the farmers, to pool the cotton at the lowest rates possible. Insofar as the local warehousemen are concerned who would be willing to meet a rate, I do not see, as I think the Senator suggested, where they are subject to criticism, but I believe that in handling the product of the farmer, which is what we are doing, that it is our duty to handle that cotton at the lowest possible figure, and that is what we have been doing, and that has been the objective of the A. C. C. A. and the cooperative corporations in handling all of the cotton, and also in handling the cotton entrusted to it by the Government.

Question. If you have finished about that, I want to ask you another question——

Senator BANKHEAD. I want to ask one. I wish you would make a statement about what services were actually performed in the moving of the cotton.

Question. Performed by the A. C. C. A. and at a cost of $688,000 to the Government.

Answer. There has been a great deal of furor about the 12-cent loan, and I asked our Mr. Cooper, in our tabulating department, to prepare me a statement before I knew of this hearing, but I want to read it in at this time. [Reading:]

"OUTLINE OF PROCEDURE FOR RECONCENTRATING C. C. C. 12-CENT LOAN COTTON

"(1) Receive and record in control records all producers' notes and related receipts delivered by Federal Reserve banks.

"(2) Check producers' notes for name, bales, and amount to Federal Reserve banks' trust receipts. Check total receipts attached to each note.

"(3) Properly identify producers' notes and all related papers with like reference number.

"(4) Separate warehouse receipts from notes and count total receipts for purpose of verifying total shown on trust receipt.

"(5) Add total bales shown on producers' notes and compare with total shown on trust receipt.

"(6) Prepare adding machine tapes from receipts for total—tag number, weight, and loan number.

"(7) Punch detail tabulating card showing: Ownership (Civilian Conservation Corps), transportation, storage date, location, compression, weight, tag number, card number, bank (from which received), trust receipt number, A. C. C. A. account number.

"(8) Verify punching of cards with mechanical verifying machine.

"(9) Prove punchings by comparison of tabulating machine totals to adding machine totals.

"(10) Maintain bale controls in stock record.

"(11) Prepare detail tag lists to accompany shipping instructions to warehouse and forward warehouse receipts.

"(12) Prepare date controls to be used in making statement of storage charges to be forwarded to warehouse for certification.

"(13) Prepare detail tag list, by loan, for purpose of allocating storage and freight charges to individual producers.

"(14) Prepare bills of lading either by loan or for carload, whichever is stipulated by the traffic department.

"NOTE.—Cotton moving to interior points must be moved on bill of lading by loan, and freight bills attached to producer's note. Cotton moving to ports may be moved in carload lots, but expense bills must be split on request of corporation."

That causes a great deal of extra work, because each account is kept separate, and the added expense of the freight and the charges are put on there. [Continuing:]

"(15) Accrue transit insurance for each loan.

"(16) Trace cotton from origin to destination and allocate specific bales by original ownership.

"(17) Compare original warehouse weight of each bale with reconcentration warehouse weight and make claims for excessive losses.

"(18) Make claims for damaged cotton.

"(19) Credit producers with collections made for loss in weight or damaged cotton.

"(20) Punch charge cards for each producer's note—charging storage, freight, transit insurance, service charge.

"(21) From producers' notes punch cards for name, address, and amount of note.

"(22) Maintain progress control on each trust receipt.

"(23) Secure samples and class all bales reconcentrated.

"(24) Make record of class of each bale.

"(25) Prepare statement to be attached to each note, showing: Name and address of producer, arrival date of first bale for each account, original location, original tag, original weight, new location, new tag number, new weight, class, total bales, total original weight, total new weight, original amount of note, warehouse charges paid, freight charges paid, insurance charges paid, total of all charges.

"The above statement is to be furnished in duplicate—one attached to the note, the other forwarded to Civilian Conservation Corps.

"(26) Furnish Federal Reserve bank with recapitulation of charges paid by trust receipt.

"(27) Attach new receipts to producers' notes and return to bank.

"(28) Notify the corporation of all movements of cotton.

"(29) Supervise shipments where necessary.

"(30) When directed, negotiate with warehouses to secure advantageous storage rates.

"(31) Approve all storage and freight charges."

Question. How many additional employees did you put on to do that work?

Answer. Well, I would guess at this time we have some 400 or 500 additional employees.

Question. I want a list of your employees and the salaries of each. I believe I asked for that, did I not?

Answer. No.

Question. I want to ask for the salary of each employee and the number of employees, just before this reconcentration movement began, and since that time. I want to know something about what it cost.

Answer. I would be very glad to do it.

Question. Now, you state about the storage charges that you were to pass on. Could you give us the figures as found by you? You just read one of the things, and that is I would like to know the amount of the storage charges each year. I would like to have

a statement each year of the old concern, and then afterward, under the new arrangement.

Answer. May I suggest——

Question. Just one minute. And I would like for you to include therein an item as to who owned these warehouses and who they were transferred to, reconcentrated to.

Answer. I think that is a proper inquiry to make of the Commodity Credit Corporation.

Question. But you see here——

Answer (interrupting). I don't object to anything that I can furnish you at all, but that would be a better source from which to obtain the information.

Question. Under 25 you have: "Prepare statement to be attached to each note."

Answer. Well, when the warehouse charges became due we paid them.

Question. That does not mean the new warehousing; that does not include that?

Answer. No. I said the Commodity Credit Association made the contract direct with the warehousemen. If I may, I have another letter here, a copy of a letter, or a copy of a statement prepared by the Commodity Credit Corporation, which I believe would be advisable to have inserted, and I would like to make it a part of the record.

Senator BANKHEAD. What does it relate to, Mr. Creekmore?

The WITNESS. The rules of handling this cotton.

Senator BANKHEAD. That is all right.

Senator MCKELLAR. Oh, yes.

(Said paper accordingly received as an exhibit.)

By Senator MCKELLAR:

Question. I next want to ask you about the dividend of $1,283,427.

Answer. What exhibit is that?

Question. I am on exhibit J. I want to know if you declared a dividend—I asked your attorney about it a while ago, but I will ask you. I want to ask you if you declared a dividend on February 14 of 1934 of $1,293,122.23?

Answer. I looked at that. The statement is correct. We did declare the dividend.

Question. You did?

Answer. Yes, sir; a stock dividend to our member associations.

Question. That dividend appears to have gone to the Oklahoma Cotton Growers Association; is that right?

Answer. No; the Oklahoma Cotton Growers Association did not receive any of that dividend, because we had purchased all of their stock interest and reserves from them in the settlement with the Government.

Question. You had also purchased that in July following this February—July 1934—had you not?

Answer. Yes; that is correct.

Question. But you paid them a dividend at that time?

Answer. That was probably a patronage dividend.

Question. What is the difference between this other dividend and a patronage dividend?

Answer. Well, a patronage dividend, as we call it——

Question (interrupting). Are they both paid out in money or not?

Answer. A patronage dividend is paid in cash by A. C. C. A. and member associations, who in turn share it with the members.

Question. Do they have to do that, or do they charge for paying out these dividends all the members, or have they a right to put some in reserve, or hold some and pay out some, or how is that patronage dividend handled that you are talking about?

Answer. If you will refer to exhibit A–2——

Question. C–2, isn't it?

Answer. Yes, sir.

Question. All right, sir.

Answer. Section 15, on page 18.

Question. All right, sir.

Answer. I wish you would read sections 15 A, B, C, and D yourself rather than to have it in the record by reading it aloud.

Question. Section 15, that is the section to which you have just referred?

Answer. Yes. Maybe I thought you might read it to yourself.

Question. I think it would be very well to read it into the record. I will do it [reading]:

"SEC. 15. The directors shall operate this association for the mutual benefit of its members as a nonprofit association, but, to the end that its services to its stockholders and the producers of cotton shall be continuous rather than temporary or spasmodic, they shall assume its financial stability by retaining for such periods of time as may to such directors seem expedient, from the amounts arising from savings or other sources after payment of expenses, and which otherwise would become due to the stockholders of this association, such proportion thereof as will create such adequate reserves as may to the directors seem best; provided, however, that reserves created and augmented in the following manner shall be, by said directors at all time maintained, to wit:

"(a) All savings and surpluses which accrue to the association prior to August 1, 1933, have been distributed and/or applied in accordance with the bylaws except the sum of $303,095.35 still carried as a reserve under the heading "Surplus."

"(b) From the gross income which shall accrue through operations in each succeeding fiscal year beginning with the fiscal year ending July 31, 1934, there shall be deducted all expenses of operation, losses, proper allowances for depreciation, obsolescence, and reserves for contingencies and a percentage divided by way of interest on capital advanced of 5 percent per annum, or such less percent as the net income for that year will permit, upon the paid-up stock or membership capital of this association issued and outstanding, provided said dividends shall not be cumulative but shall be paid or credited in any one year only from savings or net income of that year. Such dividends may at the discretion of the board of directors be applied first to the payment of any debt owing by the stockholder of this association and the balance shall be paid in cash. The balance, if any, shall be the savings or net income for the year.

"(c) Fifty percent of the net income of the association shall be distributed on a per-pound basis, each stockholder receiving a proportion thereof equal to the current crop year, as related to the total cotton handled by the association during the corresponding crop years, any amounts which shall remain being added to the surplus of the association, to be held by it as a reasonable reserve for necessary purposes, as provided in paragraph (d) The share distributed to each stockholder shall be applied first toward the payment of any debt owing by said stockholder to this association for the operations of said fiscal year, and in the discretion of the board of directors of the American Cotton Cooperative Association may be applied to the payment of any other debt owing by said stockholder to this association, and the balance, if any, shall be paid over to the stockholder to be by it distributed at once in cash to its members and the other producers of cotton who have delivered cotton through said stockholder, less only reserves as follows: First, not to exceed 1 percent of the gross sales proceeds of cotton delivered by the stockholder during the corresponding crop year if such reserves are actually applied on any indebtedness which is owing by the stockholder to the United States or its Government lending agencies at the time this bylaw is adopted; and, second, if no such indebtedness is owing, or if such creditor shall not require application of said reserves, the stockholder may retain, in its discretion, reasonable reserves for necessary purposes, not to exceed one-third of the amount actually distributed in cash to its producer members and other producers out of such patronage dividend and not to exceed 1 percent of the gross sales proceeds of cotton delivered by the stockholder during the corresponding crop year.

"(d) The balance of the savings or net income of each fiscal year shall be added to the surplus. Any amount in said surplus account over $1,000,000 may be distributed by action of the board of directors to the stockholders as a patronage dividend. If, prior to the distribution of that part of the surplus over $1,000,000, a net loss is sustained in one or more fiscal years, the sum of such losses shall be divided between and charged against the undistributed savings or net income of other fiscal years which have contributed to the surplus then shown on the books in proportion to the undistributed savings or net income of each of said fiscal years. Thereupon distribution of the undistributed savings or net income of each fiscal year, less its proportion of losses, shall be made to the stockholders in proportion to the number of pounds of cotton delivered by or through each stockholder in that year, provided that the savings or net income distributed shall be from the years which made the earliest contributions to the then existing surplus. Until the issued and outstanding capital of this association shall amount to $30,000,000, all distributions of patronage dividends authorized by this subdivision shall be applied to the purchase of the stock of this association, which shall be by this association issued and delivered to the stockholders.

"Upon dissolution of this association, distribution of the entire remaining surplus shall be made in same manner, except that such distribution shall be made in cash."

Now I call your attention to the last paragraph:

"Until the issued and outstanding capital of this association shall amount to $30,000,000, all distributions of patronage dividends authorized by this subdivision shall be applied to the purchase of the stock of this association, which shall be by this association issued and delivered to the stockholders."

Does the outstanding capital stock of the association amount to $30,000,000?

Answer. $7,000,000.

Question. Of which about $2,000,000 was profit and $5,000,000 was borrowed, as I remember.

Answer. That is correct.

Question. Then all patronage dividends are to be applied to the purchase of stock?

Answer. All patronage dividends to members are to be applied to the purchase of stock.

Question. And that does not count the—or make the distinction between patronage dividends and patronage dividends to members?

Answer. I think it does. I think that it is very clear as to that.

Question. Well, patronage dividends not authorized by this subdivision, section 15.

Answer. You have likely another subdivision. I think there is some confusion there, Senator.

Mr. DALEY. May I interrupt in order to answer that? Would you mind?

Senator MCKELLAR. Not at all. I would merely like to find out what the facts are, especially in reference to section 15 and section 18, and this particular part on page 20.

(Witness excused.)

* * * * * * *

Mr. E. F. Creekmore, recalled, further testified as follows:

By Senator MCKELLAR:

Question. Now, Mr. Creekmore, I want to ask you something else.

Answer. May I interject just a word, one statement about this $69,000 loss? I understand there are various methods of accounting. Haskins & Sells are nationally known and Mr. Conroy I have known for 5 years and have the greatest confidence and belief in

him, but the $69,000 loss would have been turned into a profit had we been trying to show a profit in our spot-cotton operations but putting in the earnings on futures, but this is the way Haskins & Sells got up the books and this is the record on which we stand. I merely wanted to make that explanation so you and Senators could understand. It could easily and properly have been shown as a profit, but when we turned our books over to Haskins & Sells we let them get up their audit as they saw fit.

Senator BANKHEAD. Let me ask a question. Turn back to that audit.

The WITNESS. Sure.

Senator BANKHEAD. I want to get a little clearer what these charges are that are made, for services charges. You have three items of that kind. One is on the current season pool, one on the carry-over, and one of the cotton stabilization. Please explain to me just what those items are?

The WITNESS. I would like to make an explanation first. There have been three changes in our operation. The first operation of 1930–31 was the stabilization operation. The second operation was what was known as the south-wide pool; that was for the season 1931–32 and 1932–33. At the beginning of each season an agreement was reached between the State associations and the A. C. C. A. that for the financing other than the interest, for the services rendered in handling and selling cotton, they would allow the A. C. C. A. a charge of 50 cents per bale for the services rendered. See if my statement is correct as to the 50 cents a bale?

Senator BANKHEAD. Who allowed that?

The WITNESS. The State associations who composed the A. C. C. A. You see, Alabama is a separate entity from the A. C. C. A.

Senator BANKHEAD. Yes. That is a charge paid by the farmer or producer, of course?

The WITNESS. Yes, sir.

By Senator MCKELLAR:

Question. Of course; because that is the only source of money?

Answer. Yes, sir; that is correct.

Question. And all that $1,283,517—I don't know whether that includes cotton stabilization?

Answer. That includes $358,305.92 for the cotton stabilization.

Question. Well, exclusive of that, let's see the other two on the pool. The first two items, $402,831.40 and $522,380.26, now that is a service charge paid by the farmer?

Answer. Yes, sir; to his State association. I believe that the $522,380.26 is the amount paid to us by the Federal Farm Board for the handling of the 1930–31 operation.

Question. This says "current season's pool"?

Answer. Am I correct in that statement?

Mr. CONROY. Yes, sir.

The WITNESS. Can you give me a reference to the number of the exhibit?

Senator MCKELLAR. That is exhibit I.

The WITNESS. I have that, thank you, but I just wanted to compare. That would be the payment made during 1931–32–33.

Mr. CONROY. What was it you wanted?

Mr. CREEKMORE. Of the items $522,380.26 and $424,512.76, there was paid to us by the Farm Board for the handling of 1,529,838 bales of the 1930–31 operation, $100,214.15 was paid to us by the Secretary of Agriculture for handling 117,899 bales of the seasonal pool, and was $402,831.40 representing approximately 50 cents per bale for services. That was paid to us by the boards.

By Senator MCKELLAR:

Question. What about the stabilization?

Answer. $358,305.93 was paid to us by the cotton stabilization corporation for the handling of 1,311,035 bales. In other words, our operation that year cost the grower $402,831.40. I am saying it cost the grower that. That is the charges deducted from the net proceeds of his cotton. We paid him substantial dividends that year. We made substantial payments to him that year.

Question. Your profit there on interest, $345,970.37, that was the difference between the rate you got the money from the Government and the amount you charged the farmer?

Answer. I think that is it, Senator BANKHEAD, and that is correct. That is the difference in the rate at which we received the borrowed money from the Government, less the amount charged the members of the association for that year, the net interest earned on advanced loans, etc., $325,970.37.

Mr. CONROY. It also includes interest which was collected on accounts receivable against customers on sales of cotton, and includes interest on bank balances.

Mr. CREEKMORE. But in a major portion?

Mr. CONROY. It would represent in a major portion the excess of interest charged the member of the association over the interest that was paid to the Federal Farm Board and Commissioner of Banks.

Senator MCKELLAR. Anything else you want to ask him?

Senator BANKHEAD. No.

I dislike to take up so much time, but I want you to understand it, after closing the year of 1933—that is, representing the 1933 operation—quotas distributed to members of the association in the year's operation amounted to $1,858,419.83.

Senator MCKELLAR. Where is that total?

The WITNESS. Well, this is in my statement.

Senator MCKELLAR. Oh, yes. Excuse me.

The WITNESS. And earnings amounting to $610,307.17 were withheld as surplus reserve. That is on page 15 of my statement.

By Senator MCKELLAR:

Question. But yet your net income that year was just $760,508.12?

Answer. Yes, sir; of which amount $610,307.17 was withheld. You must differentiate between what the A. C. C. A. considers net income and what it returns to the members. There is a differentiation there.

Question. Well, now, I asked you about an item of $19,000 that you paid for board of directors in 1932, and I find here an item of only $7,321.93 for a similar charge in 1933. Was that because you overpaid them before?

Answer. I don't think any of our board of directors are overpaid in that particular year; because of one thing and another it was decided to forget the directors' meetings. For some reason I believe really 2 out of 5 years we could not all get together at a satisfactory time. So that is a correct charge against the directors.

Question. Now, I notice an executive and administrative item, $100,107.89, and right under it a finance item of $100,191.02. Can you explain those items?

Answer. Well, we have asked, and we have telephoned and will submit to you tomorrow morning the items, and those items will be definitely explained to you at that time. Under executive and administrative—as we have previously stated, the financial expenses which will not show in the pay roll include the collateral fees, and so forth, and was an incident to the handling of the cotton.

Question. Well, I thought that was provided for in the sales, $259,077.76, on your data?

Answer. I don't follow you there, Senator, because it should not apply on sales in our method of handling it.

Question. Well, you have explained what the sales were; that was the brokerage on your foreign and domestic sales ticket?

Answer. We went into the question of collateral fees a few minutes ago.

Question. That is the same item for 1933, is it?

Answer. Are you reading from 1933?

Question. 1933?

Answer. Yes, sir.

Question. Now, I want to ask you about the rather unusual item of classing, $229,739.18. That is a good big lot of classing on cotton, isn't it?

Answer. That is 1933?

Question. 1933; yes, sir.

Answer. Referring to my statement, because I think it agrees with 1933, 1,227,900 bales were received during the season; 117,987 bales, by arrangements made with the Secretary of Agriculture, were also reclassed. I presume there was a certain amount of reclassing in the 1,311,056 bales handled for the Cotton Stabilization Corporation.

Question. All these charges, of course, come out of the farmer?

Answer. All charges of expenses of every kind come out of the farmer, but, as I say, in that year we paid what we considered under the present conditions a very satisfactory amount to the farmers, and put in some $600,000 in the reserve.

Question. Now, if you have finished with that, I want to turn to another question. I believe the law excuses you from Federal taxation, does it not?

Answer. Yes, sir; under certain conditions.

Question. Well, I find nothing in here indicating that you have ever paid any Federal taxes; is that correct?

Answer. So far we have not.

Question. For 5 years you have enjoyed a perfect freedom from Federal taxation. Have you ever paid any State taxes? I find no charges here?

Answer. You mean State taxes on cotton? We have paid some.

Question. Would you be good enough to have a statement made of every tax of every kind, nature, and description, Federal, State, county, or city, or other special assessments made by your concern during the 5 years, at the end of 5 years?

Answer. We can do that, can't we?

Mr. CONROY. Not by tomorrow. It will take 5 or 6 days.

Question. Well, you will submit it. As a matter of fact, Mr. Creekmore, you know that your concern does not really pay taxes at all to anyone?

Answer. Generally speaking, that is true of income taxes.

Question. So you have, in dealing in cotton, you have the advantage over your competitors of having no taxes to pay of any kind, nature, or description; you get all the money that you want, at a very low rate of interest, from the Government, all that you need; you have a capital which originally began at $76,950, and your losses have been taken care of by the Government on two occasions and you now seek to reopen those losses on your accounts with the Government as to its last settlement; is that correct?

Answer. I want to take them up one by one.

Question. Sure.

Answer. We do not pay any income tax, and to that extent cooperatives have the advantage of a private firm. That is caused by an act of Congress, from the interpretation of the Revenue Department.

Question. Do you think that is right? Are you willing that that act of Congress be repealed, or do you think that you ought to have that advantage, and why?

Answer. I would object to seeing the act repealed very much, and this is the way I think about it—it is just my opinion—the A. C. C. A. and the cooperative associations are merely a group of farmers striving to sell their cotton to the best advantage.

Any additional amounts received in the net proceeds after cotton is returnable on the individual income tax, if the farmer has any income tax to pay, but you and I know that he has very little. We are a nonprofit organization, operating for the benefit of our members. The cotton firms, making the comparison, are operating for personal gain, just as I would be if I were operating a store or a bank, and to my idea it is proper and right and one that I hope will be sustained.

Question. Just one moment. May I ask you, assuming that there are four persons to a family—I believe it is a little over that—and you claim to have how many members all told?

Answer. Some 250,000.

Question. 250,000, and the total of that would be about a million, and there are about 29,000,000 farmers. Now, do you think that the million farmers represented by your claimed membership should be given this great advantage over the other 28,000,000 farmers that are not represented by your claimed membership?

Answer. As I stated, I am very much in favor of it, not only from the standpoint of cooperative marketing but from the standpoint of justice to the farmer and the benefit in the operation of his association to the extent of marketing his cotton to a little greater advantage. Then he in turn will have to make an income-tax return to that additional extent, if that farmer makes an income-tax return. Unfortunately, very few of them do.

Question. I am not talking about the farmers making an income-tax return. What I am talking about is why your organization should be exempted from income-tax payments when your competitors, representing the greater portion of the cottton business, have to make income-tax returns like other people?

Answer. Because, as I see it, we are the farmers; we are representing the farmers. I am not representing E. F. Creekmore at this hearing. I am representing my members, because Congress, in its wisdom, saw fit to pass the income-tax laws in that way. That is a matter of opinion. I believe in it very firmly. You may disagree with me, but I would like to answer the next question.

Question. He will read back the original question I asked you. Please read back the original question.

(Question read.)

Answer. Insofar as the State and county taxes are concerned, I am inclined to believe that we pay the State and county taxes just as do the cotton shippers.

Question. Well, do you pay any tax on your property, where you own the cotton, or do you pay any taxes on that? Well, what do you pay on, State and county? Will you put in as an exhibit to your testimony a specimen tax bill furnished by the State?

Answer. We pay taxes on our physical property. For instance, located in New Orleans, our office furniture, and so forth and so on.

Question. Well, will you just give us the amount of the taxes?

Answer. I don't believe the cotton men generally pay taxes, State and county taxes, on the cotton which they have. I understand in Senator BANKHEAD's State, Alabama, that there is a provision for a year or 2 years' extension. In Arkansas I think cotton is taxable only in July, but naturally the cotton man and the co-op, if they have any cotton left in Arkansas over the season's operations, move it out.

Question. In Tennessee it is taxable on the 10th of January, and that is the time they usually have the most, I imagine, and no exception can be made as to taxation.

Mr. WALDAUER. You will pardon the intrusion, Senator, but the Constitution of Tennessee provides that products of the soil, in the hands of the producer, or his original vendee, are exempt from taxation, and therefore the cooperatives being the original vendee, within the meaning of the constitution, have been ruled by the attorney general of the State to be exempt.

Senator MCKELLAR. How did the question arise? Are you fighting this State taxation?

Mr. WALDAUER. I am not fighting any State tax.

Senator MCKELLAR. I say, how did you get an opinion from the attorney general of the State of Tennessee, and when, and where is it, I would like to ask?

Mr. WALDAUER. The question arose, as I recall, several years ago when there was an attempt made to tax cotton somewhere. I don't know where. I will attempt to get it for you.

Senator MCKELLAR. I wish you would.

The WITNESS. Shall I continue with the next question?

Senator MCKELLAR. Yes.

The WITNESS. The next question was if we were able to obtain as much money as we wanted at the cheaper interest rate. We have been able to obtain financing from year to year from the Farm Credit Administration or the Central Bank's cooperatives in prior years from the Farm Board. The interest rate at the beginning created 1 percent as prescribed by an act of Congress and was very satisfactory. The interest rate of 3 and 4 percent naturally looks a little high to us as long as we are able to borrow money from commercial banks at 1¼.

By Senator MCKELLAR:

Question. Well, you got a lot of it at one-eighth percent?

Answer. Three-eighths to eleven-sixteenths.

Question. Well, that is a very satisfactory interest rate, and you don't know of any competitor that you have that gets money that cheap, do you?

Answer. I know of no cooperative competitor who is forced to pay 3 or 4 percent on their capital funds. As a matter of fact, I know no cotton firm who labor to the disadvantage that the cooperatives labor under in having to pay interest on what is used as capital funds.

Question. Mr. Creekmore, you were a cotton man before you were made manager of this association, weren't you?

Answer. Yes, sir.

Question. What is the least you ever borrowed money to operate a cotton business on?

Answer. I had my own capital stock, which amounted to $500,000. The lowest rates I was ever able to borrow money were the bases on which the A. C. C. A. has had to borrow money, the bank acceptance rate, plus the commission, in New York.

Question. Which amounts to how much? How much did it amount to?

Answer. Now it amounts to three-sixteenths of 1 percent plus 1½-percent commission.

Question. Here is what I asked: Did you ever borrow money from banks while you were a cotton factor at even 3 percent, and when and from what bank did you borrow it?

Answer. My business was done with Guaranty Trust Co. Naturally, Senator, I can't remember back during those years, but I paid them—Creekmore & Co.—the quoted acceptance rate, plus quoted commission. I imagine that we did borrow money at 3 percent or lower, but interest rates vary just as the price of cotton varies, and I can't recall.

Question. When you borrow money now from private banks, what banks are they?

Answer. Guaranty Trust Co. in New York, Chase National, Chase Chemical National Bank, Manufacturers' Trust Co., J. P. Morgan & Co., Citizens Southern Bank in Atlanta, and the Hibernia National Bank of Louisiana—and what is the Los Angeles bank?

Mr. CONROY. Bank of America.

The WITNESS. Bank of America, in California.

Question. And the average rate at which you borrowed these moneys was 1¼?

Answer. 1¼.

Question. Now, was that for last year and this year?

Answer. All of last year and, I believe, so far this year.

Question. When was the law passed that provided that you pay the Commodity Credit Association 3 percent?

Answer. The Agricultural Marketing Act, in '33.

Question. '33?

Answer. Our Agricultural Adjustment Act.

Question. The A. A. A.?

Answer. The A. A. A.

Question. Now, when that act was passed you changed your borrowing very largely, did you not?

Answer. No; they have been much the same.

Question. How much money did you borrow from private banks in 1932?

Answer. Oh, I would say $50,000,000; I don't know.

Question. 1932?

Answer. Yes.

Question. And you have increased that to about $75,000,000?

Answer. It has run from $40,000,000 to $75,000,000, but I think I can best answer your question by stating in 1931, 1932, and 1933 we borrowed a total maximum of $10,000,000 from the Federal Farm Board. In 1933, 1934, and 1935 we borrowed, I think, a minimum of ten million and a maximum of $15,500,000. Now, I still have got two questions to answer.

Question. Beg your pardon.

Answer. Your capital stock—the A. C. C. A.'s capital stock—as I testified before, was something like seventy-six million——

Question. $76,000?

Answer. $76,000. It is hard for me to talk in thousands.

Question. I know it is. Anybody that handles Government funds—I know from experience, because I have handled a few of them myself. I just handled mine as trustee.

Answer. Especially after watching the expenditures in the last few years.

Question. Yes, sir.

Answer. But that capital has been increasing; the capital and surplus has been increased out of earnings withheld from the members during the year—some 2,000,000—and has been increased some $5,000,000, being done with our affiliated associations.

Question. With Government moneys?

Answer. With the Central Bank's cooperatives.

Question. Government moneys; that is what it means?

Answer. In line with the Farm Credit Act.

Question. Yes.

Answer. And the Agricultural Marketing Act. Now, I think I stated before, and I would like to state that, in my opinion, the Government has never paid any losses for the A. C. C. A. or its member associations. The Government in its stabilization operations of 1929–30 and 1930–31 suffered a loss of approximately $107,000,000, but, as I stated, it is my estimate that the cooperatives and their members during that same operation suffered a loss of $20,500,000 by cooperating with the company.

Question. Just let me ask you right there: Suppose the Government had not assumed those losses, what would have happened to your cooperative association? That is, from 1931, suppose they had not put up the money, what would have happened to your cooperative association?

Answer. They would have been hopelessly wrecked, and the injustice which has been done to them would have been greatly increased.

Question. In other words, if you had not had the Government coming to your aid in 1931, you would have been hopelessly in bankruptcy?

Answer. Yes; but if the Government had not come to us in 1929, 1930, and 1931 on these stabilizing operations, we would have been some $4,000,000 better off.

Question. There is a question of opinion about that; but if the Government had not come to your rescue, you say this, that your associations would have been hopelessly wrecked. Now, if it had not come to your rescue again in 1933, what would have been your position?

Answer. Well, bearing in mind the statement I have just made, we would have been hopelessly wrecked again.

Question. Well, now, let's assume that thereafter you were put on your own without any help from the Government, without the privilege of borrowing at a lower rate and loaning the money to your subsidiaries at a bigger rate, without the hope of the Government standing your losses in the future; what would be your position?

Answer. Well, in the first place, I have no hope or no desire for the Government to stand any cooperative loss, and as yet, with the exception of '30–'31 and '29–'30, which I consider a great injustice to the cooperatives and their members, the Government has stood no loss. Now, if the Farm Credit Act was repealed, or that portion of it offering aid and encouragement through financing and the Cooperating Marketing Act was repealed, then the cotton shippers would have about their own way, because I don't see how the cotton cooperatives could continue.

Question. In other words, you say that unless the Government continues the benefits as now provided by law and interpreted by the agents of the Government, you could not possibly continue your business?

Answer. Not on the present scale of operations. It would have to be materially reduced.

Question. Well, I won't argue the matter further, because that brings out the fact—but I want to ask you another question. What was the status of the State associations in July 1929 and October 1929; weren't they all bankrupt?

Answer. According to my estimates, which I believe are conservative—I stated yesterday I had not gone into it—the State associations on October 21, 1929, at which time the Federal Farm Board announced they believed the prevailing price of cotton was too low, and that they would advance 16 cents a pound for cotton, their cooperatives were worth approximately two and a half million dollars.

Question. In——

Answer. On October 21, 1929.

Question. You think that they were worth two and a half million dollars?

Answer. Yes, sir; and my exhibits there in my statement will show how we arrived at that exhibit.

Question. But that is on a price of cotton that did not exist?

Answer. That is on a price of cotton which existed October 21, 1929.

Question. Well, that, if a fact, would be material effect, but as a matter of fact, if those associations had been wound up and the cotton that they owned sold on the market at that time, they were bankrupt, weren't they?

Answer. I think they were worth two and a half million dollars.

Question. In spite of that. Where did they lose that?

Answer. They lost that through the stabilization operation conducted by the Federal Farm Board.

Question. That was with their full knowledge and consent, as testified by you in the hearing before the committee in 1931?

Answer. No; I don't believe I did. I testified that the '30–'31 operation was with our knowledge and consent, but I have testified here, and if I made the testimony—if I made the testimony on the other part, I am quite sure that you will find that I testified that the cooperatives knew nothing about the '29–'30 operation until they were advised by telegraph by the Farm Board, or by the press.

Senator BANKHEAD. How much cotton did you have on hand on October 29?

The WITNESS. Senator, I was not associated with the cooperatives at that time. I think about 500,000 bales is my recollection—maybe 400,000. I know that they had a considerable amount of cotton on hand.

Question. What was the price at that date?

Answer. 18.02 for December; 18.75 or 18.82 for July; that is, the quotations of October 21.

Question. It kept declining from that time?

Answer. It kept declining, but the Federal Farm Board, among other things, had been directing and aiding and encouraging cooperating marketing. They announced, without consultation with the cooperatives, "We believe the prevailing price for cotton was too low, and we will advance it, through the cooperatives, to 16 cents a pound." That announcement was given to the papers, and then it was wired to the cooperatives. The cooperatives cooperated, but I don't think any man who will consider it can believe that the cooperatives should be penalized beyond the 16-cent loan. As a matter of fact, I think the Government should have taken over that cotton at the value as of October 21, because the Farm Board—if you will remember back in those days the papers were full of the Farm Board. They had $500,000,000, which, while it was only 5 or 6 years ago, looked like a terrific amount. Of course now, with the expenditures of the Government, it looks more or less pin money. The cooperatives cooperated, but the benefits of the decline of the market, whatever it may have been, in checking the decline of the market during the harvesting season was received by the nonmembers at the expense of the cooperatives' members.

Senator BANKHEAD. Did you have your 500,000 bales hedged, your company, or your association?

The WITNESS. Well, as I say, I was not with the cooperatives at that time.

Senator BANKHEAD. Well, I know, but you knew the general history of that?

The WITNESS. I think at that time they were operating largely on the seasonal-pool basis, and I think the cotton was not hedged, and that is one of my objections to the seasonal pool, because it is purely a speculative operation.

Senator BANKHEAD. Well, in the course of your orderly marketing program, how long would you have probably held that cotton; how long would you have been disposing of it?

The WITNESS. I think the program of the seasonal pool was to sell approximately an equal amount each month throughout the year, or maybe 10 months of the year. If they received a million bales of cotton, they would sell 100,000 bales a month for 10 months, or maybe 75,000. I don't think they followed that, but that was the program.

Senator BANKHEAD. Not having the cotton hedged, you would have your losses as the cotton continued to go down?

The WITNESS. No, sir; as I see it.

Senator BANKHEAD. Why not?

The WITNESS. Because, without the Federal Farm Board, and without the Federal Farm Board's announcement, and without the Federal Farm Board's assurance that they would continue to loan 16 cents a pound on cotton, the cooperatives, because of their financial ability, would have been forced by their bankers to sell this cotton before they had a loss in it. You know how the banks are on collateralized cotton loans. Unless somebody is standing ready, as the market declines—unless somebody is standing ready to put up additional margins, or additional collateral, the banker is going to say, "Sell the cotton; it is getting down to the danger point."

Senator BANKHEAD. Were you borrowing any money then from the Farm Board to carry that cotton?

The WITNESS. After the announcement on October 21, I think they did commence borrowing money, Senator. As I say, I didn't come along until April, and I am not as familiar with that as I am later.

Senator MCKELLAR. Is that April 1930?

The WITNESS. 1930.

By Senator MCKELLAR:

Question. Well, now, Mr. Creekmore, when you testified in November 1931 you were very familiar with this whole situation at that time, weren't you?

Answer. I think I am equally familiar with it now.

Question. I know you have got a good memory, but at that time didn't you make a prepared statement just as you did yesterday?

Answer. I believe I did.

Question. Now, I want to read you from this prepared statement, which certainly confuses in my mind what you have just said. I quote from your statement on page 310:

"The 90-percent loan and the policy as to its operations were first discussed during the early part of August 1930. At the time the market was around 12½ cents. No decision was reached, but some 2 weeks later, during which time the market had declined approximately 15 points, an agreement was reached between the cooperatives and the Farm Board, with a full realization of the hazards of the operation, but with the hope that it might be concluded during the 1930–31 season, arrangements were made with the Board—keep in mind those words—arrangements were made with the Board to finance the operation for a period of 3 years, if necessary."

Now, is that correct?

Answer. That is correct, and it is very much in line with my written statement yesterday. Senator MCKELLAR, you have asked me about the '29–'30 operation. That covers the 90-percent loan of the '30–'31 operation, and Senator BANKHEAD was discussing '29–'30.

Question. Well, at the time you testified in 1931 you knew all about '29–'30?

Answer. Yes; but my testimony at that point covers the 90-percent loan which was used in 1930–31, but the 16-cent loan was the '29–'30 operation.

Question. Now, from a previous statement of yours, on page 309, I read as follows.

Answer. That is the loan?

Question. That is the loan; now, referring to it—listen to this [reading]:

"The 16-cent loan, as announced by the Board October 21, 1929, undoubtedly sustained the market during the remainder of that market season some 4 or 5 cents a pound, during which time some 5,000 or 6,000 bales were marketed, to the consequent benefit"——

Answer. Five million.

Question. (Continuing reading:)

"Of both member and nonmember, to the South, to our United States, and to the mills of the world. True, the result to date has apparently to some extent depleted the five hundred million revolving fund, but it should be remembered that one of the best-known cotton merchants of the world wired the Board, 'It is a

wise exercise of authority conferred upon you through the Agricultural Marketing Act.'"

Senator THOMAS of Oklahoma made that statement. Then you go on to say:

"If my memory serves me correctly, if newspaper reports were true, a number of Senators and Congressmen nct only approved the announcement but advocated at the time even a larger amount."

In other words, apparently, you were advocating that operation in 1931?

Answer. Well, to that extent, I am still advocating it now. I think that it did sustain the market by this operation some 4 cents a pound, and I think that some 5,000,000 bales in the hands of producers were marketed after October 21, and to that extent it was beneficial to the producers.

Question. Well, didn't you testify in November 1931 you thought it ought to be continued?

Answer. The stabilization?

Question. Yes.

Answer. I believe that I said you could not continue it with $500,000,000. I don't remember which Senator or Representative there asked some other question.

Question. Senator Brookhart, you mean?

Answer. Senator Brookhart.

Question. I read from the top of page 10, quoting your testimony at that time:

"I have no authority to speak for the board, but from my knowledge of their policy, I believe at no time have those members even thought of stabilization similar to the operation of Brazil in coffee, Cuba of sugar, and Great Britain of rubber. The board faced the situation, acted, and, in my opinion, rendered a real service as contemplated in the Agricultural Marketing Act, lessening the shock of perhaps the worst depression ever known. The revolving fund will sooner or later probably have a loss in the operation. It is for you of Congress and for the American public to decide whether the benefits outweigh the loss, when and if established. In any event, to me it is inconceivable that Congress will abandon the present operation merely because Cuba, Brazil, and Great Britain failed in their attempt, or attempts, based on an entirely different period."

Answer. I am making that same statement today very sincerely. The thing I am complaining about, Senator, is that it did render a service to the extent of checking the decline, but in the settlement of the operation the cooperative members and their associations were penalized to the extent of $4,000,000 in reserves and some ten millions in sales and six million five hundred thousand in equities, for the benefit of another producing group.

Question. Well, now, Mr. Creekmore, remembering that in 1931, when this was up before the Congress, you appeared before one of the committees, and remembering that you were in entire control of these operations at the time, and remembering that you advocated, as I have just read, a continuance of that operation, could your association now be heard to claim that you should be remunerated or compensated for the losses that you made—your association made—in carrying out those operations?

Answer. You do me too much honor in saying that I was in entire control. In effect, I was merely an office boy when it came to policies.

Question. Mr. Creekmore, if you will let me give you a little more credit, I was in the Senate in those days, and I know the members of that Board; I knew Mr. Legge, a very delightful old gentleman, who knew no more about cotton than the man in the moon, and I knew the tobacco captain, the delightful old gentleman from Kentucky—what was his name?

Answer. Mr. Stone.

Question. Yes; and I know he and Mr. Legge absolutely relied on you in every respect for advice, and they followed your advice in those days, as I recall it.

Answer. And one of the bright spots in the 5 years that I have had—I have had many tribulations—have been the friendship and confidence exhibited in me by Alexander Legge and James A. Stone; but I again say that the stabilization operation was purely a Farm Board matter, and that the policies of the stabilization corporation were directed by the Federal Farm Board. I was asked to advise, but very, very often my advice was discounted.

Question. But here you advise, and here your advice was not only taken by Mr. Legge and Mr. Stone, but it was taken by the standing committee that forwarded it.

Answer. But you have not considered what basis this statement was made on. I do not retract a single word of this statement. I believe that the market was sustained during the active marketing season. The market continued above the 16-cent level until sometime during the latter part of January. I am speaking now of the benefits received by the 16-cent-loan operation. I consider that some 5,000,000 bales of cotton were marketed between October 21 and the time the market sagged. Under the 16-cent loan, if my estimate is correct that the market would immediately have declined to around a 12-cent level—because that is about the proportion that stocks with other commodities declined—stocks even declined more—which would have caused a severe loss to the producer from October 21 but which they did not have to take because of the lifting of those 1,300,000 bales off of the market.

Question. That was done with your approval, because there you say that you thought it would be—you are advising Congress; they sent for you and had you before the committee, and you advised them that you thought it would be wrong to change the policy because the policy ought to be continued?

Answer. I want to explain that, because I want you and Senator Bankhead to understand, because in that way I think perhaps we may secure some justice for these cooperatives. I think my statement, if you will consider it there, would be on the theory—and I believe that even our enemies and competitors—and I speak not from a personal standpoint——

Question. Oh, no.

Answer. Will admit that under those very troublous times, at the time that statement was made, had the cotton stabilization corporation thrown a million three hundred thousand bales on the market—we had near chaos, but we would have had real chaos; and that is why I think I made the statement that it would be a very serious mistake to unload the million three hundred thousand bales and then the 2,000,000 bales of the '30-'31, if we had any at that time on the market.

Question. Now, let's put it in another way, and let's suppose that you have said to the chairman of the Agricultural Committee at that time—I don't remember who it was, but I believe it was Senator NORRIS——

Answer. Senator MCNARY.

Question. Suppose you had said to him, "Yes; I am in favor of this, but I want to let you know that if my association loses anything by it we are going to require the Government to make good on it, and are not taking any risks, and our association is not taking any risk"—don't you think that would have been the fair thing, if you ever expected to make a claim against the Government afterward?

Answer. The only excuse I can offer is my inexperience at that time with governmental officials. I have no reference to Congress.

Question. I know; but I believe you are about as capable a man dealing with public opinion as any man I know of.

Answer. I thank you.

Question. And it seems to me that then was the time, when you were called upon to speak out; and whatever may be the merits of the controversy, that when you did not speak out then when you were called upon, that your association could certainly not come back on your Government.

Answer. Senator, may I ask you one question? Not for me—I admit the error.

Question. Yes.

Answer. But are you going to penalize on that statement the cooperative members in the losses they have sustained just because one man is not perfect and does not do everything right?

Question. Oh, no; but the way I look at the facts we have seen thus far come out, if you want my opinion about it—I don't have any objection—I never had any opinions I was not willing to give to the public in my life—if you want my opinion about it, I think that if ever in the history of this Government any organization, association, or body of men have just had the Government to give benefits full to the brim and then heaped over, your association has had those benefits bestowed upon it by the American Government in the last 5 years.

Answer. I wish you would listen to me, because I feel that they have penalized them, but I respect your views.

Question. I want to hear them, if I can, but very rapidly, because I have got some questions here I want to look after. I know you are tired.

Answer. I am not tired; but we have some witnesses from Alabama and one from California who wish to testify, and I don't know whether you want them. I am at your service.

Question. We will hear your witnesses.

By Senator BANKHEAD:

Question. Mr. Creekmore, of course the people primarily to be served and to be benefited by a cooperative are the farmers?

Answer. Correct.

Question. Now, I would like for you to make a statement—I want it myself, and I know Senator MCKELLAR does, too, about what benefits the members of the cotton growers who sell their cotton through this organization—what benefits do they get from it?

Answer. They get in direct benefits the savings, earnings, or profits, if any, made in operation. They get in indirect benefits the competition of the movement with the cotton shippers, which narrows the spread between the price paid by the user and the members paid by the mill.

Question. Well, right there an interruption. Does the existence of your organization tend to increase the price paid to the farmers for cotton?

Answer. Undoubtedly; and I think, Senator, the best illustration I can give as to that is the opposition on the part of cotton shippers as to our operation.

Question. Well, how does it do it?

Answer. We have an organization in every cotton-producing State. We have licensed classers in the most of the States. We have other classers unlicensed in some of the States. We issue a basis sheet, with differentials based on the New York market, the premiums or discounts. With the products in competition, representing what in our opinion is a fair worth and market value for the cotton at the time it is delivered to us, that has reduced the spread in the price paid to the farmer and the price paid by the mill not alone in seeing that a proper premium is given for the cotton but in quoting the proper differentials for low-grade staples, or proper discounts upon the low grades. As I see it, that competition affects the nonmember as well as the member.

In my statement yesterday I stated that the volume of cotton handled by the cooperatives is not what the cotton men are complaining of, because in the 4-year operation ending July 31, 1931, we have handled only 11.3 percent of the total production during that time, but it is the competition on the part of the cooperatives in trying to see that their members get the fair market value for their cotton each day that is being objected to.

I made the statement that the objective of the cotton shippers would always be in direct conflict with the objectives of the cooperatives, and I am not criticizing in that statement the cotton shippers. The cotton shippers operate for personal gain. When I was a cotton shipper I operated for personal gain. It is only natural in operating for personal gain that you will try to make as much as you can in the operation, and that is by buying the cotton as cheap as you can and selling it as high as you can. The cooperatives don't operate for personal gain. They have no great desire to amass a fortune, and conditions of the cooperatives would not let them do it if they could. The cotton base, or the spread, has been narrowed to such a point at this time, because largely of the competition of the cooperatives during the last 14 years, that it is very difficult to show a profit in the operation, a direct benefit in my opinion to the member, and I want to be frank with you and with Senator McKELLAR, the net profit is about the maximum profit in an operation such as cotton shippers carry on or such as the cooperatives carry on today. That was not the case some 10 years ago, or 15 years ago, before the cooperatives started. There are plenty of pamphlets issued by the Government showing what happened back in those days, and I think that many farmers who are unfriendly to the cooperatives do not want to see the cooperatives eliminated, although they do not patronize us

Question. Well, you pay from day to day the current price or worth of the cotton?

Answer. What we consider is the price. In some instances we might consider the world price a little higher than some cotton and again a little lower than some other cotton men, but we feel when we broadcast our limits throughout the South that the cotton man must pay that much or more to get the cotton.

Question. Do you hedge your cotton?

Answer. Yes, sir; automatically. I think if you will take time to read my statement, and I am hoping before I leave that Senator McKELLAR will say that the cooperatives have tried to give you the very best information which they were able to give.

Question. Now, a cotton merchant who hedges, and I am not speaking of the cooperatives, but just a cotton merchant, the buyer—if he hedges, what difference does it make to him whether he pays one price or another for the cotton?

Answer. I believe I can best describe to you as after eliminating the hedges a merchant buys a general line of goods. He is expecting to sell those goods at retail at a price above the price he paid for them and above his operating cost.

Question. He loses an equivalent amount on his hedge, doesn't he?

Answer. Yes, sir; it is offset.

Question. Yes.

Answer. But the operation as it is today by the cotton man and by the cooperative has to handle efficiently the cotton of the farmers after they have produced it in order that they can sell it to better advantage, and thereby make a small profit over operating cost.

Question. Of course, you might have lost in your cotton?

Answer. Well, we hedged all of our cotton, so that it made no real difference to us, and if the market did go down, our hedge would protect us in that. We could not lose when we hedged, which we did, you might say automatically.

Question. Well, now, aside from the effort of the cooperatives to secure for the farmer the benefits on grade and staple classification—I recognize that as a very valuable benefit, but aside from that—you have been in business as a cotton merchant, and you have been with the cooperatives, and you have had experience on both sides?

Answer. Yes, sir.

Question. Do you figure that the members of the cotton cooperatives, on an average, get more for their cotton? Does the member get more than the nonmember does?

Answer. Well, in 1929–30 and in 1930–31 I think they got $5 a bale less.

Question. Well, that was abnormal conditions?

Answer. Times.

Question. Yes.

Answer. I think that the member does have a chance to get more.

Question. It is not if they have a chance to get more, do they get more?

Answer. We permit them to sell the cotton to the cotton shipper.

Question. The immediate fixation pool, do you give them what they have in the cotton?

Answer. Oh, yes.

Question. Well, does the member get more, on an average, or not, in your opinion?

Answer. I think in 1933–34 they got more, to the extent of the patronage equity, than they would have got from the cotton shipper.

Question. If the farmer thought that he could get more, and if they could get more, they would certainly sell to the best advantage. Why is it that you cannot get all of the cotton farmers in the cooperatives, instead of 12 percent of them. As I understand, if the cotton raiser could get more from the cooperatives than by going on the outside, to an outsider, he would do that, I take it. Why is it that you don't get them all in the association then?

Answer. There are several reasons, and I will make it as brief as I can. One, the cooperatives have not the ability or the organization to handle all of the cotton.

Question. Well, you started out with a capital of $76,000 and went up to a capital of $4,000,000.

Answer. $7,000,000.

Question. $7,000,000 in 5 years; why couldn't you act for all of them?

Answer. Well, some of the cooperatives do have that ambition. I think that would be a mistake, because I believe that any organization handling it all is riding for a fall. Second, the cooperatives have not the financial strength to handle all of the cotton.

Question. You have more financial strength because you have the United States Government back of you. You have more financial strength, even including Anderson-Clayton and McFadden.

Answer. You are mistaken about that.

Question. Oh, the Government is stronger than any individual. I don't care how Mr. Clayton or Mr. McFadden may think, you are stronger.

Answer. We borrow a maximum of $15,500,000. We don't just go up there and get it on silver plates from the Government. Both of you gentlemen know that in Washington they don't do things like that. You get these things because you convince them. We have to be in a position to show them things. Now, you ask why all of the farmers don't come to us. I think a great many farmers, because of the expectation from the movement when it started in 1920–21, were badly disappointed. The leaders of the movement at the time felt they could stabilize the price at higher levels by controlling the price. That was the objective at the time, and I think it was a mighty splendid program. Of course, there was a disappointment there for several years.

Question. Well, they certainly aren't curtailing it any this year.

Answer. It is because the farmers are more expert.

Question. I don't think they are really doing it, and I don't think that we will come anywhere near the parity price until we do it.

Answer. Well, if you and Senator McKELLAR and the administration can't do it, do you understand why the cooperatives can't do it?

Question. Now, one other question. You sold your cotton that you pooled about one-tenth each month?

Answer. No; that is the old operation.

Question. What is the plan now?

Answer. We sell it whenever we think the price we can get for it is satisfactory.

Question. Well, now, suppose the price goes down; if you take it from the farmer, the spot price, then what is the result?

Answer. Well, if the price of cotton goes down, then we have a profit in our hedge, and that will help as to the spot cotton.

Question. And who gets the benefit of that?

Answer. It is given to the movement as a whole; they all do. When the farmer turns his cotton over to us, the identity of that cotton, those particular bales, is lost. He is, of course, recovered at the end of the season on the profit resulting. If there is a loss, of course, he is not.

Question. Now, wait a minute, and that the cotton loses its identity, and if there is a loss, that the farmer does not suffer, it is not charged against him. Well, it is in that it is charged against the reserves, and he suffers in that way.

Answer. That is correct. I am glad that you called my attention to that.

Question. It reduces his dividend.

Senator McKELLAR. Which is the same thing.

The WITNESS. It reduces his reserve. If there is a profit to farmers, and if there were 1,000,000 bales handled, and $1,000,000 made in the operation, he will be paid 50 cents in cash, and he will be credited with 50 cents per bale in the reserve.

Senator BANKHEAD. In other words, it is all a part of one arrangement, which you carry through as to all of your members.

The WITNESS. Exactly.

Senator BANKHEAD. And after it is delivered, there are no losses because of hedges?

The WITNESS. That is right. We have a hedge, which will offset any decline in the market. I don't suppose that you were here yesterday, or today, if it was mentioned, but a hedge with us is automatic. When we get our wires in the morning, if we receive, say, ten or fifteen or twenty thousand bales of cotton, there is a hedge made on the New York or the New Orleans market that day.

Senator McKELLAR. All right, the next witness.

(Witness excused.)

* * * * * * *

E. F. CREEKMORE resumed the stand and testified as follows:

Examination by Senator McKELLAR:

Question. Mr. Creekmore, do you want to insert anybody in this case or shall I try to get through with you?

Answer. I would appreciate being finished with for the time being.

Question. All right, sir; we will get ahead. How many of the members of your present board of directors are the paid managers of State associations?

Answer. I believe there are six.

Question. Six?

Answer. Let me give you their names.

Question. All right, sir.

Answer. Mr. Sullivan, of California, joint chairman, elected by the directors of the California association, and approved as to his qualifications by the A. C. C. A. He has been elected by the directors of the California association as a director. That same situation exists with the following: W. R. Squires, of El Paso; Harold, of Oklahoma; Stewart, of Mississippi; Beatty, of Alabama; and Hathcock, of South Carolina.

Senator BANKHEAD. How many are there on your board, Mr. Creekmore?

The WITNESS. Fourteen.

By Senator McKELLAR:

Question. Does your association pay the salaries of those men, or any part of it?

Answer. One-half the salaries.

Question. What salaries are they paid, by the way?

Answer. Mr. Sullivan receives $7,500 per annum; Mr. Squires receives $7,500 per annum; Mr. Harold receives $5,000 per annum; Mr. Stewart receives $7,500 per annum; Mr. Beatty receives either $4,800 or $5,000; Mr. Hathcock $4,500 or $5,000—I don't know the exact amount.

Question. Does the A. C. C. A. management have anything to say about who shall be elected?

Answer. They have the approval of the joint managers on the business operation.

Question. Suppose the State manager is not in the employ of the A. C. C. A.——

Answer. You mean the joint manager or the director?

Question. I want both of them, whether they are joint managers or directors. Is there a distinction between a joint manager and a director? As I understand it, the six men you spoke of are directors?

Answer. That's correct.

Question. Yes, sir.

Answer. Let me see if I can give you a picture of it.

Question. I will be very glad if you can.

Answer. There are six men on the directorate of the A. C. C. A. who are elected by the State associations as their directors, who are employed by the State associations as managers, or business managers, and who are approved in that capacity as business managers by the A. C. C. A., the A. C. C. A. in those instances paying one-half the salaries. There are six men on the directorate of the A. C. C. A. who draw no salary either from the State associations or the A. C. C. A.

Question. Who are those six men?

Answer. Perry of south Texas, McCreary of Brazos Valley, Sharp of Texas—that is, the Texas Cooperative Cotton Association of Dallas—Lee of west Texas, I think, with headquarters at Abilene, Mann of North Carolina, Williamson of Georgia.

Question. That's 12?

Answer. Twelve.

Question. And you, and Mr.——

Answer. I am not a director, Senator. Mr. Henry is employed entirely by the Mid-South Association and is elected by the directorate of the Mid-South Association to represent that association in the A. C. C. A. organization. Mr. Williamson is the president of the A. C. C. A. and a director. He is paid $25 per day, or per diem, when on business of the A. C. C. A. That completes it.

Question. There is one man—that's 13?

Answer. Mr. Williamson and Mr. Henry.

Question. Yes; Williamson and Henry.

Answer. Yes, sir.

Question. And, as I understand it, the six men of the State organizations are employed and have their salaries paid by your association?

Answer. I don't believe that's a correct statement. Six of the men who are employed by the State associations and who, from a business-manager's standpoint, approved by the A. C. C. A., are paid jointly by the A. C. C. A. and the State associations.

Question. I don't suppose you can do it offhand, Mr. Creekmore, but I would like to have a list of the salaries, expenses, commissions, bonuses, and other remuneration your directors receive—have received—by years, from the A. C. C. A., or the regionals, since its or their organization.

Answer. I will be very glad to furnish it. Do you mean individually?

Question. Yes, sir.

Answer. I will be very glad to give you that information. I haven't got it. I do expect, sometime during the day, to comply with your request as to the salary list.

Question. Mr. Creekmore, the A. C. C. A. started out as an agent for selling cotton for the State associations, did it not, and if so, is that still the case?

Answer. The exhibits and bylaws and articles of incorporation. [Refers to papers.] The A. C. C. A., as I conceive it, was organized to handle sales for State associations and assist them in the financing of their expenses.

Question. Now you buy cotton from the State associations? Is that true?

Answer. No, sir; they deliver it to us by contract. Would you like for me to put into the record a copy of our operating contract between the A. C. C. A. and the State associations?

Question. Yes, sir.

Answer. I don't believe I have it here.

Question. I think I have one.

Answer (examines paper). This is a blank copy of the operating contract between the A. C. C. A. and the associations.

Question. Before you hand it to the stenographer will you look at section 1, subsection (a) in parentheses [reading]:

"Subject only to the provisions of paragraph numbered 2 of this section, the sum at which immediate fixation cotton shall be sold to A. C. C. A. shall be the amount paid to the association's members, plus the actual expenses of the association, not exceeding a maximum amount set out in a budget to be agreed upon in writing by the parties hereto prior to the delivery of the cotton, and plus other deductions withheld from the members of the association's account authorized by the marketing agreement of the association with its members, and agreed to in writing by A. C. C. A. before delivery of the cotton, less amounts collected from the members for subscriptions to American Cotton Advocate."

Have I read that correctly?

Answer. I believe the contract you have was a contract during the 1934–35 season. It is in effect the same as subsection (a) of section 1, with the exception of the American Cotton Grower subscription.

Question. You have left that out, or have you added something else to it?

Answer. This contract, which succeeded the contract you are reading, covering 1934–35 season has, in subsection (d) of section (1), the following in regard to the American Cotton Grower [reading]:

"The association agrees to collect from each delivering member an amount at the authorized rate to cover 1 or more years' subscription to American Cotton Grower."

Question. That's substantially the same provision that in the present contract, or the contract of 1934, which is that the association agrees to collect an amount to cover 1 year's subscription to American Cotton Grower. I am going to return to the question I asked you a moment ago—why section 1, paragraph 1, reading as follows:

"The manager of the association shall be approved by both the board of directors of the association and the board of directors of A. C. C. A. and shall be employed by and be responsible to the association and to the A. C. C. A. jointly."

That's still in the present contract?

Answer. Yes, sir.

Question. Mr. Creekmore, do you think it is fair to the producers delivering cotton of the American fixation pool 1 year to share in the profits and yet not be liable?

Answer. They are liable for the losses because of the reserves.

Question. Is that fair? If in 1 year you make money and create a reserve, and the next year a member of the association will send you one bale of cotton and have a loss on it, do you think that those who have an interest in the reserve should give it up and let me share in it if there has been a loss on my cotton?

Mr. ABE WALDAUER. That is regulated by the Cooperative Marketing Act of the various States, and we are compelled to follow the law.

Answer. It is the law in cooperative marketing, as I understand it.

Question. That involves the same question in connection with one of your settlements where future members were to be taxed, I believe, 50 cents per bale to make up a deficit. You remember that transaction?

Answer. I remember very clearly that I protested against it, and it is another indication of what I think the Government, through the Federal Farm Board, did to the members.

Question. The Board insisted on it, but, to my mind, it is unfair because I do not think the losses made as to cotton belonging to one member should be compensated for out of gains made in other years.

Answer. If I understand cooperative marketing correctly, that's one of the principles of cooperative marketing, and if their members approved of that decision, and if it is their money, I can see no possible objection on the part of the public to the operation.

Question. Mr. Creekmore, I want to get the facts on that. Suppose a man has been a member for 3 years and reserves accumulated and the next year he isn't, does he lose interest in the reserve?

Answer. No, sir; the interest is credited to him.

Question. Regardless of his subsequent participation or retaining membership?

Answer. Yes; his interest is retained for him just as a deposit account would be retained if he did business with the bank. To me one of the greatest steps forward we have made in cooperative marketing is to say to the member: "We don't want to penalize you because you are a member. If you can handle your cotton to better advantage elsewhere, do it." We are not prepared to do it all. The reserves are continued for each member just as they are held in reserve in a mutual life association.

Senator BANKHEAD. Suppose a man is a member this year and you have a loss, and he is a member next year and you have a profit; how do you figure with that man? Do you charge him back or credit him with the reserve for last year and debit the reserve?

The WITNESS. It has been created on prior years' operations.

By Senator McKELLAR:

Question. Now, let me ask you this, the members of your association themselves are never called upon to make up any deficits?

Answer. Deficits in the operation?

Question. Oh, yes.

Answer. That has been essentially true during the past 3 years.

Question. Well, have they ever been called upon, ever in the history of your organization, in the 5 years you have been manager, has any single solitary member ever been called upon to make good any single solitary loss?

Answer. Well, I think where there has been perhaps a material deficit caused by an error, or caused by irregularities, some members have, but I think insofar as going back to the individual member and saying, "We had a loss in this operation of 50 cents a bale", or 25 cents a bale, that we have not gone back to him. Of course if his operation has had no loss—since the stabilization operation until last year we had an adequate reserve to take care of that and then have $2,000,000 left.

Question. But you never called upon him, and you probably never will call upon him?

Answer. If my policy or my thoughts are followed by the directors of the A. C. C. A., you are essentially correct. We relieve the member of the responsibility of a loss, if any, occurring during the year's operations only to the extent of the loss of his interest in the reserves which have been created.

Mr. WALDAUER. I beg your pardon. May I read into the record a provision from the Cooperative Marketing Act of Tennessee, which says that the loss of the members is limited to the unpaid portion of their membership or entrance fees. I will give you the citation.

Senator MCKELLAR. Just let that provision be read into the record.

By Senator MCKELLAR:

Question. If there are losses, then, they are paid out of the reserve?

Answer. The losses are paid by the depletion of the reserve.

Question. Depletion of the reserve. If you have no reserves, why, it is just too bad, and they will not be paid?

Answer. I think that would be the result if they had no reserves.

Mr. WALDAUER. May I read this now? Section 15 of chapter 100 of the Cooperating Marketing Act of Tennessee contains the following provision [reading]:

"No member shall be liable for the debts of the association to an amount exceeding the sum remaining unpaid; that is, membership fee or subscription to the capital stock, including any unpaid balances or any promissory notes given in payment thereof."

That is chapter 100 of the Public Acts of Tennessee of 1923, and virtually the same provision in perhaps slightly varying language appears in the State cooperative statutes of 40 States of the American Union.

By Senator MCKELLAR:

Question. I want to ask you this question: Does your policy provide that the producer delivering cotton, say, in 1931, which was profitable, he really bears the losses that were incurred by you in 1935; that is what it means?

Answer. It means exactly that; yes.

Question. That their interests in the reserves are depleted to the extent of your losses this year?

Answer $212,000.

Question. If your losses should exceed your surplus, wouldn't the Farm Credit Administration have to stand the losses on its loans to you, the loans on your capital stock?

Answer. I don't know. The Farm Board put us in debt $1,700,000 on the 1929–30 operation, and with the exception of four State associations those losses were paid by the State associations.

Question. Well, that was because of other reasons?

Answer. Well, but the associations, as far as the Farm Board was able, had their assets wiped out and were put in debt on the operation to the extent of $1,700,000. My statement shows exactly what was repaid on that debt. So I think we have made a pretty good record and I believe a reputation for paying our debts if they are incurred, even if we don't believe they have been incurred justly.

Question. I want to refer to another matter. I want to ask you this question: Isn't the only substantial distinction between your immediate fixation pool operation and those of a private firm is that under certain circumstances you may pay patronage dividends to those delivering cotton?

Answer. I think for brevities sake, if I may, I will, just to refresh your memory, read a paragraph of my statement. [Reading:]

"It has been openly charged that the A. C. C. A. is just another large cotton firm. In the handling of the cotton received from its members and in the elimination of speculation in the advance or decline of the market, A. C. C. A.'s operation is along much the same lines as the cotton shippers, but at that point the similarity ceases. No cotton firm operates on the basis of reducing the spread between the price received by the producer and the price paid by the mill; no cotton firm has returned its profits to the producer; no cotton firm as yet has interested itself in a general reduction in transportation charges, compression, warehouse rates, and legislation benefiting the producer."

Question. Well, now, that does not answer the question I asked you. I will repeat it to you and take it very slowly. Isn't the only substantial distinction between your immediate fixation pool operation—confined to those—and those of a private firm, is that under certain circumstances you may pay a patronage dividend to those delivering cotton to you? Now, here I am. I come and sell you under the immediate fixation pool proposition one bale of cotton at 12 cents. Isn't the only distinction on earth between that transaction and my selling to a private cotton dealer that you may pay, at some time in the future, a patronage dividend to me who delivered you that bale of cotton?

Answer. It is difficult to answer that without adding. I think, yes, to a certain extent that is correct, but we believe and we think we have demonstrated that in addition to the price we pay we are performing other services for the farmer which are largely in excess of the possible patronage dividends or direct benefits received by the member. In addition to the patronage dividends we pay the farmer, you must remember that we credit to his account, through reserves withheld, the extent of approximately 6 percent of the operation.

Question. Can you give us any information as to how much of the cotton that you buy under the immediate fixation pool arrangement is bought from original producers or is bought from dealers?

Answer. Well, as to definite information, I cannot. I will answer your question——

Question. Just a moment. May I ask you if a very large proportion of your immediate fixation pool cotton is not acquired from persons who have already bought it from the original producer?

Answer. I think not. I think a very large proportion of it comes originally from the producer.

Question. Where could I get that exactly?

Answer. Well, I am sure that Mr. Henry will be able to testify as to that, in regard to himself.

Question. As I remember, your fixation pool cotton amounted to about 700,000 bales, wasn't it—something like that?

Answer. Now, speaking as of last year—we will say this is the record for last year—the total of 1,432,453 bales were received, 1,277,842 bales were delivered by member associations, of which 665,687 bales were handled in the 12-cent loan governmental pool.

Senator BANKHEAD. How much?

The WITNESS. 665,687 bales. So the State associations certainly handled more than 50 percent of the receipts they received direct from members through the 12-cent-loan pool, because the pool was not open to any but producers, bona-fide producers.

Senator BANKHEAD. You get all your cotton through the State associations, do you?

The WITNESS. Practically all of it. We do make some purchases. For instance, this is—reading on in the last year's operations, and in this statement, Senator, I have tried to give every possible information which Senator MCKELLAR asked for, or which I thought would be of value. [Reading:]

"In the purchase was included 77,702 bales for the Agricultural Adjustment Administration, 66,984 bales from the Chinese Government. Of this 66,984 bales, 47,700 bales had been previously sold by the A. C. C. A. to the Chinese Government."

That was cotton purchased by the A. C. C. A. without handling it through the State associations.

Senator BANKHEAD. How much cotton do your State associations buy from others than original producers?

The WITNESS. Some State associations buy none. Some State associations, for our account, buy in some years 5, 10, or 15, and some State associations may go possibly 25,000 or 30,000; I am not able to state.

Senator BANKHEAD. Do they have buying agents scattered over the country?

The WITNESS. It is all handled by our field men, Senator, just as we have representatives in Alabama.

Senator BANKHEAD. How many have you there?

The WITNESS. I would say some 15, scattered throughout the State, and then we have in addition to that a representation through some of the exchanges, I believe they call them. The majority of the local exchanges operate cooperatively.

Senator BANKHEAD. Well, they merely take in the membership then, I assume?

The WITNESS. Yes; I think so.

Senator BANKHEAD. And these other 15 agents have authority to buy cotton anywhere?

The WITNESS. If we give them that authority.

Senator BANKHEAD. Generally speaking, what is your practice?

The WITNESS. Well, generally speaking, they have not the authority unless we give them definite, detailed authority.

Senator MCKELLAR. Well, don't you give it to them?

The WITNESS. Very often. Sometimes it is necessary for us to increase our deliveries or receipts to take care of certain orders and we do at that time give it to them.

Senator BANKHEAD. Did you buy any cotton from the pool this last year?

The WITNESS. Yes, sir.

Senator BANKHEAD. How much did you buy?

The WITNESS. 79,702 bales.

Senator BANKHEAD. All right.

By Senator MCKELLAR:

Question. Well now, in buying that cotton from Mr. Johnston's pool, was a commission earned by you in the purchase of the cotton?

Answer. We are paid a commission of 50 cents a bale for the handling and sale of cotton.

Question. Even though you buy it yourself?

Answer. Yes, although we must pay more than the trade paid for it and the sale must be approved personally by Mr. Johnston.

Question. Now, that was 79,000 bales?

Answer. Yes, sir.

Question. Now, while you bought this cotton from Mr. Johnston, who is the representative of the Government pool, you at the same time received a commission on your purchase from Mr. Johnston of about $39,000 plus?

Answer. That is correct, and I would like to state for your information the basis on which the cotton was purchased. The first 12,000 or 15,000 bales was purchased by us after I had notified Mr. Johnston that we had an inquiry from India for this amount of cotton which we did not have in stock, that we were not anxious to handle the cotton, but I would like to see the cotton go into consumption in India; they had not been in the market for a year or more, and he asked me to go ahead and make the trade. We made no profit on it. The second transaction was for some 40,000 bales to Japanese spinners, which aided in increasing the consumption and reducing the surplus in this section. That ac-

counts for about 50,000 or 60,000 bales of it. The balance was just sold to mills to take care of their operations.

Question. Now, did you make a profit on the cotton you shipped to Japan?

Answer. I think we made a slight loss on it. It was just a turnover proposition—probably broke even.

Question. Now, Mr. Creekmore, isn't it true that the managers, your managers, of the regional associations, are aware of the fact that ginners and country merchants and cotton buyers, individual cotton buyers, or firms of cotton buyers, are really selling you through your immediate fixation pool very large amounts of cotton?

Answer. I don't believe they are. There are times, you know, when I say that we do authorize them to go in and buy cotton, and under the Capper-Volstead Act we are permitted to buy to an extent equal to the amount delivered by members, and that amount, as I have been informed and I believe to be correct, has been nothing like the amount of cotton delivered by members.

Question. But you deal in a lot of cotton for nonmembers, do you not?

Answer. We deal in some cotton from nonmembers.

Question. I am going to read here at this time a short statement from S. 4236 on this subject [reading]:

"The bills before us during the last session authorized organizations or associations dealing in products of their members. The bill now under consideration authorizes them to deal in the products of persons so engaged. Obviously, under the former the associations would be restricted in dealings to the members. In the latter, however, they are restricted as to the character of products in which they deal. It is clear that they may deal with any person in such products whether he was a member or not."

Now, was that amendment passed?

Senator BANKHEAD. The Capper-Volstead Act provides that they must do business with members only.

Senator MCKELLAR. But what about the amendment here, an amendment to authorize them to deal with nonmembers? Was that ever passed? I don't recall it.

Answer. I don't know.

Question. I don't believe it was. Well, we can look into that later. I will go onto something else. If you are buying cotton second-hand or third-hand, not from producers, if you were buying it from dealers or brokers, doesn't that defeat all the stated purposes of your associations as cooperative; doesn't that do away with the cooperative features of your association?

Answer. The cotton shippers say it does. I say it does not; I don't know.

Question. Well, that is a question, so we won't debate that.

By Senator BANKHEAD:

Question. I want to find out how cotton merchants make money out of the purchase and sale of cotton.

Answer. Cotton merchants?

Question. Yes, sir. Now, it is my understanding that the cotton merchants promptly after buying, hedges, so there is an automatic set-off whether the cotton goes up or goes down, he has sold it that day for the same price he paid for it presumably, if he has bought in line with the market price for that day. Now, explain to me how they make a profit.

Answer. Let me make this illustration and see if I give the information.

Question. You understand what I am trying to find out?

Answer. I know what you are trying to find out, and I should have the ability to explain but it seems like I have difficulty at times in explaining the A. C. C. A. Middling inch cotton in Senator MCKELLAR'S district is today selling, we will say, in the interior at 100 on March New York future contracts. March New York contracts we will say is quoted at 11 cents today. The cotton market will offer to the ginner or to the supply merchant 12 cents for his cotton, and purchases it. Now, when he buys that 100 bales of cotton he will sell 100 bales on March New York contract at 11 cents, the price being paid today by the mills, domestic mills, for this same inch cotton, we will say is 210 on March.

Question. In other words, they are paying less than their customers are paying, fewer points?

Answer. That is correct.

Question. Your illustration gives 100 points.

Answer. They have got 110 points gross profits, without taking into consideration the ups and downs of the market, because the advance or decline of the market has been eliminated because of the hedge, on the presumption that the premiums or discounts on cotton will advance or decline,, as well as the value of cotton on the same proportion. Now, he sells the cotton at 210 on, which gives him 110 points gross profit. He has got a total transportation charge, we will say, of 67 points, that is freight and compression. I think included in that he would have to put in five points for the first month's compress and storage charges, and if he is a prudent cotton man he will put in five points more for interest and insurance, because it takes a little time even if it is moving fast. That would be 77 points total cost. Then he has got to pay, or most of them have to pay, I believe, a certain collateral fee that we mentioned yesterday, an exchange in having the bank pay the actual cash on the draft rather than waiting until the draft is collected, and then he might add another five points for those incidental charges. That brings them up to 82 points. Now, he is selling it for 110 on.

Question. Hold on; he has got his brokerage commission too, hasn't he?

Answer. Oh, yes; he has got six points brokerage commission. Let's put the six points in. I am not quoting the exact exchanges because I have not them in mind, but I am trying to give you a fair approximate illustration. That is 88 points. That gives him a gross profit after paying all charges but not considering overhead, of 22 points, if he can buy the cotton at the price stated and sell the cotton at the price stated, and if my charges are correct, and they are approximately correct.

Question. Now, does he pay the transportation charges to the mill or the point of delivery?

Answer. That is a matter of contract.

Question. That comes out of this 110 points?

Answer. Yes, sir.

Question. He pays that?

Answer. Yes, sir.

Question. That is approximately a dollar a bale?

Answer. 110 on the basis of my figures.

Question. Now, how will that figure on seven-eighths, we will say, the length that constitutes a majority of the cotton, doesn't it?

Answer. Yes; it is the biggest part of it. Instead of 100 on March for middling seven-eighths, it would probably sell today at 25 on March.

Question. You mean to the trade, to the mills, or what?

Answer. No; I mean to the individual producer.

Question. Well, why is that; why do they pay above the market quotation?

Answer. Because the spots at this particular time are at a premium over the future quotations.

Question. Well, that is the basis, and that is abnormal?

Answer. That is abnormal; yes.

Question. Now, I am speaking of normal conditions?

Answer. Now, let me give you this illustration in your own State, with a variation of 10 or 12 points; I just can't be exact; I would say that today in interior small towns in Alabama middling ⅞ cotton selling at even December about 10, or even March, perhaps about 10 on March. March is a little under December, I understood last night, so let's put it at even on December. Now, it is the same operation. The shippers or the cooperative eliminates the speculation in the advance or decline in the market by selling an equal number of futures.

They can't sell it at the exact price they purchased it, but the average throughout the year will make it very close, and then when they sell it to the mill they buy back those futures, so that eliminates the transaction and eliminates speculation in the advance or decline of the market. One of your constituents will get the December quotations of we say even or past. December, we will say, is 11 cents today. Now, we have got the same character of charges to some extent. We have the 5 points for freight and compression; we have about 10 points for interest, insurance, and hedges, as we figure, for a quick turnover. We have no compression charges, but we will say that you have an average truck charge to your Alabama mills of 25 points. I think that is a little high for the average, say, 20 points. That is a total cost accruing on that cotton at the mill after it is produced of 35 points, so the shipper would consider that he would have to get 11 cents for the cotton, plus 35 points delivery charges, plus, we will say, 20 to 25 points overhead and profit. That is where we have come in to reduce the spread. So that cotton today, as I figured it, would sell to the mills at 11.60, which would give the shipper a 25-point profit in the operation, and while the prices I have given you are approximate, they are approximately correct. That is, cotton will sell, middling ⅞ cotton will sell today in Alabama by the producer at around even December 11 cents.

Question. He makes his profit by adding to the items of expense the delivery and handling.

Answer. That is correct.

Question. It is the margin that provides the profit?

Answer. Yes, sir.

Question. And, of course, they pay that? That is, the mills do?

Answer. Yes, sir.

Question. And I assume that the cotton bought and sold—or sold to the foreign trade is operated on the same basis?

Answer. Exactly the same basis. There are different charges. You have to make allowance for that. I hope I do not bore you.

Senator BANKHEAD. Oh, no.

Senator MCKELLAR. No; that is very interesting information.

By Senator MCKELLAR:

Question. Mr. Creekmore, are you familiar with the report or resolution of the National Cooperative Council defining the attributes of a good cooperative?

Answer. I have read it, I believe.

Question. It is signed by Mr. Williamson, president of the A. C. C. A., is it not?

Answer. Yes, sir.

Question. I call your attention to the definition as given by that committee, under section 1 of the document. [Reading:]

"Business cooperatives are created by farmers as agencies through which they collectively sell their products or purchase their supplies. Such cooperatives being owned and controlled by the members should at all times have the wholehearted participation of those members in the risks, gains, and losses of the business operations. Therefore, the members in building such

cooperatives should invest therein substantial amounts of their own funds, commensurate with the needs of the business."

Have I read correctly?

Answer. You have, but I think it would be well for you to read the preceding paragraph. I make that as a suggestion.

Question (reading):

"Pursuant to the expressed purposes, the committee has deliberated, and believes the following seven policies worthy of adoption as guiding principles for the business cooperatives of this country."

Is that the paragraph?

Answer. Yes, sir.

Question. Now I call your attention to subsection 4, the last paragraph in that section. [Reading:]

"Business cooperatives should not engage in general buying and selling. Sales or purchases for nonmembers should be strictly limited to those transactions essential to the efficient handling of the members' own business, and such nonmember business should be on a nonprofit basis."

Question. Do you endorse that?

Answer. Absolutely; yes, sir. I endorse all of those seven principles.

Question. And that is endorsed by Mr. Williamson, who is the president of your association, and who signed this report. I read again. [Reading:]

"If a desire for profits is allowed to supplant the cooperative objective of savings in operations, the future of cooperative effort is seriously endangered."

I imagine you endorse that, do you not?

Answer. Yes, sir.

Senator McKELLAR. I want to offer that report for the record. [So offered.]

Mr. CREEKMORE. May I make a comment in answer to that? I think to a large extent we are working toward these principles.

Question. You are not operating on those principles, which are announced by your president, are you. You are not operating now. You may be working toward it?

Answer. To what extent, Senator?

Question. All of this buying and selling of cotton, as you have heretofore stated, and the buying from nonmembers, as well as from members, and piling up $6,000,000 of reserves—what is the amount of the reserve, I have forgotten the amount?

Answer. $2,000,000.

Question. $2,000,000 of reserves.

Answer. Yes, sir.

Question. It seems to me you are looking after the profit business if you are piling up reserves?

Answer. It is all imperative, Senator, considering the volume of busines we have handled in the past 5 years. That is one of the signs of progress we have made, the creating of reserves.

Question. Well, now, in that connection, what is the extent of your operations, how much in terms of money, what is the total amount of your operations, about half a million dollars a year?

Answer. I think about half a billion in the 5 years, or 4 years.

Question. It runs over one hundred million a year?

Answer. I think, including the cotton we have handled for governmental agencies, that is conservative. I wish to say this. [Reading from this paper:]

If a desire for profits is allowed to supplant the cooperative objective of savings in operations, the future of cooperative effort is seriously endangered.

I think our whole policy for the 5 years I have been associated with the movement has shown a desire to operate properly, efficiently, and a desire for profit. I don't think that we have gone in general buying and selling, because I think if we had we would have given the cotten men something to complain about, because our competition has been materially reduced because of our desire to handle mainly the cotton of our members.

Question. Now, you are acquainted with the operation of Anderson Clayton & Co. About what does that amount to a year, in millions?

Answer. I think they have a representative here in the building, or I know they have one here in the city, and I would rather you would ask them. I think it is very large.

Question. Are they larger dealers in cotton than your corporation?

Answer. I believe without knowing that they will handle more cotton each year than A. C. C. A. will handle, excluding the services rendered the Government on the cotton which has been entrusted to it.

Question. Well, how does your operation compare with Weil & Co.?

Answer. I could not make the comparison.

Question. Well, how does it compare with McFadden & Co.?

Answer. All three of them have agencies here, and it would be a very valuable thing for us, as I am sure it has been an equally valuable—priceless almost—for the cotton shippers to get our intimate records for 5 years, and I would appreciate it very much if you would call the three firms in question and ask them.

Question. Have you any idea what those four large operators, including yourself, how much of the cotton crop is handled by those four operators?

Answer. No, sir; and, as I say, I think you would be rendering the cooperatives a service if you would supbena those three firms, or four firms in question, and ask them to bare their innermost secrets as we have very gladly brought ours to you.

Question. But you can realize there is a difference. Your business is conducted with Government money, and the other three are not. There is that distinction, but I will bear that in mind, what you say, so far as I am concerned, and the committee will too, I know.

Answer. I think, Senator, there can be no true comparison of benefits the cooperatives are doing until there is a joint investigation of the cooperatives and the cotton men. They make charges, and they make statements. We always present our records, and we have presented them cheerfully and honestly. I would like at this time to make a request that this investigation be continued, if possible, through an amendment to your authority, that Congress make this investigation, and that a thorough investigation be made, because when you get through you will have everything I know, but I think also the cotton trade generally should be included in it, not alone the cotton shippers but the cotton exchanges. Let's throw the whole fact before the public. Let's get the whole picture, not just a portion of it. We are trying to give you all you want. We are giving you every possible information that I am physically able and mentally able to get up for you.

Question. Don't you think it is entirely proper, in view of your being virtually an agent of the Government, to do that. Do you think the Congress ought to create an activity that Congress desires to retain a control over and then not direct it and know what those operations are? Of course, I can see a very great difference between your situation, insofar as the investigation is concerned, and those of private owners. Of course, your suggestion is up to the committee, but I shall be very happy to give it consideration.

Senator BANKHEAD. The Senate passed a resolution authorizing the Committee on Agriculture to conduct a general investigation of the cotton business and the exchanges as well. In acting under that resolution Senator SMITH is in charge of it, and he has had a corps of assistants and auditors at work for 2 or 3 months before Congress adjourned, investigating the exchanges.

Senator McKELLAR. Is it broad enough to include what Mr. Creekmore has suggested about private firms?

Senator BANKHEAD. I am not at this moment in a position to say how broad it is.

Senator McKELLAR. But that investigation is now going on, and that is with your committee?

Senator BANKHEAD. It includes some collateral investigations, and it is to include manipulations, and matters of that kind, on the exchange, and I just noticed a few days ago an account in the paper that Senator SMITH is going to call the committee together sometime in November to begin taking testimony on that very investigation. I happen to be a member of that committee, and I know that phase of it, and I assume the entire investigation has been provided for, and it will proceed.

Senator McKELLAR. I hope that committee will take the view that Mr. Creekmore has stated, and get the full information about it.

Senator BANKHEAD. And I will say to you now, Mr. Creekmore, that I will be very glad to have you present, and have any suggestions you care to make in line of the investigation which you think will be useful.

Mr. CREEKMORE. I appreciate that very much, Senator, and I would enjoy working with you, and will cooperate with you in any way possible.

Senator BANKHEAD. This investigation, as you doubtless know, is being conducted by the Appropriations Committee, and the other is by the Committee on Agriculture, and I just happen to be a member of both of those committees.

Senator McKELLAR. Incidentally, that grew out of the introduction of the Frazier bill.

Senator BANKHEAD. I don't think this committee would have anything to do with the matter that you have just brought out.

Senator McKELLAR. But you think the other committee would?

Senator BANKHEAD. Yes, sir.

Senator McKELLAR. Here is one thing I want to say about the resolution. We have some 26 or 28 Senators that are sometimes designated as the cotton Senators. That is, they are so spoken of because of the fact that they represent cotton States. North Dakota is not one of those States. Senator LYNN FRAZIER, whom I have known for many years, and who is one of the finest men I ever knew, and I know him very well, and he is honest and able in every way. But it struck the cotton Senators as a most unusual thing to find that the cotton cooperatives should have a project of this kind and would go to Senator FRAZIER, of North Dakota, who probably never saw cotton grow, or maybe never saw cotton at all, unless from a car window, to introduce this very, very important matter, and I think that had something to do with the introduction and passage of this resolution; and I would like to ask you, if it is proper, why you did not get the matter of reopening an old settlement about cotton with the Senators who were familiar with the transaction, and not go to North Dakota to find a man who was wholly unfamiliar with it, to introduce such a measure?

The WITNESS. At that time I had not had the pleasure of meeting either Senator BANKHEAD or Senator McKELLAR. That is one of the pleasures that I have had as a result of this hearing, and Senator FRAZIER seemed to have a lot of interest in the cooperatives, and he had been taking quite a bit of interest in them, and for that reason the matter was taken up with him.

By Mr. McKELLAR:

Question. Well, at the time maybe you did not know Senator BANKHEAD or me, but you did know your own Senators, Senators LONG and OVERTON?

Answer. They were not discussed or considered in the picture at the time.

Question. I would like for you, if I have not already asked the question and if you have not already furnished it as an exhibit, to furnish me copies of the present charters of the present State and regional associations.

Answer. That will be furnished.

Question. And to furnish also for the record all copies of the present membership agreements of each of your associations and a copy of the bylaws or requirements governing those contracts. I think we have some of those, haven't we?

Answer. We have some of them, but if it meets with your pleasure, I should like to send them either to you or to the court stenographer. I think that would be proper.

Senator McKellar. All right, send them to me and I will see that they go in the record.

Question. I want to ask you this question to have it in the record. Are members permitted to sell more cotton outside than they deliver to you, or to their associations?

Answer. Yes, sir; they are permitted to sell, and it varies somewhat.

Question. I think I have already asked this question, but I will ask it again, to be certain. Where farmers obtained seed loans, 10-cent loans and 12-cent loans, were they obtaining such loans through your association-made members?

Answer. Generally speaking, yes; I understand that on the 10-cent loan, at the beginning of the operation, one or two associations, in order to take care of the situation while the loans were getting in shape, did not require membership contracts. I think Mr. Henry can give you more testimony on that, and more information than I can, and the other representatives of the other State associations also.

Question. Will you state what percentage of deliveries were made before contracts were signed? In other words, do members join and then deliver cotton, or do they have to sign a contract in order to receive their pay?

Answer. Well, that would be another estimate on my part. I would say that 90 percent of our deliveries are from members who have signed prior contracts, but I don't know.

Question. Mr. Creekmore, I want to get the membership list for the record for each year from 1930—or from 1929–30—before I finish that question. Did I ask you about such a list; do you have it here?

Answer. I thought I advised you that we did not have it at this time. We would have to take it up with our member associations.

Question. Have you ever got that list?

Answer. We have taken it up with our member associations. Some of them are willing, if necessary, to supply it. Some of them feel that they would not do so without specific authority from the board of directors. Some of them feel, and I too feel, that if that list is submitted that it should be zealously kept for the committee itself, and it should not be made a matter of record.

Senator Bankhead. What is that list?

Senator McKellar. That is a list of all members of the associations. I have asked particularly for the list of members.

Question. How could it possibly—how could a list of your members of your various State associations possibly injure the corporation in any way, even if it were published in every newspaper in America?

Answer. For 5 years we have been besieged with propaganda circulated by the cotton shippers. Do you know of any merchant who would like to give to the public a list of his customers?

Question. You say merchants?

Answer. I mean general merchants, anyone even in that line of business.

Question. But you are not operating for profit. You are operating as a governmental institution?

Answer. Yes, sir.

Question. Now, why should you withhold a list of a set of your members? Why should the Government withhold that from the public, or why should it be permitted to do that?

Answer. I can't conceive that the public is interested in the membership. I can conceive that the committee might like to go over it. I do know that the cotton shippers would like very much to have it. I would like to call on Mr. Waldauer on that subject, and he can go into it.

Mr. Abe D. Waldauer. There are other reasons besides those that have just been mentioned by Mr. Creekmore. In the first place, it is a matter of common knowledge that there are people whom the farmer owes, and we are interested in the farmer, and there are those who would like to find out where his money is, so that they can run an execution on it, and to give that information to the public would increase our expenses tremendously—that is, the operating costs of the associations—by having lawyers filing answers in garnishment proceedings when it was thought that maybe a farmer had money coming to him, either in deferred payments or otherwise. We do not want to be in the attitude of aiding members to escape a just debt, but we do not think we ought to be compelled in a proceeding of this character to be forced to divulge this information at the expense of the membership. We have nothing to conceal from the Senate, or from responsible officers of the Government. We do have much to conceal from those who would not have the best designs, either on the cooperative or the farmer.

Mr. Creekmore. Now, I would like to add this: Insofar as my company is concerned, if this committee wishes the membership list, I will use my best influences to see that this committee gets it.

Senator McKellar. Well, Mr. Creekmore, insofar as the members of the committee are concerned, I will say as a member I think that a list of this character ought to be furnished. There have been charges made that these lists were secured in certain ways, and those charges have come to our attention, and I think we should have that information. I think when a member sells a bale of cotton to the A. C. C. A., and when they have a right, you might say, to do as they wish with the cotton, within certain limits, and when he is charged a membership fee, and under all of the circumstances it seems to me that this committee ought to see the list, to know who are really members and who are not, and personally I regard it as an important matter. It is up to you whether you give it.

Mr. Creekmore. Insofar as the committee is concerned, I think the great majority, or perhaps all of the affiliated associations, will be perfectly willing to submit it, but as I have said, and as Mr. Waldauer has more properly informed the committee, we do think there are serious objections and obstacles to turning over such confidential information to be made public, to be put in the hands of cotton shippers, because it will be made public and will naturally come out.

Senator McKellar. What harm could the cotton shippers accomplish? I can see this: That if they are members of the committee or members of the association, would just become members by reason of selling a bale of cotton to the A. C. C. A., it might be possible for this to be known; but why shouldn't that fact be known? You don't want a list of members who are not real, genuine, honest members, do you?

Mr. Creekmore. No, sir.

Senator McKellar. Well, if your members are real, genuine, honest members, I should think your association would desire to show it so as to make it known.

Mr. Abe Waldauer. We do and we will check that list——

Senator McKellar. Just a minute, Mr. Waldauer. We will get to you in a minute—in just a little.

Mr. Creekmore. It isn't within my power to say to a State association, you must do this, or you must do that. I understand it is within your power. If, as you say—and I would like to have you advise me definitely—if you think we should furnish a list and that be made public, I will use all the influence I have to do so.

Mr. McKellar. Nothing could be fairer.

Senator Bankhead. Mr. Chairman, my first impression is that there is no public interest in requiring a publication of that list. I think if the committee wants to peruse it, it could be helpful to us to have the list, but I can't see any necessity—it is rather a trade secret in a way. It is an advertising list which may be used by various people. It would be valuable to merchants and general stores and people of that kind, but I don't see that there is any real value in publishing a list of that kind.

Senator McKellar. Excuse me a minute.

(Senator McKellar confers with Senator Bankhead.)

Senator McKellar. After consultation with Senator Bankhead, we have decided to have you furnish a list of all of the members for the private information of the committee.

Mr. Creekmore. I will do my best.

Senator Bankhead. I really think the merchant would make the same objection to giving out his list.

By Senator McKellar:

Question. If voting by proxy is permitted, will you give me a list, insofar as the A. C. C. A. is concerned, of the votes by proxy?

Answer. Insofar as the A. C. C. A. is concerned, votes by proxy are not permitted, and only in one circumstance has a vote by proxy been permitted to any extent, and that's in Texas, and Mr. White is the secretary of the Texas association and is here to testify.

Question. Mr. Creekmore, has the A. C. C. A. ever received any contracts covering commissions, storage, or insurance, by way of rebates, drawbacks, or bonuses of any kind?

Answer. I believe that the A. C. C. A. has in no instance made any contracts where they would receive any rebate or any commission or any drawbacks that you mention that is not open to the world. We have been approached a number of times with suggestions that a certain operation would be offered to us under contract and then remittances would be made later, but we have refused to enter into such an operation. It is generally known to the trade that there is a rebate made each year by the insurance companies to everyone, dependent upon the length of time the cotton is carried.

Question. Will you furnish a statement as to how much rebate, drawback or bonus has been furnished by the insurance companies, by years?

Answer. I will be glad to.

Question. Do the storage companies furnish any rebates or drawbacks?

Answer. I don't know. As far as we are concerned, none. Our contract is an honest contract. We refuse to make contracts and receive rebates. There may be one or two exceptions.

Question. Will you look it up and see?

Answer. One possible exception has occurred to me.

Question. I think you stated a day or two ago that the A. C. C. A. has not engaged in any speculation since 1930–31?

Answer. Any speculation in the advance or decline of the market with one or two possible exceptions.

Question. Have you held any unhedged stock for the A. C. C. A. or member associations?

Answer. Unhedged fixed stock?

Question. Yes.

Answer. I believe I mentioned that when the 10-cent loan was announced we failed to hedge 10 days or 2 weeks. When the deal

came out we found that the cotton was applicable and we started to rehedge and did so. I think I also stated that in some instances, when we had a grade below a low level, we would carry a part of it if in our judgment it was advisable to do so.

Question. Will you explain the circumstances under which the A. C. C. A. repaid the cooperatives $35,000?

Answer. I wonder if I can't call on Mr. Daily to do that?

Mr. DAILY. I would like to have our file.

Senator MCKELLAR. We can postpone that question. Let me ask you this question: Mr. Daily, I will ask you if the records in case no. 734, United States report in all of the districts of Georgia, does not show that the A. C. C. A. in 1931–32 proposed to advance large sums to Georgia to make an apparent reduction in operating expenses from $2.43 to $1 per bale, and if that loan wasn't repaid at the rate of 25 cents per bale until liquidated? Was that the truth?

Mr. DAILY. I don't know what the records of that court show, but if they do show that it was not by admission on the part of the A. C. C. A. The receiver of the Georgia association, represented by a lawyer by the name of Lipscomb, was threatening to bring suit against the A. C. C. A. based on several things. It developed that a settlement we had made with the Georgia association, which we assumed had been ratified by its board of directors—the record we had showed it had—and there was a dispute among the directors; and Mr. Moes, who was associated with me in the case, and I thought a good compromise was better than a long-drawn-out lawsuit. I will have to get that file to testify.

Senator MCKELLAR. I will ask you about your memory.

Mr. DAILY. I will be glad to get a complete statement of it.

Senator MCKELLAR. But it is true that the contract of compromise, Mr. Daily, was to make an apparent reduction in operating expenses from $2.43 to $1?

Mr. DAILY. No; that had nothing to do with it.

Senator MCKELLAR. Had nothing to do with it?

Mr. DAILY. No, sir.

Senator MCKELLAR. I am talking about the contract you say was made with the Georgia association. Wasn't the amount necessary to be repaid in order to make that reduction? It was to be paid at the rate of 25 cents per bale to liquidate it?

Mr. DAILY. I am speaking from recollection now; the A. C. C. A. loaned money to the Georgia association and took their note therefor, my recollection is $70,000, and that still is justly ours. The Georgia association, I think, as the A. C. C. A. directors understood it, were not able to settle with their seasonal pool members that year for money they owed them. It developed, however—I think this is a fact—that the Georgia association used some of that money to take care of operating costs. Frankly, as a lawyer, I thought it was improper. I didn't understand, when the loan was made, that that was the purpose of the loan. In addition to that, it was a very serious question as to whether the board of directors of the Georgia association had authorized that loan or not. There was a dispute among the directors and the officers at that time.

Senator MCKELLAR. Isn't it true that the court afterward canceled that loan contract and the A. C. C. A. had to pay $35,000 in cash?

Mr. DAILY. What happened was this: The Georgia association was in the hands of a receiver, as testified to by Mr. Creekmore. The receiver of the Georgia association employed counsel. That counsel was about to bring suit against the A. C. C. A. May I say that the Georgia association had settled with the A. C. C. A. on this debt, and he took the position that he was entitled to recover from the A. C. C. A. $70,000. He finally took the position that it was doubtful whether he could recover $35,000. We reached a settlement which, incidentally, the Federal court had to approve. He was demanding $70,000, and we paid him $35,000. I am speaking from memory.

Senator MCKELLAR. But the result was the court actually canceled the contract and required payment of the A. C. C. A.?

Mr. DAILY. That's not my legal interpretation of what the court did. The court authorized the receiver to make settlement; the receiver insisted that it was $75,000, and it was settled for $35,000.

Senator MCKELLAR. Will you be good enough, when you look into it, to send me copy of it?

Mr. DAILY. Yes, sir.

By Senator MCKELLAR:

Question. Mr. Creekmore——

Answer. I hope the Senator will realize that we are not too much concerned with profits. I think it will also be interesting to the committee to know that the United States Government, through the Federal Farm Board, authorized that loan made to the Georgia association and approved it and, anyhow, the receiver brought suit against the A. C. C. A., and, as Mr. Daily tells you, it was compromised for the benefit of the United States Government. That's another experience we had with the Government.

Question. Of course, when the Government doesn't furnish the money, but requires the repayment, you regard that as an experience, but when they furnish you money at a low rate of interest, why, that's only a proper function.

Answer. We have paid every cent we owed the Government on June 30. I have a feeling of pride because we paid all that we owed, and in some cases we paid what we didn't owe, but in this case here comes the Government of the United States through its agency, the Federal Farm Board, through which, at the time, we had a loan of $10,000,000, and they approved this loan of the A. C. C. A. to the Georgia association; then when the Georgia association goes into the hands of a receiver, the receiver, for the benefit of the Government, filed suit against us for $70,000.

Question. Didn't the loan with which repayment was connected have the effect of adding to the cost of the Georgia operation? Where the cost was $2.43 and this loan, after it had been carried out, would have apparently reduced the cost to $1.

Answer. You heard Mr. Daily's statement on that question. It was understood later that the Georgia association did use some of this money to reduce its operating expenses, but it wasn't known at the time, yet we are the ones who paid.

Question. You don't approve of that conduct on the part of the Georgia association?

Answer. I don't approve of conduct on the part of any association or organization or business that tends to defeat it.

Question. That's right. In effect, didn't the loan contract mean that your members were paying 25 cents a bale on an old deficit?

Answer. I think the Farm Board suggested that.

Mr. DAILY. The payments made by the Georgia association on their $70,000 loan were limited to the reserve they could deduct.

By Senator MCKELLAR:

Question. Even assuming that it was, you might be paying off an old deficit?

Answer. Yes; that's true; and I think that's the theory of competitive marketing in that the members do pay the losses.

Question. Mr. Creekmore, I will ask you one or two more questions. Just how many of the various State organizations are making deductions under contracts with you or the Farm Credit Administration to repay old debts?

Answer. I think I can say none, but I would like to ask if that is true. [Confers.] I am rather positive none, and I would like to make a note, if I may, to correct my testimony if I am wrong.

Question. I am not sure whether I asked you to file copies of the minutes of your board. Did I or did I not, or have you them here?

Answer. You mean the minutes?

Question. Yes.

Answer. You didn't.

Question. I would like to have a copy.

Answer. May I ask that they be treated as confidential?

Question. For the present we will do that unless the committee overrules you. I want to ask you again——

Answer. Just a minute. I presume I have the right to say that we will do that.

Question. I think we discussed it before, but I wanted to be certain about it. What was the status of the various State associations at the end of the 1928–29 season?

Answer. That was prior to the 16-cent-loan operation?

Question. Yes. Would you be good enough to supply me with copies of their balance sheets?

Answer. I haven't that information. I don't know whether I can get it or not. I will make an effort to.

Question. I believe you stated, in your judgment, at that time they were insolvent?

Answer. No, sir; I said that on October 21, 1929, or previous to the settlement forced on us by the Federal Farm Board, the co-ops were worth approximately two and one-half million dollars.

Question. If you will file balance sheets from these several concerns, I will be much obliged.

Answer. If I can do that.

Question. Isn't it a fact that the first loans made by the Farm Board to the State cooperative were to cover speculative losses resulting from the policy of scientific selling during the 1928–29 season?

Answer. I can only state from general knowledge or hearsay. I think the first real money advanced to the cooperatives was to take care of the Farm Board's Stabilization operation through the 16-cent loan.

Question. The first advance of funds made by the Farm Board on June 30, 1930, was $15,000,000.

Answer. The cotton stabilization was organized June 1, 1930. The Farm Board commenced October 21, 1929, when the Farm Board stated they believed the prevailing prices were too low and wanted to advance them to 16 cents a pound.

Question. I want to read you a letter from Mr. Carl Williams, a member of the Board, dated May 24, 1932, to Stanley Reed, attorney for the Farm Board. [Reading:]

"You will recall that I gave you an informal memorandum on this point (transfer of warehouse receipts from New York banks to Federal Reserve Bank of Atlanta, New Orleans branch, to facilitate a proposed plan of liquidation through sales of cotton, largely of foreign interests, both on cash and consignment basis) the other day, asking whether, in case the corporation sells spot cotton, pays pro-rata loan to primary lenders at New York, and buys futures, this program will have to be officially approved and authorized by the Federal Farm Board.

"I would prefer that no official recognition be given by the Board to this program if it is possible to avoid doing so. If recognition must be given, I suggest that, if possible, it be a mere authorization to Stabilization to deposit amounts above primary liens with the Guaranty of New York and without describing the purpose for which the money is placed there.

"You will note also the complication that it is proposed to handle this matter through A. C. C. A. and to handle the futures in an A. C. C. A. special account rather than for the direct account of Stabilization. There are many obvious reasons for this"—

And so forth.

Then, a letter to the Farm Board from the C. S. C. What is that?

Answer. The Cotton Stabilization Corporation.

Question. It reads as follows:

"Your instructions regarding passing of entries through A. C. C. A.'s books in an account styled the "Cotton Stabilization Corporation's June account" will be strictly followed.

"As a matter of information to you, all invoices are rendered in the name of the A. C. C. A., but collections of the items are effected by the Cotton Stabilization Corporation, which eliminates from the account all entries pertaining to collections of invoices rendered against these sales. All other items, such as margins on futures, margins on call sales, payment of claims rejections, and other claims will be handled through Cotton Stabilization's June account."

Question. Before the Stabilization Corporation was organized or recognized by the Federal Farm Board—how could it have been for account of the Stabilization Corporation before it was organized or recognized as a Stabilization Corporation by the Federal Farm Board?

Answer. I think all of the members of the Farm Board, other than Mr. Legge——

Question. You will have to get that information from them. Did the A. C. C. A. or affiliated associations sell any futures in the open market between November 1 and December 15, 1930?

Answer. November 1 and December 15, 1930?

Question. Yes, sir.

Answer. Sell any futures?

Question. Yes; in the open market.

Answer. It may have sold a nominal amount of futures to cover the fixation of the members of the optional pool cotton. Otherwise, no.

Question. Didn't they buy 78,300 bales of futures for the Stabilization Cotton Corporation between those dates?

Answer. Yes; I mentioned that in my statement. I think I said 71,000.

Question. It is 78,300. Did the A. C. C. A. or its affiliates sell these contracts?

Answer. The 71,000 or the 78,000?

Question. Yes.

Answer. No, sir.

Question. How much A. C. C. A. stock does the Georgia association now own?

Answer. The Georgia Cotton Cooperative Association, which is now operating in Georgia, and very successfully, I believe, owns one share of stock, but they have authorized the purchase of $300,000 of preferred stock in the A. C. C. A.

Question. Did they get that money from their portion of the Government loan?

Answer. That is correct.

Question. Did the A. C. C. A. require any agreements as to the approval by it of managers or other State officials or policies in connection with the loans it made to the State associations?

Answer. Please repeat that.

Question. Did the A. C. C. A. require any agreements as to approval by it of managers or other State officials or policies in connection with the loans it made to the State associations?

Answer. The A. C. C. A., at about the time this financing operation was being done, did object to the management of the Texas association, and that held up, from our viewpoint, that purchase of the stock, but at the time the Texas association was also considering whether or not they would purchase the stock. That is the only connection I can think of in that question.

Question. Was any spot cotton sold by the A. C. C. A. or its affiliates to the Stabilization Corporation during 1930, 1931?

Answer. I believe not; I can't state.

Question. Would you be willing to look it up?

Answer. Certainly.

Question. And also, have you got the information on how much of this, if any, was sold to the A. C. C. A. and how much to the spinners for account of the Stabilization Corporation?

Answer. Let me see if I get that. How much was sold to the spinners?

Question. To the A. C. C. A. and how much to the spinners for the account of the Stabilization Corporation?

Answer. How much of the stabilization stock?

Question. Were there any exchanges of cotton between the A. C. C. A. and the Cotton Stabilization Corporation during 1930–31? There was?

Answer. We will get that. I testified yesterday I think there was some transfers, but I don't remember.

Question. And I would like to have a memorandum as to that. Did the A. C. C. A. receive from the Cotton Stabilization Corporation any future commissions in excess of those actually paid out?

Answer. I think the A. C. C. A. did receive some future commissions from the Cotton Stabilization Corporation through the use of its internal brokerage account, which I mentioned yesterday.

Question. Could you get a memorandum or statement showing what these commissions were?

Answer. Yes, sir.

Question. Then I want to ask you, did your association receive any selling commissions on stabilization stocks, or collect buying commissions, or make any profit on cotton sold to the Stabilization Corporation?

Answer. The Cotton Stabilization Corporation paid us merely approximately 48 for the first year, as I testified yesterday or the day before, 29 cents for the second year, and 27 cents for the third year.

Question. In the settlement of 1930–31 operations with the F. C. A., I note by Senate Report 1456, page 22, that is known as the McNary report, the sum of $2,628,063.22 of assets turned over to the F. C. A. What were those assets and where were they originally; can you tell us?

Answer. Now, will you refer me to your question there, the McNary report, I believe you said.

Question. Yes, sir. In the settlement of the 1930–31 operation with the F. C. A., I note by Senate Report No. 1456, page 22—have you got that?

Answer. Yes, sir.

Question. The sum of $2,628,063.22 as assets turned over to the F. C. A. What were those assets and where did they originate? That is the question.

Answer. We do not check with the figures furnished by the Comptroller to Senator McNARY on his audit. May I ask Mr. Hill or Mr. Conroy, can you help us on that? I just presume that it was the assets which the Agricultural Marketing Act protected that were turned over, the act reading—the Agricultural Adjustment Act reading—that we were to be paid the loan-value cost, plus carrying charges, less any assets or profits arising out of the transaction on this particular cotton, but if this is what it has reference to, we think it amounted to $4,900,000, I believe. That is filed in the 1930–31 statement, which has been given you.

Question. Well, the statute required—have you the provision of it there? The statute requires that all assets originating in connection with the 1930–31 operation be turned over, didn't it?

Answer. No, sir.

Question. It did not?

Answer. I am very familiar with that. This is being read from the compilation of the Agricultural Adjustment Act, as amended, and I am turning to page 3, part 1. [Reading:]

"Cotton option contracts: SEC. 3. The Federal Farm Board and other agencies of the Government, not including the Federal Intermediate Credit Bank, are hereby directed (a) to sell to the Secretary of Agriculture at such price as may be agreed upon, not in excess of the market price, all cotton now owned by them. (b) To take such action and to make such settlements as are necessary, in order to acquire full, legal title of all cotton on which money had been loaned or advanced by any department or agency of the United States, including future contracts of cotton, or those held as collateral for loans or advances on, and to make final settlement of such loans or advances, as follows: 1. In making such settlements with regard to the cotton, including operations to which such cotton is related, and such cotton shall be taken over by all departments or agencies other than the Secretary of Agriculture, at a price or sum equal to the amounts directly or indirectly loaned or advanced thereon and outstanding, including loans by the Government department or agency, and any loans senior thereto, plus any sums required to adjust advances to growers, 90 percent of value of cotton at the date of its delivery in the first instance as collateral to the department or agency involved, such sums to be computed by subtracting the total amount already advanced to growers on account of values of which such cotton was a part, not over 90 percent of the value of the cotton to be taken over as of the time of such delivery as collateral, plus unpaid accrued carrying charges and operating costs on such cotton, less, however"—

Are you with me there?

Senator MCKELLAR. Yes.

Answer (reading):

"Less, however, any existing assets of the borrower, derived from net income earnings or profits arising from such cotton and their operations to which such cotton is related, all as determined by the department or agency making the settlement."

I believe that answers your question.

Question. Well, now, I want you to tell us exactly what you did with the seed-loan cotton? You did not sell that, did you? That seed-loan cotton is very near to my heart.

Answer. Well, that, I believe is going to be discussed between you and Mr. Henry, and I believe that he can probably give you his end of it, and then at that time, if you are interested, I will be glad to try to supplement it.

Question. Now, I am quite sure you can answer this: In October 1931 the Department, as I recall, announced it would accept cotton as collateral on seed loans at 8 cents a pound, Middling ⅞-inch, or approximately 2 cents above the market?

Answer. Yes, sir.

Question. Now, presumably the seed-loan cotton was simply delivered as a collateral to the Department. Prices were not high enough at any time to permit its sale at collateral values. Now, did you charge commissions on that cotton?

Answer. We discussed that yesterday, I believe. I think the report is hardly fair, because it should give us credit for talking Secretary Hyde into making that collateralized loan, which resulted in a great benefit to the seed-loan member as well as others.

Question. Well, suppose it was just a gift from the Government to the seed-loan member?

Answer. As it turned out, because of our insistence, it was not a gift, and it proved very satisfactory to the Government. That cotton was generally sold, or the greater part of it was sold, under the Agricultural Adjustment Act which I have just read, and delivered to the Secretary of Agriculture, but as prices advanced, and as members got liquidated, some of the cotton was sold at even higher prices than the cotton finally sold for, the balance of the cotton.

Question. Well, now, in that connection, I want to ask you, did the A. C. C. A. perform any function or receive any remuneration

either from the producers or the Department of Agriculture in connection with collateralized or this seed-loan cotton, or was this handled by the State organizations?

Answer. Well, we have an exhibit here. That is the last exhibit on fees received. Yes, sir; we have performed a good many functions. We mentioned yesterday that we had received 111,899 bales in the year ended July 31, 1932, on which the Secretary of Agriculture paid us 85 cents a bale for reconcentrating, classing, and accounting by individual loans.

Question. That means the seed loans?

Answer. Seed loans; that is the seed loans. Now, in this same exhibit which was made a record Monday, Mr. Hill says—if that is what you mean, I know that we did not get any fees in regard to the collateralizing of the cotton, and I don't think that you really mean that.

Question. You get commissions on the sales?

Answer. On the handling; yes; all of it is on record. We got—and I hope that question was not serious that we were paid anything for having the Secretary of Agriculture take the step, because we were justified in being of service to the members.

Question. Now, I may repeat myself here, and, if so, I wish you would call attention to it, but I want to be certain about it. How much of the cotton received by the A. C. C. A. and its subsidiaries in 1931–32 was sold or transferred to the Cotton Stabilization Corporation?

Answer. Well, of course, I can't say; I haven't got that information.

Question. Well, maybe I can refresh your memory about it, because on an inquiry in November 1931 you stated this [reading]: "We have converted by stabilization approximately 110,000 bales out of some 200,000 bales of futures we had at one time or another held."

Answer. If I made that statement, it is correct.

Question. Well, now, how much of the cotton received by you in 1931–32 was sold to or transferred to your 1931 pool operations in exchange for futures?

Answer. Have you my statement on that, because I don't know?

Question. Well, I will read your statement and see [reading]:

"The Farm Board stated 1,000,000 bales was to be converted in this fashion by delivering 1931–32 receipts to the 1931 pool in exchange for its futures", and I think you have testified as follows: "We have converted from deliveries to the A. C. C. A. 1931–32 in the 1930–31 pools at this time approximately 200,000 bales, but are in course, as we get the cotton classed and allotted up, delivering 500,000 bales to the 1930–31 pools in lieu of the futures we now carry." That is correct?

Answer. Yes, sir.

Question. Just what steps were taken to make certain that the 1930–31 pool, in which obviously different producers were interested, did not lose or profit out of the 1931–32 pools?

Answer. The Farm Board recognized at the beginning of the 1930–31 operation that if it was successful it would have to stand a loss. When the season was concluded and the market was lower, they made arrangements with us to handle the cotton, just as they had made with the Stabilization Corporation cotton, and any transfer made between the A. C. C. A. in its current operations, or in its 4 years' operations, beginning with August 1, 1931, was very closely examined and approved before any deal was made. Now, of course, the management of the A. C. C. A. have no personal interests in any transaction. Their duty is to handle for the benefit of the members the cotton to the best advantage, and then in handling the 1930–31 and the Stabilization Corporation cotton it was equally their duty to advise with the Farm Board and see that they were protected.

Question. Did the A. C. C. A. receive any commissions or make any profits on cotton sold or transferred to this pool?

Answer. Well, the A. C. C. A. received—I can't state whether they made any profits or not.

Question. Well, did you receive any commissions or fees?

Answer. Not in the transfer. The record here shows that we did receive a fee of, I believe, 27 and 29 cents, approximately, for the 2 years on the 1930–31 stabilization operation.

Question. In other words, when you transferred this from the A. C. C. A. to the Stabilization Corporation, you received commissions at 27 and 29 cents?

Answer. Approximately that, per bale, for the handling of the cotton during the season.

Question. Is it not true that the outright purchases that you made were not made out to fill out the options on cotton delivered by members but was simply plain merchandise operation such as any private cotton concerns were in?

Answer. I could not say that that is true. I question the correctness of that statement, but I can't make a definite reply to that.

Question. Did the A. C. C. A. make any profits on future transactions for the Stabilization Corporation in the way of commissions or otherwise?

Answer. I believe that question was asked a few minutes ago, and I told you that the only profits we made on the Stabilization Corporation was probably through our internal brokerage account.

Question. Do you have a copy of your balance sheet as of July 31, 1932?

Answer. You have, I believe, in your file.

Question. You mean it is an exhibit; July 31, 1932, I have a copy of it, if that would be of any service, or will you just furnish us a copy here?

Answer. Yes, sir.

Question. The Comptroller General has requested it in his report, and I would like to have it to go into that matter.

Answer. Yes, sir. That is to furnish a copy of the 1931–32, ending July 31, 1932, balance sheet for the A. C. C. A.?

Question. Yes, sir. From an examination of this I do not find any reference to the amount due the A. C. C. A. by its affiliated associations, or the amount due the affiliated associations by the A. C. C. A., except certain special loans. Could you give the committee this information?

Answer. I am sure it has no reference to these loans. There were no loans.

Question. There were none?

Answer. I haven't the statement before me, but what information the Senator desires I will give it to you.

Question. Well, I have got the Comptroller's report here, which shows the balance sheets, but there is nothing here to show the amounts due the affiliated companies, or due by them. You must have dealt with them, and I was just wondering if that was an omission. Could you give us the facts?

Answer. Well, certainly it was not an omission, but it may have been overlooked. What is it your wish to have, a statement of the amounts due the affiliated associations?

Question. The amounts due by the affiliated associations and due them.

Answer. Of the A. C. C. A. for 1931–32?

Question. Several of the State associations suffered a loss on the immediate fixation pool in 1931–32 in excess of the reserve?

Answer. I think the Texas and Mississippi and perhaps the Mid-South.

Question. And wasn't the Mid-South due back a large amount?

Answer. Very probably; I am sure they were, if they lost it. The operation has changed, beginning July 31, 1933, and that is the reason for the A. C. C. A. approving some of the managers of the State associations, the business managers, in order that it may retain control to some extent and eliminate those losses of the character that occurred during the 1931–32 season.

Question. I think probably that if you would give us from the records your final profit and loss statement of each of your affiliated associations for 1931 and 1932, and their balance sheet as of July 31, 1932, we could get that information?

Answer. I am sure Mr. Henry will be glad to furnish you that, and I will try to give you that for the other State associations, of course.

Question. Did the A. C. C. A. receive any selling commissions on the stabilization cotton sold during 1932, 1933?

Answer. I believe that was a question asked before and answered this morning.

Question. Well, I thought we had that for 1931–32. This is 1932–33.

Answer. I believe that the A. C. C. A. received no commissions. I know that they received no commissions other than as shown on the exhibits given you and relative to which we have discussed a number of times, showing the various amounts. As I have stated before, 42.88 in 1931, 27.67 per bale in 1932, and 27.33 per bale in 1933.

Question. Have you any contract entered into between you and the F. C. A. as to the method of your retiring your indebtedness for the '30–'31 operation? Have you got a contract which you entered into with the F. C. A. as to the method of retiring your indebtedness for the settlement of the '30–'31 operations?

Answer. You mean in regard to the settlement of 1930?

Question. Did you enter into a written contract about it?

Answer. Yes, sir; I believe we did.

Question. Would you furnish us a copy?

Answer. I believe that is one thing that we did not bring that we might have brought.

Question. What arrangements were made by you with your affiliated associations as to the retirement of their indebtedness to you?

Answer. On what?

Question. Whatever debts any of them owe.

Answer. On the '30–'31 operations?

Question. Yes, sir; on any operation they owe you now.

Answer. Well, for 2 years, until our bylaws were amended in May, I believe, 1933, the A. C. C. A. charged 2-percent interest to be established as loss reserves to take care of any possible losses or loss made by the Federal Farm Board or made by the A. C. C. A. which were not paid. That is the only connection I can see in your question, because it was just the usual business procedure.

Question. You don't have any contract with them; no security for what they owe you?

Answer. I believe they couldn't owe us anything; I am not sure about that.

Question. In what form would the debt created by these affiliated associations as to the $5,000,000 in which they all participated—how would all of that be evidenced, and how will it be paid back, and all of that?

Answer. I will have to refer you to my statement again that I read the first day.

Question. I have forgotten about it.

Answer. I marvel at your patience and your ability to continue.

Question. Well, I am nearly through.

Answer. I am reading from page 12 of the report submitted Monday, which I believe is one of the most complete reports ever submitted before a Senate committee. [Reading:]

"Prior to the close of the 1934–35 season member associations borrowed from Farm Credit Administration $5,000,000 at 3-percent interest, with which they purchased from A. C. C. A. an equal amount of preferred stock. Maturities are as follows: 5 percent

on or before July 31, 1936; 10 percent on or before July 31, 1937; 10 percent on or before July 31, 1938; 15 percent on or before July 31, 1939; and 60 percent on or before July 31, 1940.

"Member associations participating in the financing pledged all their preferred stock and assigned to Farm Credit Administration all earnings made in A. C. C. A. operations, excluding patronage dividends to members. Earnings in A. C. C. A. withheld as reserves from final settlement with the members have been as follows." And then I total $2,454,000.

Question. That is loans?

Answer. No; just showing our earnings.

Question. Well, what I want is if you could have a statement made up as to how much each one of your affiliated companies borrowed, not the total amount but how much each one borrowed, and you have already given the maturities of the notes there.

Answer. You want them individually?

Question. Yes. For instance, take my good friend over there, Mr. Henry. He borrowed some of that money, and I would like to know what the debt is.

Answer. He don't owe me anything. He owes the Farm Credit Administration.

Question. But you lent him the money?

Answer. No, sir.

Question. Well, it says "A. C. C. A.", and that is what confuses me.

Mr. DALEY. Can I make a statement, and I think I can make a correct statement of the situation? Each individual State borrows from the Farm Credit Administration so much money. In the case of the Mid-South it is $800,000. They give their note for that.

Question. And the note of A. C. C. A.?

Answer. No; as to the A. C. C. A., that would be preferred stock, and A. C. C. A. would give preferred stock, and the preferred stock that the Mid-South held in A. C. C. A. they put up as collateral, along with their note, to the Farm Credit Administration.

Question. All the Government had to show for the $800,000 then would be the preferred stock in the A. C. C. A.?

Mr. DALEY. Technically speaking, that is true. They have other assets, the assets of the State associations.

Senator BANKHEAD. Would the A. C. C. A. give its note?

Mr. DALEY. No, sir.

Mr. CREEKMORE. If you will pardon me, I do love to disagree with my lawyers.

Senator MCKELLAR. That is a fine practice.

Mr. CREEKMORE. Technically, that is true. But I consider this statement is of some value as to the loans that matured, and I believe that the Farm Credit Association will agree with me. Here is a correct statement, I am sure, of the situation: Member associations participating in the financing, pledged all their preferred stock and assigned to Farm Credit Administration all earnings made in A. C. C. A. operatings, excluding patronage dividends, to members. In other words, until the loan was paid, or earnings which would accrue to individual associations on a per-bale basis would go to the Farm Credit Administration, instead of the usual patronage dividends to members. Were you consulted about this financing, and did you approve it?

The WITNESS. I was consulted about it. It was brought up by the Farm Credit Administration, and I did approve it because it was done.

Question. It would not have been done unless you had approved it, would it?

Answer. Unless my directors and the State associations went against my judgment.

Question. Had overruled you?

Answer. Yes, sir.

Question. What provision, specifically, of the law were these loans made under?

Answer. I would say under the Agricultural Marketing Act and the Farm Credit Act.

Question. 1933?

Answer. No; the Agricultural Marketing Act, I believe, was June 29, 1929. It was some time in there. Of course, I am not a lawyer.

Question. Mr. Creekmore, your balance sheet of November 1933 shows you owe $16,348,341.07 to the Farm Credit Administration and $7,031,222.24 to the Central Bank for Cooperatives. Was that the peak of your loan from the F. C. A., or can you answer that without an examination?

Answer. Will you repeat the two figures? I did not get the figures.

Question. November 1933 is the date shown here.

Answer. Yes.

Question. Shows you owed $16,348,341.07 to the Farm Credit Administration and $7,031,222.24 to the Central Bank for Cooperatives.

Answer. I think it is. The peak of our loan has been about $15,500,000 during the operations for the handling of the 10-percent loan. At that time we were moving cotton so rapidly that the Farm Credit Administration loaned us, I believe, $5,000,000, without the subordination, for a period of 2 or 3 months, to take care of it. At that time the total was $12,000,000, I believe, so that must have been approximately the figure.

Question. Why didn't you borrow the money from the Central Bank for Cooperatives?

Answer. Why didn't we?

Question. Yes, sir.

Answer. We did get some of it from them.

Question. You borrowed seven million from them, but ten million from the Farm Credit Administration?

Answer. You mean at one time we had twenty-three million?

Question. Yes, sir; and you state here on your balance sheet of 1933, you state you owe sixteen million to the Farm Credit Administration and seven million to the Central Bank, and I was wondering why you did not borrow the money from the Central Bank.

Answer. It was. It was obtained from the Farm Credit and Central Bank.

Question. The Central Bank felt a little dubious about making that much of a loan, didn't it, right about that time?

Answer. I think they operate much the same. They both knew about this $5,000,000 additional, and there was no objection to it.

Question. And then you applied to the Farm Credit Administration and they let you have more?

Answer. As you know, Senator, both of those agencies work together, and anything that we do or take up with the Farm Credit Administration is known to the Central Bank for Cooperatives, and anything we take up with the Central Bank for Cooperatives is known to the Farm Credit Administration. Now, I am just a little bit puzzled about the $23,000,000 loan.

Question. I wish you would look up your records, so that you can let us know the facts as to this loan for that year. I want to ask this: I think you stated this loan—these loans from the Central Bank were subordinated to those of commercial banks; is that correct?

Answer. Yes, sir.

Question. Have you got a copy of the note, and could you give us a copy of the subordination? I would like to see that.

Answer. I could very easily get one.

Question. And make it an exhibit.

Answer. All of the subordinated loans are with the Central Bank for cooperatives.

Question. What provision of the law did your friends, the Farm Credit Administration, operate under when you made these notes? Is there a provision of the law that authorized the Farm Credit Administration to subordinate those claims to individual loans?

Answer. The present Solicitor General of the United States, I believe, worked out that subordination clause. It has been used since to a much greater extent by the Reconstruction Finance Corporation, and I suggest that you consult him.

Question. I know him very well, and I will call him to explain it, because I am very doubtful if there is any law for it, even if it was worked out by my distinguished friend.

Answer. Well, I hope you are wrong.

Question. We will see about it. I may be.

Answer. I did not see the law.

Question. The loans from the Farm Credit Administration were likewise subordinated to the loans of the Central Bank?

Answer. The loans from whom?

Question. From the Farm Credit Administration; they were also subordinated to the loan of the Central Bank for Cooperatives?

Answer. I think so. Would you like to have a copy of that note?

Question. Yes, sir; in other words, I want to get this subordination business clear in my mind.

Answer. I thought that had gotten to be such a general practice in Washington it did not occur to me to bring it here.

Question. You could easily give us your profit-and-loss statement for each of your affiliates for 1933–34, could you not?

Answer. No; I could not very easily do it. I can do it. We do not keep the books for our affiliated associations.

Senator MCKELLAR. I will ask Mr. Henry for his, but if you can get it from the others, I would be glad for you to do it.

By Senator MCKELLAR:

Question. How much cotton did A. C. C. A. buy which has been placed in the 10-cent loan, or your affiliated associations?

Answer. Not one bale.

Question. How much profit did you tell me that there was in the handling of the 10-cent loan on cotton?

Answer. I don't think there could be any possible way of ascertaining the profit, if any was made, on the 10-cent loan. They have been permitted to turn over $1 per bale.

Question. And you received that?

Answer. Yes, sir.

Question. Do you know whether any of the regional or State associations bought any of this 10-cent loan cotton?

Answer. During a time when the market was at such a level that cotton was selling freely, at the discretion of the producer, A. C. C. A. believed it was wise to take or move some of this cotton, and some of the State associations were given permission to handle the cotton in this way.

Question. Do you know whether it was made as purchased cotton or as immediate fixation pool cotton, or how it was made?

Answer. I am sure it was made as member cotton, because that would be the only way it would be properly recorded.

Question. How would it be handled?

Answer. Well, a member turned it over to us, or the association would at the time of delivery, and it was handled in such a way that it would go back to the members. It was done in various instances in one of two ways.

Question. Did the A. C. C. A. ever transfer cotton from its call pool to the 12-cent loan?

Answer. No, sir. Under certain conditions we perhaps could have done that, but the conditions were such that it just could not be done; it was not practicable.

Question. Didn't you authorize a transfer of 20,000 bales in March 1935?

Answer. I don't know whether it was authorized or not. That was the time of the very heavy break in the market, and because of the break, under the loan, the cotton would have been closed out. The market declined about 200 points a day. Fortunately, the directors of A. C. C. A. were in New Orleans meeting, and on the decline of the market I asked permission not to fix the price, which would have shown the members a very material loss, and I thought the decline was unjustified, and I believe some plan could be worked out to turn this cotton over to the Commodity Credit Corporation on the 12-cent loan. But that plan could not be worked out with the market as it was. Then the market advanced 1 cent or 2 cents a pound, and in that way quite a saving was effected for our members. That is another evidence of services rendered to the members through the cooperatives that could not possibly have been rendered by the cotton man.

Question. How did you fix upon the amount of 26,000 bales that you thought you might need to transfer? Was that all that you had of that cotton?

Answer. I don't recall the amount. I would say that was the approximate amount of the cotton, but the matter under discussion was for all of the cotton, not just that portion of it.

Question. Have you got here a copy of your balance sheet of January 31, 1935? If you have not, would you be willing to furnish it to us?

Answer. Our audits are annual audits throughout the year. We have a statement of the association for the year, and an estimate as of January 31.

Question. You have a balance sheet, haven't you?

Answer. The balance sheet of A. C. C. A. is an estimate.

A VOICE. Not of January 31.

Answer. I think so.

Question. Will you give us a copy of the balance sheet of January 31, 1935?

Answer. Yes, sir.

Question. How does it happen that the loan to cover subscription to your capital stock, that they were made to State associations, rather than to A. C. C. C. A.?

Answer. It was on the suggestion of the Federal Farm Board. If the loan was made direct to A. C. C. A. it would not be considered as capital funds.

Question. It was just another way of handling the same matter. You could have handled it the other way?

Answer. No; I don't think we could have handled it through A. C. C. A. and had the same result.

Question. Couldn't the Board have simply loaned you, or the Commodity Credit Corporation, or the Board—I believe they loaned you the money—couldn't they have lent you the money and then you turned it over to these other concerns?

Answer. It would not have had the same effect. It was handled the way they prescribed.

Question. You say they dictated that?

Answer. Yes, sir.

Question. Do you, as a policy, sell cotton ahead to mills at market value as the large cotton merchants do?

Answer. As a policy we do not.

Question. Do you do it at all, whether you do it as a policy or otherwise?

Answer. We have done it.

Question. What has been the largest short basis you have assumed, and when, in such transactions?

Answer. My, how I would like to have that question of some of the cotton dealers.

Senator MCKELLAR. Is there something that you want to ask?

By Senator BANKHEAD:

Question. What constitutes the peak of your holdings in spot cotton?

Answer. I would be very glad to furnish that statement. I imagine it will be 50,000 bales.

Question. Mr. Creekmore, do you have a seat on the exchange?

Answer. Yes, sir.

Question. Does the A. C. C. A. have to put up margins on your short sales, hedging sales?

Answer. No, sir. We have to maintain certain margins, but now we settle each day with our brokers. The limit of credit allowed under the rules of the New York Cotton Exchange to any one firm is $10,000 by any one broker, so, with the volume of cotton we are handling, it requires generally a settlement each day if there is any movement in the market. With the amount of cotton that we handle, what we do is to settle up each day.

Question. You don't have to put up like the market traders do on the market?

Answer. I believe it is generally the custom for any firm, however small, if they are operating conservatively, that they are allowed some credit; but a speculator, they would have to put up. By "speculator", I differentiate between the hedge operator and the buying or selling of cotton for a speculation.

Question. How does that type of operator perform; do they have to put up a margin on short sales?

Answer. The majority of them do, I think.

Question. Does not this practice of selling to the mills ahead—does it not involve considerable risk if the deliveries do not hold up, and does it not compel you to buy cotton in the market to fill the sales you have made and to protect your members?

Answer. We have never been in that position. We might be short a few bales of spot cotton, but we have never been in a position where our interests were jeopardized.

Senator MCKELLAR. It is now 1 o'clock and I have about concluded with you. Do you desire to make a further statement?

Mr. CREEKMORE. Yes; I shall desire, before the committee formally adjourns, to make a statement and I will discuss that with you later.

Senator MCKELLAR. Yes, sir. I want to get a copy of the McNary report, and it may be that I will have a few questions about that, I don't know, but I think that winds you up. How many witnesses have you this afternoon? Mr. Henry is the next witness, but if you have anyone here who wants to get away we would be glad to hear from them.

Mr. CREEKMORE. I think we might start with Mr. Henry this afternoon.

Senator MCKELLAR. If you have any short witnesses, we would be glad to hear from them.

Mr. CREEKMORE. Thank you.

Senator MCKELLAR. Couldn't you confer about that and let us know about it immediately after lunch?

Mr. CREEKMORE. I was just going to suggest that we do that. It will not take us long to decide about it.

Senator MCKELLAR. It is now 1 o'clock. We will take a recess and we will be back at 2 o'clock.

(Witness excused.)

* * * * * * *

N. C. Williamson, the next witness, testified as follows:

Examination by Senator MCKELLAR:

Question. Give your full name and address to the stenographer.

Answer. N. C. Williamson, Lake Providence, La., farmer.

Question. Are you engaged in any other business?

Answer. No, sir.

Question. You are a dirt farmer, a really honest-to-God farmer?

Answer. Yes, sir.

Question. How long have you been connected with the cooperatives?

Answer. I have been a member since their organization—in the Louisiana association.

Question. When was that?

Answer. 1923, I believe, the organization set up.

Question. When did you join the A. C. C. A.?

Answer. When it was organized.

Question. And you have been with them all the time?

Answer. Yes, sir.

Question. How many bales of cotton do you raise a year?

Answer. On an average about a thousand; it varies.

Question. You average about a thousand bales a year?

Answer. Yes, sir.

Question. What position do you hold with the A. C. C. A.?

Answer. President.

Question. How long have you been president?

Answer. I believe about 2 years; I am not sure. I think this is the second year.

Question. And you are now the president?

Answer. Yes, sir.

Question. Do you sell all of your cotton through the cooperatives?

Answer. I deliver it to them and they sell it for me.

Question. You don't sell any of your cotton, and haven't since you have been in the organization?

Answer. Possibly 200 or 300 bales during the 12 years.

Question. Is there something you wish to tell the committee especially, and if so, just do so and use your own judgment.

Answer. I want to say that I am a farmer, as I have already said, and I was glad to hear you say that you were once a small farmer yourself.

Question. I was once a very small farmer.

Answer. I was, too. I think I can qualify. I have done more of it than you have, I expect.

Question. I did a good deal as a boy.

Answer. I was born on an 80-acre farm in central Mississippi, and I plowed and hoed, not because I wanted to but because I had to, and about the largest crop I and my three brothers ever produced in 1 year was four bales of cotton.

Question. I beat you.

Answer. I know something about the troubles of the farmer, and I am speaking as a farmer. I incidentally am a director of the Louisiana Association.

Question. Are you a salaried member?

Answer. Mr. Creekmore stated, I believe——

Mr. CREEKMORE. Mr. Williamson is paid a per diem of $25 a day while attending meetings. I am glad to get rid of him as it is costing us $25 a day.

Question. All right, Mr. Williamson.

Answer. Senator, I am not a Senator or a lawyer, but a farmer, and you will have to bear with me.

Question. Proceed in your own way.

Answer. I have a good many notes here, and I may get in trouble and have to have help. In the first place, I want to say to you, and I believe you will agree with me, Senator, that I think the greatest compliment that the cotton farmer could have paid him is the serious exception to the farmer-owned marketing organizations. According to the statements made by the cotton trade—competent, efficient men of long experience—they are complaining that they can't compete with a lot of farmers that have set up an organization to sell their cotton. If that's true, I think it is a compliment, and I believe you will admit that it is. Of course, all of these dealers—there is one thing that surprises me: that an outstanding businessman, or a busy man, or one who ought to be busy would search all over Tennessee or Arkansas to pick up the mistakes that might be made in anybody's transactions. We all make mistakes. Any business makes mistakes. I don't think we

should be criticized because we are trying to build up some reserves. I think you will see farm organizations handled honestly. I know my own organization tries to conduct its business honestly, and in my capacity as president of the Louisiana Association, whenever a mistake occurs we correct it.

Question. Are you president of both the Louisiana Co. and the A. C. C. A.?

Answer. I thought I made that clear.

Question. Perhaps you did.

Answer. Now, for the purpose of the record, I want to read to the committee the resolution that you passed, or introduced after it was passed [reading]:

"SENATE RESOLUTION 185

"*Resolved*, That the Committee on Appropriations, or any duly authorized subcommittee thereof, is authorized and directed to investigate the expenditures by the Federal Government for cotton cooperatives and their losses heretofore sustained. The committee shall report to the Senate at the earliest practicable date the result of its investigations, together with its recommendations.

"For the purposes of this resolution the committee, or any duly authorized subcommittee thereof, is authorized to hold hearings, to sit and act at such times and places during the sessions and recesses of the Senate in the Seventy-fourth Congress, to employ clerical and other assistants, to require by subpena or otherwise the attendance of witnesses and the production of books, papers, and documents, to administer oaths, to take testimony, and to make such expenditures as it deems advisable. The cost of stenographic services to report hearings shall not be in excess of 25 cents per 100 words, and the expenses of the committee, which shall not exceed $1,500, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman."

Now, under date of September 24, 1935, this letter was sent out signed by A. H. Bower, secretary, Memphis Cotton Exchange [reading]:

"*Buyer members, Memphis Cotton Exchange, Memphis, Tenn.:*

"GENTLEMEN: As you know, there will be held in Memphis during the early part of October an investigation of the activities of the Cotton Cooperative Association.

"The investigators are a special Senate committee, consisting of Senator MCKELLAR, chairman, and Senators BANKHEAD, of Alabama, and TOWNSEND, of Delaware.

"This is an opportunity for which the legitimate cotton trade has been clamoring for years, as it gives us the chance to place before the proper tribunal facts to support our honest contention that the cooperatives, as they now exist, are in no manner truly cooperatives, but rather mammoth merchandising organizations, operating not for the benefit of their farmer members but in most cases solely for private gain, all the while enjoying governmental help and privileges that were only intended for use by a truly cooperative organization.

"Our president has worked tirelessly for the last 9 months to bring about this investigation. It is now imperative that every legitimate cotton handler cooperate to the fullest in order to bring this investigation to a successful conclusion.

"All buyer members can cooperate by placing in detail with their country buyers or agents the necessity of securing affidavits from farmers who have suffered abuses because of the operations of the cooperatives. These buyers should be instructed to use every effort to immediately secure a number of such affidavits.

"In this connection it cannot be too strongly expressed that these affidavits must be complete in every respect and proof against any cross-examination, as the presentation of an incomplete case would, of course, do more harm than good. Committees have been appointed to handle the various phases of our case before the investigating committee. A special office at room 7, mezzanine floor, Memphis Cotton Exchange Building, has been opened to handle the details.

"You are urged by both our president and the writer to immediately get to work securing cases as outlined above, reporting your progress to the exchange. Complete cooperation is absolutely necessary in this fight, and our exchange must have it from all in order to successfully present our case before the Senate investigating committee."

That is signed "A. H. Bower, secretary", and is dated September 24, 1935. There was a questionnaire attached, of which I will read a copy [reading]:

"The object of this questionnaire is to secure information pertaining to the true operation of the American Cotton Cooperative Association and affiliates. The information thus compiled may be presented as evidence to the United States Senate investigating committee, which will meet in Memphis on October 15, 1935. Your answer is urgently requested.

"1. Name: Blank.

"2. Address: Blank.

"3. Business: Blank.

"4. Are you a cotton producer?

"5. Have you had any business relations with the cotton cooperatives?

"(a) Name of association.

"6. Do you at the present time consider yourself a member of a cotton-cooperative association?

"7. Have your dealings with the cooperative associations been confined to outright sales?

"(If answer is 'no', please explain in 'Remarks.')

"8. Did you consider that such sales were completed transactions and involved no further obligation?

"9. Do, or did, you consider yourself liable for any loss or eligible for any profit?

"10. Remarks.

"——— ———, witness. "Signature, ——— ———."

Now, under date of September 27—this is a circular and a clipping from the Memphis Commercial Appeal September 27th issue [reading]:

"Cotton trade maps fight against co-ops."

That's the headline.

"SENATE PROBE WILL BE HELD HERE OCTOBER 15

"Memphis cotton firms called in their buyers and representatives from all parts of the Cotton Belt yesterday morning to aid in the fight against the cotton cooperatives.

"Caffey Robertson, president of the Memphis Cotton Exchange, where the meeting was held, explained the opposition of cotton firms against the co-ops and told of the Senate investigation of the co-ops to be held here October 15.

" 'All the cotton exchanges from Norfolk to Galveston, including the small exchanges in interior points, are aiding in obtaining evidence to present at the investigation', Mr. Robertson said.

" 'We are hoping to make a successful showing at the hearing', Mr. Robertson said. 'We will show the true status of the co-ops and their true relation to the farmer.'

"Private cotton firms claim that the co-ops are not cooperatives, since there is no mutual responsibility for members to share profits and losses, and that the co-ops' losses have been borne by the F. C. A. They also doubt the co-ops' claim of membership, which includes every farmer who sells even one bale through the association.

"Among those attending yesterday's meeting was H. G. Murff, of Clarksdale, president of the Southern Cotton Shippers."

Now, under date of October 5, 1935, another letter went out. It seems that they had had other conferences.

A GENERAL LETTER

SECRETARY'S OFFICE, MEMPHIS COTTON EXCHANGE,
October 5, 1935.

DEAR SIR: As you may have already been advised, you have been unanimously chosen by our committee to act as the keyman in your vicinity for promoting the intensive effort that we must all make within the next 3 or 4 days toward securing suitable information to be placed before the senatorial investigating committee on the cotton cooperative situation.

Yours is a most responsible assignment, as it is upon you and the keymen selected in other localities that the future of our cotton industry depends.

The senatorial investigation will constitute a crisis, or showdown, in the life of our profession, and we cannot fail to substantiate our rightful case against the noncooperative activities of the existing cotton cooperative associations, who are unqualifiedly enjoying Government assistance and credit and are actually nothing more than buyers of cotton in direct competition with us.

This letter is being written to only one man in each community, and we rely upon your treating it in confidence.

As the senatorial investigation may be called as early as the latter part of next week, you can readily understand how vitally important it is that you get your drive immediately under way. It is left to your discretion as to what men you shall call upon to assist you. All firms on this market having interior connections have been instructed to keep in constant contact with their interior agents, insisting that they lend every assistance to the keyman in their community. Such buyers in your sector are being asked to contact you immediately. It is, of course, unfortunate that this work comes during the midst of the cotton movement, but we feel sure that everyone dependent upon the established cotton trade will appreciate the vital importance of this issue, and will be willing to make whatever personal sacrifices that are necessary in order to successfully build our case during the next 4 or 5 days allotted to us.

For your guidance we have singled out the four following points upon which we must all concentrate our intensive efforts:

No. 1. Questionnaires

A new form is being given you herewith. It is felt that while this new questionnaire is practically the same as the old one, it is more specific and procures the information in a more satisfactory form. If you have an unsigned supply of the old questionnaire please destroy them and concentrate on the new ones. As you can readily see this questionnaire calls for no information that any person who has had dealings with the Cotton Cooperative Association could feel any reluctance to give. We are merely trying to develop for the use of the senatorial committee a true and unbiased picture of the actual practices of the existing cotton cooperative associations, and of the transactions with the people from whom they procure their cotton. Our fight is not against the true bona-fide cooperative marketing. It is a splendid theory. But we know that the methods used by the so-called cooperative associations in cotton are not cooperative in any sense and they they are, therefore, enjoying benefits intended for the producers—actually at the producers' expense. Representing, as we do, 85 to 90 percent of the producers, it is the duty of our established cotton industry to correct this gross exploitation of producers and of their Government's well-intended generosity toward them. And we can unquestionably afford this great service to our producer friends, our Government, as well as our own industry, by revealing to the senatorial committee a true picture of the fictitious membership structure and the unorthodox cotton-buying methods of these so-called cooperative associations.

Therefore, we feel that they will be glad to cooperate in this undertaking, which is actually just as much their fight as ours.

No. 2. Ten-cent loan cases

It is common knowledge that producers who placed their 10-cent Government loans through the cooperative associations were, as a rule, treated in a far from cooperative way by the association. There are, no doubt, innumerable producers in your territory who would be glad to testify as to the low prices offered them when they elected to sell this cotton. It shall be your responsibility to line up as many such cases as possible, properly substantiating all the details by sworn evidence, invoices, etc., when practicable.

In this respect, it is also common knowledge that producers procuring their 10- and 12-cent loans through cooperative associations were signed up as members usually contrary to the applicant's knowledge or desire to become a member. Statements concerning such cases are urgently requested.

No. 3

Statements concerning various parties who would in your opinion qualify as witnesses in support of our case should the senatorial committee see fit to call on them.

Our idea here is that there are, no doubt, many reliable citizens in your community who are familiar with the various unqualified and reprehensible actions on the part of the existing cooperative associations and who would, no doubt, serve as excellent witnesses. For instance, they may have had certain experiences with the cooperatives themselves, or they may be in position to tell of specific instances or general practices in their neighborhood. Our suggestion is that you write us immediately of all such people, giving us in detail the status of each man and the instance or information that he might afford; also tell us whether he would be willing to come voluntarily or whether he would rather be called by the senatorial committee. This would, of course, include farmers, but is primarily intended to bring out the transactions with those so-called members who are at best only nominal producers. We refer to the purchases from ginners, merchants, and cotton buyers, upon whom the associations depend for their essential volume. We want to show where this volume comes from and under what circumstances. The lining up of such evidence is most important, as you can realize, in order to develop our picture as to the activities and the actual relations between these cotton cooperative associations and the people from whom they buy, or the people whom they list as members.

No. 4. Membership cards

It has come to our attention that the Mid-South Cotton Growers' Association recently sent out membership cards to various people throughout the territory. These cards have gone to all sorts of people. We have one that was sent to a Negro porter in an Arkansas town, who never produced a bale of cotton in his life. You can readily see how valuable it would be to provide us with all such cards as you may be able to procure in your territory. Accompany each card with a statement as to the status of the party to whom it was given.

In closing, we again emphasize the urgency of our task. We have only 4 or 5 days in which to do our work. That is unfortunate; but, nevertheless, with facts and common justice on our side, we should certainly be able to make our case in that time. And we can do it with your assistance. Call your friends, whom you would have help you, for a meeting immediately. Explain our objective carefully, so that they may properly acquaint the producers and others with this true issue that concerns producers just as much as it concerns us, and then let's go out and do this job as an unselfish contribution to fair play and to economical cotton marketing.

Please feel free to call the secretary of the Memphis Exchange, Mr. A. H. Bower, collect, for information or assistance at any time. Telephone numbers: Office, 6-7560; home, 7-3109.

Yours very sincerely,

CAFFEY ROBERTSON, *President.*

Now, the form of affidavit was enclosed to carry out the instruction, giving the blank town and the blank name:

"*To whom it may concern:*

"This is to certify that during the fall of 1933 I made a 10-cent Government loan on 49 bales of cotton through the Mid-South Cotton Growers' Association.

"In August 1934 I decided to sell the cotton and asked said association what the value was. They advised me in person that 24 bales of cotton was classed as 'rough' and that the value of the 49 bales of cotton was approximately 25 off of October, New York futures.

"Knowing that this offer was entirely out of line with the value of the cotton, I carried the samples to _____, who sold the cotton for me that day at 50 on October, New York, or $5.25 per bale more than I would have obtained by selling to the Mid-South Cotton Growers' Association.

"STATE OF _____,

"*County of* _____!

"Sworn to and subscribed before me this _____ day of _____ 1935.

"_____ _____,

"*Notary Public.*

"My commission expires _____ ____ _____"

Another questionnaire:

"QUESTIONNAIRE

"Town _____.

"1. Has the Mid-South Cotton Growers' Association been buying this season in your territory?

"(a) Are they now buying?

"2. Have such purchases been confined to cotton actually raised by the seller?

"3. If answer to question no. 2 is 'no', please estimate the percentage of the association's purchases obtained from sources other than from farmers selling their own cotton—that is, purchases from ginners, dealers, and merchants.

"4. In your opinion, is the association buyer sufficiently familiar with the sellers in your territory to know, generally speaking, when he is buying cotton that has not actually been produced by the seller?

"5. Is it your understanding that where purchases are made from ginners, dealers, and merchants, the seller is required to use some 'farmer member' name on the sale?

"(a) In your opinion, are such names frequently used without the farmers' knowledge or consent?

"(b) In your opinion, when such name is used is it generally done with the full knowledge of and possibly on instructions from the co-op buyer?

"(c) Have you understood that this policy is pursued by the field agents on instructions from headquarters of the cooperatives?

"6. Name those who have this season, to the best of your knowledge, sold cotton, not produced by themselves, to the cooperatives, and if you can do so, make an estimate of the amount sold by each.

_____

"7. Remarks (give any information that may be of interest).

_____"

Blank address and blank signature.

Mr. CHAIRMAN. I want to file that whole batch that I have read.

Senator MCKELLAR. All right. You don't want it put into the record twice. Just file it so he can get an exact copy.

The WITNESS. I didn't know he was taking that or I might have saved him the trouble.

Senator MCKELLAR. Well, you just take your own course.

Answer. Now, Mr. Chairman, as you note in that literature that went out, our friends, the cotton merchants, said this was a conflict between the cooperatives and themselves, and I take it they are correct. I don't consider that this is a fight between the cotton merchants in Memphis and the A. C. C. A. or the cotton cooperatives. I think it is fundamentally a fight between organized agriculture, or the cooperative marketing system, and the trade, no matter whether it is cotton, wheat, fruit, or peanuts, or what else. The same fight is going on in other territories. I just came from the Middle West and they are in the same fight with the old-line dealers with the Chicago Board of Trade that we are engaged in here between the cotton merchants and the cotton cooperatives. So I think the determination of this contest here, Senator, this trial—this investigation—will largely outline the policy that will be followed in the future regarding the legislation pertaining to agricultural cooperative marketing. I know, Senator, that you are sympathetic with the farmers. No man who was born and raised on a small farm could be otherwise fundamentally. Sometimes we get away and stay away so long we kind of forget it, but it comes back. We never can get entirely away from it. I am still there; born there and I have lived there ever since, and I am there now, but while my farming operations are not as small as they were, they are very burdensome. I am still trying to pay debts that were incurred when we were more profitable. I have never shirked any of them, and if we get along it will finally work out. We are so very much better off now than we were in the spring of 1933 that we feel rather prosperous.

I want to digress a minute or two about a question that was raised yesterday, Mr. Chairman, in regard to the resolutions adopted by the National Cooperative Council. You asked Mr. Creekmore about that.

Senator MCKELLAR. Yes.

Answer. And being a member of that committee, acting as a member of that special committee appointed by Judge John D. Mellon, president of the National Cooperative Council, to make a report at the annual meeting, with recommendations as to future policies of cooperatives, these resolutions that you referred to were adopted, and I say as a member of that committee, and incidentally president of the A. C. C. A., I want to say that I endorse heartily that report, or I would not have signed it, and we are living up to that insofar as it is possible under present conditions, because you will notice there our final hope ultimately is to be able to operate finally without having to depend upon Government funds largely, and that is our policy, and that was adopted not only by the A. C. C. A. representative who happened to be a member of the committee, but the entire organization of farmer cooperation in the Nation, because they are practically all members of them.

By Senator MCKELLAR:

Question. May I ask you a question about that?

Answer. Yes, sir.

Question. As I understood it, what you did was to reannounce the doctrine of what cooperatives were, that they bore the losses and shared the gains. Now, as I understand it, that has been taken up today, and it is admitted that these farmers will not be required to share the losses.

Answer. That is not admitted by me, Senator.

Question. In any sense, except that whatever interest they might have in patronage dividends or in reserves might be liable. That is a very different thing, I am sure you will admit, from a body of men—body of farmers—going in together and sharing losses and reaping benefits, whichever way they come.

Answer. Of course, Senator, there is some difference of opinion about the distinction as drawn there. We have been greatly criticized by our friends, the cotton merchants, of course, who do not entirely agree with our view on that, but it is not serious. Let's take up these one by one.

Question. Yes; but before you leave that, let me ask you this question: Is it the intention of your organization in Louisiana that if you should have more losses like you had in 1931 that you expect to call on all your farmer members to chip in?

Answer. We have ample reserves, Senator, to take care of any losses we have, and that belongs to those farmer members, and they will pay it.

Question. Well, that raises a question, but the question I am asking you, under any circumstances do you expect to call on any farmer to make good any losses?

Answer. He will have to make good the losses.

Question. I am not talking about reserves now.

Answer. I know what you mean, Senator. I will say we don't expect to have to. When we get to that stage we will quit.

Question. You don't expect to call on the farmers to make it up?

Answer. That is the reason it is necessary for us to keep a reserve because if we didn't have something to fall back on we could not operate at all. That is just ordinary business sense.

Speaking of reserves, there is one essential and vital difference between the old line of trade and the farmer cooperatives. It is just vital; it is fundamental; it can't be anything else. They cooperate on reserves that they deduct from their member's cotton. Now, that is sound. There is nothing objectionable as I see it that those reserves belong to the farmer members. The cotton shipper operates to a large extent on profits made in handling the cotton. That is natural. That is what he is in business for. I am not quarreling with him about it. He makes his profit off of that cotton that is produced by the farmer, but those profits belong to the cotton shipper and not the farmer. That is a very vital difference. Now, there seems to be no objection raised about cotton merchants accumulating reserves or making profits, and the farmer certainly don't get that—nobody is quarreling about that at all. Everybody seems to agree that that is perfectly all right, and it is, but I can't see why anybody should quarrel with a lot of farmers that want to get together and build up some reserves as long as those reserves belong to the farmer members.

There was something said yesterday during Mr. Creekmore's statement that I want to add to, Senator. He made a proposition in his discussion, and Senator BANKHEAD, I believe, made a suggestion that, following the suggestion of Mr. Creekmore, that the whole cotton industry might be brought into an investigation to see what the trouble is. I take it that any congressional committee authorized to make investigations have in view getting proper information for legislation in regard to whatever the industry lacks. That is, I take it, naturally sound. I don't think it is possible, however, for any committee to get a full picture of the cotton industry by investigating the cotton cooperatives alone. Mr. Robinson in this letter I read here said that we only represented, I believe, 10 or 15 percent of the cotton producers. I don't know how he figured that out. We have admitted in exhibits here that we have handled on an average I believe of less than 12 percent of the cotton. So if we only handle 12 percent of the cotton the conduct of our business would not, even though it might be found very faulty—and I will admit that we are certainly not perfect.

You could not expect a bunch of farmers to set up a selling organization in 10 or 12 years that would be perfect, because we have cotton firms that have been in business, they and their predecessors, possibly some of them for 100 years, and they say they can't stand the pressure, some of them, they are about to go out of business. So we don't claim to be perfect, and everybody knows that is impossible anyhow. So I take it that for any concern handling not over 12 or 15 percent of a commodity, and in just one line, that is the farmer's system of marketing his cotton, no matter what might be found, the evidence would not justify intelligent legislation to improve business very much, or certainly add very much to the system that is now in vogue. So I think that is a very pertinent suggestion of Mr. Creekmore's, and Senator BANKHEAD suggested, I believe, that Senator SMITH's committee was conducting the investigation at the present time and that there might be hearings held, and that that committee might go into this matter. I don't think the resolution authorizes Senator SMITH's committee to cover the ground—I don't know. If so, it is fine, but I don't believe they will cover the scope that will be required if anything substantial results from it. We are beginning to wonder, and I think it is worth while for you leaders, particularly the cotton Senators, to begin to give your thought to what possibly is wrong with this cotton marketing system.

There has been no great complaint made except the farmer's part of it. Now, we are beginning to think, and have thought for some time, that there must be something fundamentally and radically wrong with our marketing system. The very cause of this resolution of Senator SMITH's here of July 1914, I believe, in the CONGRESSIONAL RECORD, on page 3752, was just a few days before that, out of the clear sky, as somebody remarked here yesterday, nearly $10 a bale off the value of all the cotton on hand, not only what the Government owned but what the farmers owned, you might say melted away in 40 or 50 minutes. Now, there was not any difference in demand. There could not have been any real reason, according to all the economics of supply and demand, of marketing, of consumption, or production, that could have caused a decline in those few minutes. I take it that was just fundamental.

Question. What was the date of that?

Answer. The date of the decline in the market was March 11, and Senator Smith's resolution on March 14.

Question. 1914?

Answer. 1935—last March. The cotton market declined around $9 a bale, I believe, in about 40 minutes, wasn't it, Mr. White, or some of you cotton men?

Question. It was very quick. Yes; I remember it, in a very short time.

Answer. Now, personally, I think there is something fundamentally wrong with any marketing system where that condition could prevail. In line with the investigation that Senator BANKHEAD said he hoped this other committee would take up, because he is a member of the committee, and whether that committee takes it up or not, I think it is worth while for those interested particularly in cotton to see that it is taken up, and there are four fundamental questions that I think are involved; and the organized cotton growers, not only the cooperatives but general farm organizations, are thinking along these lines, and I want to read four propositions that I think are fundamental, and I hope you will get this properly in the record. No. 1: Is the present cotton-marketing system adequate for present-day conditions? Now, we have had very little change in the system of marketing cotton during the last 75 years. It has been conducted right along in the same old way.

We have had cotton merchants and cotton factors; we have cotton exchanges; we have had all the facilities for this hedging that we hear so much about. Personally I never have thought that the value of any basic agricultural commodity should depend upon speculation for its value. I don't know what you think about it.

Question. I agree with you entirely.

Answer. When there are 10 or 11 million bales of cotton produced in America and possibly 75 or 100 million sold on the New York Exchange and possibly on the other exchanges; I don't know the actual figures, but I take it that approximately somewhere in the range of 100,000,000 bales are sold annually in the New York Exchange in normal times, not in the last few years, because there has been very little speculation. That question is no. 1, and the best evidence, to my mind, that there is something wrong with the system of marketing is the very thing that happened on March 11 last, 1935.

No. 2: Should speculation be allowed in basic agricultural commodities at all? I think that is a pertinent question for thought and discussion. I am not arguing whether we should have a clearing house or some exchange, whatever it may be called. I have no prejudice against the cotton exchange, or any other exchange, but I am asking the question whether this is a sound marketing system, and whether there should not be something done to correct the things that happen when the value of a farmer's cotton can change in 40 minutes $9.50 a bale. I believe there is something wrong somewhere, and I am afraid that the investigation of Senator SMITH is not going to cure the trouble. Now, if cotton has a value, the value does not come from how many men in New York want to sell or buy 100 bales or a thousand bales, and I don't believe the value of cotton should depend upon how many people want to speculate on the board.

Sometime the value depends on the sale of the cotton, but as a rule it is how the traders, the gamblers, are buying cotton in the places at Memphis or Liverpool or Galveston or New Orleans or New York or Houston or in any of the world cotton markets, it is the speculative price that is controlling as to what the farmer will get in the end for his cotton. The Government has valued the cotton; they can tell you to a cent very often what it has cost the farmer to raise his bale or two, but this is one industry where the cost of production does not affect the price. It is what the gambling element will pay for it; how the dealings are going on. It isn't right.

Now, that is what is going on. That is what the farmer is interested in, Senator. He can't sell 100 or 1,000 bales on the New York Exchange. He can't even get there. He don't know anything about it. But he is interested, and intensely interested, in what somebody will pay him for cotton, and he is materially interested in whether he can sell his cotton for 11 cents or 12 cents, and not whether they are selling cotton in New York or New Orleans today for 10 cents or 11 cents or 13 cents.

I don't believe, I never have believed, and I never will believe that the value of a basic agricultural commodity should depend on how many people are gambling, and to what extent they are gambling. That is what makes our price now, Senator, and you know it. Instead of the tail wagging the dog, as it does now, I think the dog ought to wag his own tail. I have already discussed 3. Now, no. 4:

"Should the marketing machinery of an agricultural commodity be owned and controlled by those who produce the commodity, or by those who speculate in it?"

In other words, should the 2,000,000 cotton farmers in the South have something to say, or some control over the marketing system in this country of their cotton, or should the New York Cotton Exchange and the New Orleans Cotton Exchange, or these gentlemen here, the Memphis Cotton Exchange—should these speculators control it, and not only that, but even bar the producer from an actual participation in it?

If it is necessary to illustrate, I would like to say this just here, that just a few years ago we had this same organization of cotton

shippers. I believe it was the American Cotton Shippers Association then—I am not sure—Mr. Cameron Williams was its braggard and the general manager, and I understand that they raised a fund of something like $100,000 to do the same thing that Mr. Robertson and his organization have started out to do—that is, to destroy the cooperatives. They went to New Orleans from Memphis—Mr. Shannon and Mr. Cox. Well, the farmers took charge of it down in New Orleans, and they did not do so well, but they made their report, and that cost the cotton cooperatives and all of the cooperatives. We happened to be a member—to have a membership in the Memphis Cotton Exchange—and we were assessed our pro rata, so I am reliably informed, to build up this sentiment to fight our own organization. It may be, of course, we were only minority stockholders.

Question. You may be assured there is no fund in this matter, Mr. Williamson.

Answer. Oh, no.

Question. No fund such as that, one way or the other. I have asked the people who have testified who are paying their expenses, and I will ask the other side that question, too.

Answer. That cost my organization——

Question. I understand that situation, but there is nothing like that here.

Answer. That cost the A. C. C. A. a lot of money—that investigation; and this investigation, I want to say, is costing the A. C. C. A. a lot of money; and that means that it is costing the farmers money, because they are the ones who pay the expenses; and we can get it from no other source.

As Mr. Henry said, 12 years ago or more, before the Government ever loaned us one nickel, we had the same opposition. They could not charge then that we were borrowing Government money, because we were not borrowing any. We would handle as much as 2,000,000 bales of cotton a year, and had before the Government ever loaned us a dollar, and I think that you misunderstood Mr. Creekmore when he said that if it were not for the Government loaning us money we would have to go out of business. We have gone along, and we would go along. It would be a more difficult job; it would be a struggle. And another thing, we were not nearly busted before the Farm Board took us over and cleaned us out. Mr. Creekmore's statement is correct—is incorrect or he was incorrectly quoted. We got along all right before the Government loaned us money, and even though we might have to struggle along we would do it.

Senator MCKELLAR. At this point, before you go any further, I think this is an appropriate place to say this: This investigation grew out of a bill known as the Frazier bill, and, as I explained the first day I was here——

Mr. WILLIAMSON. Yes, sir.

Senator MCKELLAR. The Appropriations Committee of the Senate, of which Senator TOWNSEND, Senator BANKHEAD, and I are a subcommittee, appropriated some years ago $500,000,000 and turned it over to the Farm Board to help the cotton farmer. All of that money was lost, and, as you all know, this committee appropriates all of the money of the Government, other committees do not have the right to appropriate money, they only have the right to recommend legislation, but our committee appropriated the money for this, and we do for every purpose. This $500,000,000 was dissipated, and many more millions were dissipated in trying to aid the farmer, which, to my mind, was a worthy purpose, and I have already given the reason for that, and then when the cooperatives took charge, they have come and have asked for these additional appropriations. We have made some. I think we gave them at first $7,000,000; I am not sure. Then later on we have been constantly called on for money, and last year we were called on to appropriate many millions of dollars to keep your association going, and but recently were informed that $5,000,000 more had been loaned to the cooperatives, and this committee, whose duty it is to look after the finances of the Government, and the interests of the Government in connection with the expenditures of the Government, concluded that it was necessary to examine into this institution, which is a Government institution, and to examine into the affairs of this institution, naturally so because of the legislation on the subject.

You can thus see the reason for this resolution, especially in view of the fact that the Frazier resolution provided for the reopening of the Government dealings with the cooperatives heretofore, and especially in view of the fact—the statement made, we have heard it before, as a rumor, however, that the cooperatives intend to hold the Government for many millions more after that if this was reopened.

Now, this bill is still on the docket. It has passed the House—I am not sure about that, but it is on the calendar of the Senate, and is likely to come up at any time, and before it comes up at the next session the Appropriations Committee felt that it was due the Congress to know just what was proposed in this bill. There was no explanation of it. It was introduced by a gentleman who did not live in the South, who had perhaps never seen cotton grow, and did not know anything about cotton—a perfectly splendid gentleman, but wholly disconnected with cotton, and under the circumstances naturally the resolution here is confined to the cotton cooperatives, which is one of the commodities for which we have so often been called upon to appropriate money.

Now, that is the reason of this. It was not to engage in a fight at all of any kind. We wanted to know why we were spending all of this money, and what the result of this spending would be, and we are here to do that. Now, that is the purpose of this investigation.

Mr. WILLIAMSON. That is perfectly proper, Senator. I did not mean to be inferring that at all.

Senator MCKELLAR. I hope not.

Mr. WILLIAMSON. I hope I did not imply that.

Senator MCKELLAR. I sincerely hope not, and I have already put it in the record, I believe, and I want at this time to put in the front page of the Mid-South Cotton News of Memphis, Tenn., October 1935, the principal headline of which, halfway across the page, says: "Senate Investigating Committee Just Another Attack on Your Cooperative." At this point I want to introduce this article on the front page and ask the stenographer to put that in the record.

(The said article was in words and figures as follows:)

"In 1930 and 1931 the Federal Farm Board used the grain cooperatives and the cotton cooperatives for the purpose of stabilizing prices in those two commodities. The Federal Farm Board had no machinery for handling these commodities and the cooperatives carried out the operation.

"When the final settlement was made and the cotton and wheat taken over, the United States Government, instead of assuming all the losses as they should have done, made the cooperatives pay the losses to the extent of their assets and then the Government stood the rest of the loss. The reserves of the cotton cooperatives, amounting to over $2,000,000, were wiped out completely in the transaction.

"A resolution was introduced in the United States Senate at the last session instructing the Farm Credit Administration to open up these settlements and allow the cooperatives to present again their claims for reimbursement. Senator MCKELLAR opposed the resolution and blocked its passage.

"Shortly afterward he had a resolution passed appointing an investigating committee of the Senate to investigate and make a report to the Senate of the actual financial situation of the cooperatives and the Federal Farm Board and its successor, the Farm Credit Administration. Below find a copy of this resolution:

" 'Expenditures by the Government for cotton cooperatives, etc.

Mr. MCKELLAR submitted the following resolution:

" 'SENATE RESOLUTION 185

" '*Resolved*, That the Committee on Appropriations, or any duly authorized subcommittee thereof, is authorized and directed to investigate the expenditures of the Federal Government for cotton cooperatives and their losses heretofore sustained. The committee shall report to the Senate at the earliest practicable date the result of its investigations, together with its recommendations.

" 'For the purposes of this resolution the committee, or any duly authorized subcommittee thereof, is authorized to hold hearings; to sit and act at such times and places during the sessions and recesses of the Senate in the Seventy-fourth Congress; to employ clerical and other assistants; to require by subpena or otherwise the attendance of witnesses and the production of books, papers, and documents; to administer oaths; to take testimony; and to make such expenditures as it deems advisable. The cost of stenographic services to report hearings shall not be in excess of 25 cents per hundred words, and the expenses of the committee, which shall not exceed $1,500, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman.'

"The members of the Memphis Cotton Exchange and other members of the cotton trade have had several meetings in Memphis and have appointed standing committees who are working to find some of the operations of the cotton cooperatives that they consider improper. They have appointed committees in all of the cotton counties, have sent out thousands of questionnaires, and have men visiting farmers and ginners all over the territory trying to secure evidence against the cooperative movement. We publish below copies of some of the letters which have been sent out, and which explain themselves.

"The cooperatives will seek to give all the information the committee wishes in regard to their financial operations, and anything else that they have the right to ask.

"Our members can rest assured we are handling the association according to the laws of Tennessee and the United States.

"These attacks are not new; they have been going on ever since we started in business.

"If we were not succeeding or we were not getting any cotton, there would be no attacks. The more successful we are with our operations the louder will be the complaints of the cotton trade.

"This same group are not only opposed to cotton cooperatives, which is a farmer's proposition, but they are opposed to the Bankhead Act; they are opposed to the processing tax; and are opposed to practically all the plans put out by the Department of Agriculture and the Agricultural Adjustment Administration; and just recently protested to Comptroller McCarl, who kept your association from paying to you the full 12-cent adjustment price when we take your cotton."

Senator MCKELLAR. I doubt if that is a fair statement. I have told you the reason why this was being had, and I doubt that the farmer ought to be told that this investigation is an attack on the farmers, because I say to you it is not.

Mr. WILLIAMSON. Well, Senator, I think we are rather proud that the investigation has come along, and we are glad of it, because when you go back to Washington we feel that you will know more about our operations.

Senator MCKELLAR. I hope so.

Mr. WILLIAMSON. And we have nothing to hide, but we do feel that we are being attacked by the exchanges, and we not only feel it, we know it. We feel that it is no business of theirs. We are attending to our business, and we feel like we do a good job. We are not complaining of your investigation. We are used to these fights. We have always had to contend with them. We are farmers largely. We had to go out and get a cotton man in with us, Mr. Creekmore. We did not have a cotton man, and we could not compete with these men who had been trained in the business of selling cotton. I don't think Mr. Creekmore stands so well with his own colleagues; I believe he has been called a renegade by some of his friends.

Senator MCKELLAR. I think there is one thing that could be said about Mr. Creekmore; he seems to know his business.

Mr. WILLIAMSON. Yes, sir; I think he could take care of himself most anywhere. The next point I have is number 5.

Senator MCKELLAR. Yes, sir. I should not have interfered with you. Number 5.

Mr. WILLIAMSON. Yes, sir.

Senator MCKELLAR. Go ahead.

Mr. WILLIAMSON (reading):

"Should the cotton exchange be regulated by the Government to the extent that contracts shall specify grades and staple of cotton to be delivered, and this cotton should be sold on grade and staple."

Now, there are about 2 million or 2½ million cotton growers in the South, and you know what the prosperity of the cotton farmer of the South means.

Senator MCKELLAR. When they are prosperous the whole country is.

Mr. WILLIAMSON. That is it exactly.

Senator MCKELLAR. Practically, how could you bring it about?

Mr. WILLIAMSON. I don't know. It may be impracticable; but I am asking if it is possible, or is this necessary.

Senator MCKELLAR. Now what, as a cotton farmer, do you suggest; how would you bring it about, by class or grades, and have it sold on classification of grades?

Mr. WILLIAMSON. My suggestion would be to put it all in the co-ops, and then it would be solved. That would be no trouble.

Senator MCKELLAR. Well, Mr. Creekmore differs with you about that.

Mr. WILLIAMSON. Well, he is timid. I think he would handle it all. That would be no problem to solve at all.

Senator MCKELLAR. Wouldn't that be a sort of trust or combination?

Mr. WILLIAMSON. Well, I understand there is a bill in Congress now—I think Senator BUCHANAN has a bill that he introduced that provides——

Senator MCKELLAR. Senator BUCHANAN?

Mr. WILLIAMSON. No; Congressman BUCHANAN, chairman of the Appropriations Committee. I don't know what it is in detail, but it is not impossible of success. I think it is a matter that would justify serious thought and study.

Senator MCKELLAR. I am greatly interested in it.

Mr. WILLIAMSON. There is something else for you to consider about cotton. I am not only talking about cotton, but I am talking about those who are dealing in wheat. The cooperatives in that section are thinking along the same line. All I said to begin with, that these gentlemen here between the cotton trade and the farmers, they have been fighting the battle that they are fighting here, and which has been going on all over the country, and they have fought us all along the line, but the farmers are becoming more united in their fight, and Congress has begun to see some of these matters from our point of view, and the result of it in the last few years is the A. A. A. bill, and these gentlemen are fighting legislation of that type that will help the people.

Senator MCKELLAR. I think the A. A. A. bill has done the farmer more good than all of the legislation that was ever enacted in their behalf since the beginning of our Government.

Mr. WILLIAMSON. I agree with you, and it was only at the insistence of the farmers in the South, who finally got together, and along with the officials, who were charged with the duty of preserving our farms and helping the farmers, that measures like the A. A. A. bill were ever enacted into law, and matters of that kind were finally passed, which are very sound economically. At last the farmers have learned to stand together, and until they did they did not get anywhere.

So, when you look into a fight of this kind between the cotton cooperatives and the cotton exchange, it is just a repetition of this age-old fight which has been going on all of these years. It is the same as the board of trade and all of those. But we have learned how to stand together. We didn't used to know. We do not want the Government to do any more for us, for the cotton cooperatives, than the Government has done for industry and other business.

Question. Don't you think the Government has been more liberal with the cotton cooperatives than it has been with those who are not cooperatives, who are dealing in cotton, but who are not cooperatives?

Answer. You mean the cotton trade?

Question. Yes, sir.

Answer. I did not see a mandate, Senator, in the A. A. A. Act——

Question (interrupting). I am talking about the one as against the other. I will put it to you in another way. What benefits would you have the cooperatives receive from the Government that you are not now receiving?

Answer. I am not complaining. It is the other folks that are complaining.

Question. I did not think that you were; I did not quite understand.

Answer. No; it is the opposition that is complaining.

Question. I don't think the cooperatives are the people to complain of the Government's generosity—what it has done for them.

Answer. We did not consider we are being specially favored, Senator. It is the policy of this Government to outline in its wisdom certain legislation, legislation initiated by friends of agriculture, and the Government is following the mandate laid down by the Congress, and I think wisely so, beginning in 1923 with the Capper Act, and in 1926 with the Agricultural Marketing Act, and in 1926 with the Cooperative Marketing Act, and in 1933 with the Agricultural Adjustment Act. The Government is not doing anything but what the Congressmen and Senators have laid down for our Government to follow, and this is the first time in the history of the Nation we have ever had any real agricultural promotion, and no government has ever stood very long when agriculture has failed, and never will.

Question. Well, it has not failed. It failed for several years prior to 1933, but we resurrected it, and it was not the cooperatives that did it.

Answer. Well, I want you to think of it in this way: We were not in any more serious predicament, not in as serious predicament, as the banks in this country.

Question. I think mighty near most of them failed or almost failed.

Answer. And the farmers can't be criticized during those times when business crumbled and the Government has been just as liberal or more so than it has been with the co-ops; it has been just as liberal with business, I mean. There was and is ample authority for that. The R. F. C. has been most liberal with business and has loaned millions of dollars which will never be paid back to it. They have made their first payment on the railroads of this Nation. I think that most businessmen now recognize it as a payment; and they have loaned millions of dollars to insurance companies and every other business of that nature; and I am not asking anything out of line for the farmers, for the wealth producers of this Nation. I am not asking that they be put in a preferred class at all. Every farmer in the country has an opportunity if he wants to join a cooperative, of course. He is not joining, he is not forced to unless he wants to. I don't want to tell you that we are asking for special favors, because we are not. We are giving a service, and we are entitled to consideration.

Question. Isn't this farmer membership sort of like they tell me the marriage is in Russia? All you have to do is to say I am in and you are in; you are married; and if you want to get out of it you say you are out, and you are out.

Answer. That is more progressive, Senator.

Question. As I understand the present system of getting members in the farm organization—the cooperatives—the farmer can come in when he wants to, and then he has a right to get out of the organization when he wants to.

Answer. Well, Senator, I never did belong to but one church.

Question. You look like a Presbyterian to me—I am one myself.

Answer. No; I am a Methodist.

Question. Well, that is pretty good, too.

Answer. But I can't understand all of this criticism of the other lodge and what I do in my lodge. Now, if my ritual or my code of ethics—what do you call it?—if my catechism does not suit the other fellow, it is none of his business; but why jump on me if it suits me?

Now, I have a lot of good friends in the cotton business; I have known them for years and they are intimate personal friends. I don't agree with them, but I don't pry into their business, and I don't criticize their line of business. They are in a legitimate business, but I will say this: That they are not necessary to the welfare and prosperity of a farmer, and I would like for some of my cotton friends—they are talking about spreads and prices—there are a lot of interesting figures that I can show here.

Now, here is Bulletin No. 457. [Reading:]

"Relation between primary market prices and gradations of cotton. Washington, D. C., November 24, 1916, by Fred Taylor, cotton technologist"—

Whatever that is, Senator; I confess I don't know.

Question. That is the essence of a plutocrat.

Answer. Anyhow, it is an official document, and it is a most interesting document, and the figures are the result of studies which have been made.

Question. Let me tell you something interesting along that line. I remember being requested to go into the Cotton Department at Washington. That was several years ago. I went through there, and I got somewhat interested in this particular technologist, and I thought I would like to talk to people who knew something about it. His title was something that made me want to talk to him, and I met him, and asked him where he came from, and he said he was born and reared in Canada. I never understood that Canada produced any cotton. Of course, he might have had technical knowledge of cotton by study, but he knew nothing about the actual facts in regard to cotton, and it seemed to me it was very unwise to put a man in charge of such an important branch

of a great industry to which he had been assigned, but I found out I was mistaken and that he did know about his subject all right.

Answer. Well, I will say, Senator, that these bulletins are authoritative and they are checked and rechecked, and the particular economist or technician who makes the study, after he has completed his figures, they are then charted by every one of his superiors, and whenever they put something out you are pretty safe on it. I have another one, and it was right after this, in 1931. This was back in the good days when the cotton merchants had their own way and there was not anybody interfering with them at all, and in those they accumulated a lot of cotton plantations up and down the river. There were so many of my New Orleans friends that owned this land that the banks own them now. In 1930, 1931, 1932, 1933 they tell me that the banks took them over. I don't know about it much myself.

Question. You remember the passing of the Farm Loan Act, I believe it was 1933, that we have lent money to farmers to the extent of over three billions, and certainly saved a lot of them, or most of them, I don't know.

Answer. I happen to be a member of the board of directors of the land bank of the fifth district, and if it had not been for the passage of this Farm Grant Act, the land bank in that district would have been practically bankrupt, because we would have had so much property that we could not have survived. I want to return to the Frazier bill that brought up this investigation. I think it was made clear yesterday—I think you referred to it. Senator Frazier was a very loyal friend of the cooperatives—I don't know whether in his State, but he was primarily interested in trying to adjust a settlement that was made by the Farm Board with the cooperatives. He introduced a resolution, and some of the associations suggested to him that he include cotton, and if the resolution hadn't been up it is probable that we wouldn't have raised the proposition, in that we didn't see a chance to get any relief. There was a question raised that I don't know whether the record is clear on or not, and that's the question of the affiliated organization subscribing for stock in the A. C. C. A. I believe you asked Mr. Henry why he had put his money in the A. C. C. A. stock.

Question No; not his money.

Answer. His member's money.

Question. No; why he had borrowed $800,000 from the Government and put the Government's money in a concern in which he was just a director.

Answer. I want to say that in Louisiana we are in the same position as Mr. Henry—as his company. We had struggled along for years. We had tried marketing our cotton individually. Louisiana had something like $200,000 in cash belonging to its members. We owned $365,000 in stock of the A. C. C. A. We subscribed for $800,000 new preferred stock in the A. C. C. A., borrowed the money from the Farm Credit Administration to buy that stock. We put up with them as collateral $365,000, preferred stock that we owned. The $800,000 belonged to the Credit Administration. If you will look at the statement of the A. C. C. A. that Mr. Creekmore filed as one of his exhibits on June 30, you will see that if the A. C. C. A. were liquidated and all money owed was paid, including the $800,000 of preferred stock, they would still have a million dollars to distribute to their member associations.

Question. You haven't bought any land to build an office building?

Answer. No, sir.

Question. But you had $200,000 in cash and $365,000 in common stock with the A. C. C. A.?

Answer. Preferred stock.

Question. Have you got any common stock?

Answer. One share. All members have.

Question. It is all in preferred stock?

Answer. Except the one share of common stock.

Question. And on that date you needed $200,000 in cash to run your business, so you borrowed from the Government $800,000 on $365,000 worth of stock in the A. C. C. A. I don't remember who it was that stated the A. C. C. A. stock wasn't worth——

Answer. You can look at the auditor's statement, which shows the financial condition of the A. C. C. A. on June 30, and they can pay back, if liquidated, every claim and still have approximately a million dollars to be divided among the affiliate members.

Question. Would you like to go until tomorrow morning?

Answer. I am at your service. I am not nearly through.

Question. How long would you like to take?

Answer. It may be an hour or two.

Question. We will adjourn until tomorrow.

(Adjournment.)

* * * * * * *

N. C. Williamson resumed the stand and testified as follows:

Examination by Senator McKELLAR:

Question. All right, Mr. Williamson, are you ready?

Answer. I would like to issue for the record, Senator, a statement.

Question. All right, sir.

Answer. One of our Texas representatives—the West Texas Cotton Association—had a wire from Mart, Tex.—that's in his territory—that the cotton buyers in that trade territory are advertising in the papers that they will fill out the blanks for the farmers to get their adjusted-price payments at a cost of 25 cents per bale. That's just a memo. I suppose Mr. Lee—is Mr. Lee here, Mr. Waldauer?

Mr. ABE D. WALDAUER. No; he hasn't come in yet.

Question. Will you state that again, Mr. Williamson?

Answer. Yes, sir. Mr. G. Y. Lee, president of the West Texas Cooperative Association, had a message from a man representative stating that the cotton buyers were advertising the fact that they would, at a cost of 25 cents per bale, fill out the necessary blanks for the farmers to get their adjusted compensation in the difference between the 12-cent and sale price of the cotton. The blanks had come out. The cotton cooperative association will do that for the benefit of their members without any cost.

Question. All right.

Answer. Senator, before I start on where I left off yesterday—I haven't read the record, but I believe I had finished the five points—I think I had completed that, had I not, Mr. Stenographer?

The STENOGRAPHER. That's my recollection.

The WITNESS. And I would like to call the Senator's attention to this fact: He stated, and we know and we agree with the thought, that the Triple A program is one of the most constructive pieces of legislation, as far as the cotton farmer in the South is concerned, that has ever been enacted by the Congress, and I want here to remind the Senator that the cooperatives have supported that program vigorously in every detail, in toto.

We have consistently supported that program before the vote on the Bankhead bill was taken to determine whether it would be continued the second year. Our interior classers, managers of the country offices throughout the different cotton-growing States, some of our executives, got out in the country and explained to the farmer what it meant, and at every step in that program we have met the opposition of the same group who are now fighting the cooperatives and say that they represent 90 percent of the producers and have the producers' interests very seriously at heart. That, to my mind, is rather inconsistent. The process tax——

Question. What was the vote on the Bankhead Act?

Answer. I think it was 98 percent in Louisiana—89.3 percent.

Question. Well, judging from that vote, there wasn't much opposition to it?

Answer. I said among farmers—it was almost unanimous with those who voted, and a very large percent voted. The point I want to make is that the cotton shippers, the cotton merchants who are naturally interested in volume rather than price, because the profit comes out of volume, have opposed every step of the Triple A program and, so far as I know, are still doing so. That's in the record.

Question. Even if they are opposing it, the opposition doesn't amount to anything?

Answer. It has amounted to very little; but I wanted the record to show that.

Question. How did you know about the opposition, or are you just taking it for granted?

Answer. No; I am not taking it for granted; I've met it.

Question. Where?

Answer. We had one meeting in Jackson, Miss. Mr. Andrews was there and Mr. Stewart, I believe, was there, and also I believe Mr.——

Question. How did that opposition come up?

Answer. It came up in an organized program. Resolutions were proposed and speeches were made opposing the program as being detrimental to the cotton interests. The first meeting was held at Jackson, Miss.; the next meeting at Birmingham; three meetings were held at New Orleans; and right here in Memphis, just last week, I believe our friend Mr. White read a statement at the meeting opposing the proposed continuation of it.

Question. Do you mean the program of the A. A. A.?

Answer. Yes, sir. The policy of the Farm Credit Administration advancing or lending money to the cooperatives for capital-stock purposes has been questioned, and I would like for it to be put in the record that this is not any new policy.

Question. There is a question in my mind: Prior to this loan you have told about, which went to the A. C. C. A. and was borrowed by affiliate members and turned over immediately to the A. C. C. A. for preferred stock—the question that arises in my mind is, has that ever been done before? It never has been done before, has it?

Answer. With the A. C. C. A.?

Question. Yes, sir.

Answer. No; heretofore they have borrowed money for operating capital.

Question. Why was the change made at this time?

Answer. That was decided by the Farm Credit Administration.

Question. The Farm Credit Administration required the change?

Answer. They changed the policy. There were some legal grounds involved.

Question. Then the reason your various affiliate associations borrowed the money and immediately put it in the A. C. C. A. was to avoid legal objections?

Answer. No; that was one question involved in the Farm Credit Administration.

Question. What was the other question?

Answer. That was all.

Question. As a matter of fact, it was a loan to the A. C. C. A.?

Answer. This capital loan?

Question. The $5,000,000?

Answer. No.

Question. Well, let's put it the other way then: While technically it was made in the names of the various associations, the A. C. C. A. got every dollar of that money for which it issued stock?

Answer. Yes, sir.

Question. That's the real truth about it, isn't it, Mr. Williamson?

Answer. It isn't the technical question of the loan. The loan was made outright to every individual State for the specific purpose of buying stock in the A. C. C. A.

Question. I will indicate one case. How much did your association buy?

Answer. In the new issue, $800,000.

Question. How much did they own before?

Answer. $365,000.

Question. Why were you interested in buying more stock? How could it possibly have been of advantage to you to have more stock in the A. C. C. A.

Answer. I think the record will show that I went into that yesterday afternoon. I will be glad to do it again if you want me to.

Question. I will be glad if you will. I want to know specifically why you should borrow money, and especially the enormous sum of $800,000, to be immediately invested in stock of the A. C. C. A.?

Answer. In the first place, Senator, the A. C. C. A. belongs to the Louisiana association and the State affiliated member associations. In the second place, the affiliated associations know that they cannot act independently, separately, in the method of selling their cotton in competition with the trade and every other individual; therefore, they have found it necessary to have a central sales organization.

Question. You have had that for 5 years?

Answer. Certainly.

Question. Or nearly 5 years before you had this; but it seems to me that it was an extraordinary procedure that here is an association, a central association, and that central association needed money; and instead of its borrowing the money, as it had the right to do, and as it had done heretofore, it adopted the peculiar rather unexplainable policy of having the affiliates borrow the money and immediately turn that money over to the A. C. C. A., and I would like for you to explain it.

Answer. Senator, I can possibly—let me understand, Senator, is the point which you have in mind from the member associations' viewpoint or from the A. C. C. A. viewpoint?

Question. From both. You are both an A. C. C. A. director and the chairman of the local Louisiana association, which is a part of the A. C. C. A. Now, why—it is a very simple question—why did you as an individual make a loan—and that's what it is—for the A. C. C. A., the central organization? Why didn't you let the central association borrow its own money? Why did you borrow it individually and immediately put it in the hands of the central organization?

Answer. That's easily explained.

Question. All right, sir; that's the explanation I want.

Answer. The question arose in the legal department of the F. C. A. as to making loans to the A. C. C. A. and——

Question. Did the Department at Washington hold that that concern, namely, the A. C. C. A., to which it had lent money for 4 years and in large sums—did the Department hold that this was illegal—that to lend it any more money to the A. C. C. A. was illegal and make the requirement that you borrow money for the A. C. C. A.?

Answer. No, sir; they did discover a law that was on the books many years ago that even the smart lawyers there hadn't discovered—that they could not loan this money with the subordination clause.

Question. What is the subordination clause?

Answer. We will have to get it from somebody who knows the law.

Question. What I am trying to get at is the facts. Was it this: That the A. C. C. A., if it borrowed the money directly, couldn't subordinate the claim of the Government to the debts that it might contract from the local banks?

Answer. The Government couldn't subordinate its loan.

Question. So the purpose of making the loan this way was to enable the A. C. C. A. to subordinate the Government's security to that of private banks?

Answer. No, sir; to allow the Government to—the Government couldn't; but the institutions organized as separate corporations could.

Question. Here's what I am driving at: If the A. C. C. A. had borrowed the money and invested it in cotton thereafter they couldn't have subordinated that Government loan to loans that they might make from individuals or private banks?

Answer (addressing Mr. Creekmore). Is that right?

Mr. CREEKMORE. I believe, Senator——

Senator MCKELLAR. I will be glad to have that matter explained to me.

(Mr. Creekmore temporarily took the stand and testified as follows:)

In my statement which I submitted Monday or Tuesday I stated that the A. C. C. A. had borrowed from the Federal Farm Board or the Farm Credit Administration a minimum of $10,000,000, or a maximum of $15,500,000 every year on subordinated loan. Last April, I believe it was, I was advised by the Farm Credit Administration that their general counsel had raised the question as to whether or not the Farm Credit Administration could legally protect a subordinated loan.

By Senator MCKELLAR:

If you will allow me to interrupt, I think the general counsel should certainly have gone further than that. I don't believe you had any right, or that the Department had the slightest right, to subordinate a Government loan on the same cotton.

Answer. Hearing the discussion of the attorneys, and not wishing to compare my thinking with yours, it seemed to me, that because of an old statute——

Question. Will you say what that statute is?

Answer. I will be glad to see if I can find it. Because of an old statute, even though the Farm Credit Administration had the right to subordinate a loan, because of this old statute, it was questionable whether the subordination would stand. The subordination of the loans from the Farm Credit Administration have in effect given the A. C. C. A. the capital funds to operate on. In the discussion resulting, this adjustment was made: That in order to lend the money to A. C. C. A., the Farm Credit Administration would lend $5,000,000 to the individual State associations on the basis of having them pledge all of their capital stock in the A. C. C. A. and assigning the interests of the member associations in the earnings of A. C. C. A. to the Farm Credit Administration until that loan was paid. The matter was discussed over perhaps a period of a month or two before a decision was made. The State associations subscribed to the stock—procured the money and subscribed to the stock. The A. C. C. A. must have either capital fund or subordinated loans if it is to continue the volume of business which it is now transacting until the reserves withheld from the members in the operation amount to sufficient to eliminate governmental loans and at that time—I am sure I represent the unanimous opinion of all of our colleagues—we will say, "Thank God."

Question. Then, as I understand it, Mr. Creekmore, this method of having your subordinates borrow the money and take preferred stock in your association was solely for the purpose of getting around that question?

Answer. I believe frankly that if the general counsel of the Farm Credit Administration had not felt that in subordinating a loan they were doing something which might later legally be proven incorrect, that this would not have been done.

Question. Then that means that this method of borrowing through your affiliated associations was for the purpose of avoiding that question so that you could go on and borrow from private banks?

Answer. I thought I had made it clear, but I don't seem to be able to do it.

Question. You make things clear.

Answer. Thank you, sir. In the change made by the Farm Credit Administration, it gave them added security, because it put the assets of the various State associations up against the loan as well as the net worth of the A. C. C. A., as represented by their private stock.

Question. But so far as the affiliated associations were concerned, this loan wasn't for their interest. They could have dealt with your association just as they had been doing?

Answer. Well, Senator Williamson—I mean Mr. Williamson; he was a State senator, but you are the only Senator here; he was a senator before Huey Long came on the scene—Mr. Williamson has stated that the A. C. C. A. is owned exclusively by the affiliate associations. A. C. C. A. could not have conducted its operations without capital funds. The capital funds we have considered have been our assets and reserves withheld from the members, plus our subordinated loan. Now, the affiliate associations could not have continued in the same way without the A. C. C. A., unless they provided capital funds, because the A. C. C. A. could not have continued the pool of operations unless it had the capital funds.

Question. You are not limited in loans from the Department, are you?

Answer. Limited?

Question. Yes.

Answer. Yes, sir; we have been limited.

Question. They can lend you such funds as they see fit? The law only required you to pay 3 percent for the money you received from the Government and not relend it to exceed 5 percent to the people to whom you loaned it—is that not right?

Answer. The first part is right. I don't believe there is any limitation on the 2-percent spread at this time.

Question. Isn't there a 2-percent spread?

Answer. Not now.

Question. Did they change the interest rate or is it the same as it was before?

Answer. I think about the same spread we had before.

Question. All right.

(Witness excused.)

N. C. Williamson resumed the stand and testified as follows:

By Senator MCKELLAR:

Question. Mr. Williamson——

Answer. I hope you have that clear.

Question. Yes, sir; I have it clear.

Answer. I am a farmer and can't keep up with you all.

Question. You are doing pretty well for a farmer.

Answer. And the rate of interest, we talked about that a whole lot, and as long as we are above the rate of interest that banks charge we don't feel like we are being so greatly favored; however, 3 percent is a low rate of interest, and it is only in recent years that I have been able to borrow money at a rate as low as 5 percent to make a crop. I would like to impress upon the chairman of this committee the fact that we paid for everything we got from the Government—the cotton cooperatives. The only thing we got free was advice. We paid for everything.

Question. You get a very large volume of business, if you are speaking for the A. C. C. A., because if I remember the figures right, the business that the Government has given you alone amounts to commissions and income to the A. C. C. A. associations of something like $765,000 a year.

Answer. They got service for it. I think you will agree with me on that when you check the record.

Question. Some of it was and some of it wasn't, in my judgment. For instance, if I recall right—I think I saw it in the paper, or somebody told me about it—on the reconcentration operation, some concern in Memphis——

Answer. Little Rock, probably.

Question. No; I think some concern in Memphis, of which Mr. Taylor is the head, offered to do the same work for nothing.

Answer. For nothing?

Question. Yes.

Answer. We werent' able to do that because of the——

Question. You had him do it, I understand—you had him do it afterward?

Answer. We had him do it?

Question. Yes, sir.

Answer. I don't know anything about that.

Mr. CREEKMORE. Will the Senator indulge me a minute?

Senator MCKELLAR. Yes, sir. Some compress company. What is it, the Federal Compress Co.?

Mr. CREEKMORE. I had never heard of that offer.

(Mr. Creekmore temporarily took the stand and testified as follows:)

Question. He has compresses in west Tennessee and they wanted to move cotton from Dyersburg to Memphis, and he offered to move that cotton free of charge, but the Government wouldn't let him do it and turned it over to you, and how much were you paid, 85 cents?

Answer. Forty-two and a half cents, I believe. I would like to issue this request: I know Mr. Taylor and I know him favorably. I have never heard of that offer before. We have heard of an offer being made by Mr. J. D. Hillshine, of the Little Rock Cotton Exchange, that they were willing to handle it for 10 cents a bale. I believe, in the interest of fair play, that if Mr. Taylor and Mr. Hillshine will go to New Orleans and see what we are doing, we will then be very glad to have you ask them whether their offers were proper.

Question. I don't know anything about Mr. Hillshine—I hadn't heard that state of facts—but I had heard of the Federal Compress, and it is the purpose of the committee to call Mr. Taylor to testify.

Answer. In the interest of fair play, wouldn't it be advisable for Mr. Taylor to acquaint himself with the work required by the Commodity Credit Corporation before he does testify?

Question. Well, now, as I understand, his offer was limited to his compresses in west Tennessee, for instance, where a lot of cotton was removed from Dyersburg to Memphis, and I don't know of anyone—I don't think you need to go to New Orleans or anywhere else to find out what the cost of transporting that cotton from Dyersburg to Memphis would be. I am just using that for illustration. It may not have been Dyersburg, but it was some place in west Tennessee where he had a compress. I don't know how anybody could know anything more about moving cotton from one compress to another in his district than Mr. Taylor. I imagine if he knows his business, I know he would.

Answer. I believe that the statements that have been made and the offers that have been made as to what various parties would be willing to do are on a lack of knowledge of what was required to be done, and if I may be permitted when Mr. Taylor and Mr. Hillshine go on the stand, to, through you, ask a few questions.

Question. I will be glad to.

Answer. I think that my belief will be substantiated that there is not another cotton firm in the world as now organized that could have handled the reconcentration of 1,600,000 bales of cotton for the Commodity Credit Corporation, and now to build up an organization, either by the Commodity Credit Corporation, or any private firm, to handle that cotton on the basis of the requirements of the Commodity Credit Corporation, it could not have been done for 50 percent more than we are doing it.

Question. Well, as I remember, one of those reconcentrations cost about $860,000, and I believe a question was raised by the Comptroller General of the United States as to whether they had a right to make a contract, whether those in the Department and in charge, had a right to make a contract without asking for bids in connection with it, and that raised still another question about it, and I would like to have your views about that. Did you ever hear of that question being raised?

Answer. No, sir; frankly I have not, but with my 5 years' experience in Washington, I think it is very probable, because my experience has led me to believe that nothing is done in Washington without a great many questions being asked about it, and I am sure the Senator has had the same experience in dealing with the Government and the agencies in Washington.

Question. Yes; that happens sometimes, I know.

Answer. Of course, when the Senator wants it he can get along easier than anybody else can.

Question. Well, I doubt if they can get along as well, I will say that. However, we don't want to interrupt this discussion.

Answer. All right.

(Witness excused.)

Mr. N. C. Williamson, having resumed the witness stand, further testified as follows:

Questions by Senator MCKELLAR:

Mr. WILLIAMSON. That is all right, Senator, every point I can't clear up I want somebody else to do it. There seems to be some question about the propriety of a cooperative, member cooperative, or State association, so to speak, acquiring reserves. Now, we are permitted under our marketing agreement with our members, and really instructed to deduct a limited amount, and the maximum is placed in the contract for reserves.

Question. That is all charged to the farmer?

Answer. Yes, sir; and it belongs to the farmers after it is deducted.

Question. Now, when you put your money in these buildings, buy real estate and build an office building on it, how do you figure that that office building will ever get into the hands of the farmers who own it?

Answer. I take it, Senator, that under the authority given the board of directors by the members of the association, they can use those reserves in any way their judgment dictates and that would be to the best interests of the association, which is the members. We lose sight of the fact that the Louisiana Cooperative Association is about 30,000 cotton growers; that is what it is. Now, as a director, if we are paying a certain amount of rent—and I will say that Louisiana has never bought any physical facilities. However, I am not questioning the right or the propriety of any association doing so, if they can save money by doing it. One of the great cooperatives and one of the most successful ones in California, the California Fruit Growers Exchange—I believe that is the proper name—recently built a half-a-million-dollar building, if I remember correctly. It was discussed in the council—half-a-million-dollar office building of their own. They figure that the rents they are paying will pay that building out in 15 years, and the members of that organization will own it and won't have to pay any rent and still the investment is good, according to their judgment. Now, I don't see anything wrong in that.

Question. Well, when a corporation buys or sells a piece of property it has to submit it to their stockholders. Do you think it is proper and right for a member or an officer of a corporation to invest the stockholders' money in a piece of real estate and in building an office building thereon without obtaining the consent of the people; do you think that is right?

Answer. I would like to have Mr. Waldauer answer that. You are getting into legal questions.

Question. No, no; I am not asking a legal question. I am asking you whether you think it is right?

Answer. Yes, sir. I have been serving as director in corporations and I have never yet—and one of them is a national bank. By the way, I don't want to disbar myself from being on the board of directors.

Question. Well, do you mean to say that you are engaged in the banking business, too?

Answer. No, sir; just a director. It has not hurt me yet.

Question. I hope it won't.

Answer. And we spent about $50,000 or $60,000 for a building. We did not submit it to our stockholders that we wanted authority. We thought we had authority, and that was never questioned. I suppose it must have been all right and it has been a good many years, and I don't think certainly, if there had been any legal question involved, our attorney would have let us gone wrong, because he is an awful good lawyer. I don't think that is unusual, Senator. But all these reserves, as you say, come out of the producer. The difference between the reserves that we take out of the producer and those taken by the cotton merchant is that they still belong to the farmer with us and the other way they go to the profits and into the pockets of the merchant. Now, that is a very fundamental difference, and that is where we disagree. That is the only point of difference between us.

Question. Well, how may dividends has the A. C. C. A. paid out of the reserve; paid your members out of the reserve?

Answer. We have had a dividend every year except this past year, when we made a loss, as stated by Mr. Creekmore's balance sheet.

Question. Now, would you be good enough to get me the amount of patronage dividends, for instance, that you have received and paid out to your stockholders during the 5 years?

Answer. I don't know how much of a job that is, but I will endeavor to do it.

Question. Well, you can have it done.

Answer. The only thing, I don't know what cost is involved; but I will endeavor to do it.

Question. Then while you are doing that, be certain to give your balance sheet of each year.

Answer. The question came up when Mr. Creekmore was discussing—or the chairman, one or the other—the question of including the cotton merchant and the cotton trade—the whole cotton industry in an investigation or a program which would include an investigation of the whole industry. I don't know—there were three large cotton firms in this country—I don't mean to be personal in any way in this—but their names were mentioned, and it is generally accepted that these are very substantial firms financially. I know nothing about their worth, but the general opinion is it runs into many millions of dollars; and I take it they have been very successful in the cotton business; and I take it that those resources have been built up at the expense of cotton producers. They have handled cotton—I don't know what other busi-

ness they have been in, but those profits evidently have accumulated into very large sums of money. The farmer has not any interest in that at all. If the A. C. C. A. and its affiliated members had built up a capital structure equal to any one of these firms we could do a little better job and do it to the benefit of our farmer members, and they would own those millions of dollars instead of being owned by those who have dealt in the products of these cotton farmers. Now, I am not quarreling about that, Senator. I am not saying it is not perfectly legitimate and perfectly right. These gentlemen have conducted a legitimate business, but I am trying to get the difference clearly in your mind as to our operation and the operation of the private cotton firms.

Question. That is all right, but it is very clear in my mind—the difference. One difference is that the Government of the United States is putting up all of your capital.

Answer. No, sir.

Question. Well, practically all of it. Did you start out with a deficit, too? How much stock did you own in 1930 when you began?

Answer. I think when we organized Louisiana's share of the capital was—I don't recall. Do you recall, Mr. Creekmore?

Mr. CREEKMORE. I beg your pardon.

Mr. WILLIAMSON. Louisiana's share of the stock subscription when we organized?

Mr. CREEKMORE. I am rather inclined to believe those are in those wonderful records.

Mr. WILLIAMSON. I think our cash payment was $3,600—something like that.

Mr. CREEKMORE. Between $5,000 and $10,000.

Senator MCKELLAR. Well, let's be accurate about it. Well, then, do you remember what assets you had at that time?

Answer. Well, I think at that time the Farm Board put us in debt; I don't remember to what extent, but we had some resources. Our reserves were all taken, as Mr. Creekmore stated in his statement in regard to the settlement with the Farm Board.

Question. Some years ago when Mr. Legge was living, and when he came before the Appropriation Committee of the Senate, of which I was a member then as I am now, in answer to a question that I asked him about the then conditions of the various State cooperative associations, he stated that in his judgment they were all insolvent except the North Carolina, the Georgia, and the Alabama associations, and since that time my recollection is that both the Alabama and Georgia associations failed. One of them is being wound up in receivership now, and the North Carolina, my recollection is now, was also one.

Answer. No, sir; North Carolina did not.

Question. South Carolina, then, instead of North Carolina, Georgia, and Alabama, and at that time Mr. Legge said they were all insolvent except those three, and that he thought, as I recall his testimony—I will have to read the record to get the exact testimony—that he thought that perhaps those might be able to pay out, but as they have since failed, it seems that, according to Mr. Legge, all of them were insolvent in 1929 and 1930.

Answer. Well, if he was that far wrong on those he mentioned, he may have been equally wrong on the others.

Question. Well, I am asking you about yourself now, Louisiana, when the A. C. C. A. was formed you paid in $3,600?

Answer. I am not sure. Mr. Henry says they paid in $5,000.

Question. Or $5,000, or up to $10,000, let's suppose it was. What assets did it have at that time?

Answer. Well, as Mr. Creekmore stated, at the time this program started, if we could have sold our cotton and liquidated our affairs, we would have paid every nickel we owed.

Question. If you have sold your cotton for enough.

Answer. For the then current price, when the Farm Board announced its 16-cent loan.

Question. Well, isn't the whole milk in the coconut? For instance, I owe my bank here $10,000. If I had any cash, I could go over and pay it and I would not owe them anything, but the trouble is I have not got $10,000 in cash, so I don't seem to get very far with that sort of thing. What I want to know is what your assets were when you became a member of the A. C. C. A. in 1930?

Answer. Senator, you ask me a question that I can't answer.

Question. Were you president of it then?

Answer. No, sir; I was not.

Question. Will you find out what the assets of the concern consisted of?

Answer. Yes—I had just been elected president—I beg your pardon.

Question. Now, you would never have accepted as president without looking into its affairs, would you?

Answer. I certainly would not.

Question. Now, if you will just have the exact amount of the assets and the amount of the property that will be fine. I am informed that North Carolina still owes the revolving fund about $75,000. You have that testimony—well, we will put that in. I quote from page 133 of the hearings on the independent offices appropriation bill for 1932. This is evidently in 1931 [reading]:

"Senator MCKELLAR. Whereas, as a matter of fact, if the Government financial aid was taken away from these cooperatives, any of them, today, is it not a fact that they could not operate very long?

"Mr. LEGGE. I do not think that is true. They did operate, you know, for some 7 or 8 years before there was anything of this sort.

"Senator MCKELLAR. And when they did operate, every one of them was in bad financial condition; is that not so?

"Mr. LEGGE. Not every one of them.

"Senator MCKELLAR. Now, would you mind naming one that was not?

"Mr. LEGGE. Well, the nearest one to you is at Greenwood, Miss., which has operated for 10 years.

"Senator MCKELLAR. That is long-staple cotton?

"Mr. LEGGE. Yes.

"Senator MCKELLAR. But it has never been in the system, has it?

"Mr. LEGGE. Yes; we are loaning them money just the same as all the rest of them; we are loaning them money right now.

"Senator MCKELLAR. Long Staple Association?

"Mr. LEGGE. Yes.

"Senator MCKELLAR. I did not know that that was in your system, but that is the only one that is?

"Mr. LEGGE. Their cotton is not pooled under the same conditions, Senator, because that is a different grade of cotton, and it is sold on a different basis, so that they operate separately, but we have treated them just the same as any other cotton cooperatives.

"Senator JONES. Now, the Senator seems to assume that that is the only one that is not insolvent.

"Senator MCKELLAR. Are there any of the others that are not?

"Mr. LEGGE. Yes.

"Senator MCKELLAR. Which of the others are not insolvent?

"Mr. LEGGE. North Carolina is perfectly solvent; Georgia, I believe, is perfectly solvent.

"Senator MCKELLAR. That is two out of nine.

"Mr. LEGGE. Well, Texas is perfectly solvent.

"Senator MCKELLAR. That is three out of the nine.

"Mr. LEGGE. Now, there is a little California one that does not amount to much that is solvent. That is only a small operation.

"Senator MCKELLAR. Well, that is not one of the nine?

"Mr. LEGGE. No.

"Senator MCKELLAR. That is not counted in your nine cooperative associations, is it?

"Mr. LEGGE. California?

"Senator MCKELLAR. Yes.

"Mr. LEGGE. Yes. There are 11 of them, I think, outside of the staple, outside of the long-staple cotton; there are 12 altogether.

"Senator JONES. I gather that a majority of the organizations are fairly sound?

"Mr. LEGGE. Yes.

"Senator MCKELLAR. Now, wait just a minute. He has only named 4, and there 11 or 12.

"Mr. LEGGE. Alabama could finance themselves without Government aid.

"Senator MCKELLAR. Without Government aid?

"Mr. LEGGE. Yes.

"Senator MCKELLAR. Well, then, if these associations can finance themselves without aid, why is it necessary to use these additional funds, this $150,000,000 appropriation in December, and now approximately $100,000,000 for the future?

"Mr. LEGGE. That is our interpretation of the Agriculture Marketing Act; what we believe that we should do to help them. And they get the money at a lower rate of interest."

Now, wait a minute; let us get the exact date. This was on January 28, 1931. [Reading:]

"Senator MCKELLAR. And you are helping them whether they need it or not?

"Mr. LEGGE. How is that?

"Senator MCKELLAR. You are helping them whether they need it or not?

"Mr. LEGGE. Well, they need it from some source. Now, I think we have helped some of them, Senator, where they could, in extremity, have gone and gotton the money by paying a higher price for it on the outside. We did not set a limit of entire solvency, because our construction of the law was to mean that we were to be of service where we could, and we have tried to treat them all on absolutely the same basis."

That is the end of the testimony. Now, it appears from Mr. Legge's statement that North Carolina, Georgia, California, and Mississippi, 4 out of 12, were at that time solvent.

Answer. I think, Senator, Mr. Legge was mistaken. I think all of them were insolvent at the date of this. That was a year and a half practically after the 16-cent loan was announced, which bankrupted everyone.

Question. You think they were all insolvent?

Answer. Well, that is a matter of record. The 16-cent loan in the settlement bankrupted all, because they said we had to be bankrupt, and to make sure of it they made us sign notes to pay money, and we have paid it all. Louisiana don't owe one nickel in that fund. We have paid every nickel.

Question. But at that time you were insolvent?

Answer. At the time of this testimony every one of them were.

Question. To what extent were you insolvent at that time?

Answer. I think we owed—I think it was around $100,000 in notes at the time—$150,000. Louisiana signed notes for that, and we paid it off.

Question. And at that time the amount of cash that you put into the A. C. C. A. was somewhere between $3,600 and $5,000.

Answer. That was prior to this.

Question. Well, at the time the A. C. C. A. went in?

Answer. Yes, sir.

Question. You paid somewhere between $3,600 and $10,000?

Answer. It was a small amount, $3,000—I don't remember.

Question. Now, let me ask you, What is the amount of your assets today, less the loan that you made?

Answer. $565,000, approximately, plus our equity in the reserves that the A. C. C. A. has undistributed.

Question. How much do you estimate those to be worth?

ANSWER. How much was that, Mr. Creekmore? Your testimony shows the undistributed capital of the A. C. C. A.?

Mr. CREEKMORE. The capital of the A. C. C. A. is $1,000,100; surplus, $900,000. Your interest in the surplus is based on the delivery of each association in the year in which the surplus was returned, rather than the stockholders' interest, which would amount to between 15 and 20 percent.

The WITNESS. Something like $30,000 or $40,000.

Question. About $30,000 or $40,000?

Answer. Approximately; yes, sir.

Question. Mr. Williamson, I want to ask you another question. Yesterday you inveighed very greatly against the Cotton Exchange of New York and other cotton exchanges.

Answer. No; I don't think so, Senator. I didn't mean that.

Question. Well, I think you stated——

Answer. I proposed some pertinent questions I thought were worth the study and working out of any improvements.

Question. Yes; and I think you are right about it—about making those suggestions; but as I got your view, and as the papers seem to have gotten it also, it was quite an attack upon the cotton exchanges of the country.

Answer. Senator, you know enough about the papers. You can't always go by that.

Question. I know; but I heard it, and it agrees with my understanding.

Answer. Possibly my earnestness might have been misunderstood. I think I said I had no quarrel with them, but I thought, and I still think, that those suggestions I made are pertinent questions for study, and careful study, in the possible improvement of our marketing system.

Question. I agree with you about that, but here is what strikes me with a great deal of force: It has been testified both by Mr. Creekmore and by Mr. Henry that you are members of the cotton exchange in New York, you are members of the cotton exchange here in Memphis, and members of the cotton exchange in New Orleans; and so far as the New York Cotton Exchange is concerned, I think it was shown that you dealt in millions of cotton futures, and I am just wondering how you distinguished your connection with cotton exchanges throughout the country from the other person's connection with the cotton exchanges?

Answer. I am not trying to do that, Senator. We do just the same thing as the cotton merchant does, and we are forced to do it; we can't do anything else; it is the only avenue open to us. But there is a difference——

Question. Just a moment. I got the idea very distinctly yesterday from your well-considered testimony that you felt like that you were at war—that your organization was at war with the cotton exchanges of the country. Now, I don't know much about cotton exchanges. I don't suppose I was ever in a cotton exchange 15 minutes altogether in my life. I am not connected with cotton in any way except as a good citizen, and when I heard your very caustic attack upon the cotton exchanges of the country, I was just wondering why you were a member of those exchanges and operating through those exchanges, and buying millions of dollars of futures every year in those exchanges; and I would be glad if you would explain it.

Answer. That is very easily explained, Senator. We have it to do to protect our trades. Any cotton dealer must do it.

Question. Well, in other words, you are a cotton dealer just like all the rest?

Answer. No, sir.

Question. You are operating along similar lines?

Answer. You are putting words in my mouth.

Question. I am asking you if that is not a fact.

Answer. No; I say that we, the cooperatives, must protect ourselves on the cotton exchanges just like the cotton dealers. We cannot take a speculative position in the market.

Question. Haven't your organizations speculated in cotton? And the records that have been furnished by Mr. Creekmore, don't they show that you have bought millions of dollars and maybe hundreds of millions of dollars of futures, and you are constantly buying them all of the time?

Answer. Yes, sir; that is true. And I hope some way may be found to improve. I was bringing out the fact, or attempting to do so, after reading the letters that have come out from the Memphis Cotton Exchange, the conditions as they are trying to make them. I suppose they are authentic. They have not been disputed.

Question. I don't know about them.

Answer. We accept the challenge. We are not making this fight. I emphasize the fact that the cooperatives represent, according to the statement of the cotton shippers, a small proportion of the cotton growers and a small proportion of the cotton which is grown. Now in this hearing, of course, it must come to a conclusion, and I hope it will be a conclusion of the fight which they have been making for a long time because of these various investigations. Now, I accept the challenge on the part and on behalf of the cotton grower, and I also want to go on record, following the colloquy or suggestion of Mr. Creekmore, that the cotton trade be investigated—not only us, but the industry in general—and that there should be given careful study to the entire matter, and I believe that if you will only do this, it will result in a lot of laws which will be beneficial. I don't think you want to get me wrong in the record, and if I appeared to have made a vicious attack on the members of any institution, I want to disabuse your mind, and the mind of your committee as to that.

Question. I understood certainly on yesterday you were making an attack on private dealers.

Answer. I might have been a little vehement.

Question. It seems to me that whatever attack might have been, that you were certainly making an attack on them.

Answer. I want to disabuse your mind of anything like that in regard to my friends in the cotton business. I am not attacking anybody.

Question. How do you account in the last few years, I don't know when it started, but I am safe in saying I have received for some time on an average, I will say, of several letters a day, from cotton men, not only mailed to me from my own State, but from other States, saying that their business has been destroyed by the Government entering the cotton business, and asking if I could not recommend them for some place with the Government, whereby they could make a living, that they are not any longer able to make a living. Why are these letters constantly coming in?

Answer. Don't you think that the cotton producers have been in the same position, a hundred times more possibly, than the cotton merchant?

Question. Within the last 2 years, since March 4, 1933, the American Congress and its executive agents, have done more for the cotton farmer than all of the Congressmen and the executive agents that have ever existed in this country since its foundation.

Answer. I think so.

Question. Cotton was selling at 4½ cents, speaking generally, in March 1933, and by reason of the passage of the Agricultural Adjustment Act and by reason of the Bankhead Act, and these subsidiary acts, the price of cotton has raised to 10 and 11 cents, and maybe a little more. I am talking about without the bounty, and it seems to me that a wonderful work has been done for the farmers of this country in the last few years, and I am very happy to say that I have participated in it, and I think it was right and proper.

Answer. I agree with every word that you say, Senator, and I think, I not being in an official capacity like you, I don't hestiate to refer to the administration, and say that I think even in the Republican farmer West, that the administration will get credit for it, and I think the effect of the work you have done will be felt for years to come.

Question. Go ahead.

Answer. I have started to read a bulletin on yesterday afternoon, and you kept on discouraging me, because you criticised my bulletin before I read it.

Question. No; I did not criticize your bulletin, but I don't think much of bulletins.

Answer. I will read you some figures, that is all.

Question. All right, sir.

Answer. I know this gentleman, and I think you know him, Mr. C. C. Farrington, and he really knows cotton, and has done a great deal of scientific work and study in connection with it.

Question. How many pages have you?

Answer. I am not going to read it all.

Question. If you do we will be here a week.

Answer. Well, I have some letters here from some of the banks of Louisiana.

Question. Can't you read the more important ones and file the rest of them for the record?

Answer. Yes; but I want them returned to me.

Question. They can go in; that is all right.

Answer. Yes, sir. I don't want to bore you, I don't want to clutter up the record.

Question. You can put them in the record. Tell us what they are.

Answer. Here is one from a Shreveport bank [reading]:

"I have read with a great deal of interest news articles appearing in the press about the Government investigating the operation of your organization."

This was addressed to Mr. Bass:

"I believe that when this probe is finished it will prove that your association should be commended on the manner in which it has handled the cotton situation."

Question. Let me show you one that I received today from Yazoo City, a man who signs himself as B. S. Read, and who says that he received $10 less a bale for his cotton than he could have gotten in the open market.

Answer. I will read the next paragraph [reading]:

"I should dislike very much for your association to be handicapped in any way in serving the farmers. As a member of the organization, I believe that you have done a great deal of good in helping the cotton producer to get a fair price for his cotton. I have found that in purchasing his product you have paid him what his cotton is worth, and in granting him loans you have named a fair price for your charges.

"I not only hope that your organization will continue to prosper, but that more power will be given to you.

"Yours very truly,

"R. McL. JETER."

Another one from Alexandria, La. [Reading:]

"LOUISIANA COTTON COOPERATIVE ASSOCIATION,

"New Oreans La.

"GENTLEMEN:"——

Question. Pardon me a minute. You have a great many of them, and I suggest they just appear in the record.

Answer. I will read just a few.

Question. The marketing of the cotton crop in any community is a serious matter to each community to see that the cotton

farmers receive a fair value for their cotton at the time they market it.

Answer (reading):

"In this connection, the Louisiana Cooperative Association has been a great benefit to this community. We feel that the office here has been of service in seeing that each day's value has been correct, and we trust that the office here will be continued.

"JAMES C. BOLTON, *Vice President.*"

Now, I have here about 50, or maybe more, and I will not put them into the record by physically reading them, but I will turn them over for the record, and I would like to get them back this afternoon if possible.

Senator MCKELLAR. All right.

(Letters referred to are as follows:)

OCTOBER 25, 1935.

Mr. SAM BASS,
General Manager, Louisiana Cotton Cooperative Association,
New Orleans, La.

DEAR MR. BASS: I have read with a great deal of interest news articles appearing in the press about the Government investigating the operation of your organization. I believe that when this probe is finished it will prove that your association should be commended on the manner in which it has handled the cotton situation.

I should dislike very much for your association to be handicapped in any way in serving the farmers. As a member of the organization, I believe that you have done a great deal of good in helping the cotton producer to get a fair price for his cotton. I have found that in purchasing his product you have paid him what his cotton is worth, and in granting him loans you have named a fair price for your charges.

I not only hope that your organization will continue to prosper but that more power will be given to you.

With kindest personal regards, I am,

Yours very truly,

R. MCL. JETER.

HOMER, LA., *October 25, 1935.*

Mr. SAM BASS,
535 Gravier Street, New Orleans, La.

DEAR MR. BASS: There have been rumors here that the Louisiana Cotton Cooperative Association is contemplating withdrawing from the market. Such a move on the part of the co-op would leave the farmers of this parish and many others at a disadvantage in marketing their cotton.

I am one of the largest landowners in this parish, and I speak for myself and, I believe, for the majority of the other farmers in this community when I say that were it not for the cooperative associations the price of spot cotton would drop from 50 to 100 points at this place. The cooperative association is responsible for the price remaining at its present level. I would sincerely regret to hear that you had definitely decided to withdraw from the cotton market.

In the years before the Louisiana Cotton Cooperative Association was organized, the farmers of this parish, and the other parishes of this State were left at the mercy of the larger cotton buyers. They placed such a price as they wished on the cotton, and the farmer was forced to take it or hold on to his cotton. When the association was formed, spot prices immediately took on a firmer basis, and the farmers of this State have received thousands of dollars each year, above their former sales for cotton of the same grade and staple. Prior to your organization, there was no market for staple cotton, all cotton selling as short staple. Now, there is a better demand for staple cotton, and the buyers are recognizing more and more the advantage of offering to the farmers a fair price for their cotton.

Once again, I assure you that the Louisiana Cotton Cooperative Association has a definite place with the farmers of Louisiana, and asking you, in behalf of myself and most of the farmers of Claiborne Parish to remain in the market and not to leave us at the mercy of the larger cotton firms of the country, I remain,

Yours very truly,

F. B. KING.

RAPIDES BANK & TRUST CO.,
Alexandria, La., October 28, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: The marketing of the cotton crop in any community in the cotton section of the South is a serious matter to each community to see that the cotton farmers receive a fair value for their cotton at the time they market it.

In this connection, the Louisiana Cotton Cooperative Association has been a great benefit to this community. We feel that the office here has been of service in seeing that each day's value has been correct, and we trust that the office here will be continued.

Very truly yours,

JAMES C. BOLTON, *Vice President.*

GUARANTY BANK & TRUST CO.,
Alexandria, La., October 28, 1935.

Mr. LEWIS D. BROWN,
Care of Louisiana Cotton Cooperative Association.

DEAR MR. BROWN: It is our opinion that the Louisiana Cotton Cooperative Association has been an advantage to the farmer in the marketing of his cotton crop, and it is the opinion of the writer that the discontinuance of the same would be to the disadvantage of the farmer.

I remain,

Yours very truly,

A. WETTERMARK, *Vice President.*

CITIZENS PROGRESSIVE BANK,
Columbia, La., October 24, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: We understand there is a movement on foot to cut our corporation from the cotton business. We think this unjust and a detriment to the cotton trade.

You have helped to hold up the local market, and we hope you will be permitted to continue business.

Yours very truly,

_____,
Vice President and Cashier.

TENAS STATE BANK,
Newellton, La., October 2, 1935.

LOUISIANA STATE COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: Your association has served this territory for a number of years, and we have found out you to be of much benefit to the farmers. The cotton handled by you has always been very satisfactory.

We hope to see your association will continue in the future, as we consider you a help to the cotton farmers.

We remain,

Very truly yours,

T. T. HARGROVE, *Cashier.*

HOMER, LA., *October 25, 1935.*

Mr. SAM BASS,
New Orleans, La.

DEAR SIR: It has been rumored that private cotton firms are trying to put the co-ops out of existence. I would hate to see this happen, as the co-ops have done so much to help the farmer in this territory.

If it were not for the cotton co-ops association, cotton in Homer would not only bring a lower price, but we wouldn't get the classification that we are now getting.

In my estimation, private cotton firms are trying to put the cooperatives out of business in order that they may take up this old method of buying the producers cotton with some $5 or $10 profit per bale that the farmer would not get if it were not for the cooperative association.

Thus, after talking to various cotton producers, we desire the cotton cooperatives to operate in our territory regardless of whether they want them or not.

Very truly yours,

J. RALEIGH KING.

RICHLAND STATE BANK,
Rayville, La., October 25, 1935.

To whom it concerns:

The Louisiana Cotton Cooperative Association have an established office in Rayville, and as presently handled is helpful in many ways to the farmer. They keep their office open 12 months in the year, paying rentals, as well as salaries to their employees, which makes them an asset to the town and community in general. Our relations with them in a business way have been very satisfactory.

Yours very truly,

FRED MORGAN,
Vice President and Cashier.

BANK OF BENTON,
Benton, La., October 25, 1935.

Mr. SAM BASS,
General Manager, New Orleans, La.

DEAR MR. BASS: For some time I have had in mind to write you and express my satisfaction for the very fine service your organization is rendering this community in maintaining an all-year-round market for cotton.

At times I find that it is not always possible for your organization to meet competition, but our producers are assured of receiving full value for their product if a cotton cooperative representative is present, and you may rest assured that it is our desire to see the organization further strengthened so that they may continue to function and serve the producer satisfactorily.

I have read in the public press with much regret of the investigation about to take place in Washington; you have our best interest in the matter and sincerely trust the information revealed will prove beyond a question of a doubt in your favor.

With kindest personal regards, I am,

Yours very truly,

V. V. WHITTINGTON, *Cashier.*

CALDWELL BANK & TRUST CO.,
Columbia, La., October 25, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: There has been considerable agitation among the cotton brokers and buyers that your organization should be liquidated, and not allowed to continue in the cotton business.

We are wholly in sympathy with the Louisiana Cotton Cooperative Association, because in our section we know that they have been responsible in a great way in assisting the farmers secure a better price for their cotton.

We find that your buyers are liberal in grades and when other buyers compete with them they know to start with that they have to give the farmer all his cotton is worth on that day's market if he is able to buy same.

We feel that it would be a great mistake to disband the Louisiana Cotton Association, because we feel that we need them to assist in marketing our "greatest crop."

Yours very truly,

A. D. BRIDGER,
Vice President and Cashier.

TALLULAH STATE BANK & TRUST CO.,
Tallulah, La., October 25, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

DEAR SIRS: We wish to advise that cotton that we have delivered to you and also handled by you for us and our various customers has been handled in a very satisfactory manner.

We feel that by your maintaining an office in Madison Parish it has proved very beneficial to the planters of the community.

Yours very truly,

W. P. SEVIER, *Cashier.*

THE HAAS INVESTMENT CO., INC.,
Bunkie, La., October 27, 1935.

Mr. NORRIS C. WILLIAMSON,
President, Louisiana Cooperative Marketing Association,
Care of Peabody Hotel, Memphis, Tenn.

DEAR SIR: I am very sorry that press of business at home, harvesting cane, a perishable crop, prevents me from being present at the Memphis hearing.

Having produced and marketed cotton on a large scale for more than 50 years and having had extensive dealings with cotton farmers, both large and small, cash renters as well as share tenants, qualifies me to express an unselfish opinion upon cooperative marketing. I do not hesitate to say that cooperative marketing has been the greatest thing to the cotton farmer, particularly the small farmer, we have ever had.

Without the help of the Agricultural Department of the Government, making it possible to carry the overproduction in times of stress, we would all be hopelessly bankrupt.

Following the World War the cotton business of the United States began drifting into the hands of a few large operators. Their business has grown so large, their dealings with the exchanges so extensive, that we would be negligent to our own interests not to recognize the dangers. Cooperative marketing is the sensible way to meet the situation.

The Agricultural Department of the United States has done and is still doing a great work for the farmers. Without their help and without cooperative marketing we would be in a sorry plight.

Regretting my inability to be present, I am,

Very truly yours,

W. D. HAAS.

THE FIRST NATIONAL BANK,
Lake Providence, La., October 26, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: As you know, for several years we have had a great deal of business with you, and we feel that at this time we should make a frank expression, giving the result of our views and experience.

We believe that you have rendered the cotton farmer a beneficial service, especially so during the past 5 years. You have given him a market for his product every month in the year. Your service has been fair and impartial. We wish to lay stress on the fact that the small farmer having only one or two bales to sell at a time, has received the full market value. This, we think, merits such consideration by those who might criticize your manner of marketing, for it has been this class of farmer who has usually received the smallest price per pound.

By dealing with the mill and producer, thereby eliminating much overhead expense, a larger return is paid the producer. We know of no other reason of marketing that has attained this end.

Wishing you much success, we are,

Yours very truly,

W. D. BROWN, *President.*

PEOPLES' BANK & TRUST CO.,
Minden, La., October 25, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: I understand that the question of the desirability of the continuation of the Louisiana Cotton Cooperative Association is being weighed by those in authority, and I am, therefore, writing you this letter to set forth my personal opinion about this matter.

I am thoroughly convinced in my own mind that the cooperative association has proved to be a most desirable asset to our farm population. I have seen right here in our own city the change in the manner of grading and stapling our cotton which has resulted in our farming people being paid several dollars more per bale than they were formerly paid before the cooperative made its appearance in this community.

I believe the cooperative movement is an absolutely necessary part of the economic life of our farmers. Instead of the movement being curtailed, it actually should be expanded, and I believe that it would be a step backward to curtail the operation of an association that has been of such inestimable value to our farm people. I sincerely hope that all of the facts can be presented in this case and that the decision will be in favor of the cooperatives.

Yours very truly,

C. O. HOLLAND, *President.*

THE FARMERVILLE BANK,
Farmerville, La., October 25, 1935.

LOUISIANA COTTON CORPORATION,
New Orleans, La.

GENTLEMEN: Since the organization of the cooperative plan of handling cotton in this community, we believe that it has been extremely beneficial to the people in general, and especially to the cotton grower, who, in our opinion, has received a price for his commodity above that which he might have hoped to receive from the old marketing system.

We are pleased with the present set-up, and believe we voice the sentiment of the community when we make this statement.

Yours very truly,

EDW. EVERETT, *President.*

BANK OF RINGGOLD,
Ringgold, La., October 24, 1935.

Mr. SAM BASS,
Manager, Louisiana Cotton Cooperative Association,
New Orleans, La.

DEAR SIR: Don't know that we are in a position to be a good judge, but consider the Louisiana Cotton Cooperative Association has been largely responsible in keeping up the basis on cotton in our territory, and would like to see them continue their operations as they have in the past.

Yours very truly,

O. G. THOMAS, *President.*

RUSTON STATE BANK & TRUST CO.,
Ruston, La., October 25, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: We have heard none but favorable comments from men who have delivered their cotton this year to your Ruston office.

Just today a farmer in our bank said that though he lives a good distance from Ruston he likes to bring his cotton here, because he has learned that at your office here he will get the right grade and class on his cotton.

It goes without saying that we business people appreciate the fact that you are handling cotton in a way that is satisfactory to the producers.

Very truly yours,

JOHN P. GRAHAM, *Cashier.*

DUBACH STATE BANK,
Dubach, La.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: I am writing you to let you know that we appreciate your efforts in our town and parish and feel like we get the correct class and staple on the cotton delivered.

We appreciate your service in handling the 12-cent-loan cotton and in paying us the entire amount of the loan, not holding any commission or charges.

And we also appreciate the fact that you have Government classers, and I just saw a return today where one of your classers only missed two bales out of a hundred.

Our crop in this section is pretty well out, ginned about 96 percent.

Yours truly,

E. B. TATUM, *Cashier.*

WEST MONROE STATE BANK,
West Monroe, La., October 25, 1935.

Mr. MARK W. STROUD,
Louisiana Cotton Cooperative Association,
Monroe, La.

DEAR SIR: We are writing you to express our appreciation of the services rendered in this community by the Louisiana Cotton Cooperative Association. Our relations with the local office of the association has been very pleasant, indeed, and we have found that their manner of handling cotton drafts drawn through the New Orleans office has been very satisfactory, both to the bank and to our customers.

Our contacts with the personnel of the local office of the association has been most pleasant, and we have always found them very courteous and accommodating.

Yours very truly,

FRED G. THATCHER,
Vice President and Cashier.

CONCORDIA BANK & TRUST CO.,
Vidalia, La., October 25, 1935.
LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: I am writing to express my views concerning the services furnished the farmers and planters by the interoffices of the Louisiana Cotton Cooperative Association. It would be a big mistake if they were withdrawn, as the farmers here feel that due to the fair grading and stapling of their cotton by the cooperative classer enables them to get a better price for their cotton even though it is not handled by the association.

The cooperatives have given us the services of United States Government licensed classers and have been a wonderful help in improving the quality of cotton grown and enables the planters to get full value on their cotton. I think that the feeling of the planters and farmers in this territory are shown by the amount of cotton received by the cooperatives.

It is our request that they be retained and the number of offices increased if possible.

Yours very truly,

S. L. WINSTON, *Vice President.*

EXCHANGE BANK OF NATCHITOCHES,
Natchitoches, La., October 24, 1935.
LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: We have been very fortunate to have had located in our community for the past 5 years or more an office representing your association. The continuous operation of this local office and its very efficient management has been a very important factor in the development of our community and parish. We believe that the year in and year out operation of the local co-op office means a great deal to the advancement of farming in any section, both from a monetary as well as an educational standpoint. We trust that this good work will continue.

Yours very truly,

HAROLD KAFFIE, *President.*

THE FIRST NATIONAL BANK,
Arcadia, La., October 25, 1935.
SAM BASS,
General Manager, Louisiana Cotton Cooperative Association,
New Orleans, La.

DEAR MR. BASS: It has come to our attention through the press that there will be an investigation to be held in Memphis, Tenn., at an early date and we take this method of expressing our kind feeling toward the work being done in this community by the cooperatives, and we are sure that we speak for the people of this trade territory.

There has been maintained a more stable market for our cotton since you have had a representative here, and we find that our customers are receiving premiums for their better staples and grades, which amounts to a considerable sum each year.

Any assistance that we may be to you will be done gladly, for we respect our obligation to you.

Very sincerely,

J. T. THADDEN, *Cashier.*

THE BANK OF BERNICE,
Bernice, La., October 24, 1935.
SAM BASS,
General Manager, Louisiana Cotton Cooperative Association,
New Orleans, La.

DEAR MR. BASS: It gives me great pleasure to continue to support the good work your association is doing for the farmers of this territory. All cotton delivered to you has been handled to the advantage of the producer.

I also know the farmers are backing your good work and appreciate your efforts in their behalf.

Assuring you of our continued support, I beg to remain,

Yours very truly,

L. H. PRATT, *Cashier.*

CITY BANK & TRUST CO.,
Natchitoches, La., October 24, 1935.
LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: We feel that your association has rendered great service to the cotton farmers in this section.

The local office has cooperated in every way with the trade and has been a very useful agency in our midst. This section would feel their loss should they be removed from our town.

We approve of the work of your association and the local office.

Yours truly,

G. H. PIERSON,
Vice President and Cashier.

BANK OF CHOUDRANT,
Choudrant, La., October 25, 1935.
LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: We want to express to you our appreciation to your association for the manner of handling the cotton in this trade territory and the courtesy extended in handling the 12-cent loan cotton.

All of the farmers in this section feel that they have had a square deal in classing and stapling and feel that through your good work it has helped to keep the price of cotton up to market value. We handled quite a few of your patronage dividend checks, and they came at a time the farmer needed the money most.

Trusting that your association will continue to function in this territory, I am,

Yours very truly,

H. H. SMITH, *President.*

MINDEN BANK & TRUST CO.,
Minden, La., October 25, 1935.
LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: Being informed that there is a movement on foot to discredit the work of your organization, I am taking the liberty of expressing my views on the benefits that have accrued to our cotton farmer by reason of the service you have rendered in this locality.

In my opinion, you have more nearly approached a measure of helpfulness in your methods of assembling, classing, and selling of cotton than has to this time been accomplished by any other agency.

You have more nearly approached the idea of cooperation among farmers in the sale of their product in a practical way than has heretofore been accomplished.

You have largely gained the confidence of all cotton growers, something which has heretofore been considered impossible.

The writer is largely interested in the local cotton warehouse and has had personal supervision of the warehousing of all cotton being sold and assembled in Minden during the past 15 years. I am familiar with the system that prevailed before the days of the cooperatives, and I have watched with interest the development of the cotton business since that time. I believe that the cooperative movement is a constructive force in the matter of farm relief, and I believe it would prove an economic loss to cotton farmers were this association disturbed or hampered in their efforts to profitably market cotton in their present way.

I sincerely trust that your organization may survive this effort on the part of jealous interests to interfere with the good work that you are doing all over the South. I wish you success in your fight.

Yours very truly,

T. CRICHTON, JR.

THE OUACHITA NATIONAL BANK IN MONROE,
Monroe, La., October 26, 1935.
MR. SAM BASS,
General Manager, Louisiana Cotton Cooperative Association,
New Orleans, La.

DEAR MR. BASS: Mr. Stroud has asked me if I would write a letter to you giving my personal opinion as to the benefits derived by the farmers from the Louisiana Cotton Cooperative Association. I am very pleased to comply.

I think the association has been of very marked benefit to the farmers and certainly hope it will not be discontinued. It is my observation and knowledge that the farmers are receiving better basis on their cotton by from 50 to 100 points than they did before the organization of your association. I cannot say that your association is responsible for this increase in the basis, but I do know that the increase has developed since the organization of the association.

Very sincerely yours,

F. F. MILSAPS, *President.*

THE PEOPLES BANK,
Natchitoches, La., October 24, 1935.
LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: We feel that the continuous operation of your local office for the past 5 years or more has been a most important factor in the cotton trade, both for the money involved and the willing help and advice given our growers. This means, of course, that our community and parish has prospered, and we would certainly like to express ourselves as having a continuous establishment of this kind in our city. We trust that the good work will go on.

Yours very truly,

SAM'L LEVY, *President.*

FRANKLIN STATE BANK & TRUST CO.,
Winnsboro, La., October 24, 1935.
LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: With reference to your association handling cotton in this section of the State, will say that splendid results have been gained which credit should go to the Louisiana Cotton Cooperative Association.

First, the farmers are raising a better grade of staple, receiving a better price therefor. Also, after having their cotton classed and graded they are in position to receive a much better price and do receive a better price than before the cooperative association established an office here, one bale of cotton receiving the same care in being graded and classed as would a 100-bale lot.

Farmers here do not hestitate to praise the good work of the Louisiana Cotton Cooperative Association, the businesslike manner in which your local office handles the crop, and accommodations rendered them by your managers.

Prior to the location of your grader and classer here, the price always seemed to be about 1 cent to 1½ cents under the cotton-market quotations. Now they receive according to the grade and class as given them by your local managers, which gives them the full market value plus the grades.

Yours very truly,

BAILEY MARTIN, *Cashier.*

FIRST NATIONAL BANK,
Ruston, La., October 25, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: It is our opinion that your concern has assisted in bringing about a better cotton market for our town and surrounding community. Before your association began operations here there was no stapling of cotton but since the farmers have been delivering cotton to your association all the buyers staple the cotton.

We believe that your local grader is efficient and thoroughly qualified to grade cotton; sincere in allowing the proper grade and staple to the farmers at all times.

Yours very truly,

ADD THOMPSON, *Vice President.*

CONCORDIA BANK & TRUST CO.,
Ferriday, La., October 24, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

GENTLEMEN: Regarding the service rendered by your agency in this section. we advise that from our knowledge and observation this is manifested by the volume of business that your local agency receives at this point, which enjoys keen competition due to the high grade of cotton grown in this vicinity.

We believe that the cotton producers are entirely satisfied, inasmuch as their drafts are handled without delay and are able to take advantage of and receive grades by a bonded Government classer.

Our own personal connection as to banking is entirely satisfactory.

Yours very truly,

S. A. MURRAY, *Cashier.*

CENTRAL SAVINGS BANK & TRUST CO.,
West Monroe, La., October 25, 1935.

LOUISIANA COTTON COOPERATIVE ASSOCIATION,
New Orleans, La.

DEAR SIRS: The Cooperative Association of Monroe has rendered very efficient service in this territory and we feel the banks, together with the farmers, have received benefit through this office.

Hoping the same will be continued, beg to remain,

Yours very truly,

CENTRAL SAVINGS BANK & TRUST CO.,
T. C. DREW,
Manager, West Monroe Branch.

FIRST NATIONAL BANK,
Delhi, La., October 24, 1935.

To whom it may concern:

The Louisiana Cooperative Cotton Association has operated in this section for the last 2 years, and it is our opinion that they have helped the sale of cotton and the local cotton market considerably, and we believe our cotton market would be materially damaged should they decide to withdraw from this place.

Very respectfully,

F. W. MILES, *Cashier.*

ZENORIA LUMBER CO., INC.,
Jonesville, La., October 28, 1935.

Mr. L. D. BROWN,
Care of Louisiana Cotton Cooperative Association,
Alexandria, La.

DEAR SIR: Enclosed herewith find cotton sales certificates for the 48 bales of cotton which we shipped to you. Kindly sign same in triplicate and return to us, and we desire a copy for ourselves and one for our tenant.

We desire to express our appreciation for the prompt and satisfactory manner in which you handled this cotton for us and to assure you of our cooperation with the association, as we are in hardy accord with the association, and believe that through the efforts of the association the farmers and producers have received a great deal more benefits and a much higher value for their cotton than they could possibly have secured if it had not been for the information given out by the association. And through the several offices of the association each producer or seller of cotton could secure the actual value of his cotton, whether he handled the cotton through the association or not, and in this way they did know the value of their cotton.

The cotton producers in this section keenly feel the loss of the association this year, as we did not have the co-op representative here and as this point produces several thousand bales of cotton each year every effort will be made to have a co-op office here again at Jonesville.

Again assuring you of our appreciation of the assistance you have given us, we are

Yours very truly,

ZENORIA LUMBER CO., INC.,
W. D. LURRY, *Vice President.*

Question. Now read the bulletin.

Answer (reading):

"INTRODUCTION

"Producers of cotton have claimed for years that certain markets have discriminated against their product and that frequently within the same market intrinsic worth was disregarded and cotton was purchased on averages, all grades bringing the same price."

Now this was before the cooperatives were organized anywhere in the South. [Continuing reading:]

"That such a system works to the detriment of the farmer who exercises care in producing and harvesting his crop is generally admitted."

Question. That was 1914?

Answer. 1916.

Question. All right.

Answer (continuing reading):

"To discover, if possible, whether there was any foundation for such reports the Department of Agriculture in 1912–13 conducted a survey of Oklahoma to secure accurate information as to the exact conditions under which the farmer of the western belt marketed his cotton.

"So many interesting and unusual conditions were revealed by this survey that the Office of Markets and Rural Organization started an investigation in the season of 1913–14 to cover the entire Cotton Belt for the purpose of ascertaining the manner in which cotton is handled and marketed in the various sections of the South. Seventy-three towns in North Carolina, South Carolina, Georgia, Alabama, Mississippi, Louisiana, Arkansas, Oklahoma, and Texas, for the most part sections growing cotton of short staple, were covered by this survey. Every effort was made to discover the facts as they existed in the various marketing centers as a basis for improvement, since little improvement is possible without a full understanding of the exact conditions under which cotton is marketed. Special attention was given to grade to see if (and to what extent) cotton was purchased according to the accepted standards and differences existing at that time or whether it was bought on a daily average price. Special effort was made to determine whether staple was a factor in pricing the farmer's cotton or whether cotton was sold without regard to variations in length of staple. Comparisons were made between prices paid for cotton of the same grade and staple on the same day in different markets. In the course of the investigation 38,000 representative samples were secured from 73 markets in 9 different States.

"Men who were experienced in the cotton business were appointed in the various markets covered by this survey. They were instructed to begin sampling as soon as cotton began to move freely and to send in 50 samples each week. Information as to the date of sale, name of seller, and price received accompanied each sample. These samples were carefully wrapped, placed in a mail bag, and shipped to Washington. The grading and stapling was done by cotton experts connected with the Office of Markets and Rural Organization. The same experts handled the entire lot of samples, thus securing a certain uniformity in the classing. When the classing was finished the results were compiled and entered in the files of the Office of Markets and Rural Organization.

"In order to compare prices paid for cotton throughout the Cotton Belt, the average price for each grade was obtained by months for each State. This was done by taking all of the samples from the grades Strict Good Ordinary, Low Middling"—

and so forth, and he goes on to name the grades—

"as practically all the crop fell within these grades."

That left the grades covering the crop.

"By making this selection for each State it is safe to assume that the figures fairly represent the average for the season."

Then they gave a table here which illustrates this point. I am just going to read a few paragraphs here—some of the cases. It will appear in the record as an exhibit, but these studies now, in order to save time, that real short cotton of the lower grade did not lose to the farmer on the method of marketing that the better grades did, but when it came to the better grades and staples; that is where the farmer was penalized severely. [Continuing reading:]

"While it is difficult to make definite comparisons between round-lot and single-bale sales, still the figures in general clearly indicate the advantage of selling in round lots. Although this survey did not afford opportunities for definite comparisons between round-lot and single-bale sales, figures of subsequent years are available."

Question. What you mean by round lots is——

Answer. A round number of bales of cotton.

Question. Nothing to do with grade or staple?

Answer. No, sir.

Question. All right, go ahead.

Answer (reading):

"Investigations made by the United States Department of Agriculture in cooperation with the experiment station of the North Carolina Agricultural and Mechanical College in 1914–15 and 1915–16 furnish much light on the subject. During these 2

years data were obtained regarding 55,000 bales of cotton sold in North Carolina, and complete records were kept of each transaction. These figures show that in 1914–15 the producer received 29 points, or $1.45 more per bale by selling in lots of 10 bales or over, and the following year he received 17 points, or 85 cents more per bale.

"These data also tend to show the importance of selling cotton in uniform lots of grade and staple. Since the selling in round lots showed a higher price, sales in even-running lots would show equal or even higher premiums.

Table 3 shows——"

And that is here.

Question. It will all appear in the record anyway, Mr. Williamson.

Answer. There are two or three paragraphs—I am afraid you will not have time to read this record, and it will not take but a few minutes. [Reading:]

"Table 3 shows that length of staple often does not receive proper consideration in pricing the farmer's cotton. A careful study of table 3 will show that the average price paid for cotton of three-fourths-inch staple was as high as that secured by the producer of 1-inch cotton, while the latter is worth probably $5 more per bale for spinning purposes. In this connection it might be well to quote from a recent issue of the Farmers' Market Bulletin, published by the North Carolina Agricultural Experiment Station in cooperation with the State department of agriculture and the college of agriculture, April 1916, edition."

At this point they set out that the short staple brings as much as the longer staple, with a difference in price of as much as $17 per bale.

"The fact that official standards for tinged and stained cotton have been promulgated should enable the merchant to handle colored cotton in the future with little more risk than with white cotton. The decreased risk naturally will give greater stability to the market and should enable the farmer to secure prices which are more in line with the value of the produce offered. Table 4 shows the wide range in prices paid in the primary markets for tinged and stained cotton. It is but natural to expect a considerable range in prices, but there is no argument to justify a variation of 500 points in the same market on the same day for the same grade, especially when this difference amounts to more than was paid the producer for the lowest-priced bale.

"It must not be supposed that the local buyer reaps the entire benefit of this loss, because he, too, is frequently not aware of the intrinsic worth of the cotton that he purchases. Probably this amount is absorbed gradually along the line, but the producer is the one who sustains the loss.

"When conditions are favorable, great economies may be effected through the organization of cooperative associations for the proper handling and marketing of cotton. Organizing on a community basis will permit the development and maintenance of a pure variety of cotton of a given length of staple. This development of one variety must be accompanied by better methods of harvesting, ginning, and storing. When the cotton is ready for marketing, better prices can be secured by assembling it at a central point, having it properly classed, and offering it for sale in even-running lots of grade and staple."

Question. Now, before you leave that, I want to ask some questions about that. That was in 1916?

Answer. The work was done the year previous, but the bulletin was dated in 1916.

Question. Since that time has any law been passed providing that cotton should only be sold on grade and staple? Has an association ever demanded that cotton be sold only by grade and staple?

Answer. Well, we have practiced it. We have not initiated any legislation on it.

Question. Well, you say you have actually done it. Were you here the other day when a bill of sale was produced showing that the Mid-South Association had bought three bales on the round system, that it had paid an even price for all three bales, of about 7 cents plus, and it was afterward sold for 10 cents plus, and it graded very differently when it was sold from when it was bought? Now, are you in favor of a law, Mr. Williamson, if one can be had? I doubt very much whether the Federal Government has the jurisdiction to pass such a law, but are you in favor of State laws or Federal laws to help that along, because we could probably pass one affecting the cotton that moved in interstate commerce? Are you in favor of a law that cotton can only be sold on grade and staple?

Answer. No; I do not think it would be practicable for the State. We would have to have uniform laws, and I don't know whether it would be practicable—I don't know the requirements of it, or whether Congress could pass a law requiring every farmer to have his cotton classed by a Government classer. I don't know, but it would certainly be a very beneficial thing to the cotton producer. There is no doubt about that.

Question. All right, sir. Now, the other bulletin is a very long one, and I suggest that you just put that in the record.

Answer. The point that I want to bring out, and I think that your own governmental publications clearly point to that fact, is the difference, first, between the farm market at which cotton is sold, the price at which cotton was sold—and this data was secured in the year 1928, or the cotton year 1928, which would include the crop year of 1928–29, and the bulletin is one of our Louisiana bulletins, no. 221, and was published in May 1931. Now, this was in 1928–29, and it was just before A. C. C. A. was organized. Now, these estimates were made by Mr. Farrington, as I said, in cooperation with C. T. Dowell, dean and director of the Louisiana Experiment Station at Baton Rouge, together with the Department of Agriculture in Washington. As you likely know, we have short cotton in Louisiana, and all types of staple cotton, up to 1⅛ inches, and the differences between the sale price to the farmer and the price at which it was being sold in the central markets is remarkable, and they bring out the effect of grade and staple.

Question. Now, of course, you know I will be glad to hear you, but I call your attention to the fact that Mr. Henry and Mr. Creekmore both have testified that they have their organizations spread through the cotton territory and they have a leeway of as much as $1.85. They buy the cotton in accordance with those instructions, and it seems to me that you are concerned with doing what the other cotton buyers are doing, buying cotton as cheap as you can, and then selling it for as much as you can. Now, I just tell you that to let you know what is running in my mind. As to the facts of the case, that is what we are undertaking to find out here.

Answer. I want to show, Senator, the importance insofar as the cotton grower is concerned, as well as the cooperative, the importance to them both of selling cotton as a class according to the grade and staple of cotton.

Question. Well, now, Mr. Williamson, let's look back. In 1930 it was—I mean 1920—it was shown here the other day that cotton sold at 55 cents?

Answer. Yes, sir.

Question. Suppose that was beneficial to the farmer.

Answer. It might have been worth 75.

Question. It might have been; I don't know; but here is the thing about it. When a farmer gets a good price for his cotton he is not the one who is likely to be complaining. If you will look at those bulletins you will find that nearly all of them are issued when cotton is down low and everybody is trying to find a way to get a better price, and it is perfectly natural; that is human nature; naturally one will do that. So we are trying to do what we can to help the farmer. What we are trying to do is to ascertain just what is being done to the farmer and how much the farmer is getting out of the cooperatives at the present time. I don't know the history of cotton farming or cotton sales. We are here for the facts. It may be that something better is being done for the farmer and the producer, and that is what we are directing our attention to in this case.

Answer. Senator, I can't conceive of anything more pertinent nor to the point, bearing in mind the complaints that have been made by the cotton trade that we are advanced money by the Government and that we are doing business in competition with them, and still not saving the farmer, the producer, and we are not benefiting him. Now, that is what I want to show here.

Question. I have no doubt every dealer in cotton—I imagine so; I have no knowledge of it—but how any fair-minded man, whether he be a dealer or not, could differ with the statements made in these bulletins, I don't know. If there are any private cotton men here, I imagine that we could ask them if there is a one of them who does disagree with what I have just read—or you have just read, rather—and I believe at this time I will find that out. Is there any private cotton dealer here that disagrees with the arguments of these bulletins? If so, will you stand up and tell why you disagree? I don't know whether there are any here, but it looks like there is no disagreement about it.

Answer. Of course, I want to make the record here.

Question. Yes; that is one of the things we are doing, getting at now.

Answer. The charge is made that we are not serving the farmer through our operation. I don't agree with them; I don't know; they might be right, but I don't think so. Now, the only way they could be forced out of business would be for the spread between the price that the farmer gets and the price that the mills pay, so that there would not be any unusual profit for the cotton man. If we are responsible for that, I think that we have rendered a service to the farmer.

Question. The testimony of Mr. Henry was that he did not take that position. You think he is wrong about it?

Answer. I don't know what particular thing you are talking about. There was some statement produced here, as I recall, which showed that there had been some mistake made in the farmers' cotton, and he came back on the association, and the mistake was corrected. In a big organization of this kind, and being only poor humans, you must realize that mistakes have been made, and they will be made again, but all we can do is to correct them when they do occur.

Question. Oh, yes.

Answer. And you will have mistakes again, as I say.

Question. I agree to that.

Answer. Now, if you will analyze it you will see that there is nothing to what we are accused of doing. Now, the Lord knows I don't want to deny to any man the right to make a living, and to make a profit, or to make as much as he can, so long as it is not an injury or an unjust injury to anyone else, but these cooperatives have been accused of conducting our business in a way that has put a lot of good men out of business. I say that is wrong; that we have put no man out of business, and what we have done is to effect a saving to the farmer, and the farmer is getting more now for his crop, regardless of whether he belongs to our association or not; and, if we had done nothing else, we would have justified our existence. So I tell you that we are not

responsible for such a condition, and I tell you that we have rendered a service and that we will continue to do so.

Now, I want to return to this bulletin here. I want to read a paragraph here on page 19 of this bulletin, no. 221, 1931, by C. C. Farrington and C. T. Dowell, dean and director of Louisiana State University.

Question. All right.

Answer (reading):

"Average premiums and discounts for staple differed even more widely in the various subtypes of local markets of Louisiana. Average premiums for staple length longer than ⅞-inch were considerably greater in nonginner-commission-buyer markets, C, D, and E, than in any other type of local market studied. Premiums in this type of market averaged 90 cents per bale of 500 pounds for ⅞-inch cotton, $2.85 for 1-inch, $4.20 for 1 1/16-inch, $6.40 for 1 1/8-inch, and $7.30 for 1 3/16-inch. The premiums for staple length in the ginner-commission-buyer markets A and B were considerably less than those of the above markets. Premiums paid in the ginner-commission-buyer markets, however, were greater than those of any of the merchant-market types.

"Competitive merchant markets H and J were the only merchant markets in which even small staple premiums were paid. Average premiums paid in these markets, expressed in dollars per 500-pound bale, were as follows: ⅞-inch, 20 cents; 1-inch, 35 cents; and 1 1/16-inch, $1.40. In the other two types of merchant markets the average prices paid for each staple length longer than ⅞-inch were lower than those paid for ⅞-inch cotton of the same grade. In the noncompetitive ginner-merchant markets F and G, the farmers actually received an average of 85 cents less for ⅞-inch cotton, $1.05 less for 1 1/16-inch cotton, and 80 cents less for 1 3/16-inch cotton than they did for ⅞-inch cotton. Smaller discounts were made for 1-inch and 1 1/16-inch cotton, but these staple lengths also brought lower average prices than ⅞-inch cotton."

Now, Senator, I have marked certain paragraphs here, and I am going to submit this bulletin. I don't want to tire you. You have been very patient and kind and courteous and considerate with all of us through this week. You have worked long hours and I know it has been boresome to you, and I am not going to go any further in reading these figures, but there are even more astounding differences recited in this bulletin than I have read. In some instances there has been as high as $13 a bale difference in the price received by the farmer in the country market and the price paid in the central market, such as Memphis, New Orleans, and other markets throughout our territory.

Question. I haven't been bored. I have been very much interested in this entire proceeding.

Answer. I want to say again that I don't want to be placed in the attitude—I know that my newspaper friends might have mistaken my feeling—I do not want to be placed in the attitude of having attacked the cotton exchange or any of my friends in the cotton business; I don't want to have my attitude understood in that light.

Question. I want to ask you a few questions when you get through with your testimony.

Answer. Well, I am through now, Senator.

Question. From page 769 of the record I read your testimony. [Reading:]

"Answer. When there are ten or eleven million bales of cotton produced in America and possibly seventy-five or one hundred million sold on the New York Exchange and possibly on the other exchanges; I don't know the actual figures, but I take it that approximately somewhere in the range of 100,000,000 bales are sold annually in the New York Exchange in normal times, not in the last few years, because there has been very little speculation. That question is no. 1, and the best evidence, to my mind, that there is something wrong with the system of marketing is the very thing that happened on March 11 last, 1935."

Then, again, on page 771:

"Now, that is what is going on. That is what the farmer is interested in, Senator. He can't sell 100 or 1,000 bales on the New York Exchange. He can't even get there. He don't know anything about it. But he is interested, and intensely interested, in what somebody will pay him for his cotton, and he is materially interested in whether he can sell his cotton for 11 cents or 12 cents, and not whether they are selling cotton in New York or New Orleans today for 10 cents or 11 cents or 13 cents."

And, by the way, I am inclined to think there is a good deal in what you say, just as I said yesterday. But your statement was an argument against futures exchanges, and this is what I want to know: If you are so opposed to futures exchanges, and think they are doing the farmers so much harm, and you are interested in the cotton farmer, why is it—and you evidently consider that these exchanges as bad, and it might be that you are right—but why is it, if you think they are that way, that you continue to use them, that you are a member of them, and that your association is a member of them? Why not make the fight out on them if they are bad—get rid of them if they are bad? But as long as you are a member of them and use them, and especially the futures exchanges, because it is evidence here that your association and the cotton associations, the A. C. C. A. association are all buying enormous amounts of futures, probably a great many more futures than you buy spot—it seems to me that your attitude is very unusual, to jump on an institution that you are using every day. I am just asking you about your attitude.

Answer. I believe, as I have stated, that there are serious defects in the marketing system and the system of spread, but it is the only machinery we have to protect ourselves the same as any other—any country merchant or any other operator—in marketing spot cotton. We can't afford to go without protecting ourselves against losses where cotton is delivered by members, and we must hedge.

Question. What is your suggestion to the farmer in the interest of the farmer?

Answer. I suggest that you Senators who are interested in the condition of the farmers give serious thought to the very points that I suggested. I don't claim that I am right, but I do feel that those thoughts ought to have consideration. If we can improve on the system of marketing cotton to a point that will prevent the value changing almost $10 a bale in less than an hour's time, I think we should do so. There is something seriously wrong with a situation of that kind.

Question. Well, it would seem so to me.

Answer. Yes, sir.

Question. And you are complaining of the system that you use?

Answer. We have nothing else to use.

Question. Could you, as an expert cotton man——

Answer. Pardon me; I do not hold myself out as an expert cotton man.

Question. But you have been in the business all your life—in the business of selling futures and selling spots and buying futures and buying spots. Won't you tell us what you think would be a proper system to get for the farmer every dollar that he is entitled to, because, after all, that's the principal thing we want to do?

Answer. I wish I was smart enough to tell you, but I think we ought to do this, and I am willing to go with you and others who are in position to help: to get proper authority from Congress to make a proper investigation—not for the purpose of prosecuting or persecuting anybody, not with the idea of tearing down any business that has already been established, but with the idea of intelligently, and along sound lines, trying to work out some system and some improvement that will guard against the wide fluctuations that happen without any apparent cause. I don't believe honestly that there was any preconceived idea by any one man or any group of men to jump on the market on March 11—I don't believe that, but for some unknown reason which no individual or group of individuals may be responsible for—the point I am trying to bring out is that there are some vital defects in the system where a thing like that can happen, and I want to say again that I don't think there was any organized effort on the part of any man or group of men to do that thing. I don't believe it.

Question. Would a limitation on the price have been changed in 1 day?

Answer. There is a limitation now. We have 200 points, and it didn't go the limit.

Question. Suppose we reduced that to 50 points?

Answer. I don't think that would help.

Question. Why?

Answer. It would go down from day to day.

Question. That isn't always the case. Sometimes it goes down and sometimes it goes up.

Answer. Yes, sir; sure.

Question. Wouldn't a limitation of 50 or 25 points a day be of advantage?

Answer. It might. I am not competent to say that. I haven't studied the situation close enough. I know there is some weakness when a commodity that has a staple value as much as cotton does act that way.

Question. Here's what I want to ask you, Mr. Williamson: You have claimed that there ought not to be such a change in a day, and in that claim I thoroughly agree with you. I want to rectify it, and yet again you claim the farmers ought to have the cotton sold in order to be protected—his cotton ought to be sold according to grades and staples, and I agree with you there; but in neither case do you suggest any plan, any new plan. Do you want to continue the old plan until a better one is found?

Answer. It can't help itself. You have to play the game according to the rules.

Question. The whole marketing of cotton isn't a game?

Answer. It is a big gamble.

Question. I have strongly suspected that for a long time. I don't believe in this gambling.

Answer. The producers are the biggest gamblers of all.

Question. Oh, no, sir; I don't agree with you there.

Answer. He doesn't know within 5 cents of what he is going to get for it.

Question. But he doesn't go in the market—I don't believe there's one case in 10,000—I seriously doubt if there's a case in 50,000—where the producer goes on the market and gambles.

Answer. I didn't mean he actually gambled on the market, but what he thinks he is going to get out of it.

Question. That part of gambling is nothing more than what life is, Mr. Williamson, because I don't know whether I am going to be sitting here tomorrow or in the ground. It is all a gamble when you look at it that way; but what I am talking about is a gamble on cotton. Don't you think that all gambling on cotton should be stopped?

Answer. I don't know, Senator.

Question. You don't know?

Answer. That was one of the questions I asked you—one of the five questions, Should speculation be cut out?

Question. Do you think it ought to be?

Answer. Sometimes I do.

Question. Sometimes you do and sometimes you don't; is that correct?

Answer. I want to tell you what makes me doubt my own opinion.

When a man who has been in the cotton business and has made a life study of it—not as a farmer—when they sit down and present some pretty sound arguments sometimes that the wider and bigger you make your market, the better it will be for the man who owns the commodity, that is if you limit your actual clearing of trades like the banks do in their checks every day—that is, limit it actually to transfer of spot cotton—it would narrow our markets and we couldn't get a good price. Senator Caraway, whom you no doubt recall—his bill might be the solution. He introduced a bill and worked zealously for it. That bill might be the solution.

I remember that well.

Question. Can you give me a copy of your certificate of incorporation and bylaws of your association?

Answer. Yes, sir; we have that.

Question. Just pass that to the stenographer.

Answer. I can get it.

Question. Haven't you already handed one in?

Answer. No; you didn't ask for it.

Question. I will ask for it now.

Answer. Yes, sir.

Question. Will you pass it in?

Answer. Yes, sir.

Question. To be held on the same arrangement that we agreed the other day?

Answer. I haven't any authority to get it.

Question. To whom do you have to go?

Answer. The directors.

Question. I am calling for it now and you can take your own course in securing it.

Answer. Yes, sir.

Question. I would like to have the number of your membership for each year. First, the number actually delivering cotton; second, the number originated by seed loans, if you have any such; third, the number originated by 10-cent loans; fourth, the number by 12-cent loans; and fifth, the number voting for the elections each year; sixth, the proxy votes of members for director.

Answer. We vote by ballot and the ballot—the contract provides that that counts as a vote.

Question. Is that in your bylaws?

Answer. Possibly. We will send the whole thing.

Question. Have you had your books audited?

Answer. Every year.

Question. Will you send me copy of each year's operations?

Answer. Yes, sir.

Question. Could you give me your balance sheets for each year and profit-and-loss statements for each year?

Answer. Yes, sir.

Question. Would you be good enough also to give me the payments or commissions, by years, received from any governmental agency?

Answer. If any; yes, sir.

Question. And loans received from any governmental agency and any compromise thereof?

Answer. Yes, sir.

Question. Have you contracts with the A. C. C. A. by years? Also lists of employees and their salaries? Do you draw a salary? You get $25 a day and expenses from the A. C. C. A.?

Answer. Yes, sir.

Question. What salary do you draw?

Answer. Five thousand.

Question. Will you give me a list of your officers and directors and their salaries and the employees and their salaries?

Answer. Yes, sir.

Question. What taxes do you pay?

Answer. I don't think in Louisiana—we don't pay taxes except on office fixtures.

Question. Do you pay any taxes to the Federal Government?

Answer. Our State laws in Louisiana exempt farm commodities from taxes.

Question. Does it exempt—for instance, if John Smith & Co. were engaged as cotton dealers; is that exempt?

Answer. Yes; you don't have to pay taxes on cotton at any place except in the warehouses.

Question. What about——

Answer (interrupting). I am speaking about the cooperatives now.

Question. Then, as a matter of fact, you don't pay any taxes?

Answer. Not if a cooperative organization. We are exempt from income taxes under the Federal laws.

Question. Has the Farm Board——

Answer (interrupting). Pardon me, Senator; one correction: We have one little piece of land—the Louisiana association owns 20 acres of land in Boyles Parish.

Question. Has the Farm Board or the F. C. A. ever made any study or analysis of your operations?

Answer. They are working now. I believe one of their representatives is Mr. Harmon in Louisiana.

Mr. CREEKMORE. May I suggest to you, Senator McKELLAR, and to you, Mr. Williamson, that the Farm Board has made several studies, and I am sure you could get the result of those studies from the Farm Board.

Question. If you have them, I would like for you to get them for me.

Answer. All right, sir.

Question. Is most of your cotton received in your fixation pool?

Answer. Most of it now.

Question. What percent would you say?

Answer. I can't say offhand, but I can get you that.

Question. If a man sells you cotton to go in your immediate fixation pool, what further rights has he against your association?

Answer. He doesn't sell it to us.

Question. You fix the price for it?

Answer. You mean the time of delivery, when he delivers the cotton?

Question. Yes; when you and I agree upon a price, that ends my interest in it. What does he have coming after that?

Answer. Whatever equity—his proportion in it.

Question. I think you have already said that you would give me a statement of what you received in the way of immediate fixation pools and what you paid out.

Answer. You mean the sales in each pool? Is that what you want?

Question. Yes, sir.

Answer. Yes, sir.

Question. Do you advertise in your districts—what do you call them? Districts? Do you advertise to your farmers, as the Mid-South does, that they can sell their cotton outright to you?

Answer. No, sir.

Question. You don't do that?

Answer. No, sir.

Question. Have you got a newspaper, Mr. Williamson?

Answer. We have a paper in conjunction with the Farm Bureau called the Farm Bureau News.

Question. How much do you pay for that?

Answer. I think it costs about $2,000 a year.

Question. What percentage of your members have agreed upon the deliveries of cotton and have signed your membership contract upon an invoice?

Answer. Well, there would be no way of telling, Senator.

Question. Do you get memberships in any other way?

Answer. Oh, yes. We have a number—I don't know how many—signed agreements.

Question. Could you ascertain that and let us know?

Answer. Well, it could be done.

Question. I would like to know how many of your memberships come from just selling cotton under the fixation pool and the agreement to become a member?

Answer. Well, I don't know, Senator. I hope you will remember, if you stop to think about it, about 30,000, I think, our members run. It is a pretty good job—it may sound little—to go through that many names and pick out certain things. I don't want to avoid anything.

Question. I will fix it so it will be easy for you. Will you furnish a list of those who have signed contracts just generally when they came in and wanted it and they signed up their contracts with you. That will show?

Answer. I say, you will have to go through the whole list to do it. I will get it. I will give you the information you want if it is possible.

Question. Will you file a copy of your immediately fixation pool invoice in the record and a copy of that paper that you speak of? Do you still require that the people specify the number of bales if a man comes in?

Answer. No, sir; we don't.

Question. You don't do that. None of your members are liable for any loss individually?

Answer. No, sir; only liable as to their interest in the reserve.

Question. In the reserves of the A. C. C. A.?

Answer. And in the reserves of Louisiana.

Question. They are not individually liable?

Answer. They are individually liable to the extent that they own reserves, but not in the sense that I could go back to a member and say you have got to dig up some money and pay me what you owe me.

Question. No member has ever been asked to pay you anything whether you were prosperous or not?

Answer. Oh, yes; sometimes we overpay a member and go back to him. For instance, if a mistake is made in settling and we find we have overpaid him, we make him pay the difference.

Question. Suppose you find a mistake is made and he has overpaid you a few dollars?

Answer. We pay him back, certainly, whether he finds it or whether we find it.

Question. Do you know whether or not your buyers or branch managers take cotton from persons who bought it from actual producers?

Answer. I expect we do, Senator. We have had a hard time—we try not to, but we have had a hard time avoiding that very thing, and I expect possibly you have—possibly not from any State, maybe you have from others, evidence brought in here where that has happened. I don't doubt that it has happened, but one of the hardest things we have had to do is to keep local buyers in the country from buying cotton from the farmer. If they found that our bases are higher than theirs, they get somebody to deliver it to one of our interior offices, and make a profit on the cotton over what he pays the producer by turning it in to us.

Question. Do you know of any cases where your buyers or branch managers or receiving agents required the person actually delivering the cotton to them to sign as agents for the actual producers from whom they bought it?

Answer. I don't know that I got that question.

Question. I will read it over to you. [Reads question above.] In other words, to get down to what you require?

Answer. Oh, no; the only case that might be covered by your question, back a few years ago when the price of cotton was low, we had banks, for instance, that had customers that they wanted to hold cotton for, and the banks did not have as much money as they do now. We had a few instances where we would open an account where the bank had a mortgage on the farmer's cotton and they wanted to put the cotton in our association, so the bank would sign the membership. We could not take the cotton because it was mortgaged. He would sign it or give authority by signing a membership and turning in the cotton in the producer's own name, and we would send the settlement to the bank by authority of the producer. That is as near as we have come to that question, as I can recall.

Question. Well, have you issued instructions to your representatives to receive cotton only from those who produce it? Have you got any such instructions?

Answer. Well, I don't know that we have in writing, but that is what we try to do.

Question. Mr. Williamson, as a matter of fact, isn't the immediate fixation pool so close to an outright purchase, if it is not an outright purchase, that it can easily be abused as a device to purchase cotton?

Answer. I don't think so, Senator.

Question. You don't think so?

Answer. No; I don't think so.

Question. What percentage of your immediate fixation pool cotton is actually delivered to you by local merchants and ginners?

Answer. Very small, if any. I could not say, if any.

Question. Do you use the bases or price sheet which the A. C. C. A. puts out in determining the price to pay for immediate fixation pool cotton?

Answer Yes, sir.

Question. You don't use any other basis?

Answer. No, sir.

Question. Do you give your branch agents or buyers discretion in excess of these limits?

Answer. Well, that seems to have been, Senator. We have in Louisiana several different localities with different characters of cotton. For instance, we have the Delta section along the river; we have the hills in north Louisiana; and we have the lower Mason territory, that produces a different type of cotton; and south Louisiana, that used to be in cane largely, is growing cotton, and so there are different characters of cotton in all those different sections. I don't keep up with the cotton-selling end of the business at all. I know that is done sometimes.

Question. Do you know what the limits are?

Answer. No, sir.

Question. Doesn't it go as high as $1.85 a bale sometimes?

Answer. I don't know. I would not think that was customary.

Question. Do you give your branch agents discretion in excess of the basis?

Answer. That is what we were just discussing. I don't know particularly of any specific case, but I take it for granted that is done.

Question. Do you advise your classers that you want them to get the cotton for less than the full discretion given?

Answer. No.

Question. Somebody does that?

Answer. Well, I heard some reference to a letter there, but I cannot understand a practice like that.

Question. What reserves per bale have you deducted since 1930?

Answer. Our minimum is 1 percent under our marketing agreement.

Question. How much have you in reserve now?

Answer. Around $200,000; that is, reserve in excess of the reserves that are represented by preferred stock in the A. C. C. A.

Question. Are you required to turn over all your receipts to the A. C. C. A., or can your association hold those?

Answer. Well, I don't know whether we could under our contract, but we turn it all over to the A. C. C. A.

Question. Does your income statement show any net income from storage?

Answer. The Louisiana association? It could not, could it, Mr. Creekmore?

Mr. CREEKMORE. Now, the State associations do not pay storage.

Question. Well, from freight?

Answer. No, sir.

Question. From interest?

Answer. Except what interest we might loan our own cash out. We have possibly an interest account between the A. C. C. A. and the association.

Question. Would you be good enough to furnish us with that?

Answer. If we have any, I will give it to you.

Question. I believe that I have already asked you to file a statement showing your assets in 1920 and 1930, when the A. C. C. A. was established?

Answer. Yes, sir.

Senator MCKELLAR. I believe that is all.

(Witness excused.)

Mr. MCKELLAR. Mr. President, in connection with what the Senator from Texas [Mr. SHEPPARD] has just put into the RECORD, I ask unanimous consent to insert in the RECORD the letter of October 11, 1929, from C. O. Moser, president and general manager of the cooperatives, to Mr. Carl Williams, Federal Farm Board, Washington, D. C., as it appears on page 399 and following of the record of testimony taken before the subcommittee of the Committee on Appropriations appointed to investigate expenditures by the Federal Government for cotton cooperatives, and so forth.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. CARL WILLIAMS,
Federal Farm Board, Washington, D. C.

DEAR CARL: I have been thinking a great deal recently about the problems of the cotton cooperatives—that is the necessary changes in our operating methods in order to handle a larger percentage of our production, and the type of assistance needed from the Federal Farm Board in order to make a success of our combined efforts. I know that you will permit me to give you my inner thoughts along this line and that you will give them the careful consideration which their importance deserves, with the same interests and objectives in view as motivate me.

As a point of beginning we must realize two important facts and deal with each of them on their merits.

First, that each of the State associations have in the past done what they considered the best they could under the circumstances of their operating conditions insofar as endeavoring to increase their deliveries is concerned; and that whatever is done in the future toward increasing deliveries must necessarily be through a plan which will be more attractive to the cotton growers than heretofore used by the cooperatives.

Second, private handlers of cotton have materially changed their operating methods since the advent of the cotton cooperatives and have materially improved their operating efficiency—resulting in the lowering of their operating costs and reducing their per bale margin of profit.

The effect of this change in the methods of handling cotton has put hundreds, perhaps thousands, of small and even large merchants out of business. The difference between the price paid the farmer for cotton of tenderable grade and staple within the range of the short staple lengths, and particularly those which predominate in the local markets, is so small that only those who practice the most economical and efficient methods of handling cotton are able to survive the competition. The cotton cooperatives are no exception to the rule—as a matter of fact, there is not sufficient opportunity for profit in the handling of ⅞-inch middling white cotton by the cooperatives, as now conducted, particularly in the optional pools, to justify the hazard, the delay, and inconvenience of marketing the cotton cooperatively. Other benefits of a collateral or supplemental nature must be brought into the equation, or our whole undertaking cannot hope to retain the confidence and patronage of the farmers and their friends. Of course, I am fully cognizant of the effect which the existence and operations of the cooperatives have had on the price of cotton in the primary markets, but I am not certain that so intangible and unmeasurable a benefit can be substantiated to the satisfaction of the growers in general to where they will support cooperative marketing.

I think in the final analysis the movement will fail or prosper according to the price return experience of the members and nonmembers, respectively, and that the intangible benefits derived by the nonmembers will not contain a sufficient adhesiveness to hold our less prosperous member.

There is nothing now in the analysis which I have made thus far in this letter. My purpose was to lay a background of common understanding, from which we could project our views into a less generally accepted field of thought.

Bluntly stated, the time is immediately ahead of us when we must bring to the cotton farmers of the country a benefit from cooperative marketing which they have in the past not received to the measure of their satisfaction necessary to the permanency and growth of our undertaking.

The American cotton trade has been developed over a period of more than a hundred years. Around it have grown services and trade practices, based upon profitable returns to themselves for services rendered, which include banking, insurance, physical facilities, transportation, merchandising, etc. In this respect they differ from the fundamental idea behind the organization of the cotton cooperatives and the Farm Board, which are not organized for profit.

As a matter of fact, however, competition has brought about a fairly economical conduct of these merchandising operations, and there is no one single place that they may be pointed out as offering an opportunity for a material reduction in the cost of handling cotton from the producer to the consumer. Through careful management, and only by this means, is it possible to save even a reasonable amount in the total cost of performing the marketing service cooperatively for the growers. Yet, our experience clearly demonstrates, without exception or deviation, that the membership and deliveries increase or decrease in relation to

the financial returns which are made to the members as compared with the price obtained by the nonmembers. We have a definite, determinable measuring stick which is regarded by the farmer as the criterion of their satisfaction in the cooperative marketing of their cotton. This measuring stick is simply that of price return.

I do not believe the farmer is much concerned as to whether the organization is economically or extravagantly conducted, whether salaries are high or low, or whether the sales organization is good or bad. They have no way of knowing the merit or demerit of our claim for efficiency or inefficiency, but they do not know without question when their price returns are satisfactory or unsatisfactory. How to bring about this satisfaction is the responsibility of the leaders. On the way the problem is handled eventually will depend the success or failure of both the cooperatives and our legislative remedy.

We know there are only three ways by which price advantage can be brought to the members: First, by selling to the ultimate consumers in the world's best markets. Occasionally, of course, we are able to fill the short commitments of merchants, which net us prices equal to or superior to the consumer's prices. Generally speaking, however, sales outlets must be extended to the ultimate consumers; second, by exercising the best possible judgment in the fixation of prices throughout the year, which means we must have reliable statistical information concerning the essentials of our industry, and, third, by the economical operation of the association and subsidiary activities to where any possible advantage in price obtained is not absorbed by excessive operating costs.

Therefore, whether the member complains about operating costs or not, the cost of operation is inseparably and fundamentally an essential part of the successful operation of an association such as ours; and these costs must be kept within the limit of benefit of a direct money return to the member.

Stated graphically, any State cooperative whose overhead operating cost, exclusive of carrying charges, is in excess of $2 per bale, simply makes it impossible for the association to render a marketing service to its membership that will induce increased deliveries and an enlarged membership. In a similar way, carrying charges must be favorably comparable to that of private cotton concerns. It must be our aim, and we should work definitely toward the end of keeping our operating overhead expenses under $2 per bale. How may this be obtained?

Manifestly, it is no more important to keep operating expenses within reasonable limits than it is to obtain the full value for the cotton, so it must follow that operating expenses must be kept low, but not at the expense of efficient service, and that type of service can only be obtained through competent employees—that is, careful supervision over every detail of the business. There is no way that I am able to observe by which these two horns of the dilemma may be harmonized, except through increased volume. Increased volume comes only from a satisfied and loyal membership.

I believe that a loyal membership must be a well-informed membership, and there must be a most complete confidence in the ability, integrity, and character of the management of the association. Contact is essential between the management and the membership, but this is not enough. The financial needs of the membership must be taken into account and the policies of the business must be such as to result in financial advantages to the members in the end.

I am one of those who believes that service of a continuing nature may only be performed when the business is kept safe and sound from a financial and business standpoint. At the same time, normal business risks must be assumed, and the exercise of judgment in the choosing of those risks is the ultimate criterion of the success or failure of any business. The short-staple cotton cooperatives have a difficult and much-involved problem at best. It will not yield successful results if our business is conducted purely on the principle of ultraconservatism, where every transaction is accompanied with safeguards which permit of no possibility of loss. On the other hand, the opposite policy of open speculation is similarly to be condemned. However, there must be a medium ground where judgment, discretion, and experience must determine operating policies. The merit of every case under consideration must be the determining factor.

If the Farm Board, as a loan agency, is to perform a service superior to that which is now being offered by commercial banks, it must help us analyze these problems and assume jointly with us the responsibility of exercising reasonable prudence in handling our business. Such is the happy relationship which I am anxious to see established between us.

Increased delivery of cotton to the cooperatives is the key to reduced per-unit operating expense; and advances to the members at the time of delivery is the most important single influence in deliveries, other things being equal.

As you know, I am opposed to advancing too large a percentage of the value of cotton at the beginning of the year, under ordinary conditions. The spectrum of insolvency haunts me constantly, and I fear it as the child does the bogeyman, and nothing which I have to say on this subject should be construed to mean that I am willing to make advances to members in excess of the reasonable intrinsic value of the collateral. There are times, however, when the danger of market declines is practically nil, and the opportunity for courageously dealing with our delivery problem presents itself. Such a time, in my opinion, is now at hand. The size of the crop is fairly definitely known; the condition of business and the approximate demand or absorbing power of the world is fairly well established. Market analysts are capable of predicting with a fair degree of accuracy the extreme limitations to which the price may go under the reasonable expectation of future conditions. It is, therefore, at a time like this that it is possible for us to advance nearer the market price than it would be earlier in the season, when the size of the crop is less a calculable thing than it is now. I believe the cotton cooperatives, with the aid of the Farm Board, may with safety, and they should immediately, advance 16 cents a point, or $80 a bale, on unfixed cotton, basis ⅞-inch Middling; and that wide publicity to such advance should be given as being the joint program of the cotton cooperatives and the Farm Board, and that the difference between 65 percent advanced at the time of delivery and the $80 a bale should be paid to the members as soon as weight and grade of the cotton is established.

I think this advance should be limited to cotton in the seasonal pool, with an understanding between the Farm Board and the cotton cooperatives as to the final date at which this cotton would be sold and the price fixed.

Take another view of the situation. The hope of cooperative cotton marketing as a permanent institution is through the seasonal pool. The optional pool offers us the least opportunity to serve the members. However, I do not believe we should discontinue the optional pool, but we should discourage it as compared with the seasonal pool. Gradually more and more cotton should be placed in the pools which return the best results to the members. Many farmers, at least in the beginning of the season, are compelled to sell their cotton and pay their obligations; others are unwilling at this time to leave to someone else the responsibility of selecting the time to fix their prices; but, as a matter of fact, we know that on the average the information and knowledge which we have on this subject should be superior to that of the average grower. This knowledge can only be used in the case of the seasonal pool. Furthermore, our policy of encouraging optional pool sales and the advancing of 90 percent of the value of the cotton at the time of fixation is defeating one of the principal objects for which the associations were formed. It is now generally recognized in the cotton trade, with a tremendous advantage to the growers in general, that the pressure of hedge selling is depressing the prices to unreasonably low levels. Our optional-pool policy is as much responsible for this hedge pressure as that of the speculative system of marketing. We could relieve the pressure, at least to the extent of our receipts, if we would at this time advance 16 cents a pound on unfixed cotton and leave to the cooperatives the time of fixing the price. Naturally, this would be done in line with our studies of the subject.

The study of the statistical position of both American and world supply indicates that we will have a slightly reduced American supply and approximately an equal world supply for the ensuing year. Our statisticians advise me that the peak of the hedging pressure has either passed or is near, and, while we may have some decline in the price from the present levels of approximately 18.50 cents for New York December, there is no practical probability of the price going lower than last year's low of the season, if, indeed, this year's price may go that low. The low last season was reached on September 19 and was 17.28 cents for New York December. The immediate removal of hedging pressure would likewise stop the decline. So our own operations would very materially assist in overcoming the effect of the price decline, from which cotton growers and our people in general are suffering. Even at 17.50 cents, this would be 150 points higher than the advance above suggested and leaves a margin of safety more than adequate for all practical considerations.

It occurs to me that here is an opportunity to really perform a service which would greatly stimulate cooperative cotton marketing—would avoid possible losses of millions of dollars to the cotton producers of the South—and would accomplish the real purposes for which the cotton cooperatives and the Farm Board were established. Here is a case of doing something in a big way, without undue hazard to the funds of the Farm Board, and at the same time stepping into the breach and performing a service for the farmers which is beyond their ability to perform individually or as an organized group, and is a service which is beyond the willingness of commercial banks to undertake. At the same time this would not be a precedent in any sense of the word for future considerations—it would simply be dealing with the problem of the industry on its merits at a time when it was feasible for the Farm Board to give real impetus and support to cooperative cotton marketing and genuine assistance to the cotton growers in general.

I believe such a plan would add at least 250,000 bales to our deliveries this season if put into effect by October 15.

Please let me know what you think of this idea.

Very sincerely yours,

C. O. MOSER,
President-General Manager.

Mr. FRAZIER. Mr. President, I am interested in the grain-futures bill. It is true that I do not pretend to know much about the cotton situation; but I have been for some time a member of the Committee on Agriculture and Forestry, and was a member of a subcommittee which held hearings on cotton. Shortly after I became a member of the committee I was on a subcommittee which investigated the fluctuations of the cotton market; and at that time it

was shown beyond any reasonable doubt in my mind, at least, that certain big cotton companies manipulated the market, and in so doing made a great deal of money.

The Senator from South Carolina [Mr. SMITH], the chairman of the Agricultural Committee, yesterday made the statement that the head of one of the big companies testified under oath before our committee recently that in 6 years his company made a net income of $13,000,000. A part of that $13,000,000 profit in 6 years of course was legitimate commissions; but the $13,000,000 came out of either the producers of the cotton in the price they received, or the consumers of the cotton in the price they paid for cotton goods. The question arises as to whether or not the producers and the consumers of cotton and cotton products should be required to pay $13,000,000 in the way of profits to one big company which handled their product.

Of course it costs a certain amount to handle these products from the producer to the consumer, and for the processing; but this was $13,000,000 net profit, and the amendment of the Senator from South Carolina to limit dealings in cotton will tend to limit to some extent, or at least we hope it will, the amount of profit that may be made by any one big concern.

I have before me part I of the hearing on the Investigation of Causes of the Decline in Cotton Prices recently held by the Agricultural Committee of the Senate. This is only part I of the hearings. The rest of the hearings have not yet been printed. The representative of one big cotton firm in the South came before our committee, and the first 486 pages of this volume are all taken up with the testimony of the representative of one big cotton firm, the one which the Senator from South Carolina said made $13,000,000 net profit in 6 years. Of course, it is naturally to be expected that a big firm which makes over $2,000,000 a year in handling cotton is interested in a measure of this kind, and does not wish to be limited in the trading that it does. Mr. Clayton, who testified at the hearings, gave for a number of years the amount of cotton they had handled. Starting back in 1929–30, they handled 1,030,000 bales, 14 percent of the American cotton crop for that year, and so on down the line. In 1932–33 they handled 2,227,000 bales of cotton. That was 17.9 percent of all the cotton grown in the United States in that year. Over a period of 10 years the Anderson-Clayton Co. handled 13.8 percent of all the cotton produced in the United States for those 10 years. They have foreign trade, too; and Mr. Clayton testified that in 1934–35 they handled over 3 percent of all the cotton produced outside of the United States. In other words, that one company handled about 17 percent of all the cotton produced in the world, and made a profit of over $2,000,000 a year.

Yet because the Senator from South Carolina is trying to protect the cotton growers of his State, and other Southern States, and enable them to get a little better price for their products, and limit the amount of trading by one concern to 100,000 bales per month, or 600,000 bales a year, some Senators seem to think that is something scandalous and that anyone has a perfect right to deal in cotton to any extent he wishes.

We have laws against cornering the markets, and so forth, and we are supposed to have laws against monopolies and trusts, and I believe something should be done to curb dealing in cotton and wheat. In our hearing, on the wheat part of the commodity exchange bill, it was testified that on the Chicago Board of Trade alone there is bought and sold on an average of 13,000,000,000 bushels of wheat a year. We produce in the United States in a normal year only 800,000,000 bushels, and about 3,000,000,000 bushels, as I recall, are produced in the whole world; but in one board of trade—the Chicago Board of Trade—13,000,000,000 bushels are handled in a year. That is to say a thousand times more grain is handled in Chicago than there is storage room for in all the elevators of the city of Chicago. A thousand times more grain was handled in that market than there was storage room for in that great city; and, of course, those grain men make a lot of money, and the profits they make come out of the price the farmer gets for his wheat or the price the consumer pays for his flour and bread. We cannot get away from that conclusion; and the profit the cotton exchanges make comes out of either the price the cotton producer gets for his cotton or the price paid by the people who buy the cotton goods, the consumers.

Mr. REYNOLDS. Mr. President, will the Senator yield to me?

Mr. FRAZIER. I yield to the Senator from North Carolina.

Mr. REYNOLDS. I am very desirous of being enlightened upon this most interesting question. To be frank about the matter, I do not know how I am going to vote upon it, and that is the reason why I take this opportunity to interrupt the Senator.

Mr. FRAZIER. That is just the reason I am speaking—to try to convince Senators regarding the matter.

Mr. REYNOLDS. The Senator from North Dakota states, in particular reference to cotton, that one firm—Anderson, Clayton & Co., whose headquarters, I believe, are in one of the largest cities of Texas—handled last year about 17 percent of all the cotton produced.

Mr. FRAZIER. No; not last year. In 1932–33 they handled 17.9 percent of the United States cotton crop of that year.

Mr. REYNOLDS. I should like to know from the Senator whether or not, in handling that enormous quantity of 17 percent, the firm to which he refers made more profit per bale than a smaller firm that handled, we will say, less than 1 percent of the crop.

Mr. FRAZIER. I cannot say as to that, Mr. President; perhaps not any larger percentage; but on the greater bulk that they handled, of course they made a larger profit.

Mr. REYNOLDS. Yes; but I mean proportionately. The point I make is that if the man who handled, we will say, 17 percent of all the cotton produced in 1932–33, did not make any more out of it proportionately than the smaller broker who, we will say, handled only 1 percent, it would not affect the producer of cotton.

I am not so much interested in how much the brokers make. I am vitally interested in voting in a way which will help the cotton producers in the South, because I realize that there are 5,000,000 people in the Old South who are entirely dependent upon the production of cotton.

Mr. FRAZIER. That is true.

Mr. REYNOLDS. If I may be indulged for one other question, the Senator stated a moment ago that the Board of Trade in Chicago had dealt in grain to the extent of a thousand times more grain than the bins in Chicago could handle.

Mr. FRAZIER. That is correct.

Mr. REYNOLDS. Does the amount they deal in have anything to do with lessening the profit or reducing the price of the farmer? I ask the Senator the question because I know he is thoroughly familiar with farm matters.

Mr. FRAZIER. I think it does, without any question.

Mr. REYNOLDS. May I ask the Senator why it does?

Mr. FRAZIER. Of course, it is a long story. A great deal has been said today and yesterday about hedging on the market, legitimate hedging, and all that kind of thing. Under our system there is such a thing as legitimate hedging. For instance, a small dealer in a little town in some one of the Southern States buys 100 bales of cotton, let us say. It comes into the market, and he pays cash for 100 bales of cotton. In order to protect himself on that transaction he must hedge, or at least he thinks he must. The same thing is true with regard to wheat, because the wheat market fluctuates as the cotton market fluctuates. I suppose in the Senator's State the cotton is probably sent to New Orleans. That is your great cotton center, as I understand, or perhaps there is a nearer one; but, at any rate, wherever it goes, wherever the prices are fixed, the price of cotton fluctuates; and in order that the dealer may protect himself on the price he pays the farmer for his cotton, he feels that he must sell a hedge on the cotton, which is

going two or three hundred miles, because of the fluctuations in the market.

Of course, he would have to pay a commission on the hedge. When he sells the hedge, he sells his cotton. The Senator from North Carolina is correct about that; there is no question about it. When he sells the hedge, he sells the cotton, and he has to pay a commission on it. Of course, he has to buy it from the farmer at a little less than the market, so that he can make a little profit and also pay the commission for the hedging.

If it were not for this gambling on the cotton and wheat markets there would not be the necessity for the practice of hedging, and I think the whole system should be changed. But we cannot change it all at once; at least, we have been unable to change it so far; and this measure is a step toward curbing the gambling on the cotton and wheat markets.

After all is said and done, I think the Senator from North Carolina will agree with me: The profits which these cotton brokers make come out of the price the farmer gets for the cotton or the price the consumer who buys the cotton from the storekeeper pays for the cotton goods. One or the other must pay the profit.

Mr. REYNOLDS. This is a step toward regulation?

Mr. FRAZIER. Yes.

Mr. REYNOLDS. For the benefit of the producer?

Mr. FRAZIER. Yes; regulation which we believe will benefit the producer. The Senator asked if the big cotton firm referred to made more money than the little farmer. I do not think it does make more per bale, but the great bulk of business it does enables it to make a big profit over a year, and the Senator knows and I know that one big firm of cotton growers down in his section of the country makes more money per year than all the cotton raisers in all the Southern States make.

Mr. REYNOLDS. In profit?

Mr. FRAZIER. In profit.

Mr. REYNOLDS. I should like to know whether the Senator has any suggestion to make at this time as to how we can deliver to the producer the profits which are today being made by the broker, not only in cotton, but likewise in all commodities? I agree with the Senator that the small man is the man whom we are desirous of helping; that the small man is the man who is in need of help now, and I should like to be able to be of some assistance toward reducing the profit of the big broker and delivering that profit to the producer. If this proposed legislation is to be a step toward that end, if it is going to be of benefit to us in the future in arriving at that goal, I desire to aid; but if it is not going to be, then I am not as interested as I otherwise would be.

Mr. FRAZIER. We believe it will be a step in that direction. All the farm organizations and cooperative farm organizations out through the Middle West and Northwest, the spring-wheat territory, and also the winter-wheat territory, I think are in favor of the bill, and, so far as I know, the cotton farmers themselves are in favor of it.

The big cooperative referred to, which the Senator from Tennessee says is not a farm cooperative at all, is opposed to it, because it would not permit them to handle enough; but it seems that they handle 600,000 bales a year, and they could handle a great deal more than that. Six hundred thousand bales a year at 500 pounds to the bale would mean about 300,000,000 pounds, and at 12 cents a pound, that would mean $36,000,000 worth. That would be a pretty good business for any one firm, whether it was an independent organization or a farmers' cooperative organization. Thirty-six million dollars a year is a pretty big turnover, is it not?

Mr. REYNOLDS. I quite agree with the Senator, and the thing to which I am giving consideration is the proposition of limiting sales to any one firm, as is proposed in the Smith amendment, as I understand it, to 100,000 bales a month, or a maximum of 600,000 bales during a year. That is getting back to the same question I directed to the Senator a moment ago, as to whether or not a limitation upon the dealings of any one particular broker would actually raise the price of cotton as produced by the man who developed it by the sweat of his brow.

Mr. FRAZIER. Our theory is that if we can curb excessive speculation it will help the price of the producer. I think, as I said before, that we ultimately will have to do away with this method of handling cotton and wheat and other products, and cut out the middleman's profit.

Mr. REYNOLDS. I agree with the Senator in that.

Mr. FRAZIER. I think that can be done, but the pending bill does not do it. It puts it up to the Department of Agriculture to regulate to some extent the excessive speculation, and to cut down the profits.

Mr. REYNOLDS. I thank the Senator for permitting me to interrupt him.

Mr. FRAZIER. We believe it will help. The junior Senator from Texas [Mr. CONNALLY] this morning raised the point that this limitation of 100,000 bales per month might hurt the little-town cotton merchants. He said that most of the cotton is marketed in 3 months' time—September, October, and November—I believe he said. That would mean a limitation of 300,000 bales of cotton in 3 months. Three hundred thousand bales of cotton at 500 pounds to the bale would mean 150,000,000 pounds of cotton, and at 12 cents a pound that would mean $18,000,000 worth of business done by one little country-town trader. If there is any one little country-town trader in Texas who handles $18,000,000 worth of cotton in 3 months' time he ought to be included in the big-business class, instead of being called a little-town trader. So I do not think there is much to that argument.

If it is 600,000 bales for a year, that means 300,000,000 pounds of cotton, and at 12 cents a pound it would amount to $36,000,000 a year, which is a pretty good turn-over for any big corporation. It takes a big corporation to handle that much cotton or that much money. Of course, the fact that they do handle more than that makes them want to see this amendment cut out.

This firm in Texas is a large firm. The representative who came before the committee, Mr. Clayton, testified as to the number of firms in which they were interested. They have offices in a number of cities, are members of the cotton exchanges in a number of places in this country, also in foreign countries, in Liverpool, in France, China, India, Mexico, and I do not know what other countries. They have farms on which they raise cotton, and cotton gins by the dozen, and even cotton mills. Perhaps it might be well to let this big firm handle all the cotton of all the farmers of the United States. Undoubtedly they could handle it a lot cheaper than could a thousand different little firms, but there is something which goes against the grain of the average American citizen in the suggestion of letting one big company control the whole output of a commodity. We have the antitrust laws to curb that sort of thing, and the pending bill is a step toward curbing the cotton trade and the big profits of the large concerns.

Mr. President, I believe we are justified in voting for the amendment of the Senator from South Carolina. As I said, I do not know much about the cotton trade, but it is handled to a large extent as wheat is handled, and I am quite familiar with the way wheat is handled because I have been engaged in the raising of wheat for a long time.

As to the hedging proposition, so far as it relates to wheat, for instance, in North Dakota there are many cooperative farmers' elevators, more than are found in any other State in the Union. Our farmers haul their wheat to those elevators, and the elevator agent pays the cash price for the wheat. In order to protect himself he has to sell hedges, futures, on the Minneapolis market, because it takes about 2 days to get the wheat from North Dakota to Minneapolis. In that 2 days' time the wheat might go down in price 2 or 3 or 5 or 10 cents a bushel, and in order to protect himself the elevator man must buy hedges, and he has to pay a commission to hedge the wheat. That is what they call legitimate hedging, and of course it is perfectly legitimate

under our system. He must hedge in order to protect himself against loss. The same applies to cotton.

I repeat, I believe that the whole system is wrong. There is one firm I have mentioned, a firm of cotton operators, which has made more money year after year than all the cotton growers in the United States have made. I wish to say, too, that the Minneapolis Chamber of Commerce, which handles the wheat which comes in from my section of the country, makes more money each year than all the farmers who grow spring wheat make together. The Kansas City and Chicago markets make more money than all the grain growers in the United States make, and that is hardly right; it is hardly fair.

More than that, the little country elevators in North Dakota must borrow money in order to buy the wheat. It takes a lot of money to buy the wheat when it comes in from the farms in the fall of the year, when most of the wheat is marketed, just as in the South it takes a lot of money to finance the little cotton trader.

Where do the people get that money? Mr. Clayton testified before our committee that they finance a great deal of cotton. What does that mean? It means that they finance the little buyer, it means that possibly they finance mills, many of the small mills which manufacture the cotton, and many of the cotton gins and other business interests which handle the cotton.

The same thing applies to the grain men. The big grain firms finance our farmers' elevators at a fairly low rate of interest. But what does it mean? It puts the little elevator under obligations to the big company. In order to get the cheap money from the grain or cotton company the small man must ship his grain or cotton to the big company, and the profit that is made on the grain, of course, together with the little interest that is paid, makes a mighty good profit for the big company, and it makes more profit than is made by the farmers who produce the wheat.

Mr. President, I am hopeful for the passage of the pending legislation. I have been hoping for a number of years that we should have a bill passed which would do away with the gambling practices in cotton and wheat and other necessities which the farmers produce, which practices influence the market.

I do not care whether a farm pool be provided, into which all the grain and cotton shall go, and the producer who brings it in there shall get his proportionate share when the grain or cotton is sold, or whether the Government shall set up a fixed price for the amount of cotton and wheat and other products used in home consumption in the United States. I think the latter would be the fairest way to handle the product; that a price be fixed based on cost of production, and a fair profit for the amount of product used for home consumption. Then let the so-called surplus be sold at the world market. However, we have not been able to get any such legislation.

The commodity-exchange bill goes simply one step further than we have gone at the present time. It provides for giving the Grain Futures Administration and the Cotton Futures Division in the Department of Agriculture a little more authority to regulate the cotton market and the grain market. We believe the pending legislation, if enacted, will be helpful. It is a step in the right direction.

Mr. President, I hope the amendment of the Senator from South Carolina shall prevail and be placed in the bill, because I feel that the cotton growers of the South are entitled to some protection. I know the wheat growers of the North are entitled to some protection. As a farmer myself, when I go down through the great Southern States that produce the cotton of this country, it makes my blood boil to see the little shacks in which the cotton farmers live, and then go into some of the big cities and see the tremendous buildings which have been erected by reason of the wealth which is made in handling cotton. There are three or four big firms of cotton brokers who handle the bulk of the cotton of the United States, and it is an outrageous thing that one of those big firms makes more money each year than all the cotton farmers of the South make. The millionaire cotton merchant lives in a palace. The man who does the work, and his family and his children, live in a little shack set up on little blocks of wood about 18 inches high, so that pigs and chickens can get under the house out of the sun and into the shade. That helps some, I suppose.

I have seen in the South house after house without a pane of glass in them—the houses of poor farmers. When I think of the state of the southern cotton farmer it is to me unbelievable that anyone should say that he cannot vote for a limitation on the profits of the big cotton brokers and merchants.

Mr. President, there is something wrong with the present situation. Some day those southern farmers are going to organize. They are not always going to be bluffed. Our farmers in the North have organized, and organized pretty strongly, and when farm bills are presented they are willing to come before the committees of Congress and say what they think about the proposed legislation. In the hearings on the commodity-exchange bill they did come before the Committee on Agriculture and Forestry and they made very strong statements. The president of the National Grange made a very strong statement concerning the bill. Something was said with reference to opposition to the pending measure on the part of some Grange organizations. The president of the National Grange, however, made a very strong statement in favor of the bill.

Mr. President, I hope the amendment of the Senator from South Carolina will prevail, and I trust that if it shall prevail in the Senate the House will accept it.

Mr. POPE. Mr. President, there has been considerable confusion respecting technical terms which are used in trading in futures. I have prepared and checked rather carefully the terms which are used in the trade, and the various practices that have been referred to during the present debate in the Senate. Without reading it, I ask that the document I have referred to, dealing in trade terminology, be printed in the RECORD at this point as part of my remarks.

The PRESIDING OFFICER (Mr. BURKE in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

TRADE TERMINOLOGY

The following is an incomplete list of trade terms commonly used in the business of futures trading in commodities, particularly grains. The definitions given are intended to convey general meaning rather than to be literally accurate or fully descriptive.

Accommodation trades: An accommodation trade is a transaction between two commission houses whereby, one being long with the clearing house and the other short, the one that is long sells to the one that is short enough of a given futures to give each house an even or nearly even position, thus reducing the amount of margin to be put up with the clearing house. At some later date another transaction is made unwinding and undoing the first transaction. In the meantime, each house has had free use of the margin moneys put up by its customers without having to redeposit same with the clearing house. Clearing houses require margins only on net positions, so that where a commission firm has customers both long and short in equal or nearly equal amounts, the firm as such has little or no net position with the clearing house.

Advance and decline guaranties: These terms apply to a kind of contract which, although unlike privileges in form, has the same or a similar purpose. Instead of giving the buyer an option to buy or sell futures at a stipulated price during some specified period as a day or a week (as in the case of privileges), the seller of the contract guarantees to make good the difference between the stipulated price and the price at which some named future sells at any time the buyer may select during the specified period. This type of contract is usually offered by firms that are not members of any exchange but who represent themselves so to be or to have exchange connections.

"Bear": A "bear" is a speculator who believing in lower prices, trades accordingly, and by emphasizing those conditions of supply and demand favoring lower prices, endeavors to induce others to pursue a selling policy.

Bucketing and bucket shops: These are terms used to describe a method of doing business wherein orders of customers for the purchase or sale of commodities for future delivery, instead of being executed by bona-fide purchases and sales with other traders, are simply matched and offset in the soliciting firm's own office and the firm itself takes the opposite side of customers' orders.

"Bull": A "bull" is a speculator who, believing in higher prices, trades accordingly, and by emphasizing those conditions of supply and demand favoring higher prices endeavors to induce others to enter the market as buyers.

Cash commodity (cash grain): This means the actual commodity as distinguished from contract rights to any commodity arising under contracts of sale for future delivery.

Clearing firm: This means an exchange member who is also a member of the clearing association of such exchange and entitled to clear trades through same in his own name.

Contract grades: This term denotes all of the several grades of any commodity which, under exchange rules, may be delivered in satisfaction of a futures contract. It is not confined to grades deliverable at contract price, but includes those deliverable at premiums and discounts as well. The term "contract grade" is used sometimes as meaning the basic grade or the grade which ordinarily will be delivered at contract price.

Contract quantities: Contracts for the sale of commodities for future delivery usually are made in units of uniform size, there being on most exchanges two recognized size units for each kind of commodity traded in. In the case of grains on the Chicago Board of Trade, 5,000 bushels is the standard contract unit, called a "round lot." Trading is also permitted in units of 1,000 bushels, called "job lots." In the case of cotton on the New York Cotton Exchange, 100 bales (50,000 pounds) is the unit of trading; while on the New Orleans Cotton Exchange round lots of 100 bales and job lots of 50 bales are the established units of trade.

Cross trades: Cross trades are fictitious trades recorded and cleared through the exchange clearing house as real trades. They are a device commonly employed by pit brokers for becoming buyers in respect to selling orders of customers and vice versa. They take the form of a recorded double purchase and sale between two brokers. Each broker is recorded as having both bought from and sold to the other the same quantity of the same futures at the same price.

Example: Broker A is put down as seller to broker B of 5,000 bushels of May wheat at $1 per bushel and is also put down as buyer from B of 5,000 bushels at $1 per bushel. The transaction appears to be without purpose and without effect. But A, having made an actual sale of 5,000 bushels of May wheat for a customer at, say, $1.01 reports to his commission firm that the customer's order has been executed at $1. Thereupon, he switches the sold side of his own $1 cross trade for the actual $1.01 sale for the customer and takes a profit for himself of the 1-cent difference, which should have been added to the sale price for the customer. In this example, of course, it is assumed that there is a 1-cent fluctuation in price while the customer's order is in the hands of the pit broker and before he reports execution.

Delivery months: Contracts for future delivery always relate to certain specified months. In the case of wheat on the Chicago Board of Trade there are 4 principal delivery months: May, July, September, and December. Chicago May futures, for example, means contracts of sale of wheat for delivery in Chicago during the month of May. Quotations arising out of such contracts which may be made ahead as far as June or July of the previous year are posted continuously and are disseminated by wire all over the world.

Floor trader: An exchange member who executes his own orders by being personally present in the pit or place provided for futures trading.

Futures: This is a general term used to designate any or all contracts covering the sale of commodities for future delivery made on or subject to exchange rules. "Buying a futures" means contracting under exchange rules for the purchase of a given amount of any commodity for delivery during a specified delivery month at a price named. The term "futures" is also used to denote delivery months, as the May futures, meaning contracts for future delivery during May.

Futures contracts: These are executory contracts, the detailed terms of which are set forth in exchange rules and made a part of the contracts, wherein one party as seller undertakes to deliver and the other party as buyer undertakes to receive and pay for a stated amount of a given commodity at an agreed price during a specified month, the seller being at liberty to deliver on any date he may choose during such delivery month, and the buyer is required to receive delivery. Delivery is usually effected by the passing of a warehouse receipt or of a delivery notice, standing in place of the warehouse receipt, calling for a stated amount of one of the several grades deliverable on such contracts under exchange rules. Certain grades are deliverable at a discount and others at premium with respect to basic grades. The buyer must accept and pay for any of the several deliverable grades that the seller may choose to deliver.

Hedges: These are purchases and sales of commodities for future delivery made by handlers and processors of the actual commodity as a means of protection against price fluctuations affecting stocks of the actual commodity or contracts involving such actual commodity. The purpose is to offset any profit or loss through price fluctuation affecting the actual commodity by a counter result on contracts for future delivery.

"Long": A "long" is a speculator who has made commitments to buy a commodity for future delivery, which commitments are still open. He is said to be long or to have a long position in the market.

Margin: Margin means the sum of money (or collateral the equivalent of money) which the buyer and seller in contracts for future delivery deposit with their respective commission firms to guarantee performance. Such margins are usually sufficient to allow for some movement in price, and when exhausted, the commission firm, after notice and call for additional funds, may close the trade.

Net position: A trader being long 100,000 bushels of Chicago May wheat through one house and short 25,000 bushels through another house is said to have a "net position" long of 75,000 bushels.

A commission firm having customers on its books who are long in the aggregate 5,000,000 bushels of Chicago May wheat and other customers who are short in the aggregate 4,000,000 bushels would have a "net position" long with the clearing house of 1,000,000 bushels.

Office trades and transfer trades: Board-of-trade rules contemplate that all ordinary transactions for future delivery shall be made in the pit or place provided for that purpose. However, unusual conditions as well as merchandising methods and established trade practice make it necessary at times to close futures trades as between customers of the same house, or to transfer interests from one house to another by bookkeeping entries, without the trades being actually made in the pit. These are referred to as office trades or transfer trades.

Open interests (open commitments): These terms relate to the amount of a commodity represented by contracts of sale for future delivery which are open and unsettled as of a given date. Stated in another way, it means the amount of a commodity which would be required to settle all existing contracts pertaining to any delivery month if settlement were to be made by delivery of the actual commodity and there were no redeliveries—that is, each 5,000 bushels of grain would move in settlement of one and only one contract of 5,000 bushels. In computing open interests the sales side only of contracts is counted.

Pit broker: An exchange member who specializes in the execution of orders for others in the pit or trading place provided for futures trading and for which he receives a brokerage charge or commission.

Privileges, indemnities, bids, offers, puts, calls, etc.: These are true option contracts wherein, for a relatively small money consideration, the buyer of a privilege or indemnity obtains the right, during the next day (in the case of daily privileges) or during the next week (in the case of weekly privileges) to buy or sell, as the case may be, a stated amount of a given commodity for future delivery at a then stipulated price. A privilege contract giving the buyer the right to sell is called a "bid" or a "put", and the right given to buy is called an "offer" or a "call." Bids or puts are sold at prices under closing prices, and offers and calls are sold at prices over closing prices.

Example: For $6.25 one may, after the market close one day, buy a bid good the next day entitling him to sell 5,000 bushels of May wheat at, say, 95 cents. The market may have closed at 96 cents. If it opens up the next day at, say, 94 cents, or sells at 94 cents at any time during that day, the buyer of the bid will buy 5,000 bushels of May wheat at 94 cents and exercise his bid option to sell at 95 cents, thus making a profit of $50 (less commission) on a $6.25 investment. An "offer" or "call" is the exact reverse of the foregoing.

Scalper: This is a trader who, although trading in large amounts during a single day, does not hold a large open position at any one time. He trades on short turns in the market for profits of one-eighth or one-fourth cent per bushel and aims to be even at the close each day.

"Short": A "short" is a speculator who has made commitments to sell a commodity for future delivery which are still open. He is said to be short or to have a short position in the market.

Short seller: By short selling is meant a speculator who sells a stated amount of a given commodity for future delivery at a certain price, expecting that before such contract matures he will be able to make an offsetting purchase at a lower price. A hedger may also make a short sale. The difference between a hedge sale and a short sale is one of purpose. The hedger does not profit by a decline in price for the reason that while he is short futures, he is also long the actual commodity. Any profit or loss made on the futures transaction is offset by an exactly opposite result on the cash (actual) commodity held by him.

Speculator: By speculator in commodity futures is meant one who buys or sells for future delivery for the sole purpose of profiting through a change in price. There can be no such thing as investment in futures contracts similar to investments in securities for the reason that no income by way of dividends or interest accrues to the holders of these futures contracts. Their sole hope of profit lies in a favorable price change.

Spreads and straddles: Spreads and straddles are terms used respectively in the grain and cotton trades to describe a type of trading where one's purchases for future delivery in one market or for delivery in a specified month are offset by sales in different markets or for delivery in other months. The purpose of such trades is to try to profit by changing relationship between markets or between different delivery months. It may be a useful type of trading, tending to bring different markets into harmony with each other, or it may be used for a directly opposite result, i. e., to create unnatural relationships between markets or between delivery months.

Squeeze (congestion): These are terms used to designate a condition in maturing futures where sellers (hedgers or speculators), having waited too long to close their trades, find there are no new sellers from whom they can buy, deliverable stocks are low, and it is too late to procure the actual commodity elsewhere to settle by delivery. Under such circumstances and though the market is not cornered in the ordinary sense, traders who are long hold out for an arbitrary price.

Transferable notice: This is merely a form of notice of delivery which, under exchange rules, is permitted to circulate instead of the actual warehouse receipt as a means of satisfying futures contracts by delivery. It passes by endorsement until "stopped" by the person or firm desiring to take up the warehouse receipt.

Wash sales: Wash sales are pretended sales made openly in the pit or trading place for the purpose of deceiving other traders. They are employed to give false appearance of trading and to cause prices to be registered which are not true prices. They may be entered and recorded as real trades, but by agreement between the parties are either canceled or "washed" out by other trades.

Example: Pit trader A, wishing to buy May wheat when the market is 95 cents per bushel will offer May wheat at 94⅞ or 94¾ cents, being sure that his confederate gets the sale. Such sales may induce bona-fide offers at the lower prices, whereupon A turns buyer. In the meantime, his fictitious sales are forgotten or "washed" out by offsetting trades.

Mr. ROBINSON. Mr. President, I have had conference with the Senator from South Carolina [Mr. SMITH], and am satisfied that the bill now under consideration can be and will be promptly disposed of tomorrow. With that in mind, I ask the privilege of making a further statement.

The so-called relief bill has been reported to the Senate; and it is my intention, unless something arises to prevent it, to move to proceed to the consideration of that bill tomorrow after the conclusion of consideration of the bill now before us, which is now the unfinished business, and which, as I have already said, is not expected to take more than a few minutes.

RESETTLEMENT ADMINISTRATION

Mr. LA FOLLETTE. Mr. President, I have received from Mr. Tugwell, the Resettlement Administrator, copies of two telegrams, received in the one instance from the Federated Trades Council and in the other from the Building Trades Council of Milwaukee, Wis. I ask that they may be printed in the RECORD at this point as part of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The telegrams are as follows:

MILWAUKEE, WIS., *May 21, 1936.*

Hon. REX G. TUGWELL,
Administrator, Resettlement Administration.

DEAR SIR: At the regular meeting of the Federated Trades Council of Milwaukee held May 10, 1936, the delegates representing 65,000 union members, by unanimous vote, endorsed the work of the Resettlement Administration, and instructed the officers of the Federated Trades Council to cooperate with the Building Trades Council and the Wisconsin State Federation of Labor in opposing the efforts of the Milwaukee Real Estate Board, building-and-loan associations, and others, who are attempting to prevent the building of Greendale, a project of the Resettlement Administration at Hales Corners, in Milwaukee County. The labor movement of Milwaukee County, as expressed by the delegates at this meeting, is solidly in favor of this project and wants it completed, because it will furnish homes to American citizens who otherwise are compelled to live in quarters and slums far below the accepted standard of American living, thereby endangering the health and well-being of the entire community. Assuring you of our wholehearted cooperation in assisting you to carry your program to a successful conclusion, we remain,

Respectfully yours,

FEDERATED TRADES COUNCIL,
HERMAN SEIDE, *General Secretary.*

MILWAUKEE, WIS., *May 22, 1936.*

REX G. TUGWELL,
Administrator, Resettlement Administration:

The Milwaukee Trades Council and its 30 affiliated local unions unanimously endorse the work of the Resettlement Administration, and strenuously oppose the action of any group that might interfere with the successful completion of the Greendale project located in our city. The work that you are doing is a noble one and should have the support of every right-thinking citizen. If there is anything that we can do to assist you, do not hesitate to call on us.

PETER T. SCHOEMAN,
President, Milwaukee Building Trades Council.

EXECUTIVE SESSION

Mr. ROBINSON. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE REPORTS OF COMMITTEES

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters.

Mr. PITTMAN, from the Committee on Foreign Relations, reported favorably the nomination of Eugene H. Dooman, of New York, now a Foreign Service officer of class 2 and a secretary in the Diplomatic Service, to be also a consul general.

Mr. WALSH, from the Committee on Naval Affairs, reported favorably the nomination of Chief Carpenter William F. Twitchell to be a naval constructor with the rank of lieutenant on the retired list of the Navy from the 1st day of September 1936, in accordance with law; also the nominations of several other officers in the Navy.

Mr. KING, from the Committee on Finance, reported favorably the following nominations:

Senior Surgeon Carlisle P. Knight to be medical director in the United States Public Health Service, to rank as such from March 25, 1936; and

Dr. Carroll E. Palmer to be passed assistant surgeon in the United States Public Health Service, to take effect from date of oath.

The PRESIDING OFFICER (Mr. BURKE in the chair). The reports will be placed on the Executive Calendar.

If there be no further reports of committees, the clerk will state the first nomination in order on the calendar.

POSTMASTERS

The legislative clerk proceeded to read sundry nominations of postmasters.

Mr. McKELLAR. I ask unanimous consent that the nominations of postmasters on the calendar be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are confirmed en bloc.

IN THE MARINE CORPS

The legislative clerk proceeded to read sundry nominations in the Marine Corps.

Mr. ROBINSON. I ask that the nominations for promotions in the Marine Corps be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nomnations in the Marine Corps are confirmed en bloc.

That completes the calendar.

ORDER OF BUSINESS

The Senate resumed legislative session.

Mr. SHEPPARD. Mr. President, I should like to ask the Senator from Arkansas when we can have another consideration of the calendar.

Mr. ROBINSON. Mr. President, I am not able to answer that question just now. Repeatedly during the present session I have effected arrangements, with the approval of the Senate, for the consideration of the calendar. I do not recall how many times we have acted upon unobjected bills on the calendar. It is my intention to ask the Senate again to consider unobjected bills on the calendar at some opportune time before the session closes.

We have had, as the Senator knows, a great many calls of the calendar under the order which I am now mentioning, and have kept the business on the calendar pretty well up to date. It probably will be practicable within a few days to call the calendar again for unobjected bills, but it is not practicable now to announce the time.

Mr. McKELLAR. Mr. President, may it not be announced a day or two in advance, so that all Senators will have notice of the date?

Mr. ROBINSON. Yes, Mr. President; I think it may be done a day in advance.

I understand the Senator from New York [Mr. WAGNER] wishes to ask unanimous consent for consideration of a bill on the calendar.

PROGRAM OF NATIONAL SAFETY AND ACCIDENT PREVENTION

Mr. WAGNER. Mr. President, I ask unanimous consent for the immediate consideration of House bill 11108, to advance a program of national safety and accident prevention. The bill, which was passed unanimously by the House, authorizes an appropriation for the work of the accident-prevention conference, which consists of about 500 leading citizens. It is a very important piece of public service.

Fifty thousand dollars is required, and it is to be used only to pay the expenses of employees. No members of the accident-prevention conference are to receive a salary or even to receive traveling expenses in the course of the performance of this work.

A number of prominent persons have accepted chairmanships in connection with the work of the group. The Senator from New Jersey [Mr. MOORE] is chairman of the general committee. The Senator from Kansas [Mr. CAPPER] is chairman of the rural and home accident committee. The Senator from California [Mr. MCADOO] is chairman of the committee on safety in the air. Representative EMMET O'NEAL is chairman of the uniform traffic regulations committee. A number of other prominent persons are chairmen of various committees in connection with the conference. Many of them are important industrialists who are giving up their spare time for this very important service.

The reason for haste is that if we are to provide the appropriation this year, the legislation must be enacted at once.

Mr. MCNARY. Mr. President, this is the bill concerning which Mrs. ROGERS, a distinguished Member of the House, spoke to me recently. Several Members of the Senate have also spoken to me about it. I have looked into the bill very carefully, and personally I have no objection to its immediate consideration.

There being no objection, the bill was considered, ordered to a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, the sum of $50,000 to be expended under the direction of the Secretary of Commerce for the furtherance of the work of the accident-prevention conference. Money appropriated pursuant to this act shall be available upon vouchers approved by the Secretary of Commerce for fostering accident-prevention work on the part of organizations engaged in the promotion of safety and accident prevention; preparation and printing of material designed to enlighten the general public in matters of safety and accident prevention, such material to be disseminated through schools, newspapers, magazines, the radio, or any other means of intercourse or communication; the preparation and attempts to obtain enactment of uniform vehicle regulations in the several States; clerical assistance for the members of the general committee of the accident-prevention conference; travel expenses incurred by members of the general committee of the accident-prevention conference in the furtherance of the work of the said conference.

PASCAGOULA RIVER BRIDGE, MISSISSIPPI

Mr. BILBO. Mr. President, I should like to call up for consideration at this time Senate bill 4533, which has been reported by the Committee on Commerce without amendment. The bill merely grants the consent of Congress for the construction of a bridge over a navigable stream. We have a death trap in the State, where people have been killed, some recently. I ask unanimous consent for the present consideration of the bill.

Mr. VANDENBERG. What is the calendar number?

Mr. BILBO. The calendar number is 2147.

Mr. ROBINSON. I understand it is a bridge bill?

Mr. BILBO. Yes; formally giving the consent of Congress to the Highway Department of the State of Mississippi to construct a bridge across the Pascagoula River.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the bill (S. 4533) granting the consent of Congress to the Mississippi State Highway Commission to construct, maintain, and operate a free highway bridge across the Pascagoula River at or near Wilkerson's Ferry, Miss., was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the Mississippi State Highway Commission to construct, maintain, and operate a free highway bridge and approaches thereto across the Pascagoula River, at a point suitable to the interests of navigation, at or near Wilkerson's Ferry, Miss., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters", approved March 23, 1906.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

CAUSEWAY AND HIGHWAYS ON YERBA BUENA ISLAND, SAN FRANCISCO BAY

Mr. JOHNSON. Mr. President, I ask unanimous consent for the immediate consideration of Calendar No. 2189, being Senate Joint Resolution 251, which simply proposes to grant the consent of Congress to the use of rights-of-way for the construction of a causeway and highways on Yerba Buena Island, San Francisco Bay. The joint resolution has been reported unanimously by the committee and has also been reported on by the Navy Department, which has assented to the bill.

Mr. ROBINSON. I see no objection to the present consideration of the joint resolution.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution (S. J. Res. 251) granting the consent of Congress to the city and county of San Francisco to construct a causeway and highways on Yerba Buena Island in San Francisco Bay, and for other purposes, which had been reported from the Committee on Naval Affairs with an amendment at the end of the joint resolution to insert a further proviso, so as to make the joint resolution read:

Resolved, etc., That the consent of Congress is hereby given to the construction and maintenance by the city and county of San Francisco, Calif., of (1) a causeway between Yerba Buena Island in San Francisco Bay and a public airport to be constructed by said city and county on lands reclaimed in said bay; (2) roads or highways on said Yerba Buena Island connecting such causeway with the State highway on said island provided by the San Francisco-Oakland Bay Bridge crossing; (3) such fresh-water supply reservoirs, tanks, conduits, and pipe lines as may be necessary or proper to enable said city and county to supply said Yerba Buena Island and said public airport with an adequate supply of fresh water; and (4) all usual, necessary, and reasonable incidents and appurtenances to such causeway, roads, highways, reservoirs, tanks, conduits, and pipe lines. The Secretary of the Navy is hereby authorized to grant permits for such construction and maintenance, together with all usual, necessary, and reasonable incidents and appurtenances thereto, and to grant to said city and county perpetual easements for rights-of-way therefor, subject to such restrictions as he may in his discretion prescribe to avoid injury to the military, naval, or defense uses of said island and inconvenience to the military or naval forces thereon: *Provided,* That said causeway and any such connecting roads and highways hereby authorized shall be forever toll free: *And provided further,* That the location and plans of such causeway, roads, highways, reservoirs, tanks, conduits, and pipe lines, with the incidents and appurtenances thereto, shall be first approved by the Secretary of the Navy: *And provided further,* That nothing in this resolution or consent shall preclude the erection and maintenance of tollgates and tollhouses upon any of said roads or highways connecting said causeway with said San Francisco-Oakland Bay Bridge crossing for the purpose of collecting tolls for the use of such bridge.

The amendment was agreed to.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

EXPENSES OF EXAMINATION OF CREDIT UNIONS IN THE DISTRICT

Mr. GLASS. Mr. President, there are two minor banking bills on the calendar which I am told may be passed by the House under their unanimous-consent rule, provided they are passed first by the Senate. I refer to Senate bill 4511 and Senate bill 4512, the former providing for the expenses of the examination of credit unions in the District of Columbia and the latter relating to the extension of franchises of trust companies in the District of Columbia.

The PRESIDING OFFICER. Is there objection?

Mr. ROBINSON. I suggest that the Senator proceed separately with the bills.

Mr. GLASS. Very well. I first ask unanimous consent for the consideration of Calendar No. 2151, being Senate bill 4511.

The PRESIDING OFFICER. The clerk will report the bill by title.

The LEGISLATIVE CLERK. A bill (S. 4511) to amend the act entitled "An act to provide for the incorporation of credit unions within the District of Columbia", approved June 23, 1932.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. McNARY. Mr. President, of course it is not with propriety that the Senate should at this time enter upon a general consideration of bills on the calendar. I am not familiar with the bill.

Mr. GLASS. I can tell the Senator, in a sentence, what the bill proposes. It simply provides for the method of assessing costs for examinations of credit unions in the District of Columbia.

Mr. McNARY. Of examinations of what?

Mr. GLASS. Of examining credit unions in the District of Columbia. The bill was prepared by the Comptroller of the Currency and sent here.

Mr. McNARY. Has it received the unanimous recommendation of the committee?

Mr. GLASS. It has.

Mr. McNARY. Very well.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate proceeded to consider the bill (S. 4511) to amend the act entitled "An act to provide for the incorporation of credit unions within the District of Columbia", approved June 23, 1932, which had been reported from the Committee on Banking and Currency with amendments, on page 1, line 3, after the word "the", to strike out "act of June 23, 1932" and insert "District of Columbia Credit Unions Act"; in line 5, after the letters "D. C.", to strike out "Code of 1929), be" and insert "Code) is"; on page 2, line 1, after the word "section", to strike out "299 of this title" and insert "714"; in line 3, after the word "per", to strike out "annum," and insert "annum" "; in line 5, after the word "in", to strike out "section 299" and insert "such section 714"; and in line 7, after the word "examination", to strike out "made:" and insert "made.", so as to make the bill read:

Be it enacted, etc., That section 6 of the District of Columbia Credit Unions Act (sec. 386, ch. 12A, title 5, Supp. 1, D. C. Code) is amended by striking out so much of the first proviso as reads: "and fees incident to making the examinations specified in section 714 shall not exceed a basic fee of $5 and 3 cents per $1,000 of assets per annum" and inserting in lieu thereof the following: "and that the actual cost of making the examinations specified in such section 714 shall be assessed against each credit union for each examination made."

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend section 641 of the Code of Law for the District of Columbia."

CHARTERS OF TRUST COMPANIES IN THE DISTRICT

Mr. GLASS. I now ask unanimous consent for immediate consideration of Senate bill 4512.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill (S. 4512) to amend the act entitled "An act to establish a Code of Laws for the District of Columbia", approved March 3, 1901, which had been reported from the Committee on Banking and Currency, with amendments.

Mr. GLASS. Mr. President, the explanation of the bill is that the charters of the trust companies in the District of Columbia expire by limitation within a few years. No one wants to borrow money from a trust company for 2 years; usually such borrowings are on mortgage loans. The bill extends the charters of the trust companies of the District of Columbia, just as we have extended those of the national banks, for an indefinite period, unless the charter is repealed by Congress or vitiated by some illegal act.

Mr. McNARY. Are the charters about to expire?

Mr. GLASS. They will expire within 2 years. The companies are losing business every day because no one, as I have said, wants to borrow money from a trust company for only a 2-year period.

The PRESIDING OFFICER. The amendments reported by the committee will be stated.

The LEGISLATIVE CLERK. On page 1, line 3, after the numerals "641", it is proposed to strike out "of the act of March 3, 1901 (title 5, D. C. Code, sec. 342), be" and insert "of chapter XVIII of the Code of Law for the District of Columbia is"; and on page 2, line 1, after the word "company", to strike out "heretofore or hereafter organized under this chapter to transact the business of a trust company" and insert "transacting the business of a trust company and heretofore or hereafter organized or operating under the provisions of this chapter", so as to make the bill read:

Be it enacted, etc., That section 641 of chapter XVIII of the Code of Law for the District of Columbia is amended by adding at the end thereof the following new paragraph:

"Any company transacting the business of a trust company and heretofore or hereafter organized or operating under the provisions of this chapter shall have perpetual succession from the date of its organization, or until such time as it be dissolved, or until its franchise shall become forfeited by reason of violation of law, or until terminated by either a general or special act of Congress or until its affairs be placed in the hands of a receiver and finally wound up by him."

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend section 641 of the Code of Law for the District of Columbia."

PAYMENT TO FORT PECK RESERVATION INDIANS

Mr. MURRAY. Mr. President, I ask unanimous consent for the immediate consideration of Calendar No. 2168, being Senate bill 3869. This is a bill authorizing payment to Indians of the Fort Peck Reservation and other Indians of amounts due on certain delinquent homestead entries. The bill, which was amended by the committee at the request of the Secretary of the Interior, is in accordance with the desires of the Secretary of the Interior.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. McNARY. Mr. President, I hesitate at this time in the afternoon to have the Senate enter upon the consideration of the calendar without notice. I inquire of the Senator from Montana, what is the emergency associated with the bill?

Mr. MURRAY. The department is very anxious to get the bill through at this session so that it may proceed to pay these Indians the money to which they are entitled and which has been withheld from them for many years. The bill, as I have said, is entirely in accordance with the advice of the Secretary of the Interior.

Mr. McNARY. Has it passed the other House?

Mr. MURRAY. No; it is a Senate bill.

Mr. McNARY. Well, Mr. President, I do not think I can consent to the passage of a Senate bill unless we have the calendar called in the proper order. If it were a House bill, and there were many attending features involving an emergency, I would feel differently about the matter, but the line must be drawn somewhere in fairness to those who are absent and to other bills that are on the calendar. Therefore, much as I hesitate to do so, I must object to the present consideration of bills on the calendar.

The PRESIDING OFFICER. Objection is heard.

ORDER OF BUSINESS

Mr. ROBINSON. Mr. President, it is my intention, as announced a few minutes ago, to arrange for a time when bills on the calendar may be considered by unanimous consent. However, I should like to invite the attention of the Senator from Oregon [Mr. NcNARY] to a bill on the calendar which must be disposed of rather promptly in order to be effective. It is a bill authorizing the Marine Band to visit certain points in the South, including Little Rock, Shreveport, and Dallas, between certain dates.

Mr. WALSH. The first date is June 2?

Mr. ROBINSON. Yes; but it is my intention to offer an amendment to the committee amendment so as to change that date.

Would the Senator from Oregon object to the consideration of that bill now?

Mr. McNARY. Mr. President, in view of my general objection, I think I should make no exception, but should

object to the consideration of any further calendar bills at this time.

Mr. ROBINSON. Very well.

The PRESIDING OFFICER. Objection is heard.

RECESS

Mr. ROBINSON. I move that the Senate take a recess until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 4 o'clock and 12 minutes p. m.) the Senate took a recess until tomorrow, Thursday, May 28, 1936, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 27 (legislative day of May 12), 1936

PROMOTIONS IN THE NAVY

MARINE CORPS

Charles I. Murray to be lieutenant colonel.
Eustace R. Smoak to be first lieutenant.
Paul R. Tyler to be second lieutenant.
Jean W. Moreau to be second lieutenant.

Charles L. Bishop, Johnson.
Charles J. King, Milton.
Hayden E. Whiting, Sheldon Springs.

WISCONSIN

Elsie M. Dussault, Land O'Lakes.
Ralph E. Lyon, Strum.
Margaret McGonigle, Sun Prairie.

HOUSE OF REPRESENTATIVES

WEDNESDAY, MAY 27, 1936

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

The earth is the Lord's and the fulness thereof; the world and they that dwell therein; for He hath founded it upon the seas and established it upon the floods. Who shall ascend into the hill of the Lord and who shall stand in His holy place? He that hath clean hands and a pure heart; who hath not lifted up his soul unto vanity nor sworn deceitfully. Let the words of our mouth and the meditations of our hearts be acceptable in Thy sight, O Lord, our strength and our Redeemer. In the name of our Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate insists upon its amendments to the bill (H. R. 8455) entitled "An act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. COPELAND, Mr. FLETCHER, Mr. SHEPPARD, Mr. MCNARY, and Mr. JOHNSON to be the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 11108. An act to advance a program of national safety and accident prevention.

NATIONAL MEMORIAL SERVICES, JEWISH WAR VETERANS

Mr. GAVAGAN. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD and to include therein a speech delivered by the Postmaster General before the Jewish War Veterans of the United States on May 17 last.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GAVAGAN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address delivered by the Honorable James A. Farley before the Jewish War Veterans of the United States, New York City, Sunday, May 17, 1936:

Members of the Jewish War Veterans of the United States, ladies of the auxiliary, members of participating veterans' organizations, and guests, may I express my appreciation for the opportunity to participate in the forty-first national memorial services of your organization. You are the second oldest veteran organization in the United States, yielding seniority only to the Grand Army of the Republic. Among your ranks you number veterans of every war, campaign, and military expedition in which our country has participated in the memory of living man.

The month of May has been chosen to mark the time when tribute should be paid to the memory of those departed, who, at the call of their country, and in her hour of need, came to the colors and offered their all for patriotism. It is altogether fitting and proper that these memorial services should be held, but in paying tribute to the dead we cannot help but take note of what has been done for the living survivors, and the dependents of those who have gone before.

The most numerous ex-service group today are the survivors of the World War. Hence, it would seem proper that this group be selected, as an example of what a grateful Government has provided in recognition of their service.

When the United States entered the World War on April 6, 1917, there was already under consideration a plan which would provide not only for the dependents of those who were to die as a result of their service, but also for the promptest possible return to civil pursuits of the survivors. I refer to the War Risk Insurance Act, which was one of the most carefully devised pieces of legislation in history. Its aim was economic as well as humanitarian. It was the product of a number of eminent Americans, including as one of the leaders a distinguished member of your faith, Judge Julian Mack. He worked tirelessly, on leave of absence from the bench, to make the scheme a vast achievement.

There were four main objectives: The first, described as allotment and allowance, was to care for dependents while the wage earner was in service. The second, classified as compensation, was twofold—that is, to provide monetary benefits for disability resulting from service, and to guarantee a measure of support for dependents of deceased service men. The third objective was for the grant of insurance at nominal cost, averaging $7 per month for $10,000, the insurance payable on death to beneficiaries, or, in the event of permanent and total disability, to the insured himself, in both cases in monthly installments of $57.50 each.

The fourth objective of the act covered the training of the disabled for such work as their disabilities would permit and restoring them as earners. This training did not necessitate loss of compensation for service connected with disability upon their restoration to economic life. During the training period the Government, of course, paid him a living wage, calculated to include additional benefits for his dependents. This vocational program resulted in a total cost to the Government of $645,000,000, and 179,519 men were highly trained in 10 major classifications of industry.

These insurance and rehabilitation programs, worked out by the group of earnest patriots selected by Woodrow Wilson, exemplified the Nation's sense of obligation to the defenders of its ideals. They demonstrated as well the fallacy of the charge that the Government is incapable of applying sound economic principles to the solution of vast problems that arise in times of stress and emergency.

In addition to these two phases—insurance and rehabilitation—that aroused the admiration of students of national economy throughout the world, more than $149,000,000 has been appropriated since the end of the war for hospitalization under the Veterans' Administration. The largest single appropriation for this purpose was $21,000,000 in the act of August 12, 1935. It provided 12,000 beds, of which one-fourth were replacements, in 40 locations in 31 different States, necessitating entirely new hospital construction. One hundred an eight Federal Government and 92 State and civilian institutions had comfortable facilities for 65,773 veterans on March 31, 1936. To carry out the projects administered by the Veterans' Administration, exclusive of the amounts necessary to care for insurance costs and the prepayment of the World War adjusted-compensation certificates, Congress appropriated in the current year approximately $649,000,000.

Throughout the history of our country, and, as a matter of fact, long before there was a United States of America, the annals of the American continent show remarkable service by persons belonging to the Jewish faith. Members of the crew of Christopher Columbus, they subsequently came here and settled with the earliest colonists in North and South America. And in 1775, when the Thirteen Colonies on the Atlantic seaboard declared that they were and by right ought to be free and independent, a large part of the sinews of war, which were necessary to successfully carry on the revolution, were furnished by one Haym Salomon, a Polish Jew, who had come to America shortly before the Revolutionary War and settled in New York. He was at one time sentenced to be hanged for the assistance that he rendered to the patriotic forces.

He escaped, however, and went to Philadelphia and from then on was a dynamic force in the financial administration of the conflict. He contributed more than $640,000 of his fortune to the cause. He paid the entire cost of the maintenance of the army of Lafayette, and he also paid the expenses of Pulaski and Von Steuben. Today there is pending in the Congress of the United States, having been reported favorably by the Committee on the Library of the House of Representatives, a bill which would authorize the erection of a memorial in gratitude to Haym Salomon.

The honor roll of Jewish Americans who served in the armed forces during the Revolution is too well known to you to even bear repetition. From the Philadelphia nonimportation resolution of 1765 until the last gun was fired at Yorktown they were, with their fellow Americans, in the forefront of the battle.

The record of service in the wars of the Republic thereafter is brilliant with their deeds. Again, and yet again, the pages of American history speak of their bravery, their patriotism, and their sacrifice for the Stars and Stripes.

More than 2,500 Jewish-Americans volunteered for service during the War with Spain. Many of their bodies have turned to Mother Earth. But the memory of their service, mingled with that of other Americans of different racial strains, forms one of the proudest records to be cherished by grateful fellow Americans.

During the World War more than 250,000 joined the colors. Every regiment, every division, every fighting outfit has its tales to tell. But who can or ever will forget the Seventy-seventh Division, and particularly the Lost Battalion? More than 1,100 citations for bravery and gallantry above and beyond the call of duty were given American soldiers of the Jewish faith during this conflict. Of 78 awards of the Congressional Medal of Honor, 3 have been conferred upon your comrades.

More than 2,800 of the buddies of your race made the supreme sacrifice. They gave their all to the cause of the country under whose flag they were and are assured the right to worship the Supreme Deity as their conscience dictates. Can anyone, in the face of this record, discredit the Jewish-American for a lack of patriotism? Does anyone question his courage or love of country? Who, in the face of this record, can still voice or feel any doubt on this matter? If such there be, let him visit the shrines erected by the Nation in honor of its heroic dead. There he will find the Star of David side by side with the Cross of Calvary, with no distinction between Jew and Gentile, but where all are alike, the treasured memory of a Nation, grateful beyond any hope of adequate reward, for the service of its sons, native and adopted, alike. As long as such testimonials exist there should be, there can be, no question of difference of faith or creed. The one true test of Americanism is the fact of service to our beloved country, and, measured by that standard, you and your people can share with pride in the most eminent and glorious achievements of the American Republic.

A LAST WORD ON THE RECIPROCAL-TRADE AGREEMENTS

Mr. BEITER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include a statement in reference to the reciprocal-trade agreements.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BEITER. Mr. Speaker, before the close of this session I should like to say a last word on a subject for which there was no scarcity of last words from its tenacious opponents.

I refer to the reciprocal-trade agreements.

It is only fair that the people who listened to the impassioned pleas, pro and con, should understand something of what the agreements have meant in operation.

I want to present first the general picture, not entirely in terms of those unwieldy statistics by which we Americans are popularly supposed to rule our lives, but in terms of the general economic trends which influence those statistics.

The first trade agreement in effect was that with Cuba, which went into operation in September 1934. At that time disaster was predicted. The American market would be flooded with Cuban products, it was claimed, and the market

for home products would be seriously affected. There could be no sufficient increase in trade with Cuba to warrant the risk, the "die-hards" claimed.

At the end of the year 1935 those who cried "wolf" pointed with pride to their justification. According to them, imports from Cuba had increased beyond all proportion to the increase in exports. The truth of the matter was that while our exports showed an increase of approximately $25,000,000 for the calendar year of 1935 over the same period of 1934 and our imports showed an increase of $33,000,000, American business was benefited far more than the bare statistics would indicate.

The additional facts, suppressed in careless statistic quoting, prove my point. The increase in general imports from Cuba amounted to barely $8,000,000, or less than a third of the increase in general exports from the United States to Cuba. The other $25,000,000 in imports represented the increase in the import of cane sugar. American business in general is not likely to go under, even granted that the market is flooded with Cuban cane sugar.

However, even that danger is unlikely, for there has been a proportionate falling off in the importation of cane sugar from the Philippine Islands. So it will not be necessary, for the present at least, to call out the flood-relief squads to stem the inundating tide of sugar.

The Belgian agreement is another which has caused general alarm. Those who condemn it on the ground that the United States has been the loser in dollars and cents are careful not to mention the two important economic factors which would have influenced trade with Belgium, no matter what tariff rates might be in effect.

At the time of the Belgian treaty's inception there was a sharp fall in the value of the Belgian dollar. Naturally there was a rush of buying to take advantage of the lowered prices on commodities and the increased buying power of foreign dollars. Imports from Belgium showed a sharp rise. On the other hand, the buying power of Belgian money in foreign markets showed a marked decline, with a resultant decline in exports to Belgium.

In spite of these factors, exports to Belgium in 1935 and in the first 2 months of 1936 have shown a definite increase, for which the trade agreements are responsible.

The trade agreements with Sweden, Haiti, and Mexico are seldom mentioned because, under those agreements, the United States is definitely the gainer.

The Canadian agreement, which was the last to go into effect, was, perhaps, the one most decried. The poor abused farmers, so we were told, could never stand up under the competition from Canada.

Without stopping to examine the legitimacy of their woes, the dairy farmers were up in arms. A reduction of the tariff on cream, they claimed, would flood the home market, result in an overproduction of butter, thus bringing the price of butter so low as to constitute a real loss to them.

It would seem they shed a great many unnecessary tears.

Actually, in spite of the decrease in tariff, the dairy farmer is well protected by the quota-limit clause in the agreement. The new tariff applies only to the first 1,500,000 gallons of cream imported in any year. Moreover, the established quota includes not just cream imported from Canada, but covers imports from all other countries. Since the milk equivalent of this quantity of cream represents one-tenth of 1 percent of the total annual milk production in the United States, it was, very literally, the well-known "drop in the bucket" over which the dairy farmers wasted their alarm.

The amount of butter which can be obtained from a million and a half gallons of cream amounts to, approximately, one-twelfth of 1 percent of the butter produced in the United States annually.

The time has come, I should think, to let the scareheads melt back into the mental vapors which gave them birth.

In spite of misrepresentations, the only other dairy product which has been affected by the trade agreements is cheese.

Under the Canadian agreement the only type cheese which obtained a reduction under the tariff is Cheddar. The tariff on cheese under the agreement is the same as that which obtained under the 1922 schedule. And during the years when that rate prevailed, at no time did the imported cheese represent as much as 5 percent of domestic production.

The reduction of tariffs on foreign cheeses under the Dutch and Swiss agreements is of very little importance to the American dairy industry. Edam, Gouda, and Emmenthaler have always sold at comparatively higher prices in this country and have been in demand only by a small group of consumers. The reduction in tariff is not sufficient to bring these types of cheese into the home-product price range, or even near enough to it to constitute competition.

On the other hand, American dairy farmers have benefited by the reduction in duty obtained from other countries under the trade agreements—principally from Haiti, Honduras, Nicaragua, Colombia, and Brazil. While none of these imports a very large quantity of dairy products individually, their collective imports represent a significant total.

As has been pointed out time and again, as a Nation we cannot afford to promote a policy of economic self-sufficiency. The same thing applies to the individual industries and producers within our own Nation. Foreign trade cannot be balanced to the exclusive advantage of any one particular group. Those for whom there are lesser benefits in the trade agreements themselves are benefited by the movement of products in other fields. Prosperity, like depression, swiftly becomes universal, once it is set in motion.

The farmer must consider his dependence on the prosperity of industry in general from two angles: First, in its uplifting effect on the prices for his own products sold in the home market; and, second, because it stems the tide of the "back to the farm" movement which would have increased his burdens a hundred percent had the depression continued.

Even in the few months of its existence the Canadian agreement has justified all that was hoped for it. During January and February of 1936 there was a marked rise in exports of potatoes, grapefruit, oranges, apples, dried and canned fruits, rice, poultry, eggs, and nuts. On the other hand, imports from Canada, in all but two instances, have been a fraction of the amount allowed under the quota.

When all these factors are taken into consideration, it is safe to claim that the New Deal may point to another considerable victory, not only in routing the depression but in promoting what is even more important in this unsettled world—international amity and good will.

No nation alone, not even one with unused wealth and resources which have been important factors in the building of these United States, can win her way to security and prosperity in complete independence of her neighbors. When we admit that our prosperity depends upon the creating of foreign markets for American products, we are sometimes inclined to forget that the prosperity of Canada, Belgium, Sweden, France, Great Britain, for that matter, of all the countries of the world, depends upon the same factors.

We cannot afford to look upon our imports as a loss. They are an important factor in helping to build the prosperity of the neighbors whose economic security is so important a factor in the preservation of our own.

For years American businessmen have increased their subscriptions to campaigns for "goodwill advertising." Since goodwill is so important a factor in business that businessmen are willing to pay for it in dollars and cents, even though there is no accurate measure of the returns, can it be doubted that the business of government must make its concessions to the promotion of goodwill?

CIVIL SERVICE MERIT SYSTEM AND RIGHT OF EMPLOYEES TO PROVIDE FOR THEIR WIDOWS AND DEPENDENTS THROUGH RETIREMENT FUND

Mr. BEITER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include a statement in reference to the civil-service merit system.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BEITER. Mr. Speaker, legislation cementing the immediate relationship between Government and its employees and providing for the selection of those employees has always been of vital interest to the country at large. Employment opportunities made available through civil service appointment to the Federal departments and agencies have materially increased since the enactment of the 40-hour-week bill for postal clerks, and other legislation reducing the hours of labor and correspondingly increasing the number of workers in the various departments.

The depression years have helped to increase the number of workers seeking Federal appointment, probably due to the fact that the work provided is of a permanent nature and represents security and independence. The attractiveness of the employment and the higher standard of living offered has no doubt played an important factor in increasing the number of American citizens who seek to labor in the service of their country.

New theories of government may be propounded and new eras of business may be effected but the civil-service appointive system remains the same and the largest group of employees in the country retain their security year after year.

The United States Civil Service Commission, father of the merit system, was created by an act of Congress in 1883 for the purpose of selecting Government employees by open competitive examination. Under this system appointment is made upon the basis of demonstrated relative fitness without regard to political, religious, or other considerations. An applicant is required to take an examination, either assembled or unassembled, as the case may be, and if he is successful in attaining a passing grade his name is placed on the eligible register in the relative order of his standing.

A rating of 70 percent must be attained in order to be considered eligible, but veterans are permitted a preference credit of 5 points and may be considered eligible with a rating of 65 percent. Veterans with a service-connected disability are given a credit preference of 10 points and they are thus permitted to have their names placed on the eligible registers with a rating as low as 60 percent.

Veterans who are entitled to the 10-point preference because of service-connected disabilities are placed on the various eligible registers above all other names. Veterans' widows and wives of ex-soldiers who are unable physically to accept employment are given the 10-point preference credit also.

When an applicant's name appears on the eligible register he can be certified to an appointing officer for consideration only if his name is included in the first three names on the register, providing, of course, that only one vacancy exists in the department making the request. If there are a number of vacancies to be filled, then additional names may be submitted to the appointing officer, as many as three for each vacancy.

In many instances the registers of eligibles are so large that unless the applicant's name appears reasonably near the top of the register his prospects for receiving an appointment are not very bright. The registers for the departmental service are kept at Washington while those for the field service are maintained in the various district offices. In the case of postal clerk-carrier registers the district offices maintain the list of eligibles but registers for the Railway Mail Service are kept at Washington. Many vacancies made possible by the enactment of the 40-hour-week bill affecting postal workers will be filled in the near future in the various post offices throughout the country. Assembled examinations were recently held by the Commission to establish a register of eligibles for this purpose. Ratings range anywhere from 70 to 110 percent, and the papers are graded according to fractions. Thus one applicant may attain a rating of 75.01 percent and he will necessarily be placed on the register above the applicant attaining an even 75 percent.

The Civil Service law is very rigid, and rightfully so, regarding selection of applicants for appointment. Since the law is based on the merit system no other course would be possible or just. Selection is made entirely upon the basis of fitness and political "influence" does not have any bearing in the matter whatsoever.

The belief seems to be prevalent that those in public office can control the selection of applicants. This is not true, of course, and no individual has the power to change the method of selecting applicants.

Chapter 10 of the Civil Service Act provides that no recommendations of any person applying for office under the provisions of the act, which may be given by any Senator or Member of the House of Representatives, except as to the character or residence of the applicant, shall be received or considered by any person concerned in making any examination or appointment under the act.

Employees of the Federal Government are permitted to contribute to the civil-service retirement fund for the purposes of retiring after 15 or more years of active service with an assured annuity. Sickness or disability benefits are also provided. The present law does not provide an annuity for the dependents of an employee coming under the provisions of the Retirement Act, and legislation is now pending in the Congress which would give them the right to name a beneficiary and continue the benefits to their dependents under a joint and survivorship annuity plan.

Many plans of providing for dependents have been advocated, but since most of them would result in a drain on the retirement fund it has been difficult to secure approval of the Congress. The present measure, H. R. 12717, would give the employee an opportunity to indicate, during his lifetime, whether he would prefer to obtain full benefits during his retirement period or elect to divide his annuity and thereby provide for his dependents after his death. This plan would result in no additional cost to the United States Civil Service Commission, and is highly desirable for many reasons.

The United States Government has many faithful and efficient employees, and their confidence in the Civil Service Commission and the merit system is based on a sound foundation of trust. Let us do what we can to preserve and uphold that confidence.

SOIL CONSERVATION SERVICE IS PERFORMING REAL SERVICE IN SANTA BARBARA, SAN LUIS OBISPO, AND VENTURA COUNTIES OF CALIFORNIA

Mr. STUBBS. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD on the subject of soil conservation.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. STUBBS. Mr. Speaker, I desire to pay a word of tribute to the Soil Conservation Service, for the good work it is doing in my congressional district, in preventing further erosion of excellent agricultural lands. The Tenth Congressional District, which I represent in Congress, includes three important coastal counties—Santa Barbara, Ventura, and San Luis Obispo, which are locations for soil erosion camps, and where a great deal of erosion educational work is being done among agricultural groups.

Permit me to discuss, for a few minutes, the situation which has existed out there and the erosion problems which have been faced, and allow me to describe the work which is being done to correct the situation. The first erosion camps west of the Rocky Mountains—established principally as experimental stations—are located in these counties, where their worth is well recognized and where farm groups appreciate the attention which the Federal Government is giving to their erosion problems.

Out in my district climatic conditions are so favorable for the growth of specialty crops that the exceptionally fertile valley lands have been farmed to the last acre and agriculturalists also have taken advantage of the hillsides and utilized them for growing crops.

Natural vegetation and sod have been destroyed. The surface fertile soil is not deep on these hillsides. No attention was given to farming the lands in a manner that would

prevent soil erosion. As the soil thinned near the tops of these sloping hillsides and the early yields decreased by 90 percent, the upper lands were abandoned. Rainfall falling on these upper lands is not absorbed but rushes down the hills, adding to the rain falling on the cultivated lands, with the result that the good soil continues to be lost. The fertile valley lands have been injured, first, by the deepening and widening of the gullies and, second, by the deposition of silt.

Until the Soil Conservation Service started control methods in the Las Posas area little attention had been paid by local farmers to this serious soil-erosion problem.

Control methods used provide for the conserving of all possible moisture and the removal of the surplus water without further damage to the land. To accomplish this has necessitated a combining of agronomic and agricultural engineering features on the basis of data supplied by the soil scientists. Each area and properties with areas present different erosion problems requiring special individual solution. For example, soils having a relatively impervious subsoil underlying a loose, friable sandy surface erode very severely, whereas soils of loose, friable material that are deep and very pervious to water do not suffer severe losses from erosion.

At the present time, the three soil erosion camps in these three counties are situated at Lompoc, Arroyo Grande, and Los Posas. Approximately 40,000 acres of land are receiving attention. Those in charge are placing the affected acreage, privately owned, under agreement for treatment. Some of this land is being taken from cultivation for rehabilitation purposes. Terraces and terrace outlets are being constructed by the scores of miles and the thousands. Small check dams also are being built by the hundreds. Bank sloping is being followed and there are many miles of this type of activity completed at this time. More than 25 miles of diversion ditches have been dug. In addition, those in charge of the work are performing other services, but perhaps their most important one is that of instructing farm groups on how to preserve the fertile topsoil which is left.

The type of control on cultivated land is determined by the degree of erosion. Areas severely eroded have been retired from cultivation and planted with trees for wood lots, or seeded to grasses and clovers for pasture. Eroded fields still usable are controlled by terraces, which, if on moderately steep slopes (from 8 to 25 percent) are protected with close-growing vegetation. Contour cultivation between terraces aids greatly in protecting sloping farm land. Crop rotation (not strictly practiced) requires time to establish, but progress is being made. By combining crop rotation with strip cropping, not only will the degree of erosion be reduced, but soil improvement will result.

Gully protection by "vegetative revetments" to prevent meandering has been successfully employed. Vegetation in gullies assists mechanical controls in retarding run-off and spreading the peak flows, thereby reducing their force and danger. Emphasis is being placed on native plants for vegetative control. They are adapted to the situations, have more extensive root systems, supply food for wildlife, and are readily available.

Wind-erosion problems are being solved and more emphasis will be placed on crop rotation and rotation strip cropping. The necessity for improving the natural cover on watersheds is recognized, and the replacing of these areas that have been burned off with better and more fire-resistant plants is being given attention.

Subsoiling of lands following contours is rapidly becoming general practice. It permits the opening of the soil, thus providing additional space for holding moisture and increasing the time of absorption.

More interest has been taken in the work as it has progressed. Recent storms have caused very little, or no loss of soil from properties on which control work has been completed, compared with some very heavy washing on adjoining properties where no control work has been done. The superior growth of crops on terraced lands is easily noted and undoubtedly increased crop yields will result from greater storage of moisture. Water tables should be affected beneficially, due to the retarding of water flow by numerous check dams.

These project areas are a representation of typical sections of the coastal plane. It has been found that control measures are in many cases too costly for the individual landowner to finance by himself. While the demonstrations are successful, they must be maintained and carried to completion. There is a social value to future generations that must not be overlooked.

It is conceivable that if work were stopped, due to any cause, it would require many years to again cause the general public to become as conscious of the menace of soil erosion as it is today.

Mention should be made of the Civilian Conservation Corps and the excellent work accomplished. These enrollees have done everything that could be expected of them. They have been most interested in their work and the management of the camps have cooperated to the fullest extent. The educational advantages to these boys and to the community should be stressed. The presence of the organized group in the area has made possible quick control of forest fires that have started. No extensive fire losses occurred in this area this past season.

The damage done to the watershed above the Gibraltar Dam by fire has proven too costly to the citizens of Santa Barbara to be quickly forgotten.

Soil conservation work is barely started. It should be carried forward with no let-up in the program if full value of work to date is realized.

REGULATION OF SALE AND DISTRIBUTION OF BITUMINOUS COAL IN INTERSTATE COMMERCE

Mr. DOUGHTON. Mr. Speaker, I ask unanimous consent that I may have until midnight tonight to file a report on the bill (H. R. 12800) to regulate interstate commerce in bituminous coal, and for other purposes, and that the minority members of the Committee on Ways and Means may have the same privilege if they care to file a minority report.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

Mr. RICH. Mr. Speaker, reserving the right to object, I wonder if the chairman of the Ways and Means Committee can tell us when we are going to have a tax bill back here from the Senate that will be an evidence of desire on the part of Congress to at least pay a part of our way and not pass the burden on to our children? We are wrecking future generations by our enormous spending.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

THE OVERCHARGE FOR ELECTRICITY

Mr. GRAY of Indiana. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. GRAY of Indiana. Mr. Speaker, the great swollen fortunes of today have been amassed and taken from the people by the ability of certain few crafty men to look ahead and foretell what would be the needs and requirements of the masses of the people in the future and then to seize upon and monopolize such anticipated service or commodity in advance.

Of all the inventions and discoveries, developing power and harnessing the forces of nature to serve the use and purpose of men, none, or any, or all combined, have exerted such far-reaching influence upon civilization and human progress as has the use and application of electricity. But it was only a comparatively few crafty men who possessed the keen foresight to foretell the great possibilities of the uses of electricity beforehand and to realize the resources, without limit, from which to take the supply.

In their keen sense to envision the future they foresaw the demand for electricity coming from every home and habitation, for the use of every man, woman, and child, as

necessities, comforts, and luxuries and to relieve from the drudgery of toil, as well as for pleasure and entertainment and from every station and walk of life.

They foresaw through the mists of the future that electricity under the machine age would become the motive power moving the wheels, shafts, and pulleys in every mill, factory, and workshop, and to double and triple and multiply the capacity of production and every service.

They foresaw in their dream of realism the demand for electricity in the sciences, in surgery, and in the treatment of the body, arresting, staying, and overcoming disease, and with which to throw the searchlight into the bones and flesh tissues for the discovery of disorders concealed in darkness for operations and remedy in the open light of day.

They foresaw a demand developing and coming which would outrival and overshadow all other demands of the people in their everyday life and affairs and which would be growing and multiplying by leaps and bounds as time went on.

Suddenly, from a profound and deep mystery, it was thrown open to these few men that electricity was as common and plentiful as air, earth, water, and light and could be made available for use, at a cost as low, trivial, and negligible, as these common elements around us. And it is a remarkable coincidence in the progress and development of electricity observed by these few crafty men, always looking ahead for advantage, that as the many growing uses of electricity were realized new inventions and discoveries were coming to multiply the production of electricity even at lower and more trivial costs.

From their viewpoint and foreseeing power it was only necessary for these few men to wait, to abide time, to watch and observe the progress of invention and discovery and the movements unheeded by others which were gradually but surely developing the use and sources of electricity. They realized that it was not incumbent upon them or necessary to promote these inventions nor to discover the sources of electricity, then advancing and going on from day to day under the progress of economic evolution. It was only necessary for them to gain control of the sources of unlimited supply in advance and the right to dispense electricity to the people.

With these great general and universal uses coming with certainty, with electricity as vital and imperative necessities under our industrial system to furnish power for the automatic machine as well as for personal and private use and going into every home, mill, factory, and workshop, and with electricity inevitably coming to be generated and produced at low, trivial, and negligible cost, it was only natural that electricity should be seized upon and monopolized and held for extortionate and excessive charges and from which to take from the people great and untold profits and gain.

Not only have many billions already been taken from the people as consumers under excess rates and charges for electricity but great swollen fortunes from electricity are still being piled up higher from these excess profits taken and exacted from the consumers of electricity.

True, this is all ancient history of the growth and development of electricity, of the crafty few and unsuspecting many. But the time is at hand for the people to wake up to their interests and welfare and to a knowledge and realization of their right to use and enjoy electricity at reasonable cost and in abundance.

The time is at hand for the people to realize that electricity is one of the natural elements, as plentiful and abundant as water, and that they are entitled to its use free as other elements of nature and for use at the actual cost of production and distribution to them.

The time is at hand for the people to realize that they are paying far more than a reasonable cost for electricity; that covered and concealed in electrical rates are charges for high-salaried officials, for dividends upon watered stock, and the stockholders of many holding companies all for one and the same service.

As the people by nature are entitled to breathe the air and drink the water of the earth and to bathe in the sunlight from above, without limit or restriction other than reasonable costs, they are entitled to the use of electricity, another one of the natural elements, without burdens for profit or gain. The movement for such use and enjoyment of electricity for all its benefits to men has already been entered upon under cooperative organizations and collective or public ownership under which electricity is provided the people at lower cost for production and distribution.

Among the cooperative and public electric plants where charges and rates are made only to cover production and distribution and under which there is no collection from the people to pay high-salaried private-company officials dividends on watered or excess-valued stock, and to stockholders of many holding companies, are the Government-owned Tennessee power plant; the cooperatively operated Tacoma, (Wash.) plant; the publicly owned Ontario plant in Canada; and the publicly owned Winnipeg plant in Canada, and many other smaller city-owned plants. These companies base their charges upon the actual cost of production and distribution. And a comparison of their charges with private plants will show the overcharge exacted from the people.

THE OVERCHARGE FOR ELECTRICITY FOR PRIVATE, PERSONAL, AND FAMILY USE

The publicly owned plant at Jamestown, N. Y., sells 40 kilowatt-hours of electricity for $1.40, while the privately owned plant at Mankato, Minn., sells the same amount of electricity for $2.58, or an overcharge to the people of Mankato of $1.18.

The publicly owned plant at Virginia, Minn., sells 30 kilowatt-hours of electricity for 60 cents, while the privately owned plant at Chicago, Ill., sells the same amount of electricity for $1.92, or an overcharge to the people of Chicago of $1.32.

Under cooperative or public ownership electrical rates, the electric consumers in East Liverpool, Ohio, would pay for the use of 30 kilowatt-hours of electricity, 90 cents. These same consumers now pay for the same amount of electricity under private ownership rates, $2.40, or an overcharge of $1.50 for the use of electric power.

The publicly owned light plant at Virginia, Minn., sells 40 kilowatt-hours of electricity for 80 cents, while the privately owned plant at St. Cloud, Minn., sells the same amount of electricity for $2.38, or an overcharge to the people of St. Cloud of $1.58.

The publicly owned light plant at Cleveland, Ohio, sells 40 kilowatt-hours for $1.31, while the privately owned plant at New Ulm, Minn., sells the same amount of electricity for $2.97, or an overcharge to the people of New Ulm of $1.66.

The publicly owned electric-light plant at Guelph, Wis., sells 26 kilowatt-hours of electricity for 77 cents, while the privately owned plant at Appleton, Wis., a city of almost the same size, sells the same amount of electricity for $2.59, or an overcharge to the people of Appleton of $1.82.

The publicly owned plant at Kansas City, Kans., sells 40 kilowatt-hours of electricity for $1.60, while the privately owned plant at St. Paul, Minn., sells the same amount of electricity for $3.60, or an overcharge to the people of St. Paul of $2.

The publicly owned electric-light plant at Brantford, Wis., sells 36 kilowatt-hours of electricity for 95 cents, while the privately owned plant at Sheboygan, Wis., sells the same amount of electricity for $3.24, or an overcharge to the people of Sheboygan of $2.29.

The publicly owned light plant at Jamestown, N. Y., sells 40 kilowatt-hours of electricity for $1.40, while the privately owned plant at Auburn, N. Y., sells the same amount of electricity for $4.29, or an overcharge to the people of Auburn of $2.89.

The publicly owned electric light plant at Tacoma, Wash., sells 36 kilowatt-hours of electricity for $1.60, while the privately owned plant at Augusta, Wis., sells the same amount of electricity for $4.80, or an overcharge to the people of Augusta of $3.20.

The publicly owned light plant at Jamestown, N. Y., sells 40 kilowatt-hours of electricity for $1.40, while the privately owned plant at Mount Vernon, N. Y., sells the same amount

of electricity for $4.80, or an overcharge to the people of Mount Vernon of $3.40.

The publicly owned light plant at Springfield, Ill., sells 40 kilowatt-hours of electricity for $1.90, while the privately owned plant at Jackson, Miss., sells the same amount of electricity for $6, or an overcharge to the people of Jackson of $4.10.

The publicly owned light plant at Kansas City, Kans., sells 500 kilowatt-hours of electricity for $8.70, while the privately owned plant at Chicago, Ill., sells the same amount of electricity for $15.15, or an overcharge to the people of Chicago of $6.45.

Under public ownership rates in Windsor, Canada, electric consumers of that city pay a monthly average bill of $4.26 for 350 kilowatt-hours of electricity. Under rates of privately owned plants in Detroit, Mich., directly across the river from the city of Windsor, the consumers of electricity in Detroit pay monthly, for the same amount of electricity used, $11.80, or an overcharge of $7.66 each month.

The publicly owned light plant at Los Angeles, Calif., sells 500 kilowatt-hours of electricity for $7.15, while the privately owned plant at Chicago, Ill., sells the same amount of electricity for $15.15, or an overcharge to the people of Chicago of $8.

The publicly owned light plant at Tacoma, Wash., sells 500 kilowatt-hours of electricity for $6.12, while the privately owned light plant at Chicago, Ill., sells the same amount of electricity for $15.15, or an overcharge to the people of Chicago of $9.03.

The publicly owned electric-light plant at Woodville, Ontario, Canada, sells 150 kilowatt-hours of electricity for $3.90, while the privately owned light plant at Williams Bay, Wis., sells the same amount of electricity for $14.64, or an overcharge to the people of Williams Bay of $10.74, and both cities are almost the same size.

In the city of Decatur, Tex., which is served by the Texas Power & Light Co., a privately owned and operated electric-power plant, the householder using 40 kilowatt-hours a month would pay $36 per year, whereas under the Government or T. V. A. rates he would pay $14.40 a year, an overcharge of $21.60.

In the city of Bridgeport, Tex., which is served by the Empire Service Co., a privately owned and operated electric-power plant, the householder using 40 kilowatt-hours a month would pay $54 a year, whereas under the Government or T. V. A. rates he would pay $14.40 a year—an overcharge of $39.60.

THE OVERCHARGE FOR ELECTRICITY FOR MERCANTILE, INDUSTRIAL, AND COMMERCIAL USES

Under Government or cooperative ownership power rates, a small-business man conducting a business in Albany, N. Y., would pay for 200 kilowatt-hours of electricity $6, while under private-ownership rates this businessman is compelled to pay $16 for this same amount of electricity, or an overcharge for electricity of $10.

The publicly owned plants which furnish electricity in Tennessee sell 1,000 kilowatt-hours of electricity for $8.90 while the average cost for the same amount of electricity from private-owned plants in New York State is $19.80, or an overcharge to the people of New York of $10.90.

The publicly owned plants which furnish electricity in Tennessee, Mississippi, and Alabama, sell 1,000 kilowatt-hours of electricity for $8.90 while the average cost for the same amount of electricity from private-owned plants in Pennsylvania is $28, or an overcharge to the people of Pennsylvania of $19.10.

The Government-owned plants which furnish electricity in Tennessee and the Southern States sell 1,000 kilowatt-hours of electricity for $8.90 while the average cost for the same amount of electricity from private-owned plants in Illinois is $30.70, or an overcharge to the people of Illinois of $21.80.

The Government-owned electric light plant is furnishing the Tupelo Journal, a newspaper, with electricity for 1 month for $18.94 while the same newspaper under a privately owned plant, paid a monthly electric-light bill of $41.38 or an overcharge per month of $22.44.

The publicly owned plants which furnish electricity sell 1,000 kilowatt-hours of electricity for $8.90 while the average cost for the same amount of electricity from private-owned plants in Kentucky is $34 or an overcharge to the people of Kentucky of $25.10.

The publicly owned plants which furnish electricity sell 1,000 kilowatt-hours of electricity for $8.90 while the average cost for the same amount of electricity from private-owned plants in Arkansas is $35.90, or an overcharge to the people of Arkansas of $27.

The publicly owned plants which furnish electricity sell 1,000 kilowatt-hours of electricity for $8.90 while the average cost for the same amount of electricity from private-owned plants in Maine is $41, or an overcharge to the people of Maine of $32.10.

The publicly owned plants which furnish electricity sell 1,000 kilowatt-hours of electricity for $8.90 while the average cost for the same amount of electricity from private-owned plants in Virginia is $45.50 or an overcharge to the people of Virginia of $36.60.

Under the Tennessee Valley Authority or Government rates for electricity, the W. R. Reed Co., a retail mercantile establishment located in Tupelo, Miss., pays a monthly electric-light bill of $23.69. This same company under rates of a privately owned plant paid a monthly electric-light bill of $65.14, or an overcharge per month of $41.45.

The publicly owned plants which furnish electricity sell 1,000 killowatt-hours of electricity for $8.90, while the average cost of the same amount of electricity from privately owned plants in Iowa is $46.50, or an overcharge to the people of Iowa of $37.60.

Under the T. V. A. rates or Government rates for electricity the J. C. Penny Co., Inc., in Tupelo, Miss., pays a monthly electric-light bill of $28.49, while the same company under rates of a privately owned plant paid a monthly bill for electricity of $84.50, or an overcharge per month of $56.01.

The Winnipeg and Ontario public plants are selling 4,000 kilowatt-hours of electricity for $30, while the Indianapolis privately owned plant is selling the same amount of electricity for $163.25, or an overcharge to the people of Indianapolis of $133.25.

The Government-owned Tennessee River electric plant is selling 4,000 kilowatt-hours of electricity for $20.90, while a private Mississippi power company at Meridian, Miss., has been selling the same amount for $146.80, or an overcharge of $125.90.

And while the Government-owned Tennessee River plant is selling 4,000 kilowatt-hours of electricity for $20.90, the privately owned plant at Quincy, Ill., is selling the same amount of electricity for $240.85, and a Wilmington, Del., private plant is selling the same amount for $249.60, with gross overcharge accordingly.

Under Government or Tennessee power-plant rates the Tupelo Cotton Mills, manufacturers of cotton cloth, a large concern doing business in the State of Mississippi, consumed 258,000 kilowatt-hours of electric energy in 1 month and paid $1,896.40 for this amount of power. Before Government rates went into effect this same manufacturing concern paid under the privately owned power-plant rates $4,008, or an overcharge of $2,111.60.

How municipal ownership has reduced rates

Cities	Cost of electricity per kilowatt-hour	
	Before public ownership	After public ownership
Cleveland, Ohio	$0.15	$0.03
Seattle, Wash.	.20	.05
Springfield, Ill.	.11	.05
Winnipeg, Manitoba, Canada	.20	.03
London, Ontario, Canada	.09	.015
Pasadena, Calif.	.15	.05
Jamestown, N. Y.	.10	.05
Ottawa, Ontario, Canada	.07	.01
Lincoln, Nebr.	.12	.05
Toronto, Ontario, Canada	.08	.017

THE OVERCHARGE FOR INDIANA

Now coming to the overcharge in my own State of Indiana, we find that the people of the State of Indiana are paying annually over $19,000,000 more than the fair and reasonable cost of electricity as provided under public and cooperative ownership. The people of the State of Indiana used 1,209,459,000 kilowatt-hours of electric energy last year, for which they paid the sum of $39,861,716. Under the T. V. A. rates the cost would have been $20,677,716, a saving of $19,184,000 a year. Under the Tacoma rates the cost would have been $20,672,716, a saving of $19,189,000 a year. Under the Ontario rates the cost would have been $16,219,967, a saving of $23,641,749 a year. Under the Winnipeg rates the cost would have been $18,351,716, a saving of $21,510,000 a year.

This $19,000,000 is being collected from the people of the State of Indiana to pay high salaries of presidents and other head officials of the private electrical companies doing business in the State and for dividends on watered stock and for dividends to stockholders of many private electric holding companies for one and the same service rendered the people. The local and operating companies furnishing or providing the people with electricity are being compelled by the foreign, overhead companies to collect this amount for salaries and dividends in the form of increased charges and are powerless to safeguard their consumers against the high and extortionate charges resulting.

Under city or public ownership at Washington, Ind., the people are charged for 250 kilowatt-hours, $5.50. At Madison, Ind., under private ownership, the people are charged for the same amount, $10.35, or an overcharge of $4.85.

At Frankfort, Ind., the city-owned plant charges for 25 kilowatt-hours of electricity, $1.25. The Lakeport, Ind., private plant charges for the same amount, $2.12, or an overcharge of 87 cents.

The city-owned plant at Crawfordsville, Ind., sells 250 kilowatt-hours of electricity for $6.10. The Insull privately owned plant at Huntington, Ind., sells the same amount of electricity for $10.80, or an overcharge of $4.70.

COMPARISON OF RATES SHOWING THE CHARGES BY STATES

Hon. JOHN E. RANKIN, Member of Congress from Mississippi, has prepared a comprehensive statement showing a comparison of rates and charges for electric service in the different States under private-electric-company operations and public or cooperative ownership, and gives these charges for each State separately. The T. V. A. rates compared by Mr. RANKIN refer to the Government-owned plant at Muscle Shoals on the Tennessee River, which makes substantially the same rates charged by the city-owned Tacoma plant, the Winnipeg, Canada, public plant, and the Ontario, Canada, public plant, and other smaller owned city plants of this country. The comparison is the charge made by these plants with the privately owned electrical plants obtained from the regular schedule of rates. Mr. RANKIN's statement is based upon authoritative data and presented by him before Congress.

MAINE

Under the T. V. A. rates the people of the State of Maine would save $5,067,000 a year.

NEW HAMPSHIRE

Under the T. V. A. rates the people of the State of New Hampshire would save $3,443,000 a year.

VERMONT AND RHODE ISLAND

Under the T. V. A. rates the people of the States of Vermont and Rhode Island together would save $8,222,000 a year.

MASSACHUSETTS

Under the T. V. A. rates the people of the State of Massachusetts would save $37,184,000 a year.

CONNECTICUT

Under the T. V. A. rates the people of the State of Connecticut would save $14,451,000 a year.

NEW YORK

Under the T. V. A. rates the people of the State of New York would save $125,699,000 a year.

NEW JERSEY

Under the T. V. A. rates the people of the State of New Jersey would save $39,123,000 a year.

PENNSYLVANIA

Under the T. V. A. rates the people of the State of Pennsylvania would save $71,169,000 a year.

OHIO

Under the T. V. A. rates the people of the State of Ohio would save $46,843,000 a year.

INDIANA

Under the T. V. A. rates the people of the State of Indiana would save $19,184,000 a year.

ILLINOIS

Under the T. V. A. rates the people of the State of Illinois would save $58,474,000 a year.

MICHIGAN

Under the T. V. A. rates the people of the State of Michigan would save $34,025,000 a year.

WISCONSIN

Under the T. V. A. rates the people of the State of Wisconsin would save $17,893,000 a year.

MINNESOTA

Under the T. V. A. rates the people of the State of Minnesota would save $14,460,000 a year.

IOWA

Under the T. V. A. rates the people of the State of Iowa would save $12,480,000 a year.

MISSOURI

Under the T. V. A. rates the people of the State of Missouri would save $21,068,000 a year.

NORTH DAKOTA

Under the T. V. A. rates the people of the State of North Dakota would save $2,184,000 a year.

SOUTH DAKOTA

Under the T. V. A. rates the people of the State of South Dakota would save $2,480,000 a year.

NEBRASKA

Under the T. V. A. rates the people of the State of Nebraska would save $7,156,000 a year.

KANSAS

Under the T. V. A. rates the people of the State of Kansas would save $9,174,000 a year.

DELAWARE, DISTRICT OF COLUMBIA, MARYLAND, AND WEST VIRGINIA

Under the T. V. A. rates the people of the States of Delaware, Maryland, and West Virginia, and the District of Columbia together would save $24,870,000 a year.

VIRGINIA

Under the T. V. A. rates the people of the State of Virginia would save $9,600,000 a year.

NORTH CAROLINA

Under the T. V. A. rates the people of the State of North Carolina would save $10,642,000 a year.

SOUTH CAROLINA

Under the T. V. A. rates the people of the State of South Carolina would save $5,567,000 a year.

GEORGIA

Under the T. V. A. rates the people of the State of Georgia would save $9,666,000 a year.

FLORIDA

Under the T. V. A. rates the people of the State of Florida would save $9,141,000 a year.

KENTUCKY

Under the T. V. A. rates the people of the State of Kentucky would save $8,227,000 a year.

TENNESSEE

Under the T. V. A. rates the people of the State of Tennessee would save $9,852,000 a year.

ALABAMA

Under the T. V. A. rates the people of the State of Alabama would save $6,163,000 a year.

MISSISSIPPI

Under the T. V. A. rates the people of the State of Mississippi would save $3,981,000 a year.

ARKANSAS

Under the T. V. A. rates the people of the State of Arkansas would save $4,157,000 a year.

LOUISIANA

Under the T. V. A. rates the people of the State of Louisiana would save $7,401,000 a year.

TEXAS

Under the T. V. A. rates the people of the State of Texas would save $24,912,000 a year.

OKLAHOMA

Under the T. V. A. rates the people of the State of Oklahoma would save $8,639,000 a year.

MONTANA AND UTAH

Under the T. V. A. rates the people of the States of Montana and Utah together would save $6,546,000 a year.

IDAHO

Under the T. V. A. rates the people of the State of Idaho would save $2,761,000 a year.

WYOMING

Under the T. V. A. rates the people of the State of Wyoming would save $1,318,000 a year.

COLORADO

Under the T. V. A. rates the people of the State of Colorado would save $6,405,000 a year.

ARIZONA AND NEW MEXICO

Under the T. V. A. rates the people of the States of Arizona and New Mexico together would save $4,287,000 a year.

NEVADA

Under the T. V. A. rates the people of the State of Nevada would save $1,034,000 a year.

WASHINGTON

Under the T. V. A. rates the people of the State of Washington would save $12,188,000 a year.

OREGON

Under the T. V. A. rates the people of the State of Oregon would save $6,929,000 a year.

CALIFORNIA

Under the T. V. A. rates the people of the State of California would save $53,503,000 a year.

A comparison of charges for electricity under publicly owned or cooperative plants, such as the Government-owned Tennessee plant, the publicly owned Tacoma and Winnipeg plants, and the Government-owned Ontario electric plants, with the private electrical plants of the country show a total overcharge to the people of the United States of a billion dollars collected from them annually.

Under cooperative and public-ownership operations electricity can be generated at the same low cost regardless of whether by water or other power, shown providing a low rate to consumers and can be duplicated at any point in the country, by the Diesel and other combustion engines.

The following is from the second report of the Science Advisory Board, page 419, as well as further shown in the hearings on Senate bill 3524, this Congress, part 1, at page 236 thereof:

As a result of the recent great improvements in furnaces and engines, the present low prices for fuels and the possibility of building fuel electric plants near the markets for current and where fuel can be delivered cheaply, it is commonly less costly to provide electricity by combustion methods than by harnessing water power and building transmission lines.

THE COSTS OF ELECTRICITY CAN BE REDUCED STILL LOWER

But the last words in reducing electric charges are not read from cooperative or publicly owned plants in reducing the cost of electricity to the people. Cooperative or publicly owned plants alone are only bringing a part-way reduction. The charges or rates for electricity are still left heavily burdened with the loss and waste resulting from piecemeal line extensions, from duplication or overlapping service, and from production in smaller trivial volume, and serving limited population and areas.

THE ECONOMIC LAW OF COSTS

It is an accepted and recognized economic law that the cost of a service is determined by the scale of operations under which provided or the cost of any product or commodity is determined by the volume of production under which produced. Under this economic law the larger the scale of operations the lower will be the cost of the service or the larger the volume of production the lower will be the costs of the production. Under this economic law it is only a large scale of operation that will assure low cost of service or a large volume of production that will insure a low cost of products. This is the economic principle of mass production. Under this economic law small scale of operations or a small volume of production will make low and reasonable costs impossible.

FARM AREAS, TOWNS, AND CITIES CANNOT BE SERVED SEPARATELY

It is for this reason that farm or rural areas cannot be served separately and apart from the towns and cities therein located. But all consumers of any certain district must be served with electricity together. The farmers of the rural areas cannot be served at low and reasonable rates under a limited service or small volume of production. This is especially true of electric service. The generation, transmission, and distribution of electricity must be in large mass or volume to bring down the unit cost of electricity provided.

THE ELECTRICAL DISTRICT THE REMEDY

There is a remedy for this duplication and overlapping service, this piecemeal extension of distributing lines, this operation of separate and different systems of generating plants, transmission and distributing lines, and the different and separate service provided for towns, cities, and rural communities within the same territory or district. It is the organization of the county or electrical district under one unified or coordinated system for the generation of electric power or current for the whole territory or all the consumers of such district, which is necessary to lower the power-unit cost by increasing the volume of electricity produced, and by combining town, city, and rural territories under one central power plant for all. The entire territory of the county unit or electrical district, the farm, urban, and city population and all individual consumers and industries served within the specified territory included, must be held for the exclusive market and consumption of such unified system and coordinative facilities to bring electricity within the reach of the farmers.

Under the county unit or electrical district all existing plants would be coordinated or organized under one unified system for the elimination of loss and waste resulting from duplication and overlapping service necessary for economic and efficient operations. Or the cooperative associations and municipalities may acquire and take over the existing electrical means and facilities under the laws of the State where located for unification or coordination of such plants under one system of operation and management. Or if there is a municipally owned plant within the county territory or electrical district without sufficient generating capacity to produce electrical current or power for all the individual consumers and industry included in such county unit or electrical district, then the municipality owning such plant may apply to the Rural Electric Administration for a loan to enlarge such municipal plant to provide the farm electric membership association with such increased power or current in addition to the amount required by the city consumers.

WILL REDUCE ALL RATES TO TOWN AND CITY AS WELL AS FARM CONSUMERS

Such county or electrical district will not only reduce the rate of electricity to the lowest possible minimum to farmers, but the economy of large-scale production in reducing the unit cost of electric power will bring down the rates to the town and city consumers as well, variously estimated at one-third to one-half below piecemeal, overlapping operations with benefits and advantages to all.

Many of these cooperative or publicly owned plants showing a great reduction of charges under privately owned electrical plants are operating under a loss and waste of small volume of production and from serving small areas of populations.

The elimination of the loss and waste resulting from piecemeal line extensions and duplication and overlapping service, together with the economy and efficiency realized under large or mass production and serving a greater number of consumers, will operate to reduce still further the cost and charges for electricity below the lowest rates and charges shown under cooperative and public ownership, and will bring electric rates down to the minimum under which the people can afford to take and consume electricity in sufficient amount necessary for their use.

WAITING FOR THE PEOPLE TO SAY THE WORD

Such are the greater benefits of electricity coming from the use of more liberal amounts and at low and reasonable charges, and which can be realized and enjoyed by the people as soon as they are ready and will ask for the service and will join and unite in a movement of towns, cities, and farm areas under the county unit or electrical district.

Such are the means, methods, and facilities prepared or being made ready to lift the burdens of profit and gain, to eliminate loss and waste of duplication and overlapping service, to effect economy and efficiency of operations necessary to bring down electric costs and charges for greater and more liberal use by the people. And such is the program completed or in course of completion to multiply the blessings of electricity and bring its benefits to all the people at low and reasonable costs. And as soon as the people are ready to cooperate and say the word the movement waiting will go forward for them.

ORDER OF BUSINESS

Mr. SNELL. Mr. Speaker, I desire to propound an inquiry of the chairman of the Rules Committee. I notice there are some 6 to 10 rules pending consideration. Can the gentleman tell us at the present time when and in what order he expects to call up these rules? If he cannot give us the information now, will he put it in the RECORD after this request later in the day?

Mr. O'CONNOR. Just at the moment there is only one rule pending, but we expect to report today or tomorrow four or five others. When these various rules will come up for consideration is for the determination of the Speaker and the majority leader.

Mr. SNELL. When the gentleman reports these rules will he give us some idea how he intends to call them up?

Mr. O'CONNOR. I will give my idea as to how they should be called up for consideration.

PREVENTION OF SALES DISCRIMINATION

Mr. SABATH. Mr. Speaker, I call up House Resolution 523 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

House Resolution 523

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 8442, a bill making it unlawful for any person engaged in commerce to discriminate in price or terms of sale between purchasers of commodities of like grade and quality, to prohibit the payment of brokerage or commission under certain conditions, to suppress pseudo-advertising allowances, to provide a presumptive measure of damages in certain cases, and to protect the independent merchant, the public whom he serves, and the manufacturer from whom he buys, from exploitation by unfair competitors, and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill and continue not to exceed 4 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit, with or without instructions.

Mr. SABATH. Mr. Speaker, as I understand it, the gentleman from Pennsylvania [Mr. RANSLEY] does not desire any time on this resolution?

Mr. RANSLEY. Mr. Speaker, we desire 30 minutes on all rules, and I therefore ask for 30 minutes on this one.

Mr. SABATH. Mr. Speaker, I yield 30 minutes to the gentleman from Pennsylvania.

Mr. Speaker, this is a rule for the consideration of H. R. 8442, generally known as the Patman bill. It is a broad, liberal rule, and provides for 4 hours' general debate, after which the bill shall be read for amendment under the 5-minute rule.

This bill amends section 2 of the Clayton Act. I might say at this time that if the Clayton Act had been passed without certain amendments, which were adopted at the time, it would not now be necessary to amend that act by bringing in the present bill.

Unfortunately, at that time certain gentlemen thought the bill was too stringent and forced the adoption of amendments which weakened the bill to a considerable extent.

Today I am placed in a very embarrassing position. Many of my personal friends who are connected with large institutions that are fighting this bill, are honestly of the conviction that it should not pass. They have strenuously opposed the bill. At the same time, I feel that my duty is plain, to the people in my district and in the country generally, and in advocating and voting for the bill I regret that I incur the criticism of those friends.

This bill gives the Federal Trade Commission additional powers to investigate and pass upon abuses when complaints are filed with that Commission. Its objects may briefly be stated to be the following:

(1) To effectually suppress discriminatory prices and terms of sale between purchasers;

(2) To prohibit, under certain conditions, the payment of brokerage fees or commissions to dummy brokers; and

(3) To prohibit pseudo-advertising allowances, and to eliminate the willful discrimination against small independent dealers.

I have the utmost confidence in the Federal Trade Commission, as I think the country at large also has, and do not believe it would be guilty of taking arbitrary action against any legitimate manufacturer or concern. In any event, those ruled against have the right to appeal. Consequently, I hope there will be no opportunity given to the courts to hold the bill unconstitutional.

The need for legislation to protect small independents is recognized by every student of government and economics. Even those opposed to the bill agree that there are abuses which should be corrected. Nevertheless they seek to delay action. Of course, I know that such attempts are not unusual when efforts are being made to defeat legislation by one means or another.

It is amazing to what extent lobbying and propaganda are nowadays employed against legislation. The well-organized activities of those seeking to thwart passage of the this bill are second only to the efforts made against the holding-company bill. The usual cry has been made by opponents of the bill—that is, that it is unconstitutional. Following that is the cry that the bill will give too great a bureaucratic power to the Federal Trade Commission.

Regardless of the charges these lobbyists bring, one fact stands apparent. I know, and the people of the country know, that the great majority of fair manufacturers and retailers and all those who favor a fair and square deal are in favor of this legislation. They realize that it will restrict the chain-store and mail-order octopuses which are gradually but surely destroying the small businessman in every section of the country. [Applause.]

It has been argued that many farmers, manufacturers, and dealers are opposed to the bill. It is true that there are objectionable features, namely, the antibasing point and the classification provisions. But I want to inform the House that the Judiciary Committee has agreed to move to eliminate both of these provisions from the bill. Likewise, if it is shown that other features are objectionable, they may be modified.

I do not charge all chain stores or mail-order houses with being guilty of the abuses complained of. The bill is not aimed against them. It is aimed against cutthroat practices and abuses.

Within the last few weeks I have received many petitions from employees of the chain stores against the bill. Let me call their attention to the fact that investigations have disclosed that employees of chain stores receive from 25 to 30 percent lower wages than those paid employees of independent establishments.

The chain-store octopuses, mainly controlled by Wall Street financiers, must be restricted from unfair and discriminatory practices. Since the ethics of fair dealing seem to be unknown to them, these overlords must be prevented by legislation from obtaining special inducements, at the expense of independent dealers, through threats and coercion.

As pertinent, I want to here insert the conclusions of the Judiciary Committee, which reported the bill almost unanimously:

CONCLUSION

In conclusion, your committee wishes to correct some important misapprehensions, and even misrepresentations, that have

been broadly urged with regard to the probable effect of this bill. There is nothing in it to penalize, shackle, or discourage efficiency, or to reward inefficiency. There is nothing in it to fix prices, or enable the fixation of prices; nor to limit the freedom of price movements in response to changing market conditions.

Any physical economies that are to be found in mass buying and distribution, whether by corporate chain, voluntary chain, mail-order house, department store, or by the cooperative grouping of producers, wholesalers, retailers, or distributors—and whether those economies are from more orderly processes of manufacture, or from the elimination of unnecessary salesmen, unnecessary travel expense, unnecessary warehousing, unnecessary truck or other forms of delivery, or other such causes—none of them are in the remotest degree disturbed by this bill. Nor does it in any way infringe the seller's freedom to give a part or all of the benefit of the saving so effected to others with whom he deals, whether in higher prices paid to the producer from whom he buys his raw materials, or in higher wages to those who labor in production or handling of his goods, or in lower prices to the customer, including the ultimate consumer who buys them.

It is not believed that the restoration of equality of opportunity in business will increase prices to consumers. Unfair trade practices and monopolistic methods which in the end destroy competition, restrain trade, and create monopoly have never in all history resulted in benefit to the public interest. On the contrary, for the most part, they have been symbolic of lower wages, longer hours, lower prices paid producers, coercion of independent manufactures, domination of that field of industry, and in the end high prices to consumers and large profits to the owners.

It is the design and intent of this bill to strengthen existing antitrust laws, prevent unfair price discriminations, and preserve competition in interstate commerce. It is believed to be in the interest of producer, consumer, and distributor. No business institution need have any fear of this legislation if it will conduct its business honestly and without the use of unfair trade practices and unjust price discriminations.

I am not going to take up further time, since I feel that almost the entire membership recognizes the need for this legislation. I now yield to the gentleman from Pennsylvania. [Applause.]

Mr. RANSLEY. Mr. Speaker, I yield 10 minutes to the gentleman from Michigan [Mr. MAPES].

Mr. MAPES. Mr. Speaker, I am supporting this legislation and, therefore, am in favor of the rule which proposes to make it in order.

One of the duties of government is to protect the weak against the strong. I think this legislation will have a tendency to do that and, therefore, I am in favor of it.

In compliance with a resolution of the Senate passed in the Seventieth Congress, the Federal Trade Commission conducted an investigation of chain stores, extending over a period of several years. In December 1934 it submitted its final report, in which it made certain recommendations for legislation. In its report it suggested a draft of a bill to amend the Clayton Act to prevent unfair and unjust discrimination in prices between different purchasers of commodities.

Early in this Congress, January 30, 1935, to be exact, I introduced the bill as proposed by the Federal Trade Commission having somewhat the same object in view as the Patman bill, now about to be considered. The original Patman bill was introduced on June 11, 1935.

The proposal of the Federal Trade Commission was not as rigid as the Patman bill, which this rule is to make in order. In substance, it provided that there should be no unfair or unjust discrimination in prices in the selling of commodities to different buyers, and left it pretty largely with the Federal Trade Commission to determine whether the price was unfair or unjust.

Incidentally, it might be of interest to the House to know that this morning the distinguished Chairman of the Federal Trade Commission, Judge Davis, a very highly respected former Member of this House, appeared before the Committee on Interstate and Foreign Commerce on a bill now being considered by that committee. He told the committee that there had been no amendment to the Federal Trade Commission Act since the passage of the original act creating the Commission in 1914. The Commission is now asking for some amendments to the original act, but for a period of over 21 years no amendment has ever been made to it.

The final report of the Commission on the chain-store situation gives some rather interesting information. I think it is conceded that in some instances discounts have been given to chain stores and other large buyers that have not been given to independent merchants and that in some cases at least the chain stores, because of their power and perhaps aggressiveness, have been able to secure larger discounts for the same quantity of goods purchased than other buyers have been able to secure. There is no question but what the independent retail merchant is opposed to that practice and wants to have it corrected. It is not so well known or realized that the manufacturer, the very man who sells to the chain stores, needs and wants protection the same as the independent retailer does.

The Federal Trade Commission had this to say on that subject in its report:

There has been considerable criticism of some of the methods used by chain systems in their bargaining with manufacturers for special price concessions. The criticism comes largely from the manufacturers themselves, many of whom protest the methods used while yielding to them. Some state their yielding was accomplished only as the result of threats and coercion.

And, again, the Federal Trade Commission makes this statement:

Thirty-three of the manufacturers interviewed stated positively that threats and coercion had been used by chain-store companies to obtain preferential treatment.

I think those who are familiar with the facts realize that the manufacturers themselves want to be protected, as well as the independent retail merchants. In some instances, at least, the chain stores have been able to dictate to the manufacturers, much to the regret of the manufacturers.

Mr. PEYSER. Mr. Speaker, will the gentleman yield for a question?

Mr. MAPES. I only propose to take a moment, but I will yield to my friend from New York.

Mr. PEYSER. The gentleman has referred in his statement constantly to chain stores, but is the bill directed against chain stores? Is it not rather directed against all manufacturers and all merchants?

Mr. MAPES. Of course, it has general application, and applies to everyone alike, as it should.

I believe the legislation ought to be general and that anyone who is guilty of the abuses ought to come within its provisions. At the same time I think that the basis of the legislation is this report on chain stores of the Federal Trade Commission, to which I am referring.

Mr. PEYSER. One more question. Would it not apply to a man that owns one store—an outstanding department store, say?

Mr. MAPES. I do not see how it would apply to the retailer.

Mr. PEYSER. Would it not if he was a quantity buyer?

Mr. MAPES. In his purchases from the manufacturer, but not in his sales to the consuming public.

Mr. PEYSER. He would be affected by it.

Mr. MAPES. He might be affected by it in his purchases if he was getting unfair or unreasonable discounts, discounts that others buying the same quantity of goods under the same conditions could not get. Why should not he be? That is what this legislation is for. It is to give the independent merchant a chance for his white alley against the big fellow. As I said in the beginning, it is to protect the weak against the strong.

In further answer to the gentleman from New York, I might say that I have some apprehension that the Patman bill in its present form goes too far and may be too rigid. Personally, I prefer the bill recommended by the Federal Trade Commission, which says that there shall be no unjust or unfair discrimination in price, and leaves the matter of determining the injustice or unfairness to the Federal Trade Commission.

I know that every Member of the House of Representatives has respect for the personnel of the Federal Trade

Commission and would be willing to have the law administered by that Commission.

But we have this bill before us and must pass upon it. I think it ought to be amended in several respects, and I understand that it is generally agreed that two provisions in it are to be entirely stricken out. The problem is to pass a law that will correct the abuses without going too far, without putting undue restrictions on legitimate business. The bill can be perfected in the Committee of the Whole when it is read for amendment under the 5-minute rule.

Attention has been called on the floor of the House by different Members recently to the big salaries received by the chief executives of some of the chain-store organizations. While it may not have great relevancy to the legislation under consideration, it is interesting to read what the Federal Trade Commission has to say about the pay which the clerks and employees of the chain stores in their retail stores receive as compared with what similar employees are paid by independent retail dealers. This is what the Commission says about that. I quote:

Comparable data on chain-store and independent dealer wages for full-time store selling employees are available for the following eight kinds of business: Grocery, grocery and meat, drug, tobacco, ready-to-wear, shoes, hardware, and combined dry goods, dry goods and apparel, and general merchandise.

The investigation covered a broad field. The report continues:

The weighted average weekly wage of 3,933 independent store selling employees in these eight kinds of business for the week ending January 10, 1931, was $28.48, as compared with $21.61 for 107,035 chain-store selling employees.

That is a difference of nearly $7 per week, or about 30 percent of the entire amount they received. The report further states:

A simple average of the eight lines of business shows a narrower spread between the two figures ($23.10 for independents and $23.62 for chains, respectively) but leaves the same distinct conclusion, namely, that for the period studied the independents paid their store employees more than did the chains.

I wonder if there should not be a more equitable distribution of the profits of these big organizations as well as a prohibition against unjust and unfair price discrimination in buying.

Mr. SABATH. Mr. Speaker, I yield now to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN. Mr. Speaker, the small retailer, the independent merchant, I might call him, has his eyes on Congress today and is praying for the enactment of this legislation. He sees an opportunity to remain in the picture if Congress places this law on the statute books.

This does not only apply to the small merchant in the cities but to the general-store and cross-roads merchant in the country. In April 1935 there appeared in the New York Times an article, which I later learned was a prepared release, announcing the formation of the American Retail Federation. This account in this reliable paper pictured a gigantic movement to establish, with headquarters in Washington, what I termed a "superlobby." After investigating, becoming convinced that this release came from those who were back of the movement and was not a dream of some reporter, I prepared and introduced a resolution providing for an investigation of this superlobby.

The preamble of the resolution contained 10 paragraphs based upon the article in the Times. The resolution passed and the Speaker named me chairman of the committee to make the investigation. Within a week following the approval of the resolution I took sick and, owing to my inability to carry out the duties imposed upon me, I resigned as chairman of the committee and the Honorable WRIGHT PATMAN was named to head the committee. The investigation covered a period of many months. The House extended the scope of the investigation by amending the resolution.

I want to say now that I do not recede from any statement contained in the preamble of the resolution but one. I named in the preamble the Great Atlantic & Pacific Tea Co. as one corporation interested in this superlobby. A Mr. Hartford, of this company, called me on the telephone and later wired me that his company had not participated in the organization and had not advanced one dollar toward expenses and did not propose to do so. I passed this word to Mr. PATMAN and he promised to see that it was brought out in the investigation. The testimony disclosed that this company did not have a part in the organization, but there was a letter produced which indicated the company, or some of its officials, were rather in sympathy with the movement. I make this statement in a spirit of fairness.

While the record does not disclose that one Harold R. Young, chief Washington representative of the National Retail Dry Goods Association, was involved, still I am satisfied, as a result of his activity, his telephone messages to me, and his statement in a conference with me, he was greatly interested in the organization and was promoting it, as well as laying the groundwork for the National Retail Dry Goods Association to become a part of the superlobby. I therefore let my statement as to Mr. Young stand.

The report of the committee, filed by Mr. PATMAN April 7, 1936, justifies the introduction of the resolution and supports every charge I made, with the exception of what I mentioned regarding the A. & P. Co. and Young.

The bill now under consideration results from the evidence secured by the investigating committee. You will hear from members of the committee of the advantages in the form of rebates, and so forth, that accrue to the large chains and mail-order houses which were denied the small retail merchant. It is to correct such abuses that you are asked to vote for this bill. It is a desire to extend equal rights to all and special privileges to none, and nothing more. I want the small druggist, grocer, butcher, hardware man, and other merchants in my district to be able to buy their supplies at the same price and receive the same benefits as is accorded the large chains and mail-order houses. I seek no advantages for them and they desire none. This bill will give them what they have long hoped for, and without this legislation their end is in sight.

If one will read the testimony before this committee he or she cannot but come to one conclusion, and that is that this bill should be passed. Others far more familiar with the record will give you a detailed account of what has been going on for many years, and it is just such advantages as will be enumerated, supported by the evidence, that has resulted in hundreds of thousands of individual merchants being required to close their place of business because they were unable to compete with those who had received these special favors.

Simply to give you an idea of what has happened let me recall that one large chain received in rebates from manufacturers and wholesale merchants over $8,000,000 in one year. It was disclosed that they just refused to buy unless they received cash discounts or the equivalent in merchandise. This, of course, enabled them to undersell the small merchant, who I say is doomed to complete destruction unless this legislation becomes a law.

I realize the question as to the value of large chains is debatable. There is some good to be said for the chains, but likewise there is plenty to be said against them. Take my own city, St. Louis, for instance. I do not know what the situation is now, as I have not been home for some time, but when I was last in St. Louis I know that the bread one of the largest chains sold in hundreds of stores was baked in Chicago and sent to St. Louis by fast express every night; that the pastry sold in the largest chain of cafeterias in St. Louis was likewise baked in Chicago and sent to St. Louis. What benefit did the people who patronized the chains get? Did our bakers get employment? Then again it must be remembered that chains whose headquarters are in other cities send their profits out of my city two and three times a week. They are continually draining the city of money. How much better it would be if citizens of St. Louis owned these stores and spent their profits in St. Louis.

I predict if this legislation does not become a law it will not be long before the chains will have a monopoly and then

there will be no cut in prices, no sales but they will charge what they like, and the people will be at their mercy.

The resolution I introduced in April 1935, which the committee in its report shows was justified, follows:

Resolution

Whereas the Associated Press on April 16, 1935, and the New York Times of April 17, 1935, reported that a superlobby to be known as the American Retail Federation was recently formed to promote the business of chain stores throughout the United States and to influence the actions of Members of Congress with reference to legislation affecting chain stores and their holding companies; and

Whereas one Louis E. Kirstien, of Filene's Department Store, in Boston, Mass.; one Clarence O. Sherrill, who was a high-salaried vice president of the Kroger Grocery & Baking Co., of Cincinnati, Ohio; and one Harold R. Young, chief Washington representative for the National Retail Dry Goods Association, are purported to be the organizers thereof, with the understanding that said Clarence O. Sherrill will be the president and active head of said superlobby, with direct responsibility for conducting its propaganda and lobbying activities in the city of Washington, D. C., before the United States Congress and the committees thereof; and

Whereas it is stated in the public press that the executive committee of this superlobby, which has been named the American Retail Federation, is to be composed of officers and directors of the principal gigantic retailing establishments of the Nation dealing primarily in the fundamental necessities of everyday life, as follows:

Louis E. Kirstien, representing E. A. Filene & Co., of Boston, Mass.

Lessing J. Rosenwald, chairman of the board of Sears, Roebuck & Co.

Fred Lazarus, Jr., of F. and R. Lazarus & Co., of Columbus, Ohio.

Percy S. Straus, representing R. H. Macy & Co., of New York City.

C. W. Kress, of S. H. Kress & Co., of New York City.

Albert H. Morrill, president of the Kroger Grocery & Baking Co., of Cincinnati, Ohio.

George M. Gale, president of the Louis K. Leggett Co., of New York City.

John A. Hartford, president of the Great Atlantic & Pacific Tea Co., of New York City; and

Whereas it is apparent that said American Retail Federation is organized for the purpose of increasing the profits of big business, through lobbying tactics, designed to prevent small businesses from securing competitive opportunities equal to those enjoyed by corporations representing vast aggregations of capital; and

Whereas it is apparent that the achievement of any or all of the purposes of said American Retail Federation will react to the detriment of the farmer, the wage earner, and the consumer, on the one hand, and will serve to injure the employers of labor and the laboring man on the other hand; and

Whereas the said superlobby has already opened palatial headquarters in the city of Washington, D. C., and has attempted, and is now attempting, to force and coerce thousands of small retail merchants, dealing in the necessities of life, into the ranks of this superlobby, so that it may thereafter hold out to Members of Congress and to others in the Government that it represents a completely centralized and authentic voice for all retailers of the Nation; and

Whereas the following national associations of retailers whose executive committees and boards of directors are in almost every case controlled by representatives of large corporations are already listed in the public press as having already offered or pledged their support to the superlobby plans of the American Retail Federation, to wit:

The National Association of Retail Clothiers.
National Retail Dry Goods Association.
National Association of Retail Grocers.
National Retail Furniture Association.
National Retail Hardware Association.
American National Retail Jewelers Association.
National Association of Retail Druggists.
National Shoe Retailers Association.
Limited Price Variety Stores Association, Inc.
Mail Order Association of America, Inc.
National Council of Shoe Retailers.
National Retail Association of Music Merchants.
Food and Grocery Chain Stores of America, Inc.

An invitation will be extended this week to the International Grocers Alliance of Chicago, a cooperative organization of grocers; and

Whereas the gigantic sum of $750,000 has already been pledged or contributed to this superlobby by the greatest aggregation of rich and powerful department stores and chain stores of America ever brought together for the purpose of directly or indirectly nullifying the effects of the N. R. A., the A. A. A., the Sherman Act, the Clayton Act, and other antitrust laws now on the statute books of this Nation, and by propaganda and other methods inimical to the public welfare, to attempt to control and influence the Congress of the United States in its legislative deliberations; and

Whereas it is further reported that this superlobby, the American Retail Federation, is now proceeding upon a plan designed to force the small independent retail merchants of America, engaged in the sale of the necessities of everyday life, to contribute an additional $2,000,000 annually to the funds available to this organization in its lobbying activities, and for the further purpose of permitting it to disseminate propaganda among the consumers and producers of the United States; and

Whereas it is inimical to the welfare of the citizens of the United States to permit the organization and functioning of such a superlobby, designed for the purpose of intimidating and influencing Members of Congress through direct and subversive lobbying activities, as well as through coercing hundreds of thousands of underpaid employees throughout the Nation to flood the respective Members of the United States Congress with letters, petitions, and propaganda designed to improperly and untruthfully represent the public sentiment of the respective constituencies of said Members of the Congress: Now, therefore, be it

Resolved, That a special committee of seven, to be named by the Speaker, be created, and hereby is authorized and directed to investigate the aforesaid American Retail Federation, its capitalization, its membership, its objectives, the sources of its funds, its financial connections, and its officers and agents, and to investigate the record of stock dividends, officer's salaries, profits, interlocking directorates, and banking affiliations of all corporations directly affiliated with, or contributing to, the said American Retail Federation; and be it further

Resolved, That for the purpose of this resolution, the committee, or any subcommittee thereof, is authorized to hold such hearings, to sit and act at such times and places in the United States, whether or not the House is sitting, has recessed, or has adjourned, to require, by subpena or otherwise, the attendance of such witnesses and the production of such books and documents, to administer such oaths, and take such testimony as it deems necessary and advisable.

I now quote the conclusions of the majority of the special committee.

We consider the American Retail Federation a carefully conceived and organized association which had for its purpose a pretense to the public that it was representing small dealers and small independent merchants over the entire country, which would give it power and influence with Congress and the various legislatures while at the same time it was so conceived and organized that complete power and control at all times would be in the 10 original incorporators who represent large chain-store and department-store interests or vested in someone in whom they had complete confidence to carry out their purposes and intents. It was organized by the chain- and department-store interests, and they propose to dominate the entire organization.

Evidence adduced during this and other investigations now being conducted and which have been conducted by Congress, showing that it is becoming a practice of certain well organized and powerful groups representing vast aggregations of corporations and capital to use methods of undue influence and propaganda sometimes bordering upon, if not including, deceit to block, oppose, and hinder the consideration of proposals for legislation, leads and impels this committee to recommend immediate passage of legislation requiring the registration of all lobbyists for the purpose of protecting the public interest. It is proposed that legislation be enacted which will require that any person employed as a lobbyist by one or more corporations or otherwise acting in the interest of one or more corporations or their associations in endeavors to influence action on proposed legislation, either directly or through expression of public opinion, publicly announce the same at the outset and at the beginning of such undertaking by registering—such registration to be frequently renewed in its entirety—and a statement to be filed at regular intervals disclosing fully all receipts of money or other articles of value and how expended, with appropriate officials of the House and Senate on records provided for the purpose.

Mr. Speaker, of course my resolution did not put the American Retail Federation out of business, but I think I can say without fear of contradiction that the investigation did show the Members of Congress what the committee was organized for and what Members could expect from them in the way of propaganda in support of and opposing legislation.

Mr. Louis E. Kirstien, representing E. A. Filene & Co., of Boston, one of the organizers of the federation, discussed this organization with me. This gentleman impressed me very much with his sincerity. He was very frank, and I wanted to meet him because of his association with the founder of the Filene stores, who has done so much for the little fellow, and who recently resigned from the chamber of commerce because of its activities. Mr. Kirstien was the first witness before the committee to give a frank and honest statement of the purposes of the organization. Col. Clarence O. Sherrill, who has a signed contract with this federation calling for $40,000 salary the first year, $45,000 the second year, and $50,000 the third year, and Albert H. Morrill, the head of the Kroger Grocery & Baking Co., of Cincinnati, refused to admit that it was the purpose of the organization to lobby among Members of Congress. Mr. Kirstien stated frankly that was the purpose. No one can object to an individual

or an organization favoring or opposing legislation. That is their right and it would be in violation of the Constitution to deny that right. Mr. Kirstien advised me that the main purpose of the organization was to gather statistics on distribution, and so forth. He insisted that he was convinced during the operation of the National Recovery Act that such data was not available. I thought at the time of our conversation that Mr. Kirstien was misled, and I think so now, but he does not agree with me. I told him I could not conceive that a man with his business experience would agree to pay such a salary to Colonel Sherrill simply to gather statistics. There is no doubt in my mind that others in the organization, whether Mr. Kirstien agrees with them or not, intended to use the organization to advance the interests of the chains and mail-order houses and to use the small, independent merchants and their organizations for this purpose. I am sure that Mr. Filene, who originally was responsible for E. A. Filene & Co., would never have joined such an organization.

As I said, Mr. Speaker, I am going to let others tell the House of the findings of the special committee, which, I am sure, will justify every Member of Congress in voting for this bill.

Mr. SABATH. Mr. Speaker, I yield 5 minutes to the gentleman from Arkansas [Mr. MILLER].

Mr. MILLER. Mr. Speaker, I do not desire at this time to go into a detailed discussion of the bill, but I think the membership of the House is entitled to know of the amendments that will be proposed by the committee which handled the bill and which will be proposed as committee amendments. I make that statement at this time because these committee amendments, in my opinion, if adopted by the House, will remove from the bill a great many of the objectionable features. The first amendment that will be proposed by the committee when we reach consideration of the bill under the 5-minute rule will be an amendment striking out, on page 6 of the amended bill, the classification section, or subsection (1), page 6.

Mr. MAPES. Mr. Speaker, will the gentleman yield?

Mr. MILLER. Yes.

Mr. MAPES. It is proposed to strike out all of this paragraph?

Mr. MILLER. At this time it is. The first four lines might be retained, but I see no reason why the whole paragraph should not be stricken out. The next amendment that will be offered by the committee as a committee amendment will be directed at subsection (5) on page 7, which is the basing point provision in the bill.

Mr. RICH. Does the gentleman mean to strike out the whole section?

Mr. MILLER. That amendment will be for the purpose of striking out all of subsection (5), or the basing point provision in the bill. Probably that provision should not have been put in a bill amending the Clayton Act; but it was put in and the committee has decided to offer an amendment to take it out. It should be borne in mind that I am now talking about committee amendments. I do not know what other amendments will be offered, but I think the membership is entitled to know what the committee will offer as amendments. The next committee amendment is directed to subsection (e) on page 9. I shall not consume the time of the House to give you a detailed statement in respect to that, but it will take into consideration those manufacturing establishments that furnish services and facilities such as fixtures and storage facilities. Those are the amendments that will be proposed by the committee.

Mr. MICHENER. Mr. Speaker, will the gentleman yield?

Mr. MILLER. Yes.

Mr. MICHENER. Those amendments are agreeable to the proponents of the bill?

Mr. MILLER. Yes.

Mr. MICHENER. In other words, the proponents of the Patman-Robinson bill accept the committee amendments?

Mr. MILLER. Absolutely; yes. I propose to offer the amendments myself as committee amendments, and they are acceptable to all concerned, so far as I know.

Mr. ROBERTSON. Mr. Speaker, will the gentleman yield?

Mr. MILLER. Yes.

Mr. ROBERTSON. What will be the material difference between the House bill, with the committee amendments the gentleman has mentioned, and the bill as it passed the Senate?

Mr. MILLER. It is practically impossible in the time I have for me to answer that question.

Mr. ROBERTSON. There will still be a material difference?

Mr. MILLER. Yes; and the only way those differences can be adjusted will be in conference.

Mr. ROBERTSON. But if we adopt some of those Senate amendments?

Mr. MILLER. It is within the power of the House to adopt some of them, but I hope the House will not.

Mr. ROBERTSON. Why?

Mr. MILLER. I do not think that they are proper amendments.

Mr. MAIN. Mr. Speaker, will the gentleman yield?

Mr. MILLER. Yes.

Mr. MAIN. Has the committee taken any cognizance of the objections of the cooperative organizations?

Mr. MILLER. Yes.

Mr. MAIN. Will any amendments be offered to remove the objections offered by the cooperative organizations?

Mr. MILLER. The cooperatives' objections were principally to that classification section and to the basing-point section. They profess to find an objection to section (e) on page 9, but I believe, upon due consideration, they will find they really do not object to that section.

Mr. RICH. I understand the gentleman's committee amendment will strike out section (e) on page 9.

Mr. MILLER. Not strike it out, but we will make some amendments to it.

Mr. RICH. And the gentleman has not those amendments?

Mr. MILLER. Yes; I have, and I shall give them later on.

Mr. TOBEY. Mr. Speaker, will the gentleman yield?

Mr. MILLER. Yes.

Mr. TOBEY. The gentleman is familiar with the suggested amendments offered by the proponents of agriculture; that is, the Grange and the Farm Bureau, and so forth.

Mr. MILLER. The gentleman means the one exempting those from the operation of the bill?

Mr. TOBEY. Yes.

Mr. MILLER. I am.

Mr. TOBEY. Does the gentleman propose incorporating those in the bill?

Mr. MILLER. No.

Mr. TOBEY. In other words the gentleman is opposed to the Grange and the Farm Bureau?

Mr. MILLER. No. I presume the gentleman is talking about the amendment suggested by Mr. JONES this morning. I am opposed to exempting any special organization from the operation of the bill, because this is the defect of the present law.

The SPEAKER. The time of the gentleman from Arkansas has expired.

Mr. SABATH. Mr. Speaker, I yield the gentleman 1 additional minute.

Mr. MILLER. The defects of the present law are patent to anyone. If the House membership will take section 2 of the Clayton Act as originally proposed; that is, the substantive part of the Clayton Act, you will find that section 2 would be all that is necessary now, but its effect was destroyed by adding a proviso. I want to call your attention now to the report of the committee which succinctly states the objectives of the bill as follows:

To accomplish its purpose, the bill amends and strengthens the Clayton Act by prohibiting discriminations in price between purchasers where such discriminations cannot be shown to be justified by differences in the cost of manufacture, sale, or delivery resulting from different methods or quantities in which such commodities are to such purchasers sold and delivered. It also prohibits

brokerage allowances except for services actually rendered, and advertising and other service allowances unless such allowances or services are made available to all purchasers on proportionally equal terms.

The bill as reported by the Committee on the Judiciary when amended in accordance with the amendments that will be proposed as committee amendments will, in my opinion, protect the independent merchant and at the same time protect the consumer against exorbitant prices which will be sure to follow unless the present monopoly of the large manufacturers is broken.

The SPEAKER. The time of the gentleman from Arkansas [Mr. MILLER] has again expired.

Mr. RANSLEY. Mr. Speaker, I yield 10 minutes to the gentleman from New York [Mr. CELLER].

Mr. CELLER. Mr. Speaker, it is significant that today marks the first anniversary of the Supreme Court decision declaring unconstitutional the N. R. A. It is also very significant that those who are primarily interested, particularly benefited, like the retail grocery and drug industries, really wrote this bill. For that purpose? Namely, to replace the code declared unconstitutional by the Supreme Court of the United States—to replace the price-fixing code consigned to limbo by the Court.

In the course of my remarks today and possibly tomorrow, I shall unfold to you statements made by over 50 economists of this country from the leading universities, clearly indicating that this bill will raise prices to a great degree, to all the consumers of the land.

I would happily vote for this bill despite the fact that it would raise prices if it would concomitantly provide for labor safeguards, as the N. R. A. did. But here you have a very unusual situation—a bill which will replace N. R. A. codes, without the benefit to labor as to hours and wages of employment. That is why I am unalterably opposed to it and will vote against it. You raise consumer prices, but concomitantly you do not raise wages.

Furthermore, a very, very imposing array of organizations is opposed to this bill You may not know it, but almost all the important farm organizations of this land have voiced emphatic opposition to this bill.

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. Just a moment, please.

I have in my hand a letter of pointed and forceful opposition to the bill, addressed to the chairman of the Rules Committee [Mr. O'CONNOR], which I will put later in the RECORD, written by the American Farm Bureau Federation, by Mr. Chester Gray; from the National Grange, by Mr. Fred Brinkman; the National Cooperative Council, by Robin Hood, which, incidentally, comprises 1,450,000 farm members; the National Cooperative Milk Producers' Federation, over the signature of Charles H. Holman; the Farmers' National Grain Corporation, over the signature of M. W. Thatcher; the Northwest Farmers' Union Legislative Council, over the signature of M. W. Thatcher. These names are household words to our Members from the farm lands. Frankly, I do not know a single one of them, yet I recognize the importance of these pronouncements.

If you gentlemen from the farming communities want to disregard the emphatic protests leveled against this bill by those important organizations, you are welcome to do so. You may take your political fortunes in your hands by doing so; but I warn you, gentlemen.

Now, what other organizations have been opposed to it?

Mr. McLAUGHLIN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield.

Mr. McLAUGHLIN. Is it not true that the objections of those organizations are directed in part to provisions which have been stricken out by committee amendments?

Mr. CELLER. Oh, no. Their opposition is more fundamental and much broader. I did not mean to take the time to read the letter, but I may read later a significant portion of this letter of May 18. Subsequently I will read to you a letter written May 25 by the American Farm Bureau Federation and the other farm groups, first, in opposition to the so-called quantity discount provision; second, in opposition to the provision which very significantly requires you or me to exculpate ourselves if we are under accusation, reversing the time-honored Anglo-Saxon provision that no man is guilty until he is proven so by his accuser. Under this bill we change all that. The moment the Federal Trade Commission points its finger at you or at me and makes out what they call a prima-facie case, the duty is on us then to prove our innocence. I will say to my distinguished colleague from Nebraska [Mr. MCLAUGHLIN], for whom I have an abiding affection, that these farm organizations, in their communications to the Members generally and to the distinguished chairman of the Rules Committee, emphatically opposed this provision of the bill. I will take time to read those provisions if you wish, but I will put the letter in the RECORD later.

Mr. EKWALL. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield.

Mr. EKWALL. Does not the gentleman know that the rule he has stated is not the rule in this country; that where the information is peculiarly within the knowledge of the party, then the burden shifts to him to prove that fact?

Mr. CELLER. I must emphatically disagree with the gentleman. In the courtroom the burden shifts from time to time, but under our Constitution we cannot legislatively say that the burden of proving one's innocence shall be upon a defendant in any kind of a proceeding.

Mr. McLAUGHLIN. Mr. Speaker, will the gentleman yield further?

Mr. CELLER. I yield.

Mr. McLAUGHLIN. The fact is, however, that in the letter to which the gentleman has referred from the farm organizations they object to the basing-point system and object to the classification, both of which have been stricken from the bill.

Mr. CELLER. Oh, no; they go much further. Later on, when I have more time, I am going to read the exact wording which opposes the quantity discount and the question of burden of proof.

Furthermore, what other organizations are opposed to it? The National Manufacturers' Association. All the miners' organizations of the country are opposed to it, particularly the American Mining Congress.

They very significantly got the Senate to adopt an amendment to the Robinson bill, exempting the mining business from the operations of the act. The dairymen's leagues in the country are opposed to the bill. The National Voluntary Groups Institute is opposed to the bill. What is the National Voluntary Groups Institute? It is composed of 105,000 retail grocers, druggists, and hardwaremen's associations. They are opposed to the bill, because they are united into voluntary cooperative organizations. They object to the quantity discount provision, or, rather, the requirement that the Federal Trade Commission shall effect a ceiling beyond which no quantity discounts can be made.

The Manufacturing Chemists' Association is opposed to it; the National Retail Lumber Dealers' Association, comprising 23,000 members; the National Retail Hardware Men's Association; the National Publishers' Association; the General Federation of Women's Clubs, composed of the housewives who have been at last aroused to the dangers of this situation; the General Federation of Women's Clubs, comprising 2,200,000 women, are opposed to it. I could go on and on and give you the names of many more very important organizations opposed to the bill, but my brief time at this juncture will not permit. Here are, however, some of them:

The Lehigh Valley Cooperative Farmers' Association, representing organizations of 1,800 farmers in the Lehigh Valley.

Associated Grocery Manufacturers of America; opposed to any limitations upon quantity price differentials; in favor of regulation of advertising allowances, and so forth.

National Coal Association, representing bituminous-coal producers, employing 450,000 men.

National Retail Dry Goods Association; membership distributes one-fiftieth of all consumer goods.

Mail Order Association of America.

Institute of Distributors; members large and small multiple-unit distributors.

M. E. Kingman, representing five nationally known rubber manufacturers.

Additional groups and interests who have either filed letters and briefs or appeared in opposition to the Robinson-Patman bill:

Evaporated Milk Association, representing all the evaporated-milk industry.

National Cooperative Milk Producers' Federation.

American Home Economics Association.

Witnesses at the Borah-Van Nuys hearing who stated their opposition to the Robinson-Patman bill:

Virginia H. Morrison, representing the Community Round Table of Illinois, membership of 500 women's clubs, church and welfare organizations.

Benjamin C. Marsh, executive secretary of the Peoples' Lobby, an organization having for its purpose the protection of the consumers.

John D. Miller, president of National Cooperative Council, an organization of farmer-owned buying and selling cooperatives with 1,450,000 farmer members.

George A. Boger, representing a small farm cooperative.

George H. Thompston, representing farmers' cooperative corporations in Vermont.

Chester R. Gray, representing the American Farm Bureau Federation.

Eugene B. Kingman, representing a number of rubber-goods manufacturers in Rhode Island and Connecticut.

Fred S. Davis, representing Food Distributors Association of Philadelphia; 12,000 retail grocery stores and 40 wholesalers.

Edgar Watkins, council for the National American Wholesale Grocers Association, representing about 75 percent of the wholesale grocery business.

Pacific Egg Producers Cooperative, Inc.

Texas Hardware and Implement Association.

American Cranberry Exchange, representing producers located in Massachusetts, New Jersey, Long Island, Connecticut, and Wisconsin.

Illinois Manufacturers Association.

Mr. Speaker, this is a bill that seeks to help a very small segment of our business population, retail grocers and retail druggists; that is all it seeks to do; but in the attempt to help this very small segment of our population it will derange all manner and kinds of business. It is very interesting to note what the Supreme Court said with reference to this type of legislation in the case of Borden Farms' Products Co. against Ten Eyck. Its statement is most applicable to the legislation at hand:

> The present case affords an excellent example of the difficulties and complexities which confront legislators who essay to interfere in sweeping terms with the natural laws of trade or industry. The danger of such efforts always is that unintended dislocations will bring hardships to groups whose situation the broad rule fails to fit.

This is exactly what is going to happen here; you are going to have dislocations all over the country. The cure will be far worse than the disease.

This bill has been frequently and improperly called an anti-chain-store bill. During all the 14 years of my service in this House I have been opposed to chain stores. Time and again I have offered resolutions providing for multiple chain-store taxes in the District of Columbia. I yield to no man in my opposition to chain stores when they misbehave. I hold no brief for them. This bill is not an anti-chain-store bill, it is an antimanufacturers bill; it is an anticonsumer bill; it is an antivoluntary groups bill; it is an antifarmers bill; it is an antiminers bill; it is an anti-almost everything, and that is why I am opposed to it. [Applause.]

The National Manufacturers' Association have stated:

> That the bills can no longer be considered as directed against chain-store methods of distribution. In our opinion, the bills now propose fundamental changes in the antitrust laws which should be undertaken only after complete study of their effect on the distribution of manufactured articles and their effect on ultimate prices to the consumer."

Mr. RANSLEY. Mr. Speaker, I yield the balance of the time at my disposal to the gentleman from New York [Mr. CELLER].

Mr. CELLER. I thank the gentleman from New York. I had not intended to take so much of his time.

Mr. PATMAN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield.

Mr. PATMAN. The gentleman stated a while ago that these large farm organizations had opposed the bill. For his information, I conferred with representatives of the farm organizations, and we have corrected the substantial objections they urged. The Judiciary Committee met and instructed the chairman to offer certain amendments which are favorable to the sponsors of the legislation and will correct every substantial complaint they have made.

Mr. CELLER. The gentleman from Texas did not ask me a question. I shall, nevertheless, attempt to reply to his statement. I again say the gentleman is indubitably in error. I have a letter from the American Farm Bureau Federation dated May 26, yesterday, in which they again voice emphatic protest against this limitation with reference to quantity discounts, and they ask me to vote against this bill in this language:

> If you do not get a satisfactory answer, we would urge you to insist upon changes in the language so as to allow of all economies of mass and cooperative buying to be passed on to the buyer.

If this language means anything, it means exactly what I told you.

Mr. PATMAN. Mr. Speaker, will the gentleman yield for a question?

Mr. CELLER. Let me complete my statement. I say these farm organiaztions want these amendments in the bill: Elimination of the quantity-discounts provision and elimination of that section placing the burden of proof on the defendant. With the adoption of these amendments, they would be in favor of the bill; and I would be in favor of the bill, too, because I am and always have been opposed to large aggregations, these large mass buyers, receiving benefits in the way of false discounts, false advertising allowances, false service allowances; I am opposed to that. If you will eliminate the evils I have indicated, I will then whole-heartedly support this legislation.

Mr. PATMAN and Mr. BEAM rose.

Mr. CELLER. I must yield first to the gentleman from Illinois.

Mr. BEAM. Mr. Speaker, I am interested from the consumers' standpoint. I followed the gentleman's statement very attentively. I would appreciate it if the gentleman would explain how the housewife and consuming public generally will be affected if this bill is enacted into law.

Mr. CELLER. The bill will provide in effect that everybody must get the same price. The gentleman from Texas has stated that repeatedly, and I will quote from his statements later on.

Mr. PATMAN. If the gentleman will yield, he certainly does not want to misquote me.

Mr. CELLER. I will quote what the gentleman said.

Mr. PATMAN. Read all of the statement. Do not read part of it.

Mr. CELLER. Look on page 3446 of the CONGRESSIONAL RECORD of March 9, 1936, where the gentleman said this:

> In truth and in fact, if the Robinson-Patman bill is enacted into law, all merchants will receive the same prices from the manufacturers that the chain stores now receive.

To the extent that the chain stores or other mass buyers may not receive cheaper prices by virtue of their quantity discounts the consumer will be compelled to pay that difference. I may say to the gentleman that the consumers' prices will be increased because those merchants who, because of efficiency and possibly greater capital and acumen, are able to buy more cheaply will not be able to pass the

savings on to the consumers, and to that extent the prices will be elevated to the consuming public.

If you want any authority on the subject, I would suggest that the gentleman take the volume of the Brookings Institute and get the opinion of Dr. Moulton, who says, in no uncertain language, that this bill will have a very disastrous effect on the consuming public and will have a tendency to raise and elevate prices.

Let me also quote in that regard some language of my distinguished colleague on the Judiciary Committee, Mr. MILLER, of Arkansas. He said, page 6622, of the RECORD, May 4:

> Quantity discounts * * * are economically sound. They stimulate efficiency in trade and industry and make possible lower prices to the ultimate consumer, and higher prices to the farmers and other producers of raw materials.

Therefore, I say, if quantity discounts will reduce consumer prices, then any interference with such quantity discounts by the Federal Trade Commission will to that extent hamper discounts and proportionately interfere with reduction in consumer prices.

While this bill would probably operate for several years, at any rate, as the wholesale grocers and druggists anticipate, and would actually force up prices to the consumer in these two lines and particularly on trade-marked articles, yet in other lines, gradually including grocery and drug items, the very clear and definite effect would be merely to split manufacturers into two classes, namely, those who manufacture and sell only to mass distributors and those who manufacture and sell only to ordinary wholesalers and retailers. When this division had taken place, the manufacturer who would sell only to mass distributors could then sell at any price he desired, and there would be no discrimination since he would not quote prices to ordinary wholesalers and retailers. Under these circumstances, the wholesaler and independent retailer would certainly be worse off than at present, and in many lines would be in a decidedly worse position, since at the present time many manufacturers who now sell to several classes of trade charge a part of their overhead to the mass buyer and thereby offer better inducements to the retailer.

Certainly, no true friend of the independent retailer could support a measure which would bring about the result herein described.

In the interval while this realinement was taking place, there would be great disruption among manufacturers who now sell both classes of trade. While some were deciding which road to take, others would move more rapidly and would get the mass buyers' highly desirable business. Undoubtedly, many manufacturers would be forced out of business. There was ample testimony in the hearings to this effect.

Certainly, this is no time either from the economic or the political standpoint to force a vote on a bill of such far-reaching consequences.

The gentleman from Texas [Mr. PATMAN] complains that I only read to the Members a part of his statements. I read before a very significant part. It proves that all merchants will be treated alike and will receive the same prices. Herewith appears his statement in full from page 3446 of the RECORD.

> In truth and in fact, if the Robinson-Patman bill is enacted into law, all merchants will receive the same prices from the manufacturers that the chain stores now receive. This should not only allow the consumers to save a great deal of money, but will cause competition to be keener and the number of retail outlets to reach the consumer with lower-priced goods will be considerably increased. It is not a subsidy for a small group, but it will be giving all independents the same prices, so that all their customers will be benefited along with the chain customers.

He now says that his statement deals only with sales of equal quantities and under similar conditions. The RECORD shows that he made no reference whatever to equal quantities or similar conditions.

Is this a price-fixing bill?

It would result in price raising and, in some cases, actual price fixing.

The Federal Trade Commission would be empowered to fix maximum quantities (one carload is the quantity mentioned) beyond which there could be no price reductions for additional quantities. This would have a price-fixing effect.

Then the restrictions put on the normal economies of quantity discounts would have a price-fixing effect.

Furthermore, the encouragement of customer classification which this bill gives would tend to force fixed differentials for wholesalers as compared with retailers, and retailers as compared with consumers, without regard to quantity.

The N. R. A. codes fixed prices. This bill seeks to reestablish an N. R. A. code. It implies, therefore, that prices will be fixed. If prices could not be fixed, the active proponents of the bill, the retail grocers and the retail druggists and the manufacturers of trade-marked articles, would not want the bill. The National Food Brokers' Association, the National League of Wholesale Fresh Fruit and Vegetable Distributors, and the United States Wholesale Grocers' Association, through Mr. Teegarten, in their testimony before our Judiciary Committee, admitted that this bill would replace the code. It would, therefore, reestablish price-fixing facilities.

The Federal Trade Commission can fix the ceiling as to quantity discounts. That indirectly is price fixing.

Mr. SABATH. Mr. Speaker, I yield 8 minutes to the gentleman from Texas [Mr. SUMNERS].

Mr. SUMNERS of Texas. Mr. Speaker, whatever may be the attitude of Members of Congress with regard to this proposed legislation, there must be unanimity of agreement that it is important proposed legislation.

I do not believe that any student of economics in this country can be unconcerned as to what is happening. At one extreme we find ourselves drifting toward an economic feudalism and on the other extreme drifting toward an attitude of dependence upon the Government or somebody else. These two tendencies together are identical, in my judgment, with certain things that happened long ago when the world came to live under a feudalism.

This bill proposes, and its purpose is definite, to try to give to the little man in business and industries a better opportunity to survive than he now has. No student of our system of government can fail to recognize that we have a definite choice. We cannot preserve a democracy in government unless we preserve a democracy in opportunity.

Mr. Speaker, the proposed legislation, in my humble opinion, is in the interest of private property. In days gone by private property was secure behind the line of defense held by smaller men in business and industry. Whenever there was a red agitation, these little fellows gathered about them their schoolmates, their friends, and their kinfolk established and held the line of defense. Behind that line private investments were safe. But under this drift the number of those defenders of private property is continuing to be reduced, and these aggregations are getting bigger and bigger, and are attracting more and more attention. If this thing continues, I venture my life on the prophecy the time is not far distant when some men, some opportunists, will take advantage of the psychology of the situation and led by a spirit of revolution will take over these big industries and aggregations of capital. If they have not the money to pay for them, they will use the printing press. Is it possible these great captains of business do not appreciate this peril or will ignore it?

There is not anything in human economy that makes men more dependable than responsibility. Perhaps that statement is not quite right. There is not anything that makes people dependable like responsibility or so willing to fight for a thing as having an ownership interest associated with responsibility. Human beings do not fight for a boarding house as they fight for their firesides. Somehow, some way, in America we have to begin to build from these two extremes toward the middle, and we have not a split second to spare. We have been going along here dreaming that conditions which obtain in other sections of the world and in other ages of the world have by some mysterious sort of process been excluded from us. That is a foolish dream. It may prove to be a fatal dream.

There is much to indicate that the generation in which we live must grapple with the same major problems which have challenged the genius of those who lived in the other great crises of the world and which wrecked nations and civilization in days gone by. There has not been an age in all the history of time as stupendous as this. There has not been a time that challenged men to be statesmen more than this age challenges us. It is not to protect an individual, it is not to give the little fellow more money, it is not to take something from somebody else, but it is to build strong again the foundation of our Government and our civilization. That is the job presently before us. You cannot have it with a few great economic overlords to whom everybody else owes economic allegiance. They are not reading the signs of the times, they are not looking beyond their noses. If they will but read the history of the past, if they will only study the signs of the present, those people who are not blinded by greed and lust for power would come in here and assist us.

Mr. PEYSER. Will the gentleman yield?

Mr. SUMNERS of Texas. I yield to the gentleman from New York.

Mr. PEYSER. Apropos of the gentleman's statement a moment ago, is there anything in the pending act that would compel a merchant or manufacturer to sell to the little man if the manufacturer or merchant did not want to do so?

Mr. SUMNERS of Texas. No; but let me tell you right now that if ever those people in this country defy public opinion and deny to the little man a chance to buy they will be committing economic suicide and the gentleman better tell them so. [Applause.] The American people are not going to stand for a few lords of industry destroying this country. [Applause.] I am not an enemy of these people; I am trying to be their friend. They are not more happy. They are not more secure. They are building for themselves an aggregate of opposition from which they will not escape. If they will not allow the existence of the small-business man, their only possible defenders, they, and they alone, will then be the authors of their own destruction.

[Here the gavel fell.]

Mr. SABATH. Mr. Speaker, I yield the balance of my time to the gentleman from Indiana [Mr. GREENWOOD], a member of the Rules Committee.

Mr. GREENWOOD. Mr. Speaker, I agree with the previous speaker that there is no room in this country for commercial feudalism because we live in a country of democracy, which some have called rugged individualism, where we believe in fair play for all groups and classes that are engaged in the same kind of endeavor.

Along this line, I recall a professor who was beloved very much, just before I left school, gave this instruction to his class:

> You may forget some of the general maxims of the law which I have taught you, but I want you to remember at all times that the supreme function of the law is to protect the weak and to restrain the strong.

This is the purpose of this bill. I trust the rule will be adopted and this bill enacted into law by the Congress.

The Clayton Act undertook to regulate monopoly and prevent unfair trade practices. There has grown up in the more than 20 years since it was enacted certain concentrations of wealth that are not satisfied with the economic power they have of concentrated credit and management. They desire the advantages of being able to buy at a lower figure than other competitive classes that are entitled to the same treatment, and there have grown up certain practices which this bill proposes to remedy. It is contended that because of quantity purchases they should have great discounts. This bill does not undertake to destroy that right, but it does say that another class or group that buys the same amount in quantity shall have the same privilege of purchase. If a bunch of farm cooperatives organized into an association buys as much in quantity as a chain store, they should have the same privileges of a quantity discount, and this bill undertakes to classify and treat them in the same way.

There are certain schemes that have been carried on of allowing fictitious brokerage fees. Some firm that buys in large quantities goes to a manufacturer and says he would like to buy at a fixed price. The manufacturer says, "I cannot sell you at that price, because this is my price", and he says, "I know, but I am giving you my exclusive business and it can be arranged by some agent of mine coming to you and by your paying him a brokerage fee."

This is a false and fictitious fee, and in order to end such trade practices this bill undertakes to eliminate fictitious brokerage fees.

The same is true with reference to service allowances and advertising fees used as a subterfuge to give an unjust discount to someone who uses coercion and says to the manufacturer, "We are buying altogether from you and taking a large portion of your output and therefore you must give us this advantage through this subterfuge."

This bill undertakes to correct this situation.

My friend and colleague from New York spoke of the N. R. A. I am one who believes that the National Recovery Act justified its enactment. [Applause.]

The fair-trade practices that grew up in this country as a result of that law are still going on and it is proposed to continue them with reference to certain phases of the production of goods and distribution to retailers and wholesalers. We must have trade practices of fair competition.

Farm cooperatives will not be injured by this bill. If farm cooperatives that are associated together can buy the same quantity from a manufacturer, they will receive the same treatment as a chain-store or mail-order houses or any other centralization of economic power.

Labor is never injured by fair-trade practices. Labor will take care of itself if these fair-trade practices are enacted into law.

My friend from New York was somewhat excited over the question of the way the Federal Trade Commission shall hear these cases. The gentleman from New York wanted to adopt the rule used in criminal procedure, I presume, that a man to be found guilty must be proven guilty beyond reasonable doubt. The fair procedure in a proceeding of this kind is that used in civil proceedings where a case is made out by preponderance of the evidence.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. GREENWOOD. I prefer to finish my statement and then I shall be pleased to yield.

This bill provides that a prima-facie case shall be made out against a manufacturer or wholesaler and after a prima-facie case is made out the burden shifts to the other party, which is offset by proper proof. This is the proper procedure for this kind of case. This is not a criminal case, this is a case between two classes of businessmen and when they have satisfied the rule as to burden of proof, then the wholesaler or the one against whom the complaint is made shall come in and rebut that prima-facie case by introducing his evidence. This is the way it should be handled and in a judicial way it is all in the hands of the Federal Trade Commission.

I think many organizations have been unduly aroused and promoted to a state of excitement by those who have been engaged in these practices, and this is the reason some of these organizations, perhaps, have undertaken to persuade the Members of the House that there is danger in this bill, because the opposition has been promoted. When this bill is understood I cannot conceive that any labor organization, and I have been a friend of labor, or any farm organization, and I have been a friend of those organizations, will have any objection, because the men with whom they transact business, the small merchants in the city and in the town, will receive fair treatment and when any organization is treated fairly there can be no reasonable objection offered.

Mr. MAIN. Mr. Speaker, will the gentleman yield?

Mr. GREENWOOD. Yes; I yield.

Mr. MAIN. Is it not true that the cooperatives are concerned over the matter of their rights to give discounts rather than receive them?

Mr. GREENWOOD. I am not able to say about that. I do not know of any such desire on part of cooperatives.

Mr. CELLER. Will the gentleman yield?

Mr. GREENWOOD. I yield.

Mr. CELLER. The gentleman may or may not be aware of the fact that in the Senate bill very many penal provisions are embodied. Would the gentleman be agreeable to have the same words in reference to the burden of proof placed in this bill?

Mr. GREENWOOD. I am not discussing the Senate bill, I am discussing the bill before the House which has no penal provisions. The conferees can attend to that matter, and I do not know that the House would yield in that respect.

Mr. GIFFORD. Will the gentleman yield?

Mr. GREENWOOD. I yield.

Mr. GIFFORD. Might it not be very difficult to sustain the burden of proof in the matter of perishable commodities which might be sold at a lower price, and the Federal Trade Commission might be late in considering it?

Mr. GREENWOOD. It is true that complications can arise with reference to commodities, but I believe the law gives the Federal Trade Commission sufficient power to make regulations with reference to commodities.

Mr. GIFFORD. But the burden of proof is on the culprit.

Mr. GREENWOOD. Not until a prima-facie case is made out. That will be for the Federal Trade Commission to decide, and not for the gentleman or myself.

The SPEAKER. The time of the gentleman from Indiana has expired.

Mr. SABATH. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. MILLER. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 8442) making it unlawful for any person engaged in commerce to discriminate in price or terms of sale between purchasers of commodities of like grade and quality, to prohibit the payment of brokerage or commission under certain conditions, to suppress pseudo-advertising allowances, to provide a presumptive measure of damages in certain cases and to protect the independent merchant, the public whom he serves, and the manufacturer from whom he buys from exploitation by unfair competitors.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. MEAD in the chair.

The Clerk read the title of the bill.

Mr. MILLER. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Without objection, it is so ordered.

Mr. MILLER. Mr. Chairman, I yield to the gentleman from Texas [Mr. PATMAN] 30 minutes.

THANKS TO SPEAKER AND OTHER LEADERS

Mr. PATMAN. Mr. Chairman, those of us who are interested in this legislation appreciate the fact that the Speaker of the House, the majority leader, and the Rules Committee and the Judiciary Committee have cooperated with us in our desire to get this legislation properly considered.

The bill was introduced almost a year ago. The Judiciary Committee held hearings lasting over several months. The questions involved were discussed by those against as well as those in favor, and the committee hearings are available, printed in two volumes, to every Member of the House. Every person who desired to be heard in behalf of the legislation or against it were heard by the Judiciary Committee.

NOT PRICE FIXING

This is a bill unlike the bill referred to by the distinguished gentleman from New York [Mr. CELLER] as a price-fixing bill. It is just the reverse. It is opposed to price fixing. It is an anti-price-fixing bill. The only time I have ever said that manufacturers would give the same price to retailers is in the case where the independent is in a position to purchase the same quantity as the corporate chains; and if the gentleman would read the entire speech, he would find that statement to be true. We are making no effort in this bill to fix the price.

NOT CLASS LEGISLATION

It is not a bill that discriminates against any class or group. It is not a bill that will shelter the independent merchants of this country or reward the inefficient retail merchant, but it is a bill to give equal rights, equal privileges, and equal benefits to all alike who are in the same position, purchase the same quantities under the same circumstances. I venture to say that not one member of this Congress will get on this floor and say that he is opposed to the main purposes of this bill. Some will say that they are not opposed to the main purposes, but that this "particular bill" is not the bill they want. Which bill do they want? Have they ever introduced a bill? Have they ever endorsed any particular bill? No.

PURPOSES OF BILL

What are the objectives of this bill? Mr. Chairman, there has grown up in this country a policy in business that a few rich, powerful organizations by reason of their size and their ability to coerce and intimidate manufacturers have forced those manufacturers to give them their goods at a lower price than they give to the independent merchants under the same and similar circumstance and for the same quantities of goods. Is that right or wrong? It is wrong. We are attempting to stop it, recognizing the right of the manufacturer to have a different price for a different quantity where there is a difference in the cost of manufacture. There is nothing in this bill to prohibit it, but the bill expressly provides that the manufacturer may have a difference in price where there is a difference in cost of manufacture. There is only one exception to that, which I shall discuss after I have finished discussing the other purposes of the bill, and that is advertising allowances.

One great concern in America last year compelled manufacturers to pay it $8,000,000 in pseudo-advertising allowances and pseudo-brokerage charges. That amount of benefits the independent merchants of the country were not entitled to receive from the same manufacturers, purchasing the same quantity under the same conditions. You are in favor of giving the citizens the same right as the corporations in this country, and that is all that we are asking in this bill.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. Yes.

Mr. COX. For an observation. In effect that practically forces the independent buyer to provide the fund that goes by way of rebate and advertising to the big buyer, giving him an advantage.

FARMER REPRESENTATIVES FROM NEW YORK CITY

Mr. PATMAN. That is right, giving him an advantage in that way. Another is this dummy brokerage. Let me tell you something about the farmers. You hear talk about saving the farmers. Are we going to have to go to the heart of New York City and get Congressman CELLER and Congressman PEYSER and Congressman BLOOM to come down here and speak for the farmers of this country? They are the principal opponets of this bill. They appeared before the Rules Committee in opposition to a rule. In the investigation we discovered the corporate chains were strong enough to use a few farmers as a front, or a stuffed shirt, as the mouthpiece for them. The investigation disclosed that, and the officials of the chain stores were so pleased with it that they referred to them as the "cornstalk brigade." So I guess Congressman CELLER and Congressman BLOOM and Congressman PEYSER would like to have the use of another cornstalk brigade here before Congress. They are not going to fool the farmers or the representatives of the farmers.

DUMMY BROKERAGE

Take this dummy-brokerage allowance.

There is a merchant in Virginia representing potato growers. He sells thousands of cars of potatoes a year, and

our investigation has disclosed that he had a secret contract with a large mass corporate chain buyer by which he obligated himself to sell every car of those potatoes of those farmers to this large buyer. At what price? Oh, at the market price. That sounds good, but fortunately for the large mass buyer, he was big enough to make the market price. They do make the market in those localities. This man representing the farmers sold those potatoes to that mass buyer, fixing the price himself, and what did he get out of it? He got a secret rebate of $2.50 to $5 on every car that the farmers knew nothing about, and the trade was, "If I don't deliver you every car, for every car that I do not deliver you I will be penalized $5." That is the kind of dummy-brokerage arrangement we are trying to prohibit in this bill.

This is a bill to protect the farmers of this country, I say to my distinguished friends from the heart of New York where holders of privilege reside. I heard one witness before the Rules Committee say that 90 percent of the people affected by this bill live in two congressional districts in New York City. I do not take issue with that statement. I believe it is absolutely true, that 90 percent of them live in those two congressional districts. What are they asking for? They are asking these special rights and privileges and benefits that they are not entitled to enjoy as a matter of right and justice be continued. How? By openly fighting? The representatives of the special interests will not openly fight them, but you will never get a bill that they will favor. There is something wrong with every bill that is presented. We are trying to prevent the dummy brokerage, prohibit a man from doing something for hire against the interest of the person that he is supposed to represent.

QUANTITY PURCHASES

Next is quantity purchases. This bill expressly provides that there shall be price differentials, but against discrimination; a different price for a different quantity, if there is a difference in cost of manufacture. But there is one exception to that. That exception you will approve, I believe, if you understand it as those of us who have been sponsoring this bill understand it.

RAILROAD REBATES

Fifty years ago there was a clamor in this country for legislation to prohibit rebates and discrimination in freight rates, to prevent favoritism in freight rates. The people of this country demanded that the Congress pass a law that would stop such discriminatory practices. The Congress met. The argument then was made on the floor of this House that will today be made against this bill. This argument was made:

> Oh, if you do that, these big fellows will not get these cheap freight rates, and that will cause prices to go up, and the consumer will pay the bill. It will raise prices hundreds of millions of dollars a year.

They made those same arguments against that law that they are making against this bill today. But the people were aroused. They were against this cheating and chiseling for the purpose of helping a few large buyers, through discriminatory freight rates, create a monopoly. So Congress passed that law creating the Interstate Commerce Commission. The Interstate Commerce Commission said:

> Hereafter we are going to fix the carload as the quantity limit, and whoever causes one carload to be transported will pay the same price per car for transportation as one who causes 100,000 carloads to be transported.

The large shippers came in. They said:

> If we have a trainload shipped from Chicago to New York in one direct run, it will only cost about 50 percent per car for transportation that it would cost if you shipped in and out in single cars from Chicago to New York.

They were right about it. The Interstate Commerce Commission did not take issue with them, because they knew it was the truth; but the Interstate Commerce Commission said:

> Yes; but if you permit that you will create a worse condition in this country. We have to look into the future. If we permit that, a few large shippers will get all the special prices and the large dealers will destroy the small dealers and we will have a monopoly in this country, and we are not going to permit it. So we are going to stay by that one-carload-quantity limit.

The Supreme Court of the United States, in the case of *I. C. C. v. B. & O.* (145 U. S. 263), although not passing on the question directly, expressed itself in favor of what I am saying today. This is what they said:

> If, for example, a railway makes to the public generally a certain rate of freight and to a particular individual residing in the same town a reduced rate for the same class of goods, this may operate as an undue preference, since it enables the favored party to sell his goods at a lower price than his competitors, and may even enable him to obtain a complete monopoly of that business. Even if the same reduced rates be allowed to everyone doing the same amount of business, such discrimination may, if carried too far, operate unjustly upon the smaller dealers engaged in the same business, and enable the larger ones to drive them out of the market.

That is what the Supreme Court of the United States said. I will read what the Commission said in another case, the *Anaconda Copper case* (19 I. C. C. 592):

> Whatever difference there may be in cost to the carrier between traffic in trainloads and traffic in carloads, it appears to the Commission that to give greater consideration to trainload traffic than to carload traffic would create preferences in favor of large shippers, and be to the prejudice of the small shippers and the public.

Those are two expressions, one from the highest court of this land and the other of the Interstate Commerce Commission, saying that you must not give special rates to trainloads, admitting there is a difference in cost per car, because if you do it, it will create a monopoly in this country and the large dealers will be enabled to crush and destroy the business of the small dealers, and that is against the public and against the consumers.

That is exactly the point involved in this bill. We permit differences in price for different quantities, based upon cost up to one point. What is that point? To the point where a few large buyers can buy at such a low price that they can create a monopoly, just like they had a chance to create through railroad freight rates. We placed a provision in this bill which provides that when that stage is reached the Federal Trade Commission may fix a quantity limit on that particular commodity. The Federal Trade Commission will have nothing to do under this provision unless there is danger of monopoly. I am sure you are in favor of curbing and stopping monopolies. If the Commission believes there is danger of monopoly, then the Commission can fix a quantity limit on that particular commodity, just as they did on freight rates, whether it be 1 carload or 10 carloads, or a few pounds or a thousand pounds, depending on the commodity. It makes no difference. They will be permitted to fix quantity limits above which anyone purchasing that particular quantity receives the same price under the same conditions.

That has already been approved by the Supreme Court of this country and by the Interstate Commerce Commission. It is absolutely fair. Who is there on this floor who will say we should not stop a monopoly, and if it is necessary to do it, that we should fail to give the Federal Trade Commission this power which would permit them to curb a monopoly in the same way that the Interstate Commerce Commission was given the power to curb that monopoly?

A SUMMARY OF THE MAIN PROVISIONS

In this bill, Mr. Chairman, we are asking for those main points, to eliminate these pseudo-advertising allowances, given only for the purpose of favoring the large corporate chains. We are asking that the dummy brokerage be eliminated to the extent that it cannot be used as a bribe to make one person go back upon the person who employed him and betray him. That is, if you are against deceit and trickery and treachery, you certainly ought to be against this dummy brokerage.

We are providing further that quantity purchases shall be permitted up to the limit where a monopoly will possibly be caused; and then the Federal Trade Commission may, not shall, may adopt rules and regulations that will prohibit that monopoly from being created. These are the main points in the bill.

FARMERS' ORGANIZATIONS

Farmers' organizations sent letters to all the Members saying they were opposed to certain things; I learned through their representatives in Washington 2 or 3 weeks ago they were opposed to the basing-point provision of the bill, section 5. So I took it up with the Judiciary Committee. The committee members had heard similar complaints and the committee at a meeting agreed to cut out the basing-point provision. This silenced a lot of the opposition. The basing point is not directly related to what we are trying to do, as I view it, so it was all right to cut that out.

Mr. SIROVICH. What section of the bill was that?

Mr. PATMAN. Section 5.

Mr. SIROVICH. Will the gentleman explain it a little?

Mr. PATMAN. I do not want to explain it, for it is out of the bill, and to discuss it would only be confusing and unnecessarily take up my time.

The next ground of opposition by the farm organizations was the classification section. They were opposed to the classification of wholesalers and retailers. The committee cut out this provision. These were the two important objections raised by the farm organizations. I met with their representatives and we talked over their other objections. I showed them where in the case of their other major objections they were mistaken, and they frankly admitted they were mistaken about it.

There is no reason on earth why any spokesman of any farmer or any farm group or anyone who wants to favor the farmers of this country should not vote for this bill. It is in the interest of and for the protection of the farmers, the wage earners, and the consumers. It is not against their interest; I know that.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield.

WILL NOT INCREASE PRICES

Mr. BANKHEAD. Much objection has been urged against this bill on the ground it would tend to increase retail prices to the average consumer of the country. Will the gentleman discuss this phase a little?

Mr. PATMAN. I am glad the gentleman mentioned this. One witness appeared and out of a clear sky made the statement that this bill, if passed, would cost the consumers of America $750,000,000 a year. He had nothing on which to base his statement. If the corporate chains of America save the consumers $750,000,000 a year by selling only 25 percent of the goods that are offered for sale, whenever the independents, who sell 75 percent, get the same price as the chains they will be able to save the consumers of America billions of dollars; and this bill, instead of costing the consumers money, will save them money, will cause competition to be keener, and everybody who buys will get the benefit of the lower prices, and not just those few. Incidentally, the gentleman who made that statement is drawing $110,000 a year as salary and bonus from a corporate chain concern, and he possibly considers that his large salary and bonus are at stake, in jeopardy, and he would like to save them. He knows that if his company has to pay the same price as the independents for the same quantity, and that he cannot chisel and racketeer, that maybe that bonus will be in jeopardy, or that large salary he gets will be in jeopardy, and he was trying to save it.

LARGE SALARIES

Another large corporate chain pays a comparatively few of its officers and directors $1,996,000 a year, pays several of them over $100,000 a year, one of them $180,000, another $140,000, another $52,000, and on down to $25,000. Perhaps they feel their large salaries and bonuses are in jeopardy as long as this bill is pending. This same concern that is paying its officials approximately $2,000,000 a year received $8,000,000 during the particular year of its business we examined in secret rebates and in special discounts that the independent merchants of this country did not receive. They want to keep their secret rebates in order that these big salaries can be paid to them. It is strictly a selfish, greedy proposition. They have no vision; and the Good Book says, "Where there is no vision the people perish." These men are willing for this country to perish so long as they can continue to draw those large salaries and bonuses.

Mr. DOCKWEILER. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield.

Mr. DOCKWEILER. Referring again to the $8,000,000 bonus received by the particular company to which the gentleman referred, I was a member with the gentleman of the committee investigating chain-store activities. Did we not discover that the dividend requirements of this concern were met entirely by these bonuses and allowances, and that they did not even have to earn the dividend out of regular legitimate sales, but could pay it and cover it entirely by these bonuses and rebates?

Mr. PATMAN. The gentleman's statement is correct.

Mr. FLETCHER. Mr. Chairman, will the gentleman yield?

WHO WILL PROFIT BY DEFEAT OF THIS LEGISLATION?

Mr. PATMAN. I am sorry, I cannot yield. Much talk is heard about the consumer being entitled to the lowest price. I thoroughly agree that the consumer should be given the lowest price possible, consistent with the interests of this country. This bill is not going to raise prices, it is going to lower prices; but those who want to keep their special privileges and big salaries are trying to build up a psychology in this country that the bill will increase prices. They are doing this in order that they may profit by the defeat of this legislation.

WHO ARE THE CONSUMERS?

Who are the consumers of this country? There are 26,000,000 people in America dependent upon agriculture for a livelihood; there are 36,000,000 dependent on mechanical and manufacturing pursuits for a livelihood; there are 18,000,000 people dependent upon distribution and trade; 9,000,000 dependent upon the professions; and 11,000,000 dependent upon transportation and communication. Is a farmer who goes into a store as a consumer benefited by a destructive price? No; he is ruined by a destructive price, for if the farmer does not get a good price for what he produces he cannot buy what is manufactured by the 36,000,000 people in the mechanical and manufacturing pursuits. If the chains beat down and destroy his price to where he does not have purchasing power, then the wage earners cannot buy because the farmer cannot pay for what the wage earners manufacture.

It destroys their purchasing power. The farmers cannot buy, therefore our whole country suffers. The only way for America to be prosperous is for every group and every class and every section of this country to be prosperous. We cannot be prosperous as individuals alone. We must be prosperous together or there will be no prosperity. [Applause.]

LOWEST PRICE

Whenever you talk about a low price for the consumer, we say "Yes, consistent with all these other things." First, that the farmer or the producer of the raw material has received a fair price for what he produces. Second, the wage earner who converted this raw material into the finished product received a fair wage; and, third, that there was a fair cost added for the costs of distribution. A cost lower than that is destructive to our country and is not a policy that will build up the country.

HOW FARMERS AFFECTED

Let me show you how this affects the farmer. The price of perishable products today is fixed by a few large mass buyers. Whenever you load your potatoes, your tomatoes, your spinach, or anything that is perishable into a refrigerated car, that car moves toward an eastern market. These large mass buyers sit back. They know the car is coming. They know when it was shipped and they know the train it is coming on. They know where it was last night, and they know where it will be today. They know the market it will reach and when it should reach the market. They sit back and when the car reaches a certain market at a certain time, they will take action. Those products can only last so long before they will begin to deteriorate and eventually

become ruined. Those poor farmers in Colorado, California, Texas, and Florida are sitting back there waiting to sell their products. Who are they going to sell to? Just one of two, three, or four large buyers. Those buyers sit back and wait until the time comes when the farmers have to sell or else pay the freight and lose what they have shipped in the car. You know what happens. They sell the perishables for what they can get in order to pay the freight. That is the way the perishable produce market has been destroyed in this country. Then they take what they have stolen and racketeered from the farmers and place it in the show windows of the cities and try to use that as a bait to get people to trade with them, pretending all the time that they are the friend of the consumers. They are not the consumers friend, because the consumers of America are interested in good prices and good wages. That is the only way this country can be built up again.

DEBTS

The people of America today owe $250,000,000,000. How are they going to pay these debts? Our tax burden has been fixed for the next 40 years, and I refer to the minimum tax burden, not the maximum. The minimum has already been fixed for the next 40 years. How are we going to pay $250,000,000,000 in debts and taxes for the next 40 years? Can we pay them with low prices and low wages? If you reduce wages 50 percent and reduce prices 50 percent you double the debt burden of this country in what the people have to pay with. You double the tax burden for the next 40 years. So the only way that America will ever recover is by good wages and good prices, the lowest possible price to the consumer, consistent with a living wage to the farmer and the wage earner, together with a fair cost for distribution. Any other price is destructive and will not build up this country.

GOLDEN RULE

The objectionable amendments, as the gentleman from Arkansas [Mr. MILLER] stated, will be taken from this bill. When that is accomplished the bill is just one demanding honesty. It is one which enforces the Golden Rule in business. It is the adoption of the policy of live and let live. That is the only kind of policy we in this country are entitled to and is the only one that will permit us to live and let live.

Mr. CELLER. Will the gentleman yield?

Mr. PATMAN. I shall be glad to yield to the gentleman if he will correct his statement.

Mr. CELLER. No. I stand on the statement and will repeat it to the gentleman. But will the gentleman agree to the committee amendment with reference to classification of buyers?

Mr. PATMAN. Will the gentleman support the bill then? I suggested to the Rules Committee that I would favor eliminating the classification section.

[Here the gavel fell.]

Mr. GUYER. Mr. Chairman, I yield the gentleman 10 additional minutes.

Mr. ROBERTSON. Will the gentleman yield for a question in reference to perishables?

Mr. PATMAN. Perishable products?

Mr. ROBERTSON. Subsection 3 of section 2 allows price differentials on perishables that are deteriorating.

Mr. PATMAN. Yes. This does not prohibit price changes. You may change your price every minute of the day so long as you are not using it to discriminate in favor of one customer as against another one. [Applause.]

Mr. ROBERTSON. Suppose one merchant would buy one barrel of apples and you would sell it to him at $3 a barrel. Suppose a chain store would say, "We will take the 10,000 barrels that you have for sale."

Mr. PATMAN. There is a difference in the cost of distribution, and you would have a right to permit a differential in price where there is a difference in manufacturing and distribution cost. There would be a difference in the cost of distribution in the case to which the gentleman refers, and they would have the right to make that change in price, but if the same amount was sold to a competitor they would have to give him the same price. If the sales are made in different markets there cannot be a discrimination. Prices can be changed any time so long as it is not done for the purpose of discriminating.

CONGRESSMAN CELLER MISTAKEN

The gentleman from New York is mistaken in that he took part of my statement and did not read all of it. You can oftentimes get statements confused in that way.

Mr. MILLER. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield.

Mr. MILLER. To clarify the situation referred to by the gentleman from Virginia [Mr. ROBERTSON] I would like to call his attention to the provisions of subsection 2 on page 6, and answer his question specifically with respect to apples. It is entirely possible that you could sell 275 barrels of apples to a customer at a cheaper rate than you would sell 10 barrels because of the difference in delivery and service that the buyer would render.

Mr. ROBERTSON. You are getting on thin ice there.

Mr. MILLER. No; we are not on thin ice there.

Mr. ROBERTSON. You might be selling in carlots and does the gentleman mean to say you could not sell 10 carlots of apples at a cheaper price than 1 barrel or 1 carload?

Mr. PATMAN. If the gentleman wants to vote for this bill——

Mr. ROBERTSON. It is not a question of whether we want to vote for it or not, we want to know what your bill means to the apple producers of the country and we should be frank about it.

Mr. PATMAN. It simply enforces common honesty in business. It prohibits things that every man should be prohibited from doing.

CONGRESSMAN CELLER DID NOT BRING OUT MY ENTIRE STATEMENT

Now, with regard to the statement made by the distinguished gentleman from New York [Mr. CELLER], here is what I said. I said that the manufacturers would have to treat their customers alike and give them the same price, and I still say that. For what? For the same quantity under the same conditions. This is the part that the gentleman did not bring out. He simply failed to tell it all.

The manufacturers will not fix prices between themselves. If you are a manufacturer of shoes and you sell to one person a carload of shoes for $2.50 a pair, based upon carlot quantities, you will be compelled to sell his competitor across the street, if you have selected him as a customer, at the same prices under the same conditions. Is not this fair, is not this honorable, is not this right? This is all we are compelling by this bill. We are not saying that the manufacturer must give everybody the same price. We are saying that whenever a manufacturer selects a customer—and the manufacturer has the express right under this bill to select his own customers, and I would not repeal that right were it within my power—but when he selects these customers, we say to him, "Mr. Manufacturer, you have got to give them the same prices under the same circumstances; you are not going to be allowed to discriminate against one for the purpose of destroying him as a competitor."

Mr. SIROVICH. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from New York.

COOPERATIVES FOR BILL

Mr. SIROVICH. The Atlantic & Pacific Co. owns about 18,000 stores throughout the country and through mass purchase is in a position to buy so cheaply that they can discriminate against every individual store in the Nation. How can we protect the small stores throughout the country and put them in a position to compete and force the large manufacturers?

Mr. PATMAN. By giving them the same rights under the same circumstances.

They now have co-op organizations, and the gentleman was so bold as to state that the co-ops are against this. It is a very foolish co-op that would be against this bill. They

have no protection on earth under existing law, and if this bill is not passed they will have no protection.

Mr. SIROVICH. Would not your bill assist the small stores in going into a cooperative in order to get the same opportunities?

Mr. PATMAN. Certainly; and it will be helpful to the cooperatives.

They even referred to the fact that the co-ops are against this when in the Northwest they organized a co-op for the rubber-footwear industry. They wanted to buy rubber footwear on the same basis that the chains were buying rubber footwear from the same manufacturers. So they went in together, and they offered to buy the same quantity and pay the same price, and the manufacturers said, "We are tied up with the chains, and we cannot do it; we have got to charge you more." There is no law to protect them, but this measure will furnish them protection. It will compel these manufacturers, if they select a purchaser as their customer, to treat such customer fairly and squarely and give him the same rights, benefits, and considerations under the same circumstances, but no special benefits.

Mr. PALMISANO. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. For a question; yes.

Mr. PALMISANO. I am in sympathy with the object of the bill, but I should like to know if the gentleman from Texas can explain what effect this bill would have on dealings within the limits of a particular State.

Mr. PATMAN. Of course, it will not apply to intrastate commerce. There is only one exception where it could apply, and that is where the transactions within a State would affect the price of the commodity that was sold interstate, on the same theory as railroad freight rates. This is the only way it could apply to intrastate transactions.

Mr. PALMISANO. The fear I have is that the monopolies may place their orders within a State for their particular stores in that one State.

Mr. PATMAN. The gentleman might as well get that doubt out of his mind, because it will not happen. They cannot do that if this bill becomes law.

Mr. PALMISANO. I hope not.

Mr. PATMAN. They will be absolutely protected.

Mr. TAYLOR of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield.

Mr. TAYLOR of South Carolina. There has grown up a practice on the part of manufacturers of making certain brands of goods for particular chain stores. Is there anything in this bill calculated to remedy that situation?

Mr. PATMAN. I only have a very short time, and I must finish my statement. I have not time to discuss that feature, but the bill will protect the independents in that way, because they will have to sell to the independents at the same price for the same product where they put the same quality of merchandise in a package, and this will remedy the situation to which the gentleman refers.

Mr. TAYLOR of South Carolina. Irrespective of the brand.

STAND BY COMMITTEE

Mr. PATMAN. Yes; so long as it is the same quality. I hope you will stand by this committee. The committee has worked hard on this bill.

They have spent months on it. The gentleman from Arkansas [Mr. MILLER], the gentleman from Iowa [Mr. UTTERBACK] and the gentleman from Nebraska [Mr. MCLAUGHLIN] and others have spent much of their time on it. This is not my legislation, this is not my bill, this is a bill for the Members of the House sponsoring the legislation. Members on the floor today are sponsoring this legislation who sponsored it before I came to Congress.

It is not new legislation. Let us see to it that they do not put any weasel phrases into the act that destroyed the act of 1914. There will be all kinds of amendments offered here. They will contain weasel words, weasel phrases such as destroyed the Clayton Act in 1914. Let us reconstruct and revise that law and give the independent merchants a fair, square deal. [Applause.]

THE LOW PRICE CONSUMERS SHOULD RECEIVE

Consumers should receive the lowest price possible. That does not mean, however, that we should not look into the future and determine the effect of present destructive policies if permitted to continue. For instance, because a corporate chain is bribing or baiting their customers with real low prices while their competitors are being destroyed does not mean that the consumers will continue to get those prices after competition is destroyed; it means that the sky will be the limit as to prices and the people will pay what monopoly says they should pay. On the other hand, the farmers will be compelled to accept the price for what they produce that monopoly says they must accept. The wage earners will be compelled to accept the wage that monopoly fixes. Such a policy in the direction of monopoly is destructive to the best interests of our country. It just happens that the independent merchants are victim no. 1. Farmers and wage earners will be victim no. 2, and the consumers of the country will be victim no. 3.

The consumers are entitled to the lowest price consistent with a fair price to the producer of raw materials, a fair wage to those who convert the raw materials into the finished product, and a fair cost of distribution to the consumers. Remember that the 26,000,000 people dependent upon agriculture, the 36,000,000 people dependent upon mechanical and manufacturing pursuits, the 11,000,000 people dependent upon transportation and communication, the 9,000,000 people dependent upon professional services, and the 18,000,000 people dependent upon distribution for a livelihood are also consumers and they are interested in fair prices and fair wages.

NUMBER OF PEOPLE DEPENDENT UPON DIFFERENT TRADES AND PROFESSIONS

A rough approximation of the number of persons in the United States dependent in 1930 on each main class or general division of industry and service

General division of industry or service	Gainful workers, 1930		1930 population, distributed by industry as were the gainful workers in 1930
	Number [1]	Percent distribution	
Total	48,829,920	100.0	122,775,046
Agriculture	10,483,917	21.5	26,360,137
Forestry and fishing	268,992	.5	676,337
Extraction of minerals	1,156,377	2.4	2,907,526
Manufacturing and mechanical industries	14,341,372	29.4	36,059,093
Transportation and communication	4,438,413	9.1	11,159,682
Trade (wholesale and retail)	7,530,064	15.4	18,933,145
Public service (not elsewhere classified)	1,049,576	2.1	2,638,991
Professional service	3,408,947	7.0	8,571,253
Domestic and personal service	4,814,573	9.9	12,105,476
Not specified industries and services	1,337,689	2.7	3,363,493

[1] Figures are from table 1 of ch. 7 of vol. V of the Fifteenth Census Reports on Population—the General Report on Occupations.

NOTE.—In this approximation, it is assumed that in the United States as a whole, in 1930, the number of dependents to each gainful worker was the same in each general division of industry and service.

The above table was taken from the office records of the Bureau of the Census.

HOW GREEDY GET CONTROL

There is not a danger of monopoly at this time in every line of business, but in the lines of business in which corporate chains are engaged there is already a monopoly in many of the favorite areas in this country. In determining the extent that corporate chains have gone in the direction of monopoly, comparisons should be restricted to the areas in which the corporate chains operate and the lines of business in which they are engaged. For instance, in community A, there is a million dollars' worth of retail distribution business a year. Let us suppose that the corporate chains only do 25 percent of that business, or $250,000. Without further

investigation you would say that there is no danger of monopoly, but suppose that the $250,000 of business represents all of the grocery business in that community for that year and that is the only business in which the chains are engaged in that area. That would show conclusively that in the grocery business in that area that they have a complete monopoly although they are only doing 25 percent of the total retail business, which includes all retail distribution.

Suppose a corporate chain has 10,000 outlets, and it opens a thousand new outlets. These thousand new outlets are in competition with local merchants who have spent their lifetime building up goodwill and the business in which they are engaged. This corporate chain desires to destroy the competitors around these thousand new stores. Under the existing system all they have to do is to let these thousand stores have all their secret rebates obtained by reason of their purchases for all their 11,000 stores and this will enable the thousand new stores to soon destroy their competitors. When these competitors are destroyed, a thousand more stores can be opened and their competitors destroyed in a similar manner. The losses in one place are made up not only by the secret rebates obtained on total purchases but also on higher prices charged to consumers in areas where they already have a monopoly of business where their competitors have already folded up.

RATIO OF BUSINESS DONE BY CORPORATE CHAINS IN WASHINGTON

Chains and independents, and other types of operation

(Census of American Business—Retail Distribution, 1933)

DISTRICT OF COLUMBIA

Kind of business	1933			1929, percent of total sales by chains
	Total sales	Sales by chains [1]	Percent of total sales by chains	
Variety stores	$4,892,000	$4,709,000	96.1	93.3
Shoe stores	4,972,000	3,014,000	60.6	43.9
Grocery stores (without meats) [2]	8,559,000	6,840,000	79.9	80.2
Filling stations	12,318,000	6,913,000	56.1	47.6
Drug stores	15,494,000	9,719,000	62.7	60.1

[1] Includes local, sectional, regional, and national.

[2] Represents only 17.7 percent of grocery-store business; combination stores with meats represent 82.3 percent.

The above facts were given to me by the Bureau of the Census.

The same situation prevails in other large cities of comparable size.

DANGER OF MONOPOLY

At first, variety stores represented the principal line of business operated by chains. Then groceries, shoes, drugs, and others have been embraced. As one line of business is taken over and the areas producing the best volume are covered another line of business is immediately taken up for the same purpose. The Bureau of the Census discloses that in 1933 the variety chain stores in the District of Columbia were doing 96 percent of this business, chain shoe stores 60 percent, chain grocery stores 80 percent, chain drug stores 62 percent. If you limit comparisons to the areas in which corporate chains operate, you will discover that they already have a monopoly in the areas producing the greatest and best volume in the cities of this country in many lines of business.

It is a fact that the census figures disclose that the number of independent merchants have increased during the last few years; but these increases were all over the Nation and in areas not served by chains at all or in lines of business in which the chains were not engaged. Besides, these increases in number of units often represent small filling stations and a small stock of groceries in areas where chains do not operate.

RESULT IF LAW NOT PASSED

The people of America must very quickly decide whether they want absentee ownership of business through corporate chains or whether they want local independent merchants. I believe that the interests of the consumers and this country will be served by preserving independent business which forces competition and lower prices to the consumers. If we have absentee ownership of business, the public will pay and pay dearly, the profits going to the privileged few. Local communities will be destroyed since the local reservoirs of credit will be dried up and the opportunities for young people will be very much restricted.

QUESTIONS AND ANSWERS

I have prepared questions that are usually asked about this bill and have given my answers thereto. They may be found in the CONGRESSIONAL RECORD for Thursday, May 21, 1936, pages 7759–7761, and for May 25, 1936, pages 7885–7887.

Mr. GUYER. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. CELLER].

Mr. MILLER. And I yield 10 minutes to the gentleman from New York [Mr. CELLER].

The CHAIRMAN. The gentleman from New York [Mr. CELLER] is recognized for 30 minutes.

Mr. CELLER. Mr. Chairman——

Mr. CRAWFORD. Will the gentleman yield? Will the gentleman be disposed to yield for a question before he begins?

Mr. CELLER. If the gentleman will give me 10 or 15 minutes to get into my speech I will yield then.

Mr. Chairman, I believe there has been a lot of feeling engendered unnecessarily in the debate on this bill. There has been a great deal of passion and prejudice aroused regarding the different views that we may have on this legislation.

I have no interest in the bill except to see that the people in this country get the proper bill; get a square deal. I think this is unfair legislation. The consumer particularly will not get his due. The consumer will pay the piper.

I hold no brief for the farmer. I have no farms in my district. If any person will take the record of my votes on farm legislation they will find that I have been fairly consistent in voting with the majority in Congress on all farm legislation.

I have voted almost consistently for farm legislation that came before the House. Just because farmers send me communications in opposition to this bill does not necessarily make me a farmer or an exponent of what the farmers want.

But are you going to throw into the wastebasket all of these opinions of the National Grange or the American Farm Bureau Federation or the National Cooperative Council—those of you who sponsored and favored other farm bills?

Now, I am going to read, primarily for the edification of the gentleman from Texas, these opinions from these prominent farm organizations:

MAY 18, 1936.

Hon. JOHN J. O'CONNOR,
Chairman, House Rules Committee,
House Office Building, Washington, D. C.

DEAR MR. O'CONNOR: On behalf of the farmers of this country, we desire to submit to you for your consideration our opinion relative to the proposed Robinson-Patman bill which has been reported by the House Committee on the Judiciary, and which is now awaiting action on a rule before your committee.

As representatives of the organized farmers of this country, we are in favor of legislation to eliminate false brokerage allowances, false advertising allowances, and unreasonable quantity discounts where such discounts are made available only to a very limited number of customers.

These evils were the ones which received considerable attention when this bill was before the House Judiciary Committee and also in the hearings held by the special subcommittee which investigated the American Retail Federation.

Unfortunately, the bill as finally reported out by the House Judiciary Committee did not confine itself to the correction of these abuses but went far beyond into the field of legitimate business and industry.

The bill, in its present form, will greatly restrict and hamper the operations of producer-owned and producer-controlled cooperative associations by unjustly and unfairly preventing farm cooperatives from receiving wholesale discounts and through the strait jacket which it proposed to place on their legitimate merchandising and advertising operations.

In addition, we are fearful that farmers and consumers will be forced to bear the burden of higher prices which this bill would encourage if enacted in its present form.

We therefore urge that the bill go over at least until the next session of Congress, when it can be more carefully reviewed and studied with a view to writing a bill which will correct the abuses

complained of without at the same time obstructing the legitimate business operations of farmers' cooperative associations.

Sincerely yours,

THE AMERICAN FARM BUREAU FEDERATION,
By CHESTER GRAY, *Washington Representative.*
THE NATIONAL GRANGE,
By FRED BRENCKMAN, *Washington Representative.*
THE NATIONAL COOPERATIVE COUNCIL,
By ROBIN HOOD, *Secretary.*
THE NATIONAL COOPERATIVE MILK PRODUCERS' FEDERATION,
By CHARLES W. HOLMAN, *Secretary.*
FARMERS' NATIONAL GRAIN CORPORATION,
By M. W. THATCHER, *Washington Representative.*
NORTHWEST FARMERS' UNION LEGISLATIVE COMMITTEE,
By M. W. THATCHER.

Mr. Chairman, I say to the distinguished majority leader that he should pay some attention to what these farm cooperatives and farm organizations say, namely:

In addition we are fearful that farmers and consumers will be forced to bear the burden of higher prices which this bill will encourage, if enacted in its present form.

Mr. MILLER. What is the date of that letter?

Mr. CELLER. May 18.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. CELLER. Not now. To continue, let me repeat its phrase:

We therefore urge that the bill go over at least until the next session of Congress, when it can be more carefully reviewed and studied with a view to writing a bill which will correct the abuses complained of without at the same time obstructing the legitimate business operations of farmers' cooperative associations.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. CELLER. In just a moment. Mr. Chairman, the gentleman from Texas [Mr. PATMAN] has made much of the fact that he has been in conference with these gentlemen representing these farm groups. Let us see what the result of his interviews with these farm organizations was. Under date of May 25 we have this communication I hold in my hand—and he saw them before May 25, and if he saw them after May 25 I will show him a letter after May 25—and all these letters up until yesterday, up until 6 o'clock last night, indicated absolute opposition to this bill. Here is a letter of the same farm organizations on May 25:

The bill as reported out by the Committee on the Judiciary did not, in our opinion, confine itself to the correction of these abuses, but went far beyond into the field of legitimate business and industry in such a manner as would definitely injure the operations of farmer-owned and farmer-controlled cooperative associations.

They also object to the classification provisions, and I hope the gentleman from Texas [Mr. PATMAN] will vote with us, with the members of the Committee, in striking out entirely the classification provision. I shall not read what they say with reference to that, but further:

Many of our cooperatives are large advertisers of the commodities which they sell. Because of limited advertising budgets, and because of fundamental merchandising necessary of placing advertising strategically, it would unduly hamper our operations were we required to put our advertising on a national basis. We are unwilling to have our operations put into a strait jacket under legislation which may require that if an advertising campaign is put on in Washington, D. C., a similar program must be followed in each market in the United States in which our cooperatives operate.

In other words, this bill provides that if these cooperatives make any kind of a concession to anyone anywhere, they must go all over the country and make the selfsame concession in all parts of the country, regardless of local conditions. Therefore, these farmers, like all businessmen, like all manufacturers, all chemists, all miners, all involved in the voluntary retail field, are opposed to putting business in that kind of a strait jacket and forcing everyone to do the selfsame thing all over the country. It just cannot be done.

Mr. BOILEAU. Mr. Chairman, will the gentleman yield?

Mr. CELLER. In a moment. Let me go on with this letter:

Our final objection rests in the change which is made by section (e) of the proposed bill, in the right of our cooperatives to cut prices whenever such cuts in the prices of commodities are necessary in good faith to meet competition. Under this bill as now before the House, our right to meet competition in good faith is severely restricted. The language of the bill requires that any price cuts be justified by showing that the price cuts were made in good faith to meet an equally low price of a competitor. Not only does this bill thus limit our right to meet competition, but by its very terms places the burden of proof on our cooperatives of establishing the fact of the lower price of a competitor.

That is a very difficult thing for anyone to do, and to place that burden on the farmer cooperatives is quite beyond my comprehension, when advocated by men who come from farming communities.

Under the old Clayton Act, the burden of proof was upon the complainant to prove that a seller had discriminated in price, but under section (e) mere proof of discrimination in prices is taken as a prima-facie indication of unlawful discrimination, with the burden of proof upon the defendant to show that the discrimination was made to meet a lower price of a competitor. We feel that it should be obvious to anyone familiar with business and merchandising practices throughout the United States, that the requirement of finding out what your competitor's price is would do away with the value of this exemption. Under the language of the bill, our cooperatives might be deprived of all of their business by unfair competition or by local competition in intrastate commerce not covered by this bill, solely through the inability of our cooperatives to find out exactly what the lower price of this competitor was.

On the other hand, if our cooperatives met this competition without knowing exactly the prices charged by their competitors, and it later developed that the cuts made by the cooperatives were below the cuts previously made by their competitors, our cooperatives would be subject to triple damages from all of their other customers, although they acted in good faith.

Listen to this: You did not hear anyone saying anything about the triple-damage provision of this bill. While it may not be directly in the bill, take this into consideration: This bill amends the Clayton Act. The Clayton Act provides for triple damages. When you put these amendments into the Clayton Act with its triple damages, you subject your farm cooperatives to very serious consequences. You cause them to be hailed down to Washington from the farthermost parts of the United States to answer all manner and kind of complaints that will be offered, which will be recognized by the Federal Trade Commission, and upon the mere say-so of the Federal Trade Commission, they must come down here and exculpate themselves, prove their own innocence, in a way as difficult as they indicate by this letter. I ask you to pause before you vote for such a monstrosity of a bill; before you subject them to triple damages in the way indicated.

These farmers probably singled me out not because I come from New York, but perhaps some of the other gentlemen from farming communities were adamant and refused to listen to them, probably because they did not realize in the first instance—and pride precludes their realizing now—the far-reaching consequences of this bill with reference to the farm organizations.

In conclusion, the farm organizations say:

We feel that it is a fundamental right of American business and industry, not only of cooperatives but all other legitimate businesses to preserve and protect their established trade against unfair and uncontrolled competition. We feel that no strait jacket should be placed upon the right to meet this competition in good faith.

For consecutive reading I herein set forth the letter in full:

THE AMERICAN FARM BUREAU FEDERATION,
THE NATIONAL GRANGE,
THE NATIONAL COOPERATIVE MILK PRODUCERS' FEDERATION,
THE FARMERS' NATIONAL GRAIN CORPORATION,
THE NORTHEAST FARMERS' UNION LEGISLATIVE COMMITTEE,
May 25, 1936.

HON. WRIGHT PATMAN,
House Office Building, Washington, D. C.

DEAR MR. PATMAN: In connection with the conference which you held this morning with Mr. Fred Brenckmann, of the National Grange, and Mr. Donald Kane, of the National Cooperative Milk Producers' Federation, with reference to the communication addressed by the farm organizations to Congressman O'CONNOR on May 18, 1936, regarding the Robinson-Patman bill, the farm groups signatory hereto have met and discussed the matters considered at this morning's conference.

As we pointed out in our letter of May 18 to Mr. O'CONNOR, the organized farmers of this country are in favor of legislation to eliminate false brokerage allowances, false advertising allowances, and unreasonable quantity discounts. As we pointed out in that letter, however, the bill as reported out by the Committee on the Judiciary did not, in our opinion, confine itself to the correction of these abuses but went far beyond into the field of legitimate business and industry in such a manner as would definitely injure the operations of farmer-owned and farmer-controlled cooperative associations.

In order that the record may be made perfectly clear, we desire to submit to you in detail our objections to the bill in its present form in the hope that the House may see fit to eliminate these objectionable features and thus remove our objections to the legislation.

Briefly stated, our objections are as follows:

1. We object to the provisions of subparagraph 5 which would eliminate the multiple basing point system of sales.

2. We object to the classifications of purchasers in subparagraph 1 under which farmer-owned and farmer-controlled cooperative associations would be deprived of their wholesalers' and jobbers' discounts. We would like to see this classification eliminated entirely or an exemption granted to cooperative associations in the following language:

"*Provided, however*, That the classifications herein set out shall not apply to producer-owned and producer-controlled cooperative associations nor shall anything in this section abridge or impair any of the rights or benefits granted to certain producer-owned and producer-controlled cooperative associations under existing statutes."

3. Our third objection lies in the possible interpretation of subsection 2 (a) of the Clayton Act, as amended by this bill. We are fearful that this section viewed in the light of the committee report might be construed to mean that different prices could not be charged by the same seller in different markets. If this construction were placed upon the legislation, it would destroy the business operations of many of our great farmers' cooperative associations. Different prices must be charged in different markets, depending upon a number of economic factors, and any attempt to standardize prices of agricultural commodities throughout the United States would be ruinous not only to our cooperatives but to the farmers who market their products through our cooperatives. We would like to have this issue clarified.

4. We are also concerned over the possible interpretation of paragraphs 5 (c) and (d) insofar as these paragraphs affect advertising.

Many of our cooperatives are large advertisers of the commodities which they sell. This advertising is handled in many cases on a cooperative basis between our cooperatives and the purchasers, under the terms of which our cooperatives pay not more than the actual cost of advertising the goods which they sell. Because of limited advertising budgets and because of the fundamental merchandising necessity of placing advertising strategically, it would unduly hamper our operations were we required to put our advertising on a national basis. We are willing that all customers in the same market be granted equal privileges insofar as advertising is concerned, but we are unwilling to have our operations put in a strait jacket under legislation which might require that if an advertising campaign is put on in Washington, D. C., a similar program must be followed in each market in the United States in which our cooperatives operate. We are very desirous that this angle in the bill be clarified.

5. Our final objection rests in the change which is made by section (e) of the proposed bill in the right of our cooperatives to cut prices whenever such cuts in the prices of commodities are necessary in good faith to meet competition.

Under the bill as now before the House our right to meet competition in good faith is severely restricted. The language of the bill requires that any price cuts be justified by showing that the price cuts were made in good faith to meet an equally low price of a competitor. Not only does this bill thus limit our rights to meet competition, but by its very terms places the burden of proof on our operatives of establishing the fact of the lower price of a competitor. Under the old Clayton Act the burden of proof was upon the complainant to prove that a seller had discriminated in price, but under section (e) mere proof of discrimination in prices is taken as a prima-facie indication of unlawful discrimination, with the burden of proof upon the defendant to show that the discrimination was made to meet a lower price of a competitor.

We feel that it should be obvious to anyone familiar with business and merchandising practices throughout the United States that the requirement of finding out what your competitor's price is would do away with the value of this exemption. Under the language in the bill our cooperatives might be deprived of all of their business by unfair competition or by local competition in intrastate commerce not covered by this bill solely through the inability of our cooperatives to find out exactly what the lower price of these competitors was. On the other hand, if our cooperatives met this competition without knowing exactly the prices charged by their competitors, and it later developed that the cuts made by the cooperatives were below the cuts previously made by their competitors, our cooperatives would be subject to triple damages from all of their other customers, although they acted in good faith in meeting the competition and were forced to do so in order to maintain their business.

We feel that it is a fundamental right of American business and industry—not only of cooperatives but all other legitimate businesses—to preserve and protect their established trade against unfair and uncontrolled competition. We feel that no strait jacket should be placed upon the right to meet this competition in good faith.

We therefore feel that the proviso at the end of section (e) of the bill as reported out by the committee should be stricken out and the following inserted in its place:

"That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that the discrimination in price complained of, in the same or different communities, was made in good faith to meet competition."

Not only will this amendment preserve the existing rights of our farmer-owned and farmer-controlled cooperatives and enable them to protect their business against unfair and uncontrolled competition, but we would also like to point out specifically that this exception applies only to outright price discrimination and does not apply either to (1) false brokerage allowances, (2) false advertising allowances, and (3) unreasonable quantity discounts. We feel therefore that it cannot be used to defeat any of the central objectives of the legislation and on the other hand, is necessary if the rights of our cooperative associations are to be protected.

If the foregoing objections of the farm groups can be met by amendments to the House bill, we would be glad to withdraw our objections to this legislation. Because of our belief in the importance of the principles which we have outlined we are taking the liberty of sending a copy of this letter to each Member of the House of Representatives.

Very truly yours,

THE FARMERS NATIONAL GRAIN CORPORATION,
By M. W. THATCHER, *Washington Representative.*
THE NORTHWEST FARMERS UNION LEGISLATIVE COMMITTEE,
By M. W. THATCHER, *Washington Representative.*
THE AMERICAN FARM BUREAU FEDERATION,
By CHESTER H. GRAY, *Washington Representative.*
THE NATIONAL GRANGE,
By FRED BRENCKMAN, *Washington Representative.*
THE NATIONAL COOPERATIVE MILK PRODUCERS' FEDERATION,
By CHAS. W. HOLMAN, *Secretary.*

Now, does the gentleman want any later views from the farm organizations? I will in due course read a letter that I received last night at 6 o'clock, where the selfsame objections were voiced. That was immediately after the gentleman from Texas had interviewed these gentlemen representing the farm organizations. They could get no relief from him. "Pride probably goeth before a fall." He would not yield to them. He was too proud to yield to them, having made up his mind after having toured the whole country and making outlandish promises to all the retailers all over the land that this bill would be manna from Heaven. I am afraid all these retailers are doomed to disappointment, because this bill will hurt them to the *n*th degree. It is going to force manufacturers into two classes, those who deal with mass buyers, like the mail-order houses and department stores and chain stores and voluntary cooperatives and farm cooperatives, and those who deal with the smaller dealers on the other hand. That is what is going to happen. Instead of these small dealers getting any advantage, you will have confusion worse confounded. The big operators, the mass buyers, will get prices more cheaply because of these artificial classifications required by the bill, because of these foolish limitations on quantity discount, and the little fellows will be compelled to buy from the little fellows, and, far from giving them any kind of advantage, you will give them distinct disadvantages.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield.

Mr. COX. I wanted to ask the gentleman if in the reference he made to the author of the bill, he intended to question his motives?

Mr. CELLER. Oh, by no means. I yield to no man in my admiration of the gentleman from Texas.

Mr. COX. If that were the disposition of the gentleman, I would like to propound him a question, wondering when he became the spokesman of the farmers, because I thought the gentleman was the special pleader for an entirely different group.

Mr. CELLER. I yield to no man in my admiration of the gentleman from Texas in connection with trying to bring some relief to retailers. I think he is enthusiastically misguided. I do not question his motives. Far be it from me to say so, no more than would anyone question my motives in opposing this bill. I have no farmers in my district; but, goodness knows, if the farmers give me some ammunition against this bill, I would be a jackass if I did not use it. I am using that ammunition.

Mr. CAVICCHIA. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield.

Mr. CAVICCHIA. Like the gentleman, I have no farmers in my district, but I have some 300,000 consumers. Will the

gentleman please spend a little time in telling me what effect this bill, if adopted, will have on the consumers?

Mr. CELLER. I stated a few moments ago, while we were discussing the rule, that I would tell you something about what economists have said about this bill and its effect upon the consumers. I have almost 400,000 consumers in my district, and that is why I am primarily opposed to this bill. They would primarily be hurt.

Dr. Harold G. Moulton, of the Brookings Institution, recently said this:

This bill, insofar as it would strike at all those who have heretofore been effective in reducing prices, to that extent will raise prices.

To the same effect Prof. Malcolm P. McNair, of Harvard University, said:

With very few exceptions, the large-scale retail enterprises of today are fighting the consumer's battle. Their bargaining power is a wholesome weight in the balance against the monopolistic tendencies of many manufacturers. Congress certainly will not be serving the consumer's interest by tipping the balance of the scale further toward the manufacturers' side.

Prof. M. C. Waltersdorf, head of the department of economics, Washington and Jefferson College, said:

The proposed law would not facilitate increased distribution at lower cost, but no doubt would hinder flow of goods. This is undesirable, as it would retard rather than facilitate recovery.

Prof. Shaw Livermore, of the University of Buffalo, writes as follows:

I am emphatically opposed to this bill and anything similar to its discriminating against the able and efficient retail distributors of the country. It will tend to destroy healthy competition and not to maintain it.

Prof. William A. Carter, of the department of economics, Dartmouth College, stated that he was—

Opposed to legislative attempts to arbitrarily classify distributors that the proposed bill is administratively unfeasible in regard to quantity differentials.

Professor Carter is against the bill.

Professor Caverly, of the University of Michigan, states that he does not approve of any attempts to restrict free competition as embodied in the bill.

Dr. George Filipetti, professor of economics at the University of Minnesota, says as follows:

The Robinson-Patman bill runs counter to reductions of cost of production and distribution, places a premium of inefficiency, and would be likely to result in the exploitation of the ultimate users of articles of commerce and industry.

While Prof. C. C. Huntington, of Ohio State University, writes:

I believe in lower prices for quantity sales, if such prices are still above the cost of producing, and filling such order is to the advantage of the consumer, and helps the purchasing power of the consumer in the lower income brackets.

In addition to the experts mentioned above, opposition to the bill is professed by Profs. Lewis H. Haney and Walter E. Spahr, of New York University, and Prof. T. R. Snavely, of the University of Virginia.

I could readily quote at length the names of scores of other well-known economists, selected at random from various parts of the country, who have expressed disapproval of the bill, primarily on the score of increased prices to you, the consumers.

I say to the gentleman from New Jersey that this bill will have the definite tendency of elevating prices to the consumer.

The gentleman from Texas makes much of the charge of monopoly. The term is used loosely and intemperately. No charges have been filed as to monopoly. If so, there is an ample remedy.

Now let us take a look at this bugaboo of monopoly they say is about to jump out at you from every store. The proponents of the Robinson-Patman bill say its passage is necessary to prevent retail monopolies or tendencies thereto. In fact, their bill, which has been christened and rechristened by themselves several times, has as its most recent name the Patman-Robinson equal opportunity in business bill, evidently to give it an antimonopoly appeal. There is no monopoly in the retail field. These is not even a leak in the dike. The big national mass distributors—all the talking is about—only do 8 percent of national distribution. The competitors agitating for this bill overlook carefully the fact that 87 percent—of this 8 percent—of the mass distributors have each only 25 stores or less and are sectional or intrastate business. You can't spell monopoly out of 8 percent no matter how hard you spell. And the Federal Trade Commission investigated 6 years at a cost to you consumers of $1,000,000 and could find no monopolistic practices in the retail field.

It is interesting to note that voluntaries are a match for the chains. Corporate grocery chains do an annual business of $2,500,000,000. The grocery voluntaries also do a business annually of $2,500,000,000.

Nine out of every ten stores are independent stores. The number of independent proprietors in business in 1933 actually increased over the number in 1929, while the number of chain stores in that same period of time declined. It is significant to note that more than 75 percent of our retail business in America is being done by independently owned stores.

Also, well over a tenth of the 1,350,000 independently owned retail stores in the United States are now affiliated with the cooperative buying and advertising groups currently prospering and developing in the food and grocery field, in the drug field, and in the limited-price variety-store field.

The gentleman from Texas speaks about the analogy of freight rates. Since the Interstate Commerce Commission passes on freight-rates limits, the Federal Trade Commission should pass upon quantity discounts. He and others suggest the limitation should be a carload. I might remind some of the farmer Congressmen that the Grange League Federation in New York, composed of the National Grange, the Dairymen's League, and the Farm Bureau, a farmers' cooperative, buy, for their members, feed, fertilizer, spray materials, and fruit baskets in trainloads, not carloads. See how you would damage these farmers' organizations by any sort of quantity limitations.

Similar organizations like the Farm Bureau Cooperative in Indiana, Ohio, and Albama the Farmers Unions in Nebraska, the Dakotas, and Oklahoma; the fruit growers of California; and other cooperatives buy, by the trainload, nails, lumber, and other articles used in farming.

It is ridiculous to cite limitations on freight rates. A railroad is a public utility. There is no competition. You must take the railroad facilities or leave them. That is why the Government must step in with limitations as to rates. That supervision cannot obtain and should not obtain when it comes to private business.

It is interesting to read what the Federal Trade Commission said with reference to its chain-store inquiry. Compare its conclusions with the instant bill.

In December 1934 the Commission sent to the Senate its final report on the chain-store investigation, conducted in response to Senate Resolution 224, Seventieth Congress, first session. This report briefly summarizes many of the important features of earlier reports on the inquiry and also presents certain conclusions and recommendations.

Recommendations and conclusions: When the Commission came to consider the social and economic advantages and disadvantages of chain-store merchandising from the legal standpoint, it was evident that many of the economic advantages possessed by the chains were of a character that is in conformity with existing law. Such advantages as those flowing from the integration of production and of wholesale and retail distribution, from the savings involved in avoiding credit and delivery service, and from the ability of chains to realize the benefits of large-scale advertising are all plainly beyond the present scope of statutory law. Nor did the Commission recommend any change in the law in order to eliminate such advantages. Such a program would involve radical interference with the rights of private ownership and initiative, virtual abandonment of the competitive principle, and destruction of the public advantage represented by lower prices and lower cost of living.

As to the vexatious discriminations and limitations in the bill, permit me to read from my minority report:

The decisive factor in connection with this bill is that by a series of dams placed across the stream of competition, its end effect becomes exactly what its proponents allege will not be its end effect, either because they do not understand the real purposes of the group of wholesalers whose attorney wrote the original bill or because they do not understand what the bill actually intends to accomplish and do not desire to admit the intention, but hope to gain the support of the favored groups through its enactment.

The first dam the bill would erect across the stream of competition is hidden within the 17 words here quoted, which circumscribe price differentials:

"* * * resulting from differing methods or quantities in which such commodities are to such purchasers sold or delivered * * * (sec. 2 (a) (2))."

Actually these words practically eliminate legitimate "quantity discounts." Their author is the aforementioned counsel for a group interested in the bill. On page 34 of the hearings before the House Judiciary Committee, he gives a specific example of what those 17 words mean, and it is most revealing. According to it, each buyer, no matter how large his purchases, and no matter how many of the seller's services he does not utilize, must pay for all the services the seller elects to have in his business, and can only be allowed a discount amounting to any savings in cost or service or expenditure his order happens to occasion.

Just consider for a moment what that means in practice. Take the case of a typical important seller who maintains a warehouse system; a string of sales offices in all the larger cities; a large sales force; an elaborate design department; a formidable collection, credit, and statistical staff; an excellent laboratory; a strong advertising department expending many thousands in general advertising; a comprehensive traffic department and an administrative overhead sufficient to represent him at all the conventions and meetings of the trade involved.

Of course such a manufacturer would have large plant capacity; indeed, very probably he would have excess plant capacity, as probably there would be a slack season in his line during which he would ordinarily lay off many men.

He would be set up to make and market a run of production resulting from the usual flow of small-lot orders. It is both a well-known and an amply demonstrated fact that it costs far less to produce a large order permitting the most effective production arrangements than it does to produce a flow of small-lot orders. (Report of the hearings before the House Judiciary Committee, p. 89.) These economies are totally aside from and in addition to those resulting from ability to dispense with services or facilities necessary for developing and administering a flow of small-lot volume.

Now what happens when a large buyer—say, a large department store, a large mail-order house, or a large chain, or a large voluntary group made up of many progressive small retailers—comes to that seller and says: "I have a formula here according to which I want you to make a million units exactly like this sample. I will pay cash in advance, if you like, and I will take deliveries in the quantities at the times most convenient to you, and therefore you can keep a plant going during your slack season, thereby giving men work and spreading your overhead thinner. You do not need to tell me about your laboratory, sales organization, advertising, warehousing system, and all that—I know all about that. It is excellent, but it is for the general small-unit sales field. I do not require any of it. I have my formula and sample here; I do not require your laboratory and design department. I have my own warehouses, sales force, my own advertisements, and my own advertising staff. I merely want to buy your production facilities for a large run, as I would rather do that than buy a factory myself"?

Suppose the seller figures out a fair allowance for those conditions and a deal is struck, fair and advantageous to both parties and to the public, which will as a result get the benefits of the economies resulting. Is not that all entirely fair, logical, and good common sense besides?

But would this bill permit it? It would not.

Those 17 little weasel words quoted above would prevent it. For they mean that the large buyer would have to pay a price carrying a proportion of every one of those unused services which the seller maintained to handle an entirely different type of sales. Or, to put it differently, he can only be allowed what additional expense the seller would have been put to in order to obtain the business in addition to that he obtains as the result of using all his facilities. Those 17 words would probably allow no appreciable allowance for quantity at all under the circumstances cited. However, if the seller had to hire an added inspector because of the order, that might be allowed; or if the buyer had come by some strange chance from a locality which the seller did not ordinarily cover with his sales force, then the expense of sending a salesman to him might be allowed, or if he, because of some strange circumstance, supplied his own shipping boxes, that might be allowed.

That is certainly a dam from bank to bank of the competitive stream, and a high dam. But the proponents of this bill are not satisfied with that dam. They want two more, evidently to be quite sure of their purpose.

The second dam is the provision forcing a seller, if he elects to classify customers in the usual way—that is, as wholesalers, buyers for further processing, retailers and so on—to do so according to a special formula set up in the bill. But this formula prevents his classifying large buyers solely according to quantities bought. Of course, the proponents of the bill cloud the issue by pointing out he can classify according to volume within each classification specified by the bill's formula, but—and it is a very big "but" for the reason given above—he then runs into dam no. 1 and really cannot allow legitimate quantity discounts.

Dam no. 3 is inserted to stymie the seller who realizes the actual import of the arbitrary customer classification formula set up in the bill and innocently believes he can serve his customers and the consumer by producing only for quantity buyers selling direct to the consumer. This dam is the provision which authorizes the Federal Trade Commission arbitrarily to fix the differentials which may be allowed by a manufacturer under such circumstances. Naturally the manufacturer who wrangled the best deal from the Commission would get all the business, and then probably would be forced by the reduction in his differentials to place himself in the hands of but one large buyer, or of two or three noncompeting buyers, if he could find them. In the meantime the small manufacturers competing with him no doubt would be ruined or restricted to what business they could obtain under the classification system prescribed in the bill. The deleterious effect upon those manufacturers thus forced to such an alternative is elsewhere set forth herein.

Thus these three dams placed across the stream of competition by this bill very neatly served to turn the channel of day-in and day-out small-lot sales into the hands of the bill's sponsors, and as well to strait jacket the competitive and economical direct-from-maker-to-consumer channel. And that is the real intention, the real purpose, of the bill—a far different purpose, a far different intention, than its proponents present to the country.

A huge bureaucracy would be set up in the Federal Trade Commission.

Thus the Federal Trade Commission is given a sweeping right to limit quantity discounts according to its own findings. This is a very broad and a very unusual power to extend to an administrative body, responsible neither to the Congress nor to the President. How in practice any organization, much less the Federal Trade Commission, would be able sensibly or physically to determine what is "like grade and quality" or "differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold and delivered" is quite beyond human comprehension.

It would baffle Athena herself to evaluate the various factors that influence production and selling. Then superimpose upon that immense problem that of deciding the reasonableness or unreasonableness of the proffered "quantity discounts", and the task laid in the lap of the Commission by this bill becomes no less than superhuman. Let us take as an example but one article—cotton. I understand there are nine Government grades of cotton alone. There is Sea Island cotton, Egyptian Pima, Chinese Pima, just to mention a few basic classifications. The cotton may be carded or combed; there are 101 or so grades depending upon strength of texture and finish; it may be bleached, unbleached, or mercerized; there are over 100 methods of weaving.

The variety of items in the final channels to consumption is similarly so extensive as to likewise demonstrate the absolute impracticality of the proposed legislation. Sears, Roebuck catalog, for example, comprises 48,000 articles. I have instanced the difficulty of determining grades and qualities of cotton. That difficulty mayhap is present in each of the many raw materials entering into every one of the noncotton items among the 48,000 articles in that catalog.

Price differentials vary according to the service rendered by the wholesaler. For instance, in selling the retailer by way of the wholesaler, the manufacturer assumes the risk in buying raw materials and fabricating goods for future demand. He stores up his manufactured goods and then attempts to find distribution to the retailers through his wholesale customers. His goods may remain on his shelves. There may be no demand. He takes his chances. He must be compensated for these risks. On the other hand, the national distributor, such as a large chain, department store, or mail-order house, may go to the manufacturer with a large order for goods to be shipped directly to stores or distributing warehouses. There is in such a transaction no use for middlemen, brokers, middlemen's advertising expenses, or middlemen's sales forces. All these elements greatly affect prices, in this latter case the buyer renders the services which in the former instance the manufacturer is supplied with through his wholesalers. It is this shifting of services otherwise expensive to the buyer that naturally causes a great legitimate difference in selling prices. Furthermore, there are different kinds of services rendered by different types of wholesalers. There are some wholesalers who perform a complete distributing service for the manufacturer.

There are mill agents, there are so-called desk jobbers who have their offices in their hats and who merely write out orders and send them to the manufacturers for shipment direct. All of these factors cause a wide difference in price, but under this bill those not classified as wholesalers could only obtain quantity price allowances limited to the extra expense involved in selling to them, or making up their orders, or delivering their goods, over and above the cost of carrying on all the activities of the business from which they brought whether or not used by them. However, a customer may be classified, it is obvious the true cost of selling each, and of producing and delivering his order, will vary according to the service and facilities used by each, and those varia-

tions should be reflected in the price. That would not be possible under this bill. Let us take it from the buyer's point of view and consider the different services which the buyer equips to discharge in order more efficiently to serve his customers.

These services replace services which under this bill would have to be classified arbitrarily if any customer classification were made other than purely on the size of orders. In such instance the bill would prohibit the allowance to the buyer of a legitimate reflection of that part of a classified service actually discharged by him. For example, a buyer classified as a retailer under the terms of the bill may discharge, and at less expense, a part or all of the functions discharged by a wholesaler. This is the case with mail-order houses and the large department stores, which frequently, moreover, pool their orders. Under the classification option they would have to be arbitrarily served as retailers. Then any allowance for quantity would have to be justified, subject to review by the Federal Trade Commission, under the very rigid requirements of the bills' wording, which limits such allowance to the actual differing methods in which goods are made, sold, or delivered for each order. On the other hand, a company arbitrarily classified as a wholesaler simply because it happened to be separately incorporated and dealing only with retailers, could buy as small a quantity as one-twelfth of a dozen and still be allowed full compensation for the complete wholesale function plus a profit margin. See page 9 of the majority report, the appropriate excerpt from which is as follows:

"Wholesalers frequently find it necessary to supplement existing stock by additional purchase in small quantities and the above—subparagraph (1)—permits the wholesaler to be accorded wholesale prices on these smaller purchases as incident to his business without the seller having to accord them at the same time on the whole body of purchases in similar quantities on sales direct to retailers dependent upon him for their source of supply."

Furthermore, in considering this question of "quantity discounts", it must be remembered that in actual commercial practice quotations are made under a multitude of differing practices and to cover a multitude of differing conditions. For example, in large segments of distribution the entire sales process culminates not in an actual order but in a mere listing of a price with the large customer, against which orders for the item are later received, either in large or small volume. But it is certain the volume cannot be known when the price is made. Under such conditions, as similarly in many other cases, customary trade practice would be totally upset and disorganized, and unnecessarily so, by any effort to apply the rule laid down in this bill.

Mr. CAVICCHIA. Mr. Chairman, will the gentleman yield for one more question?

Mr. CELLER. Yes; I yield to the gentleman from New Jersey.

Mr. CAVICCHIA. The gentleman from New York is a lawyer. We are, of course, often laughed at when we question the constitutionality of any measure that comes on the floor of this House. We are usually told to leave the question of constitutionality for decision by the Supreme Court. What does the gentleman think of the constitutionality of the bill, particularly the provision relating to price fixing?

Mr. CELLER. Any lawyer worth his salt will have to say that the bill is unconstitutional. It is rather unpopular to say that in this body; I will say it. Not only that, it violates the right of contract. If I, a buyer, am in the market for a million units have I not the right to be able to and expect to buy them at a lesser price than the man in the market for 10,000 units? Who is going to gainsay me this right? It is the right of contract made inviolate by the Constitution. The Constitution guarantees this right to me without molestation from the Federal Trade Commission or any other body; and this right is a paramount right guaranteed to me by the Constitution. I think, therefore, the bill is unconstitutional. If further argument in support of my position is needed, I call attention to the Sugar Institute case, a very significant case. I have not time to read it all. In the Sugar Institute case it was decided that quantity discount when withheld by the members of the Sugar Institute constituted a monopoly in restraint of trade. In other words, the Supreme Court in the Sugar Institute case, decided only a few days ago, held as follows, and I particularly call that to the attention of those Members who are lawyers:

Carrying out its policy as to discriminations, the institute condemned "as unbusinesslike, uneconomic, and unsound, concessions made to purchasers on the basis of quantity purchased." The Court found that this agreement and the practice under it prohibited not only "unsystematic and secret quantity discounts" but also discounts "systematically graded according to quantity." The Court examined defendants' contention that quantity discounts would effect no economies. If, said the lower court, the facts were as defendants insisted the question would arise whether such a concerted restraint was reasonable. But the Court considered the actual facts to be "entirely inconsistent with defendants' position." As to direct costs, the Court found that the refiners got no discount for quantity purchases of raws which constitute about 80 percent of the cost of refined; that quantity sales affected no appreciable direct savings in manufacturing costs and no savings in brokerage; but that in sales to those who could take deliveries in carload lots direct from the refinery, there were substantial savings "in delivery, storage, bookkeeping, and other incidental expenses." And as to indirect costs, the Court found that sales which distribute production more evenly through the year effect substantial savings to the refiners and that the demand for sugar is elastic, so that encouragement of large sales through quantity discounts might reasonably be expected to build up total production and thus effect economies. Also that a quantity discount to wholesalers selling to manufacturers as well as to manufacturers buying directly from refiners, might well result in a substantial increase in sugar consumption.

So the Court said in substance that they insisted that the members of the Sugar Institute grant quantity discounts without let, without hindrance. Exactly what the Supreme Court exhorted and demanded these refiners do, this bill would prohibit. How under the sun you could sustain the constitutionality of the Robinson-Patman bill in the face of this decision regarding quantity discounts in the Sugar Institute case is beyond me. What you do here in passing this bill will be purely abortive; it will be your labor for your pains, because the bill will be back on the Speaker's desk declared unconstitutional by the Supreme Court in due course.

Mr. CAVICCHIA. Mr. Chairman, will the gentleman yield?

Mr. CELLER. Yes; I yield.

Mr. CAVICCHIA. The gentleman in his speech mentioned quantity discounts. The gentleman from Texas in his speech mentioned secret rebates.

Mr. CELLER. That is another matter.

Mr. CAVICCHIA. Will the gentleman please tell us the difference.

Mr. CELLER. I am in favor of legitimate discounts for larger quantities. I am wholeheartedly against secret rebates and so-called secret advertising and brokerage allowances. These large chains go to a manufacturer and say they will buy 50,000 units of a certain product. They will remind the manufacturer that he is not getting the business through a broker and that the manufacturer should make a difference in price commensurate with the broker's commissions. Sometimes they do it secretly. I protest against such secret practices. I am opposed to these secret brokerage allowances. I want to rip them out, root and branch. I want to rip out the secret and so-called advertising allowances; but the bill goes much farther than that. All must be aboveboard and not in camera.

Mr. KELLER. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield.

Mr. KELLER. The gentleman referred to the decision of the Supreme Court in the Sugar Institute case. Was the court divided in that opinion?

Mr. CELLER. No; it was a unanimous opinion.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield.

Mr. CRAWFORD. Referring specifically to the decision of the Supreme Court in the Sugar Institute case I would like to propound a question with reference to subsection 2 of section 2 of the bill on page 6. The Sugar Institute attempted to discourage or forbid the granting of quantity discounts to anyone and to everyone. As the gentleman from New York read excerpts from the opinion of the Court I got the impression that the Court condemned the institute for its action on the ground that there might be a difference in cost of delivering small truckloads as against carloads.

Mr. CELLER. The Court made no distinction of that sort at all. They said economies would be effected by these larger purchases; therefore it would be an encouragement to effect larger purchases, and the consumer would be saved money because he would be paying less for sugar.

Mr. CRAWFORD. That is exactly the point I am bringing out. The gentleman has emphasized the point I was making. The Court held that the institute should not refuse to give these discounts and they constitute economies that are absolutely evident, and the institute should permit quantity discounts because such procedure might increase the consumption of sugar and therefore result in a lower price to the consumer.

Mr. CELLER. And anything that would discourage quantity discount, and this bill would certainly have that effect, because the Federal Trade Commission could stick its nose into everybody's business, to that extent would militate against quantity discount and fly into the face of the theory enunciated by the Supreme Court.

Mr. CRAWFORD. Subsection 2, as I have interpreted it, would permit quantity discount along the lines set forth in the Supreme Court decision.

Mr. CELLER. In the sense there would be an interference by the Federal Trade Commission in the granting of these quantity discounts, and they would have a right to interpret them and set a ceiling beyond which there would be no discount—to that extent this bill militates against the decision of the Supreme Court.

Something has been said about the limitation of quantity discounts on a carload of merchandise. What effect will that have upon the farmer cooperative? Again I am appealing to you on the basis of the farmers. Do you know, I repeat, that the G. L. F., the Grange League Federation of many States, particularly my own State, including the National Grange, the Dairymen's League, and the Farm Bureau get together and buy in huge quantities. They get together and sell in huge quantities, not in carload lots, but in trainload lots. I am informed, I repeat, that they buy their spray material not in carloads but in trainloads. They buy their feed, their fertilizer, their fruit baskets in trainloads. Will the Commission prevent that? They could under this bill.

Mr. GUYER. Mr. Chairman, I yield 20 minutes to the gentleman from Wisconsin [Mr. BOILEAU].

Mr. BOILEAU. Mr. Chairman, this is one of the most important pieces of legislation that has ever come before the Congress of the United States. However, this is not an anti-chain-store bill, as many have claimed. There is nothing in the bill that may be interpreted as outlawing or making illegal the chain-store systems of the country. There is nothing in the bill that takes from the chain-store systems any of the advantages they now properly enjoy.

The chain-store systems may continue operation after the enactment of this bill, but the pending bill attempts to eliminate from the present set-up the unfair, unreasonable, and unconscionable advantages that the chains now enjoy because of their ability, through large purchasing power, to coerce the manufacturers from whom they buy, and because of the unfair trade practices which they employ in the operation of their retail establishments throughout the entire country.

As I previously stated, this is not an anti-chain-store bill. It merely takes from the chain-store systems those unfair advantages which, in good conscience, they should not enjoy.

A good deal has been said, particularly by the distinguised farm leader from New York City [Mr. CELLER], about the attitude of agriculture toward this bill. I have a wholesome regard for the gentleman, but I have not yet felt that I should follow him on farm legislation. I admit at the outset that the letters he has read are authentic. The statements which he has attributed to farm leaders are actually their statements; but, I submit, Mr. Chairman, that many of the statements made by these farm leaders in opposition to the bill were made because they were misinformed as to the provisions of the bill. I for one want to assume my part of the responsibility for unintentionally misleading them. I was in conference with them when we were discussing the effect of this bill upon the farmers of the country. This was before the gentleman from New York City began conferring with farmers on farm legislation. In this meeting there were several Members of Congress who have been consistent friends of the farmers, as well as the representatives of several national farm organizations.

Mr. CELLER. Will the gentleman yield? I just want to say I never saw one of these farm leaders. They wrote to me, and I never had a conference with them.

Mr. BOILEAU. That is fine. They wrote to the gentleman because they knew his attitude. I will assume my share of the responsibility for unintentionally misinforming these farm leaders with reference to some of the provisions of the bill to which they have registered objections.

It was not because we failed to make an effort to be properly advised. In order to get the most reliable information we could we invited a distinguished Member of this House, who has been largely responsible for handling this legislation in the Committee on the Judiciary, to come before our group and explain the provisions of the bill. This distinguished gentleman of the House unintentionally gave those of us who participated in this conference an erroneous impression with reference to some of the provisions of the bill.

I can say advisedly that some of the objections voiced by these farm leaders were based upon a misunderstanding of the provisions of the bill. At least two of the principal objections made against the bill were because of our misunderstanding of its plain provisions. The letter of these farm leaders written to Mr. PATMAN on the 25th of May, and to which Mr. CELLER referred, points out two additional provisions, the meaning of which should be clarified. This can be done here on the floor of the House, when reading the bill by section, without offering a single amendment. It will only require an explanation on the part of those who are sponsoring the bill, in order to more clearly indicate the intent of Congress. The distinguished gentleman from Arkansas [Mr. MILLER], the distinguished gentleman from Texas [Mr. PATMAN], and members of the Judiciary Committee with whom I have conferred, as well as members of the unofficial steering committee, all agree upon the interpretation of that language, and I am sure no amendment will be necessary to clarify it. The congressional intent will be made clear from the debate on the floor.

I hear some gentlemen say that the Supreme Court may have something to say about it, but I am sure the language is so clear that even the Supreme Court cannot misinterpret it.

Another objection raised by these farm leaders was with respect to the anti-basing-point provision. They felt that this was a dangerous feature of the bill. I personally would rather have that anti-basing-point provision in the bill, but the committee, in its wisdom, will submit a committee amendment striking it out. The members of the steering committee believe that in order to insure its enactment we should eliminate this provision, and, although personally I would prefer that it remain in the bill, I am nevertheless willing to go along. I am pleased that in this respect we are meeting the demands of the farm organizations with whom I have always tried to cooperate, both as a member of the Committee on Agriculture and as a Member of the House, and whose views I have welcomed at all times in the consideration of this bill.

I have given consideration to their needs as a member of the Patman committee investigating chain stores, and as a member of the executive committee of the Steering Committee organized to promote the adoption of this bill. It is now agreed that the anti-basing-point provision is to be eliminated. So far as I am concerned, I would like to see it remain in the bill, because I do not believe it to be dangerous, but in the interest of the passage of the measure, and because of the apparent apprehension of the farm leaders, I am going to vote to take it out.

Another objection made by the farm organizations was with reference to the classification of wholesalers and so forth. The distinguished gentleman from New York, in his argument a few moments ago, referred to the inclusion of that provision as being one of the reasons the farmers are opposed to the bill. There is absolutely no opposition to

striking this paragraph from the bill. The steering committee has asked that the Judiciary Committee do this, and I understand that the Judiciary Committee has agreed to offer an amendment striking it out. Everyone here is in accord and in agreement that this should be taken out, primarily, because it would be detrimental to the best interests of the farmer cooperatives. When this was pointed out by the farm organizations, all those who had been supporting the bill agreed that this should be taken out. So the gentleman from New York is in error in this respect.

Now he talks about advertising allowances and refers to the farm leaders as being opposed to this provision of the bill. This was objectionable as they first interpreted the bill. However, this is another case of misunderstanding and misinterpretation of the language. They received this impression at the meeting I have referred to, at which time an erroneous impression was given with reference to the actual provisions of the bill. Now that they understand it, all they ask is that the intent of Congress be made clear during the debate. In my own humble judgment, I do not think it needs explanation or clarification. It certainly does not need amendment, because it is very clear that these prohibitions against advertising allowances are not going to be injurious to the cooperative farm organizations of the country.

Mr. BLOOM. Mr. Chairman, will the gentleman yield?

Mr. BOILEAU. In just a moment.

The gentleman from New York [Mr. CELLER] said that if these farm cooperatives—and his heart was bleeding for them—give an advertising allowance in one community, such advertising allowance would have to be given by the cooperatives to all of their customers throughout the entire United States. I confess I do not blame him very much for making this statement. As a matter of fact, I had the same impression myself until I read the bill more carefully.

I think if he will study the bill I am satisfied he will conclude that the farm cooperatives can go into one community and grant advertising allowances and they will not be required to give such advertising allowances to customers in other communities. It is true that if they go into Podunk and give an advertising allowance to one concern in that community they will have to give a similar allowance to any other concern in that community, but not on the west side of New York.

Mr. BLOOM. Will the gentleman yield?

Mr. BOILEAU. I yield.

Mr. BLOOM. What part of the bill is the gentleman referring to?

Mr. BOILEAU. I am referring to subsection (d), on page 9. At the end of the paragraph it says:

> Unless such payment or consideration is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

"Customers competing in the distribution of such products or commodities"—that means the same city or community, with competitors in the same town. But it does not mean that an advertising allowance to a customer on a corner in New York must be made to one in my home town in Wisconsin. They do not compete.

Mr. BLOOM. I am simply looking for information. Will the gentleman tell me in what part of the bill it says anything about advertising at all? Where is the word "advertising" used?

Mr. BOILEAU. We can talk about advertising allowances without using the word "advertising." If you want to find it read section (d) with that thought in mind, and you will find that it fully covers advertising allowances.

Mr. BLOOM. And yet you can find no place in the bill where it uses the term "advertising."

Mr. BOILEAU. No; but the Judiciary Committee discussed the bill and the provisions in paragraph (d) with relation to advertising allowances, and any member of that committee will tell you that that section refers to advertising allowances.

Mr. CRAWFORD. Will the gentleman yield?

Mr. BOILEAU. I yield.

Mr. CRAWFORD. Even if the Judiciary Committee claimed that these provisions on pages 8 and 9 did not import advertising allowances the fact remains that it does embrace it?

Mr. BOILEAU. There is no question about that.

Mr. CRAWFORD. The gentleman made the statement that this advertising allowance would have to be granted to each dealer in a town.

Mr. BOILEAU. I say "competing."

Mr. CRAWFORD. The gentleman means each customer?

Mr. BOILEAU. Each customer.

Mr. CRAWFORD. In other words, I do not have to allow it to people who are not my customers?

Mr. BOILEAU. No.

Mr. CRAWFORD. I could select a single customer in a single town and grant it to him?

Mr. BOILEAU. The advertising allowance?

Mr. CRAWFORD. Yes.

Mr. BOILEAU. No; you could not. If you grant an advertising allowance to one customer in that community who is competing, you must grant it to all his competitors.

Mr. CRAWFORD. Then why the language on line 5:

> To all other customers competing.

Mr. BOILEAU. All other customers competing in the distribution of such commodities.

Mr. CRAWFORD. But he must be my customer?

Mr. BOILEAU. All persons with whom you deal, and if you offer such an advertising allowance, it is my opinion that you must offer it to all customers of yours in that community.

Mr. CRAWFORD. I can select one customer?

Mr. BOILEAU. If you are only selling to one customer.

Mr. CRAWFORD. In a given town?

Mr. BOILEAU. I believe you could do that; yes.

Mr. BLOOM. You only think he can do it?

Mr. BOILEAU. No; I am stating that if you have only one customer in a community, that is the only person to whom you have to offer it.

Mr. BLOOM. You will have to give it proportionately to all other persons in that town.

Mr. BOILEAU. All other customers with whom you deal.

Mr. MILLER. Yes; his customer.

Mr. BOILEAU. That is all.

Mr. MAY. Mr. Chairman, will the gentleman yield?

Mr. BOILEAU. Briefly.

Mr. MAY. This is about a matter I think the gentleman will be interested in. The gentleman has talked about cooperatives and, I take it, he has reference to farmers' cooperative associations. There is nothing in the bill that says a word about farmers' cooperative associations, but in subsection (f), on page 9, I think there is enough language to authorize a cooperative in some business which is creating a monopoly to take advantage of it and continue that monopoly.

Mr. BOILEAU. The gentleman stated I refer to farmers' cooperatives. There is nothing in the bill about them. The cooperative farm organizations objected to certain provisions of the bill which they thought would restrict their carrying on business of the type they are now carrying on under the authority of the Capper-Volstead Act. That has been eliminated.

Mr. Chairman, I want now to go on to the other objections. This cooperative proposition is referred to in section (f). That language permits cooperatives in other lines of business to continue as they have in the past, and permits them to turn back to their own members such benefits as might accrue to them in their cooperative enterprise. That is true.

Mr. MAY rose.

Mr. BOILEAU. Oh, I have only a couple of minutes left.

Mr. MAY. I am trying to strengthen the bill.

Mr. BOILEAU. I appreciate that; but I cannot yield further. One other matter I want to bring out, so far as farm organizations are concerned, and their opposition to this bill: I want to make it clear to the Members of the

House that I do not claim to be authorized by these farm organizations to speak for them. They are able to speak for themselves. They have not asked me to speak for them, and I do not want to have anyone get the impression that I even claim to do so. However, I say that of the five objections they raised in the letter to Mr. PATMAN on the 25th day of May, the first four will be all be taken care of by these amendments, and the debate, I am sure, wil clarify the congressional intent, if such is needed, with reference to two of the sections of the bill. There is one provision, however, that they are still opposed to, and that has not been taken care of by proposed amendments. That is paragraph (e).

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. GUYER. Mr. Chairman, I yield the gentleman 2 minutes more.

Mr. BOILEAU. With reference to section (e), they request that the proviso in that paragraph be changed. They want to strike out the part about the prima-facie case which may be rebutted by showing that the lower price to any purchaser was made in good faith to meet an equally low price of a competitor. They would like that changed so that they can offer prices in good faith to meet competition. They insist that is necessary. I do not personally attach the importance to their amendment that they attach to it, although I do not believe that it would harm the bill a great deal to make that change. I feel that the bill is a little better in its present form than it would be with the amendment. I do not believe that the change is necessary to protect the interests of the cooperatives in their legitimate business.

This bill is intended to prevent a seller from discriminating in favor of one customer, giving one customer an advantage that he does not give to his competitor. That is the intention of this bill. The amendment they suggest would not harm the bill a great deal, but it would not make it any better. They, however, still insist upon that amendment, so that the gentleman from New York is about 20 percent accurate. In other words, he says the farm organizations have five objections. I believe I can say without fear of contradiction that the objections have been reduced from five to one, and the gentleman from New York is about 20 percent accurate when he talks about the opposition of the farm organizations. However, I, for one, am going to support this bill in its present form.

[Here the gavel fell.]

Mr. MILLER. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. PEYSER].

Mr. PEYSER. Mr. Chairman, I am going to endeavor to approach this measure from the point of view of the consuming public, to show the disadvantage, in my judgment, that they would be placed at, provided this bill is put into effect, due to what I think is the unworkable part of the bill.

The consuming public represents a larger body than either the laborer, the farmer, or any other individual group, because it means the combined population of the Nation. I do not think any of my colleagues will dispute that. If this bill should become a law, through what I deem to be its unworkable phases the disadvantage to the consumer would be brought about in this manner: Let us assume that a large manufacturer—we call him A—is selling his merchandise today principally to B, C, D, and E, they being chain stores, department stores, mail-order houses, or what not, but large buyers. The remaining part of his product today goes to the small consumer at the country store or the little corner store. If this bill should become law, the manufacturer, A, could conform with this law by confining his merchandise entirely to the merchants B, C, D, and E, and withdrawing his merchandise from the little fellow, representing the small percentage of his output. I asked a question this morning of the chairman of the Committee on the Judiciary. He stated there is nothing in this bill that could make the manufacturer sell his merchandise to a man if he did not want to sell it to him. What does that mean in reflected price to the consuming public? It means that the little man is removed from the picture as far as buying merchandise from the large manufacturer is concerned, and he must seek other channels for the purchasing of that merchandise. Those channels that he finds are open to sell him, not at the price at which he is buying it today, but at a higher price, due to the fact that his purchasing is going into channels where the overhead is higher on account of the mass purchasing power having been removed. Now, who is going to pay that added price that the little merchant must pay for his merchandise? The consumer. In no other way in the world can that little man who is forced to pay more exist, unless he in turn collects that from the consuming public. That is one phase of the bill that I think is unworkable, and will in turn increase the cost to the consumer.

There is another phase. If this should become a law there is nothing to prohibit the man who has his largest distributing points in two or three or four States, from opening up subsidiary salesrooms within these States, and delivering the merchandise to the subsidiaries to conform with the provisions of this act. That man within the State in which he distributes the bulk of his merchandise, it being intrastate, can offer any discounts, any allowances that he sees fit. So that the proponents of the bill, whose sincerity I do not question, are really going to hurt the little fellow, because they are absolutely legislating the people that they want to affect under this bill, into a preferred position.

There is one other situation that could develop. There will be many men today who are manufacturing and offering their merchandise to the general public, who will go into the distributing business themselves and will set up competition against the merchant. This competition does not exist to any extent today. But it is bound to come if this bill is passed. I know of one case in New York of a firm who for 10 years has sold no merchandise to the consuming public in general. He formerly distributed his merchandise to many distributers. Today he has his own stores. He has 10 or 11 and is constantly branching out. That will be the preferred position that other manufacturers will be driven into.

There is nothing to prohibit a man from starting, not only his own factories and his own stores but from withdrawing, if you will, what you might term the "chain store" and building up as a wholesale distributor, and organizing his different chains under a cooperative system, whereby he can sell to those cooperatives which are owned and operated by individual managers today under his supervision. He can sell them under a volume price, in order to conform to this act. In what way are you helping the public under this law? You are not helping them. You are hurting them. If they do take advantage of these evasions, instead of prices coming down to where they are to the big buyer, it will just work the other way. It will put the manufacturer in a position to ask more for his merchandise either in large quantities or in small quantities, as the case may be.

Mr. PIERCE. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I yield.

Mr. PIERCE. Then, according to your philosophy, you are absolutely helpless? The chain stores become manufacturers and distributors, and there is no help for the situation?

Mr. PEYSER. I do not say we are absolutely helpless. I say we are helpless under this bill.

Mr. PIERCE. But we are helpless anyway. Is not the whole tendency of the chain store to become a manufacturer today?

Mr. PEYSER. It will be if you drive them into the manufacturing business.

Mr. PIERCE. Are they not in it now?

Mr. PEYSER. No; they are not, to any extent.

Mr. PIERCE. Are they not growing vegetables on the Pacific coast?

Mr. PEYSER. They manufacture some articles.

I yielded for a question, not for debate. Let me say to the gentleman that instead of manufacturing a few things, as the gentleman states now is the case, they will be driven to manufacturing all their goods.

I would like to consider the bill now from the point of view of labor. I have had some merchandising experience,

and I know of many cases where factories have been kept busy during off seasons, where the factory would make quantity concessions in price in order to keep their workmen busy, in many cases with little or no profit to himself, this low-priced merchandise in turn being sold at prices well under the regular scale, the added consumption due to low price keeping labor employed and the consumer getting the benefit.

I favor correcting any evils that may exist, but the bill we are debating does not do that, as I have tried to show you, and I, for one, will not support it.

Mr. MILLER. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. FORD].

Mr. FORD of California. Mr. Chairman, I shall not in anywise discuss the technical details of this bill, but I desire to call the attention of the Members to two or three points which seem to me to be vital in its consideration.

We all know that a number of great merchandising chains have been created in the United States. These vast organizations usually center in New York or the East where the great money pools are located. By reason of their broad capital structures, of their efficient organization, of their power to attract to their service men of outstanding ability in their particular lines, they have been able to do a tremendous volume of business throughout the country. They have built up a great system of merchandise distribution, with the result that they have been enabled to purchase the goods they sell at a price considerably lower than that exacted of the small independent merchants for the same or similar goods. It may be argued that because of their efficiency and ability they should be entitled to these advantages. Possibly a strong argument can be made to support this viewpoint, but this carries with it an implication that goes far beyond efficient distribution by chains. If these chains are permitted to continue in their present trend, we shall at no distant future see the retail trade of this country in the hands of four, five, or six great merchandising institutions. These chains will control the distribution of two-thirds of the food and clothing of this country. They have not yet got into the field of shelter, but even in housing there is a tendency toward mass production, the building of knock-down houses at the mill and shipping them to the point of erection. So the time may come when a half dozen great corporate structures may control the distribution of all the things that go to make up the ordinary necessities of life. This being the case, what would happen? The independent merchant would be put out of business, and unless he could get a job with a merchandising chain he would probably have to go on relief. We must all admit that this is evident, it is plain, and it is coming. What will it mean in the end to the producer, let us say, of foodstuffs, when it gets to the point where these chains control the distribution of potatoes, wheat, corn, vegetables, or any other commodity raised on the farm? These chain managers will say, "We will pay you so much for your produce, and no more"; and the farmer will have to take the price offered. Let us take the case of a commodity that has been kicked around as one of the so-called loss leaders in the chain stores, the cigarette. I have seen cigarettes sold at retail in chain stores on the coast for less than the small dealer could buy them at wholesale. Why? Because the small dealer had to pay the price the wholesaler exacted, while the chain stores were able to get a price from the manufacturer that enabled them to put the small dealer out of business.

While this may be to the consumers' advantage for the period during which the chain was forcing the small dealer out of business, ultimately, as soon as the small dealers are eliminated, the chain stores will say to the manufacturer, "We control the distribution of this product now, so we are going to make you accept our price for that product and that price will be whatever we choose to pay."

We are getting to the point where the great distributing chains in this country are able to dictate the price to the producers of many articles; and when they have eliminated competition they are going to dictate to the consumer the price he pays; and, let me tell you, this price will be all the traffic will bear.

To some extent the chain store saves the average consumer money; yes. There are four or five leader articles sold at a price lower than you can buy them for from the independent merchant; but if you buy a full bill of goods and compare the total price with what you would have paid at the small store, you will find that you have paid as much or more than you would have paid at the small store; and in the small store you would get your full weight, whereas in the chain store you very often do not.

The philosophy of this whole matter was set forth by the very eloquent, the very able gentleman from Texas—I place him in the class of statesmen—Mr. SUMNERS, who, in the short 5 minutes he spoke on this floor, set forth the situation as ably as any man I ever heard in this House. [Applause.]

I am going to vote for the Patman bill, because I believe it will benefit the farmer-producer as well as the honest manufacturer; that it will benefit the consumer; and that it will keep in business the 8,000,000, 9,000,000, or 10,000,000 small dealers who have so far made their own way in this terrifically intense competitive system, but who are now threatened with extinction unless the Congress of the United States comes to their aid and does something for them. I ask my colleagues, therefore, to support this bill because it heads in the right direction and may check a dangerous trend. If we do not stop this trend, a situation will develop in this country that will mitigate against any possible recovery.

Mr. PATMAN. Mr. Chairman, will the gentleman yield for me to read a telegram about the co-ops?

Mr. FORD of California. Yes.

Mr. PATMAN. I have just received the following telegram from Hector Lazo, executive vice president, Cooperative Food Distributors of America:

MAY 27.

Hon. WRIGHT PATMAN,
House of Representatives:

In view of controversy relating cooperatives, want to register with you that 98 retails, owned cooperatives, operating in 37 States and owned by 21,000 individual retail grocery merchants, approve H. R. 8442 as recommended this noon by Judge Miller and will help you carry out its purpose throughout the country.

HECTOR LAZO,
Executive Vice President,
Cooperative Food Distributors of America.

Mr. FORD of California. I do not think the argument can be supported that in its present form the bill is detrimental to the cooperatives. The person who makes that argument is not sympathetic with the measure.

Mr. Chairman, I yield back the balance of my time.

Mr. GUYER. Mr. Chairman, I yield 10 minutes to the gentleman from Michigan [Mr. CRAWFORD].

Mr. CRAWFORD. Mr. Chairman, within a few days after taking my oath of office in this body I introduced a bill moving in the direction in which this one is moving today. I stand on the fundamental proposition that a business operating in this country which refuses to compete should be regulated. I get this philosophy from the Interstate Commerce Act and from the fact that the public-utilities commissions of the respective States say that a public utility must be controlled because it has no competition. It does not compete, it has no competitors, therefore must be regulated by the public. Now, if it is bad to give secret rebates, concessions, advertising allowances, and quantity discounts to the favored few in the movement of freight or in the movement of passengers, it is bad for the economic body and unsound economic practice to give those things in trade between jobbers, retailers, wholesalers, and manufacturers.

This bill is too broad to deal with, in a general way, within the short space of time of only 10 minutes, so I want to get down to something specific. A lot has been said here about the farmers objecting to the bill. Let me take you on a little visit and show you what is happening to one single farm commodity which is produced in some

16 States and is perhaps one of the greatest headliners there is anywhere in the realm of politics. I refer to sugar made from beets.

The domestic sugar industry in this country rests in, we will say, 18 States; Louisiana and Florida in the Southern States, in which will be found the cane fields, and in the territory north of the line I have indicated on the map, we find the sugar-beet industry. There are two chain organizations in this country, one of which distributes about 8,000,000 bags of sugar per annum, operating mostly in the territory east of the Mississippi River. The other chain operates largely in the same territory.

How do they buy their sugar? Let us start at the beginning, in the sugar-beet fields of the Western States, and Michigan, Ohio, and Indiana. The farmer sells the sugar beets under a participating contract which says that he will take for his labor, in the form of a pile of sugar beets, a certain percentage of the net price received from the manufacturer after he sells the sugar, the pulp, and molasses taken from the beets. In some areas it is on a 50–50 basis—that is, you take the net proceeds (not net profits), giving 50 percent to the processor and 50 percent to the farmer.

Where does he come into this bill? The processor sells the sugar through a broker. Who is the broker? Fundamentally, he is a chain broker who has headquarters up in New York City. He has a beaten path from his brokerage house over to the purchasing department of the big chains. Keep in mind, now, we are dealing with a farm product. I am now talking about the pocketbooks of the farmers up in my own district as well as the pocketbooks of the farmers out in the western and middle-western districts, the fellows who perform the stoop labor in the field.

The broker goes over to the chain store and says, "Let me tell you something, Mr. Chain Buyer. I know a certain beet-sugar mill operator out in the West somewhere who is hard pressed for money. He operates under a tax law which reaches in and states that he has to distribute his earnings; therefore he has not accumulated a reserve for working capital. He needs money for meeting pay rolls, for interest charges, for raw material. His warehouse is full of sugar. I will tell you what let us do. Let us make him an offer for a hundred thousand bags of sugar 20 cents below the market. That is 20 cents a bag. It is $120 a car secret rebate. On what? Why, on one carload of sugar. Think of the rebate on 10,000 bags of sugar or on a hundred thousand bags of sugar.

So they flirt around with the processor, who is going to split 50–50 with the farmer, for a few days, and finally this chain broker, who has an office in Detroit, Chicago, St. Louis, Cincinnati, New Orleans, Atlanta, San Francisco, and Denver, Colo., tells the Michigan processor, "Well, Mr. Michigan Processor, you better sell those 100,000 bags of sugar. If you do not I am going over to a processor in Denver, Colo., and buy from him." He is telling the Denver processor the same story the same day.

They put the processors in the sweatbox. He looks at the 100,000 bags of sugar at $4 a bag, and he thinks of a $400,000 check in one lump sum, shipment within 10 days. What does he do? He sells the 100,000 bags of sugar, makes a secret, confidential price—10, 15, 25 cents per bag under the market, in which the farmers own a 50-percent interest. The sugar is sold to a group of fellows who operate a chain store and the deal is rigged by a group who operate a chain brokerage firm. They buy the sugar at a discount of say $20,000. The farmers lose $10,000 on the one deal.

Who did this? A New York chain brokerage outfit operating through a chain set-up. The local broker is crowded out of the picture. What happens? This same group of farmers depend upon two groups of people for distribution. Who are they? The chain stores and the home-owned grocers, the independent retailer who has helped build the Y. M. C. A. and Y. W. C. A., the one who helps carry the Salvation Army, the one who helps build every local institution that we have in every community in this country; those are the people who have held the American civilization together. The local retail merchant contributed to that building as much as anybody, and the chain store contributes about as little as anybody.

If the chain stores will compete I have no objection to them. If they will buy their sugar and other goods on the same basis that other merchants buy theirs, fine. No one can complain about that, and I shall not complain. You are moving 120,000,000 bags of sugar per annum in this country to be consumed by 127,000,000 people. If you spread the same kind of secret discount over the entire production you would have 20 cents a bag on 120,000,000 bags or, say, $24,000,000. The refiner on the Atlantic seaboard located in Boston, New York, Baltimore, Savannah, and at New Orleans and San Francisco, must sell sugar the same way because the same pressure through the same brokerage outfit and through the same chain-store set-up is being exerted on all refiners and beet-mill operators.

Mr. Chairman, every Member here on the floor can see the chaos and destruction of such practices. The American sugar-beet grower (and I have thousands of them in my district in Michigan) has been paying this kind of tribute down through the years. The rigged machinery of the chain broker and the organized chains can whipsaw the market at all times and take this "bargain-counter secret-rebate sugar" into other markets and destroy the price structure not only on the number of bags so purchased but on thousands of other bags of sugar which have been purchased on the "up and up" at full list price by the independent local jobber and retailer. I could put into the RECORD detail figures on these unfair and repulsive practices that would expose a black page in the history of the sugar industry of this country. The American farmer is totally helpless so long as the processor of the beets continues to submit to the "sweating" of the chain broker and chain-store operator. If the chain stores and the chains brokers will not compete on a fair basis, then let us see if Federal legislation can be designed which will "line them up" just as we have heretofore lined up the railroads. A refusal to compete leaves only one thing to be done, and that is to "regulate." As badly as we hate that word, if it is a choice between "monopoly" and "regulation" I personally will choose regulation. In the long run I have no fear of what the people of this country will choose, once they understand the machinery that is involved.

Mr. EKWALL. Will the gentleman yield?

Mr. CRAWFORD. I yield to the gentleman from Oregon, very briefly.

Mr. EKWALL. I simply want the gentleman to mention Portland, Oreg. I am from Oregon.

Mr. CRAWFORD. Has the gentleman a refinery there?

Mr. EKWALL. No; but I would like the gentleman to mention my State. [Laughter.]

Mr. CRAWFORD. Very well; we now have Portland, Oreg., in the RECORD.

I want to touch now on one other thing, and that is with respect to the basing-point provision. A lot of people do not understand the basing-point provision and it is easy to understand why they do not. Lots of products are sold f. o. b. a given point. We will take, for instance, sugar. Sugar is sold f. o. b. New York City. The price today of cane sugar is $5 a hundred f. o. b. New York City, and the price of beet sugar is $4.80 f. o. b. New York City. The processor of sugar beets will receive an offer, we will say, at Saginaw or Bay City, Mich., to sell sugar at Bay City at the New York basis of, say, $4.80. The sugar is invoiced to the Bay City wholesale jobber at $4.80 per hundred pounds, plus the freight rate from New York to Bay City, and the Bay City jobber picks up the sugar at the Bay City processor's warehouse. If the sugar is sold to a customer at Cleveland, the price is $4.80 plus the freight from New York to Cleveland, and the Bay City processor pays the freight from Bay City to Cleveland. The freight charges from New York to Bay City are much greater than to Cleveland. Also the freight charges from the Bay City processor's plant to the jobber's warehouse in Cleveland is very high, all resulting in a much

higher net for sugar sold and delivered at Bay City than if sold and delivered by the Bay City processor at Cleveland.

[Here the gavel fell.]

Mr. GUYER. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. FLETCHER. Will this bill remedy that sugar situation?

Mr. CRAWFORD. Only in part. It is hoped to remedy the secret rebate I have mentioned. The basing-point provisions are to be eliminated from the bill, I understand.

We are going to strike out of this bill the basing-point provision, and if I had the time I could show you where, if that goes out, it may cost the American sugar growers of this country millions of dollars annually, and I know the figures that I am talking about. However, you cannot keep it in this bill and pass the bill, can you, Mr. Chairman?

Mr. MILLER. That is the impression I have.

Mr. CRAWFORD. That is right.

Mr. MILLER. I agree myself that the basing-point practice that has grown up is indefensible, but I do not believe that can be taken care of in this bill.

Mr. CRAWFORD. Neither do I, and I am not going to object to throwing that out of the bill, because we can crawl a little bit at a time and go as far as we can with this bill.

We have not the time to go into this, but I could submit actual figures and show where this bill, if it is workable, will turn back into the pockets of some 80,000 sugar growers in this country literally millions of dollars on the elimination of the secret rebates and price concessions and advertising allowances on that one commodity alone, and yet we have had statements here from farm organizations opposing this bill because they understand that the bill will do thus and so. They were speaking about the bill as it had been explained to them and as it had been read to them in previous prints, and they were not speaking about the bill as we will vote on it in a day or two.

Mr. CELLER. I may say to the gentleman that in my time I read a letter dated yesterday at 6 o'clock p. m., where the farm organizations are still opposed to the bill.

Mr. CRAWFORD. That may all be true, but within the last day or two agreements, I understand, have been reached on certain changes that are to be made before final passage, and I know that the farmers who have not seen their leaders for months, and may not see them for years, think about how they are going to be affected by this bill.

In addition to the elimination of these secret rebates, take this advertising scheme: A chain store will make a deal and say, "Give us a 10-cent advertising allowance on 100,000 bags of sugar, or 10 cents a bag", and they will run a little ad that may cost them $5 in 40 or 50 different papers and they will collect $10,000 as an advertising allowance for this; and then they will take that very ad and say to these farmers what a great factor the chain is in distributing the products of the farm in that particular county where the ad has been run.

Now, I must come back to the fundamentals, because my time is about to expire. If a business refuses to compete, why not regulate it? If it will compete, then there is no reason for any regulation. If secret rebates and advertising allowances and practices of that kind are destructive in the transportation of goods, why are they not just as destructive in the barter and sale of those goods? These are the fundamentals you are dealing with.

A manufacturer does not dare drive out of his distributing machine the independent retail merchant. If he does the other independent retail merchants will boycott him, and inside of 60 days to 6 months his factory will be closed; but the same manufacturer will say to a chain-store operator, "You can have my shirt, you can have my pants, you can have my B. V. D.'s", while he says, by practice, to the little retail merchant who has held the community together, "I will help the chain store drive you out of business by allowing the chain secret rebates, and so forth, and I will give them anywhere from 5 to 25 cents per unit as a secret allowance", playing the cards under the table, while he denies the independent wholesale merchant or the home-owned retail house that is operating in the community where the goods are grown, processed, and distributed the same privileges. This is unfair. This is highly destructive of our entire economic procedure. It goes further than that and eventually, if not checked, it will destroy the present social and economic institutions of our country. I favor checking this drift if there is any constitutional way it can be done, and I believe there is. [Applause.]

[Here the gavel fell.]

Mr. MILLER. Mr. Chairman, I yield 10 minutes to the gentleman from Nebraska [Mr. McLAUGHLIN].

Mr. McLAUGHLIN. Mr. Chairman, it seems to me that the discussion of this bill has been enlightening, but because of the ramifications into which it has run has been at the same time a little confusing. Therefore I am going to ask the indulgence of the Committee in the short time allowed me in attempting to contribute to this debate by clarifying the issues before us in the consideration of this measure.

One might be led to the conclusion after hearing the discussion here that this is a new measure, that we are seeking to establish a new policy and to engage in a new type of regulation. That is not true. In weighing and considering the arguments upon this bill I ask you to bear in mind that it will accomplish only an amendment to existing law which has been on the statute books in this country since 1914.

In other words, this is an amendment proposed to the Clayton Act, an amendment to only one section of that act.

Let me read the section which the bill proposes to amend. Section 2 of the Clayton Act reads:

> That it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities which commodities are sold for use, consumption, or resale within the United States, or any Territory thereof, or the District of Columbia, or any insular possession, or other place under the jurisdiction of the United States, where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

That is section 2 of the Clayton Act.

And then Congress added a proviso, as follows:

> *Provided*, That nothing herein contained shall prevent discrimination in price between purchasers of commodities on account of differences in the grade, quality, or quantity of the commodity sold—

And so forth. In other words, section 2 of the Clayton Act prohibited discrimination in price, but in the proviso it is provided that discriminations in price are permitted, so that the proviso which was added to that section completely destroyed the section itself.

Now, this bill before us presented to the Judiciary Committee simply does what section 2 of the Clayton Act intended to do. In other words, it provides generally that discrimination in price is prohibited, but sets forth the conditions under which reasonable and proper allowances may be made in price for the specific reasons and upon the particular grounds set forth in the act.

The bill under discussion prohibits the specific abuses which have grown up under the Clayton Act because of the proviso to which I have just referred.

There are three types of discounts used as subterfuges by manufacturers to large purchasers in order to afford to those purchasers a reduction in price as contrasted with the price which the small purchaser is allowed. Those three discounts are advertising discounts, or pseudo advertising discounts, if you will; brokerage discounts or pseudo brokerage discounts, if you will; and quantity discounts. This bill does not prohibit those three discounts. In fact, it clarifies the law and states the terms and conditions under which those three discounts may properly be allowed. Advertising discounts are limited to legitimate advertising discounts, and no purchaser or manufacturer should complain about that. Brokerage discounts are limited to legitimate brokerage discounts and not secret rebates, and no manufacturer should object to that. In fact, I am informed that manufacturers are anxious that this bill be passed in order that they may not be gouged as they have been in the past by large-quantity purchasers who are demanding these unreasonable discounts.

The third is quantity discounts. It has been suggested, but the general impression has been created in connection with this bill, that this bill, if enacted into law, would require that a manufacturer sell to the man who buys a dozen articles at the same rate per article as the man who buys a thousand or a thousand gross of those articles. That is not the case. Quantity discounts are allowed under section 2, as shown on page 6 of the bill, but only for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchases sold or delivered. So that a manufacturer who can effect a saving in cost of manufacture or effect a saving in delivery in different quantities is allowed to grant a discount on account of such savings. Using, however, the analogy of the Interstate Commerce Commission in fixing rates on interstate shipments by railroad, which has been followed, the bill provides that there shall be a limit beyond which no discount shall be allowed. In the case of the Interstate Commerce Commission the limit was fixed as a carload lot, as we have heard it explained here by those who have preceded me.

It has been suggested and urged, and was urged at the time the interstate commerce law was passed, that Congress should go further and permit discounts beyond that unit for the reason that a railroad can ship more cheaply a trainload than it can ship individually the aggregate of cars that go to make up that trainload. The Interstate Commerce Commission held, and it has been upheld by the courts, and I think we will agree, wisely, that discount beyond a carload would not and should not be allowed for the reason that but very few shippers would be in a position to take advantage of it. Very few shippers would ship in such quantity as to make that discount beyond a carload lot available to them. So this bill allows the Federal Trade Commission, after proper consideration of the facts, to fix the limit of quantity beyond which no quantity discount shall be allowed.

To summarize briefly, this act permits allowance for discount as stated in section 2 on page 6 for difference in the cost of manufacture, sale, or delivery resulting from differing measures or quantities in which the commodities are sold or delivered to the purchasers but allows the Federal Trade Commission to fix quantity limit beyond which no discount will be allowed.

This provision is based upon and follows the theory of quantity limitation, provided for as to transportation in the Interstate Commerce Act.

The bill merely strikes out the proviso in the Clayton Act which renders ineffective as to quantity discounts the provisions of that act prohibiting price discrimination and at the same time makes the Clayton Act effective as a prohibition against improper discounts or rebates under the guise of advertising discounts, or brokerage discounts.

As a member of the Judiciary Committee to which this bill was referred and as a member of the subcommittee which studied and considered this measure, I have listened to the testimony of witnesses and have read the printed briefs and arguments and have reached the conclusion that the measure is designed to protect the independent merchant against unfair practices which, if continued, will ultimately destroy independent merchandising.

I have no desire to shackle legitimate business or to impose unreasonable restrictions upon legitimate business. On the contrary, I am in favor of all possible assistance to the conduct of industry, trade, and business generally in a fair and honest manner.

The time allotted to me does not permit me to touch upon all the phases of the bill or to refer to all of the points made in the arguments thus far on the floor of the House. However, I have pointed out the essentials of the measure and the good which will result from its passage, and I trust the House will pass this act with the committee amendments which have been described by those who have preceded me on the floor in the discussion of this bill.

Mr. MILLER. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. SHANNON].

Mr. SHANNON. Mr. Chairman, I take it this measure is intended to restore to the American boy the opportunity which has been taken from him by great wealth.

Adolph Hitler, of whom I do not approve much, said that he would sooner have 10,000 Germans owning 10,000 stores than one German owning 10,000 stores. I would sooner have 10,000 Americans owning independent businesses than have one chain company owning 10,000 stores.

A few years ago one of the founders of the A. & P. died in Connecticut, leaving his son $135,000,000. His mother bewailed in loud tones that she was worried lest some designing woman should come along and get that $135,000,000. While worrying about the disposition of that great fortune, the good widow should have also given some thought to the manner of its acquisition. She should have thought of the many small independent merchants who were destroyed and whose families were left destitute by the chain organization of which her husband was a part. These independent merchants were destroyed because there was no law to protect them from the menace of organized wealth.

The very bigness of these chain organizations makes them a menace to our civilization. They have a disregard not only for the laws of the land but for the laws of God. They even attack something sacred to every man and woman in this room. They disregard a day that has been handed down and observed by us for thousands of years—the Sabbath of Moses and the Sunday of Christianity. I want you to show me, if you can, one of these institutions that has any respect for that day.

A great judge in Missouri by the name of Scott, away back in years gone by, said in sustaining the law prohibiting the transaction of business on Sunday: "It is right and proper that this day should be set apart as a day of rest. Why, even the beasts of the field know when Sunday comes because a harness is not adjusted to them."

I am not a Sabbatarian, but I do believe in a proper observation of that day from the standpoint of religion, rest, and pleasure.

In almost every city in this country today you will find a group of chain stores, under the guise of drug stores, selling every article under the sun and keeping open 18 hours on Sunday as well as the day before, the Sabbath of Moses. The underpaid clerks of these gigantic organizations are forced to observe the day set apart for worship, peace, and rest by selling the wares of their mercenary employers. Do we want the civilization handed down to us by our Savior, or do we want to substitute for it this new civilization introduced by the chain organizations who have but one god—money?

I say we are a bunch of cowards if we do not come forward and take steps to correct this evil.

On Easter Sunday I was over at Atlantic City, and I have here a few articles of necessity that were sold to me there that day. I purchased this hammer at McCrory's. I do not know why it should be necessary to sell hammers on the Boardwalk on Sunday unless for the purpose of hitting some fellow on the head after he had indulged too freely in something obtained in one of these modern women's barrooms. [Laughter.] Then I found this belt. There might have been some necessity for this. I bought it at Woolworth's. Then I also purchased this rack at Woolworth's for 20 cents. The label explains what it is to be used for.

There might have been some need for a fellow buying this bath brush on Sunday, but he should have been made to buy it the day before or the day before that.

I also bought this saltcellar, again at McCrory's.

On another Sunday, while in Atlantic City, I bought this jewelry. There was this pair of pierceless earrings, 10 cents at McCrory's; and this pin of indestructible pearls,

10 cents at Woolworth's. Then I went into Henry Ford's elaborate display on the Steel Pier. There I found men putting machines together, while high-pressure salesmen explained the fine points and took orders for the sale of these automobiles.

I next went to the other end of the walk, at the corner of Georgia Avenue and the Boardwalk, and found the display rooms of that great plumbing-fixtures organization, Crane's, which boasts of being the largest concern of its kind in the country. I was taken in, and they showed me 27 different toilet-room arrangements. [Laughter.] All of this was on a Sunday afternoon.

Mr. PEYSER. Mr. Chairman, will the gentleman yield?

Mr. SHANNON. I yield.

Mr. PEYSER. Why did the gentleman encourage them by buying these things on Sunday?

Mr. SHANNON. I bought them to bring them here that you might see them. [Laughter.]

Mr. RICH. Mr. Chairman, will the gentleman yield?

Mr. SHANNON. I yield.

Mr. RICH. I happened to go down town the other day after the gentleman spoke about the fisheries and I looked in the front window of a chain store and all I saw was imported fish from foreign countries, instead of using the fish from our own countries.

Mr. SHANNON. Yes; let us strike. Remember you are striking for your child and your grandchild, that he may have the opportunity that you and I had before the damnable chains came into existence in this country. [Applause.]

Mr. RANDOLPH. Mr. Chairman, will the gentleman yield?

Mr. SHANNON. I yield.

Mr. RANDOLPH. I was much interested in the gentleman's remarks. May I add this observation to what my colleague from Missouri has said relative to Sunday selling: In Washington, D. C., the store of Woodward & Lothrop does not even place advertisements in the Sunday newspapers, and their windows are covered with blinds on Sundays.

Mr. SHANNON. The chains will do something to that concern.

Mr. RANDOLPH. Of course, it is not a chain store.

Mr. SHANNON. I understand. It is an institution that observes the rules of decency.

The CHAIRMAN. The time of the gentleman from Missouri has again expired.

Mr. GUYER. Mr. Chairman, I yield 10 minutes to the gentleman from Kentucky [Mr. ROBSION].

Mr. ROBSION of Kentucky. Mr. Chairman, ladies, and gentlemen, this so-called anti-chain-store bill before us does not introduce a new principle of law or policy in this country, as I understand it. Many years ago Congress became convinced that some industrial and commercial organizations had become so powerful and were indulging in such discriminatory practices as to amount to unfair and unjust discrimination and created powerful monopolies.

Let us not forget that it was a Republican Congress and a Republican administration that passed the Sherman antitrust law and led in the field of legislation to protect the small-business man and the small concern against monopolies. At that time and under those conditions the great concerns that were charged with being guilty of these discriminations and the development of these great monopolies were engaged in industrial production—steel, oil, sugar refining, and so forth—and in the distribution of these products. The great chain organizations for the distribution of food, drugs, clothing, furniture, house furnishings, and so forth, were unknown. They had not been developed.

As our country developed, it was found that the antitrust laws did not meet a number of new conditions and situations, and therefore in 1914 Congress passed what is known as the Clayton amendment to the Sherman antitrust law. A provision was put in that law, however, that greatly weakened its effectiveness. But for that provision in the Clayton Act, this measure might not now be necessary and we might not have been confronted with conditions that now call for action on this legislation.

The big railroads many years ago developed a practice of secret rebates to large shippers and to favored sections of the country. The railroads, like other great aggregations of brains and capital, refused to compete fairly with their competitors of less capital or give rates comparable to small shippers and other sections, and it was therefore necessary to regulate them. For industry and commerce, we put through the Sherman antitrust law, with the Clayton amendment, and set up the Federal Trade Commission, and to cut out these unfair practices on the part of the railroads we established the Interstate Commerce Commission. I think it is now generally admitted that these measures were necessary and wholesome for the people generally of this country.

Since the passage of those acts we have developed in this country other great giants—great aggregations of brains and capital—the so-called chain stores. They have been engaged in distribution. In the beginning they distributed mainly food products, but the field has widened. Now they handle food, hardware, drugs, furniture, clothing, and even fruits and farm products.

We find billions of capital and a great array of brains controlling these great enterprises. All of us admire the high efficiency of many of these great organizations. A single chain has as many as 14,000 units scattered throughout the length and breadth of the land.

It is not the purpose of this bill to destroy or unreasonably or unfairly hamper any legitimate business institution, however large it may be. May I invite your attention to the announced purpose of this act? The very first line of the bill reads:

An act to supplement existing laws against—

Against what?—

against unlawful restraints and monopolies.

It can be seen at once that it is in harmony with the Sherman antitrust law and its amendment, the Clayton Act. Who is there in this House against enacting laws to restrain and prevent monopolies and unfair trade practices?

The next section provides that—

It shall be unlawful for any person engaged in commerce—

To do what?—

to discriminate in price—

Well, discriminate how far and how much?—

where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce * * * or prevent competition.

Is there anything unfair about that? Democrats and Republicans throughout the years have been declaring in their platforms against monopolies and urging the restraint of monopolies. One of the serious objections to the N. R. A. was that it broke down and suspended the Sherman antitrust law and the Clayton Act. It favored the big business concern and discriminated against the small business concern. It made it possible, and it occurred in thousands of instances in this country under the N. R. A., for the whales in business to destroy and swallow the small fish in business; and one of the great objections to the A. A. A. and the Cotton Control Act was that they benefited the great sugar and cotton plantation owners of the South and the great wheat and corn growers of the West and made it possible in many instances for a single plantation or farm owner to receive as much as a million dollars in benefits while it drove millions of farm tenants and farm workers from the plantations and farms and on relief. The big fellows got the loaf, the little fellows got the crumbs, and in hundreds of thousands of instances they did not even get crumbs.

And we find that the big chains are getting the loaf and the small and even large independent merchants are getting only the crumbs, and in many instances they do not even get crumbs—they are destroyed. They are not being destroyed by competition, but by unfair and unethical trade

practices of the large chains, made possible because of their great aggregations of capital and their tremendous power.

Yes, this bill further says that it shall be unlawful in any line of commerce if such discrimination substantially lessens competition in commerce and tends to create a monopoly in restraint of trade. Who can complain of such a measure that is designed wholly and only to prevent monopolies and restraint of trade?

I was a member of the subcommittee of the Judiciary Committee of the House to which this proposed legislation was referred for investigation. We held hearings and heard those favoring and those opposing this legislation. Our subcommittee, after holding these hearings and investigating the matter, came to the conclusion that the great chains of this country were indulging in unfair and unethical practices that did amount to restraint of trade and that did constitute a monopoly in restraint of trade, and our subcommittee reported this measure favorably to the full Committee of the Judiciary of the House, and the full Committee of the Judiciary, after having given the matter consideration, arrived at the same conclusion and favorably reported the bill to the House.

There were two features, however, on which we were not in full agreement. Many of us opposed section 5, on page 7, of this bill. It is the so-called price-fixing or basing-point provision. It has been unanimously agreed that that section go out; and many of us did not concur in another provision of the bill that might be unfair to the so-called cooperative associations of the independent merchants of the country. An appropriate amendment has cured that matter. Subsection (f) of section 5, on page 9, fully protects the independent merchants' cooperative associations. Some of the farm organizations opposed this measure, but, as I understand it, these amendments have removed the provisions of the bill to which they objected.

Many outstanding Members of this House who represent great farm districts have made very enlightening speeches, pointing out that this measure would be helpful and not hurtful to the farmers, and have urged its passage. Some of the Members of this House who served years ago with me remember the tremendous drive that was made to pass what was known as the branch-banking bill. What was the purpose of those measures? The purpose was to make it possible to have great banking institutions located in places like the cities of New York, Chicago, and so forth, and make it possible for them to have branch banks extending into every State of the Union and into each and every community. They could have had a branch bank in each of the little county seats of your district and in each and every community with sufficient population to sustain a bank.

It was simply a chain-bank proposition. It would have substituted for the board of directors and officers selected by the people of the respective communities of this Nation and made up of business and professional men and farmers some mere factor selected from your community or sent into your community. They would have known little and perhaps cared less about the credit needs and extending credit to the farmers and other people of the respective communities. The money would have been gathered in and transferred to New York or Chicago, depriving your community and mine of the necessary money and credit. A lot of us made a vigorous fight and helped to defeat the chain-bank system in this country.

The chain stores represent great aggregations of capital and brains. They are located in New York, Chicago, or some other great metropolis. They have established units in every county seat and important industrial center or populous community throughout the land.

Now, what are some of the unfair trade practices charged and proved against many, if not all, of the chain stores? False discounts, alleged advertising allowances, various kinds of rebates. It is agreed that these are unfair trade practices and they go outside of legitimate competition, and because of these unfair practices, they create monopolies in their own favor and unduly and unfairly restrain trade in interstate commerce. In other words, they destroy their competitors; and it was the belief of our committee, and I think it is of this Congress, that where any concern gets so big that it is unwilling to compete fairly and seeks to destroy, and does by its unfair trade practices destroy, its weaker competitors, then the only thing for us to do in fairness is to regulate and prevent these monopolies and restraints of trade.

MAINTAIN INDEPENDENCE AND INDIVIDUALISM

I have observed the effect of the powerful chain stores in my community and congressional district, as you no doubt have in yours. Many splendid independent merchants in the county-seat towns and industrial centers in my own county and throughout my district have been swept out of business by the chain stores. In their stead are the chain stores which do not as a rule buy any real estate. They rent some building or place of business. They pay very little taxes to the city, county, or State where they operate. Each day they take their receipts to a bank, make a deposit, and at the same time secure a cashier's check or draft which is forwarded in the first mail in most instances to New York City. I have observed this many times when I was an officer in a national bank in my home town. The money of the community is absorbed just like a great sponge absorbs water. It can be seen at once that this system takes the money and credit from the various counties and communities of the Nation and centers it in the great metropolises like New York and Chicago. About all the service they render to a community is to exchange their goods for the people's money and send the money out of the community.

When some poor person dies in the community, or some widow and orphans need help, or churches or colleges are to be built, or other welfare or civic improvements are to be undertaken in our respective communities, we do not go to the chain stores. They have splendid men and women in charge of them, but they will say to you very promptly and truthfully that they have no authority to make these contributions.

But each community has always been free to call upon the home merchants, the small wholesale house, and their officers for help. In putting out of business the independent merchants and wholesale houses, we have destroyed one of the important sources of revenue in maintaining the city, county, and State governments.

But the biggest thing of all, the chain stores are killing community interest, destroying opportunities for our young men and young women, and destroying individualism throughout the land. Business opportunities ought to be open to the boys and girls and men and women of each community. It develops citizenship and character. It is said that more than a million traveling men have been deprived of their jobs by the chain stores. Think of it—a million intelligent, capable, splendid men and women who have lost their jobs through the chain stores. This is a wonderful group of men and women. I have many times described them as the "go-getters", the first-line-trench fighters in business and development.

If government means anything, it should be ready and willing all the time to encourage and protect the weak and restrain the powerful when the powerful undertakes by unfair trade practices to become a monopoly and to destroy those with less capital and power. Let us protect the community spirit in every community in this country. Let us promote self-reliance and individualism. Let us keep open the door of opportunity for the boys and girls of your community as well as mine throughout the Nation. It would be useless for fathers and mothers to educate and give their boys and girls business training if in the end they find these chain stores, chain banks, and chain railroads chaining commerce and the door of opportunity closed. It has been well said that it means more to this country to have 10,000 merchants with one store each than to have one big chain store with 10,000 branches. This Nation can only be strong insofar as each individual is free and strong. I am anxious to

maintain the homes, the stores, the manhood, the womanhood, and the individualism of my community and in the 17 counties of my congressional district as well as in yours. [Applause.]

A few years ago there were four great tobacco concerns in the world that came to the Kentucky tobacco growers and told us, "Take our price or let it alone." For a long time the hard-pressed and broken-backed tobacco growers of Kentucky took their price. They had to do so; but after a while they got tired of it, and out of that oppression grew the "night riders." Congress failed to help them, and the people felt that they could not help themselves in any other way.

We must preserve individualism and individual opportunities for our sons and daughters, for our merchants, and our people. We must protect them from oppression. The present system makes it possible for some men to leave more than a hundred million dollars at their death to their children; but we must not forget that it is always at the expense of our sons and daughters and the citizens of our communities.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. ROBSION of Kentucky. I yield.

Mr. CRAWFORD. The gentlemen brought out one thought about which I desire to ask a question, that is the taking out of a community, a section of the country, or a colony, if you please, the accumulated savings of the people and transferring this money to some far-distant place. When the money is drawn out of the community by the chain-store aggregations moving it to centers of financial capital like New York City, does it not have the same destructive influence on the economic and social welfare of those people as it does when we go into an island like Puerto Rico and draw off the accumulated savings of those people?

Mr. ROBSION of Kentucky. I hope the gentleman will not take too much of my time. I got this additional time to use for myself, although I am glad to have the gentleman's contribution.

What are we trying to get away from these chains? We are not trying to take away from them any rights given to them by the Constitution of this country. What we are trying to take away from them is secret discounts, secret rebates, and secret advertising allowances. We are trying to take away from them those practices that are unfair. We are trying to take away from them the power to destroy the independent merchants and the independent and smaller wholesale concerns. We are trying to keep these large aggregations of capital and brains from forming monopolies. We are trying to keep open the door of opportunity for the small-business man as well as the large. [Applause.]

WILL NOT INCREASE THE PRICE TO CONSUMERS

It is contended that if we pass this measure that it will raise the price to the consumer. That was the same argument made when Congress passed the Sherman antitrust law and the amendment thereto, the Clayton Act. The identical argument was made when Congress passed the act to cut out rebates by railroads and preferences given by railroads to certain big shippers and to certain communities, cities, and sections of the country, and placed railroads under the Interstate Commerce Commission. This is the argument always made by great aggregations of capital when they refuse to compete fairly with lesser competitors and Congress attempts to regulate them and to protect independent and smaller concerns and prevent the larger and more powerful concerns from creating monopolies and engaging in unfair practices in restraint of trade.

This measure gives the Federal Trade Commission the power to investigate any concern that may be engaged in unfair trade practices and by which acts monopolies are created and trade is unfairly restrained.

Mr. MILLER. Mr. Chairman, I yield 10 minutes to the gentleman from Colorado [Mr. MARTIN].

Mr. GUYER. Mr. Chairman, I yield 5 minutes to the gentleman from Colorado [Mr. MARTIN].

Mr. MARTIN of Colorado. Mr. Chairman, the community builder in America is passing from the picture. Main Street, his handiwork, is fast becoming a link in a national chain, hooked up to a handful of skyscrapers in a few great cities. The towns and the smaller cities are drying up. Not merely regimentation but extinction is what the independent merchant of America is facing. As a bright young businessman remarked to me as I left home to return to this session of Congress, "We are gone, unless Congress can do something."

Multiplied thousands of businessmen, young and old, are staring into the same future. This is the indisputable picture of thousands of communities in America today, and this is the problem to which this legislation is addressed. Whether it will even approximate that objective, I leave for others to say. On that feature, I feel sure about only one thing; it will not destroy the big fellow. The big fellow always gets by. That is one of my guiding maxims in all legislation in which there is a big-fellow and a little-fellow side to it. The big fellow always gets by. He not only gets by, but he gets bigger. He was only in swaddling clothes when the Sherman antitrust law was enacted in the late eighties; now he "bestrides this narrow world like a Colossus." All the antitrust laws down to now have only succeeded in making bigger if not better trusts. Maybe some day we shall emerge. Maybe now we see only through a glass darkly.

Mr. Chairman, every village, every town, every city, large and small, in the United States, was founded by a pioneer independent merchant. The first building in every one of the thousands of villages, towns, and cities which dot the land, was a rude little store. Then more stores. Then from among these merchants came the men who founded the little banks. They built the mills and the slaughterhouses and the little industries. They built the school systems and the water systems and the sewer systems and the light systems and the streetcar systems. They became the mayors of the towns and the civic leaders. They built the fine homes and the fine business blocks. The man who built that first little store built the fine home on the hill and the fine business block downtown, and every town and city in America is a living monument to him; and all without outside help or capital. He hewed and builded his town out of the earth. He was the foundation of the commercial structure of America. Shall he be preserved or shall he be destroyed? That is the issue. Chain stores, chain hotels, chain theaters, chain banks, chain utilities, chain everything, and all absentee-owned and run by hired men.

Among all the economic changes which have overtaken and even overwhelmed us, nothing is more ominous than the change which within 15 years has converted Main Street into a link in a national chain. The suddenness of this change is illustrated by an incident told me by a man who traveled several western States for a large eastern drug concern. He said that one day while making his rounds he called on a druggist in an enterprising town and during the call he mentioned to the druggist his observation of the rapid growth of the chain system and the danger it held for the independent. The druggist, who owned his own place of business and had the best location in town, laughed at the threat. Three or four years later the traveling man dropped into the same place, and the druggist without waiting for any preliminaries said, "Come out here; I want to show you something", and took him to the sidewalk and pointed out that the chains had practically every desirable location in the block. He said, "They have got me, I am selling out to them, I am going out home and build a little notion shop on the corner of my residence property." Such incidents are valuable, more graphic and educational than a volume of statistics. It has happened in every town. Nor does the process end with the independent. Not only do the chains swallow the little fellows, but they swallow each other. I know this to have happened. A, B, C, and D were chains. B swallowed A, C swallowed B, and D swallowed C. If not already, some day D will be reposing in a bigger stomach.

Even the manufacturer is becoming a victim of the swallowing process.

Mr. Chairman, my thoughts often revert to the first time my attention was directed or at least my thought focused on this phenomenon in our commercial lift. I was driving down the west coast from Seattle to Los Angeles about 15 years ago when I noticed, here and there along the highway, large wooden shells built in imitation of an orange. They were refreshment stands. In each of them was a young man. After noticing the similarity in the dress of these young men, making them as alike as the shells, I stopped at one and told him what I had observed. He replied that there was a string of these stands all the way down the coast owned by a firm in Los Angeles and all the men in them were hired men.

At that time auto camps were just coming in and later on the tour it occurred to me that somebody would string these camps together just like the soft-drink stands, and 2 weeks later I saw in the paper an Associated Press item that a man in St. Louis was going to put in a national chain of auto camps.

I then began to note this development in other lines, and a few months later I was making talks to the local businessmen's clubs, and I recall saying to them that the time will come when you will walk down Main Street and every store you pass will be managed by a hired man. He will have no identity with this community. He will own no home in it. He will contribute nothing to its civic life. His sole interest will be to make a showing that will earn him a promotion to a better town. I named some of the pioneer wholesale firms which had grown from little pioneer stores and whose founders had been the leading citizens of the growing city, the community builders. Some of these concerns were already gone, others were going, drying up, bought out, or frozen out.

I was told the other day that there were no independent tire dealers left in my home town and that one of the last, and a good one, was now running a little repair and vulcanizing shop. Perhaps he is a casualty of the contracts between the Goodyear Co. and Sears-Roebuck, recently reported on by the Federal Trade Commission, involving discounts by the manufacturer to the mail-order house which enabled it to destroy the independent dealers throughout the country handling the products of the manufacturer. Monopoly devouring its own spawn. Multiply this case by tens of thousands and you get the national picture of colossal monopolies flourishing on the ruins of little business.

Now, Mr. Chairman, I am not appraising this change altogether by a yardstick of dollars, but also by a yardstick of men. I am wondering what will be its ultimate effect on the community life of America and upon its citizenship. We cry for individualism, when individualism is dead. We denounce regimentation, but what is this? In the final analysis, what is the difference between the absentee landlord and the absentee merchant? I find it difficult to accept this fundamental change as a sound, healthy, and desirable condition in the economic and social life of the Nation, and both its economic and social life must eventually be profoundly affected and altered.

A Member who recently drove across the country from St. Louis to Washington remarked to me that the towns looked like they were drying up. Nothing but chains. Along their streets are agencies which daily siphon out of them much more than they put in. They are falling victims to a type of mass commerce, gigantic, efficient, machinelike, which may not spend or leave a dollar in the town or in the State, except what is necessary to pay the local overhead. The hinterland is becoming a shell. It is true that these enterprises are no longer so totally aloof from all contacts with the life of the communities they serve as they were some years ago. The local manager may be no longer instructed to show the community chest the door. They have taken counsel of prudence, but even if they replaced every activity of the independent merchant, of the community builder, the question would still remain whether it would be American, whether it would make for the welfare of America, whether it would make for citizenship, to have all the business agencies of every town in the country owned and operated by gigantic corporations, a thousand, two thousand miles away. I recall the model town of Pullman, built and owned by one man. It had everything but liberty. It resulted in an explosion which shook the country for a season. There is a question how much interest a man has in a community in which he owns nothing, and the same is true of a community of people.

Recently in Washington I heard a local radio newsman say that the modern college student looked like "another Ford." All of a pattern. The chain system produces the same thing. Henry Ford is the largest individual employer of labor in America, but he is the only individual in his system. The Ford system will never produce any Henry Fords. The future of the youth of America is wrapped up in this and similar problems. What is that future? A place on the pay roll of a national octopus which will cast him out as soon as his pace slackens? That is all I can see for him. He may be better educated than his father, but will he be that substantial, independent figure walking down Main Street, bearing upon him the stamp of a community builder? Or will he be "another Ford"?

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. GUYER. I yield to the gentleman from Colorado 5 additional minutes.

Mr. MARTIN of Colorado. Mr. Chairman, what precedent have we for this legislation which proposes to prohibit unreasonable quantity discounts and false brokerage and false advertising allowances, which are in reality rebates, bonuses, subsidies, paid by or extorted from manufacturers, which enable the big buyers to crush and drive out independent competition? For answer we may turn to the history of the railways, of the interstate-commerce laws, and the many State laws which were enacted to abolish secret rebates, and rate and service discriminations, and all the evils which once enabled the carriers to make or break individuals, business enterprises, and communities. The change did not destroy the railways and they themselves would not accept a return to those practices.

This bill is not a Federal invasion of a new legislative field. It is merely amendatory of the Clayton antitrust law. It is merely intended to meet vast-scale commercial developments not in existence at the time of the passage of the original act, an adaptation of existing law to new conditions and abuses. If passed, I predict that its defect will be, not that it overshoots, but that it falls short of the mark.

Perhaps this trend is inevitable. Perhaps this phenomenon of the chain system is only one more milestone on the road to the socialized state. Perhaps when a few large private hands have gathered it all in, a larger hand will reach out. I believe as firmly as I believe anything, that the men who are fighting these monopolistic trends in all lines are making the last stand for individualism in American industry and commerce. I need not even go so far as to say that the independent is the ideal type, the final development in our economic life, but I will affirm that this legislation is an effort to preserve him. The only question to be decided is, Is he worth preserving? [Applause.]

There are no expressed differences of opinion as to the great need for curbing the unfair trade practices which are destroying independent business in this country, and at which the bill is aimed. There are only differences as to the remedy, mainly from those who at the bottom favor no remedy. The object of the bill is all right, they say, but the method is all wrong. It seems to me I have heard this before. I think this question may be safely left to the body vested with jurisdiction of the act. The administration of this law will be in no inexpert hands. The Federal Trade Commission, created for just such purposes, has won an enviable place among the regulatory agencies of the Government and in the confidence of the country. [Applause.]

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MARTIN of Colorado. I yield.

Mr. BROWN of Michigan. The gentleman implied that there was a chain banking system in the United States. I want the gentleman to know that there is no chain banking that is authorized by Federal law, except in those States where State legislatures have authorized it.

Mr. NICHOLS. Mr. Chairman, will the gentleman yield?

Mr. MARTIN of Colorado. I yield.

Mr. NICHOLS. I can tell the gentleman another story about that. We have chain banks all over the State of Oklahoma.

Mr. BROWN of Michigan. There is no State banking in the United States that is authorized by Federal law.

Mr. NICHOLS. We have chains of 8 or 10 banks in Oklahoma, owned by one or two men.

Mr. BROWN of Michigan. I am talking about Federal chain banks.

Mr. NICHOLS. They are chain banks, whether they are authorized or not.

Mr. MARTIN of Colorado. Mr. Chairman, under leave granted, I insert the following:

STATEMENTS FROM THE REPORT OF THE COMMITTEE ON THE JUDICIARY AS TO NEEDS, OBJECTS, AND SCOPE OF BILL

The purpose of this proposed legislation is to restore, so far as possible, equality of opportunity in business by strengthening antitrust laws and by protecting trade and commerce against unfair trade practices and unlawful price discrimination, and also against restraint and monopoly for the better protection of consumers, workers, and independent producers, manufacturers, merchants, and other businessmen.

To accomplish its purpose, the bill amends and strengthens the Clayton Act by prohibiting discriminations in price between purchasers where such discriminations cannot be shown to be justified by differences in the cost of manufacture, sale, or delivery resulting from different methods or quantities in which such commodities are to such purchasers sold and delivered. It also prohibits brokerage allowances except for services actually rendered, and advertising and other service allowances unless such allowances or services are made available to all purchasers on proportionally equal terms. It strikes at the basing-point method of sale, which lessens competition and tends to create a monopoly.

Your committee is of the opinion that the evidence is overwhelming that price discrimination practices exist to such an extent that the survival of independent merchants, manufacturers, and other businessmen is seriously imperiled and that remedial legislation is necessary.

More than 20 years' experience and observation with respect to the operation of the Clayton Act, together with new methods of trade and industrial organization that have since developed, have convinced your committee of the shortcomings of existing legislation, and of the need for strengthening existing laws and of fitting them more perfectly to the methods and needs of today. This your committee has striven to do with a careful regard to the preservation of full freedom and sound and honest business methods in all its necessary and proper operations, but with a firm resolve not to permit the desire of privilege to masquerade under the claim of right. It has been our effort to disturb nothing that is essential.

Its guiding ideal is the preservation of equality of opportunity as far as possible to all who are usefully employed in the service of distribution and production, taking into consideration their ability and equipment to serve the producing and consuming public with efficiency, and the protection of the public from a threat of monopoly or oppression in the production and manufacture of the things it needs, and the distribution of the same, fairly and honestly without employment of unfair trade practices and unlawful price discrimination.

It is the design and intent of this bill to strengthen existing antitrust laws, prevent unfair price discriminations, and preserve competition in interstate commerce. It is believed to be in the interest of producer, consumer, and distributor. No business institution need have any fear of this legislation if it will conduct its business honestly and without the use of unfair trade practices, and unjust price discriminations.

Mr. GUYER. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. DIRKSEN].

Mr. DIRKSEN. Mr. Chairman, about the time I became politically ambitious some years ago it became necessary, of course, to campaign in every village, hamlet, and city of the Sixteenth Congressional District of Illinois. In the course of that campaign I had my eyes opened. I went into some little villages that at one time were thriving communities and today are merely ghosts of communities. In going in you would see, perhaps, the bank was closed. The stores were closed and boarded up, and for all practical purposes all the life and the virility had left the community.

I had still another experience when the banking difficulty struck this Nation and we had the bank holiday. I do not recall offhand, but I believe there were some 12 or 13 small banks in my district that keeled over and I sought the best I could to render some assistance, to meet with the stockholders and the boards of directors, in the hope those banks might be rehabilitated, because the community life centered around the bank. It was then my privilege to go back after the shades had been drawn in those banking institutions and to note that boards had been plastered over the windows of ever so many stores in those communities likewise. No Member of the House can go through this kind of an experience without becoming reflective and wondering what the development in American communal life has been up to the present time.

I discerned two forces that had developed this country. The first one was a centrifugal force which started away back in the days when the Constitution was formulated and it spewed away from a common center. It picked up these families on the Atlantic seaboard and spewed them away out into the hinterland. It was this centrifugal force, I presume, that sent Fremont into the West, that sent Sutter out into the valleys of California, that sent Lieutenant Pike to Pikes Peak, that sent all of these pioneers out into the hinterland, until finally our frontier was taken to the Pacific Ocean.

When the frontier was gone this centrifugal force stopped and a new force started to generate a different development in America. We then experienced the centripetal force, which is one that operates to throw things into a common center, rather than away from a common center. This force became active and it picked up these disassociated families and individuals dotting the country everywhere and spewed them into common centers. That was the force that gave us great metropolises like Chicago, St. Louis, Cleveland, San Francisco, New York, Philadelphia, and all the rest.

Mr. BLOOM. And Peoria.

Mr. DIRKSEN. And Peoria. So that America has moved forward on these two forces—the centrifugal force, which gave us the pioneers; and the centripetal force, which gave us the large cities.

As we went along we began to gird this Nation with hard roads, fine ribbons of wide concrete, so they would lend themselves to automobiles going along at 75, 80, or 90 miles an hour. As I saw that road-building program in every one of the 48 Commonwealths of the Union, I wondered what it would one day do to the small community. We in Peoria are just as close to Chicago at a distance of 170 miles as we were to a city 10 miles away 40 or 50 years ago. In proportion, as we have annihilated distance, so we have added an incentive for people to take the weekly pay check and, instead of spending it in the town where they live, it is so much easier to jump in an automobile and go 50, 60, or 100 miles to a common trading center, largely because there is that vanity, that magnificent conceit, that makes women, for instance, want to look over great varieties of ready-to-wear and that makes men want to do precisely the same. In proportion, as we have had this development, we leave the little community over here without the breath of life.

I wondered what could be done. As lawmakers, can we do something that will sort of preserve the communal life in those little centers? May I say parenthetically that of the 125,000,000 people in this country, 65,000,000 live in towns under 10,000 or live on the farms. Over half of our population is located in small communities; and I say here and now that I believe those communities constitute the real frontier of democracy. The Congress of the United States cannot do too much within the confines of the Constitution to preserve those communities and preserve that communal life which leaves such an indelible impression upon the whole of this Nation. Is there something we can do to preserve those communities and preserve that business life? I think so. I think we can do it within the terms of this bill.

I think it is rather unfortunate that the words "antichain store" have ever been permitted to creep into this discussion or creep into the efforts of any independent group in this

country, because the Congress of the United States from the standpoint of psychology can never set itself up as being against something which is, after all, intrinsically a legitimate institution. Nobody will say that a chain organization as such is wrongful under the law. It is legal. It has a perfect right to be here. However, it has no right to engage in unlawful practices that flaunt the provisions of the Sherman Act, the Clayton Act, or any other acts that have been placed upon the statute books for the purpose of preserving competition and for the further purpose of preventing monopolies.

So I believe I can go along with this bill and still not subscribe to the idea that this is an anti-chain-store bill, because I believe that is a wrong approach. I do not believe that any independent retailer in this country or any group of retailers who take an intelligent viewpoint or who have an intelligent approach to the problems of the retail business of the future would care to go on record as being against something of this kind or against chain stores because, after all, they are legitimate. However, when large unit groups resort to practices that are in violation of existing law, or when they resort to practices that are essentially immoral, and I use the term advisedly as being against good public policy, then I do believe that the Congress of the United States has the authority to step in and preserve the independent business structure, so that it can go on making their contributions to American life.

The thing has some practical aspects, and we can look at it in this light. I fancy, because of the efficient merchandising efforts used by high-pressure agencies and by our various organizations today, that one group store, for instance, can probably do as great a volume of business as three ordinary stores operated by independent proprietors. If you are going to put these independent stores out of business, then look at the tax resources and tax possibilities that are being gradually destroyed. If you are going to put three retailers out of business in a little community and have their province supplanted by a single, large operating organization, it means you have dissipated tax possibilities that are going to have to be spread over the rest of the community. So we are making a contribution in this respect also in proportion as we do that which is in the domain of the Constitution in order to preserve private enterprise.

Mr. GUYER. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. DIRKSEN. The same thing goes for this great problem of unemployment that stares the Nation in the face today. When I said that 65,000,000 of the people of this country are located in communities of under 10,000, I include also the fact that this embraces some 700,000 retail distribution outlets and embraces some 2,000,000 people. If this development keeps on whereby they flaunt good morals and public policy so that ultimately these independent stores will be eliminated from the scene, we shall have to make some provision for the employment of another half a million people in the next few years. Perhaps we can now take the first step in preserving this communal life and preserving these independent agencies that will minimize the unemployment problem and, possibly, enlarge the possibilities of employment in the future.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. DIRKSEN. I yield to the gentleman from Michigan with great pleasure.

Mr. CRAWFORD. Does the gentleman mean to say that our problem will begin and end with simply finding employment for these people who have been thrown out of employment, or does the problem go further than that?

Mr. DIRKSEN. That is just a fragment of the whole unemployment problem, I will say to the gentleman, but the Congress must never be insensible to anything that will contribute to a solution of our unemployment problem, even if it should embrace only 100,000 or 50,000 people. It is at least that much.

Mr. CRAWFORD. What I have reference to is this: Here is a man who has been doing business in a community on a profitable business, putting his profits back into the community, helping in everything that goes toward building up the business and the character of his community. He loses his business or loses his job, and then we have unemployment, plus these other things, to provide for, because that money which is once lost will never come back to the community.

Mr. DIRKSEN. I think the gentleman is correct.

When I say that the small merchant is entitled to this protection from the Congress, I do not mean that it is the function or purpose of the Congress to enact class legislation or to coddle or shelter anyone. Nor am I persuaded that the small merchant desires sheltering. All he wants is a square deal and protection against practices which are discriminatory and against which he has no recourse. Long ago I stated that if so-called chain organizations were sound in principle and practice and could legitimately overcome all competition, they would survive and expand; if they were unsound in principle and could override lawful competition only through favoritism and discrimination, they would ultimately die out. I believe I can still subscribe to that statement because independent merchants can meet every competition that is fair and that places them on a parity basis with the units of large organizations. That fact is borne out by the figures which were quoted in an address by Mr. Carl W. Dipman, editor of the Progressive Grocer, made to the National American Wholesale Grocers' Association in Chicago in January of 1936. In that address Mr. Dipman states that in 1933, when prices and business volume were still declining, the independent merchants lost only 4 percent in dollar volume while the chain organizations lost 6 percent. In 1934, when prices and sales volume were increasing, independent merchants gained 9½ percent as against 6 percent for chain organizations. There you have reasonably conclusive proof that the live, alert, aggressive merchants will hold their own and need no privileges or favors. All they need, and I am sure that all they ask, is protection against unlawful discriminations by way of rebates and allowances. It is the old story of providing equality of opportunity, and this measure may be a step in that direction.

It has been said this afternoon that this measure will inflict a penalty on the consuming public in the form of higher prices. That sounds plausible enough, but is subject to a great many interpretations. Let us look at some of them. First of all, you have almost 1,250,000 single independent stores owned and operated by the proprietors, who, if made conscious of the fact that they are entitled to and can have the protection of the Government against unlawful practices, will shake off the defeatist philosophy and get into the business battle with renewed vigor and vim. Considering that the independent merchants of the Nation, according to the figures of the Federal Trade Commission, do about 73 percent of the retail business, the chances are that the public will have far more to gain than they will to lose if this protection is afforded. What might now be saved on the 19 percent of retail business done by chain organizations might be saved several times over by what the public might save on the 72 percent. But even if there were a loss to the public, I wonder whether as a matter of basic principle we could support any contention that we should not pass remedial legislation to correct unlawful practices because it might raise prices. If we assume that a practice is wrong, then in strict principle it should be corrected even though there was the possibility of a raise in prices.

As I listened to my good friend from New York [Mr. CELLER] and all his dire prophecies of gloom I was almost filled with dismay. From his argument one might infer that if this measure were enacted it would spell ruin and disaster for the entire Nation. But from the past come some rather definite reassurances. In 1887, when railroad rebates were rampant and the Congress, under the spur of public opinion, set up the Interstate Commerce Commission, there were the same prophetic warnings of disaster. Yet we have lived through it and achieved new economic heights, and we are still doing business at the old stand. Back in and around

1914, when States were beginning to adopt workingman's compensation acts, the opponents of those measures prophesied general disaster and insisted that the added cost could not be passed along to the consuming public. Yet one by one the States fell into line, and today workingmen's compensation is well nigh universal. Nor did it ruin or even slow up the economic progress of the Nation. We may therefore accept with much doubt the direful predictions of our good friend from New York.

One of the saving graces about this bill is that the committee on its own motion will remove the anti-basing-point paragraph and the classification paragraph. With reference to the former, the steering committee for this bill will recall that many weeks ago I inserted a statement in the RECORD regarding the basing-point paragraph. It had no place in this measure. It was a wholly separate and distinct substantive proposition which should be treated in a separate measure if such legislation was desired, and it seems to me the committee is to be congratulated on removing those sections of the bill to which there was widespread objection and which would not aid in accomplishing the general purposes of this bill.

In conclusion let me say that the idea embodied in this bill is worthy of a trial. It seeks only to protect business against unlawful practices. It does not prevent differentials or discounts but seeks only to make the giver and receiver of such differentials justfy them as against the other fellow, who also has a right to live. It seeks to write a moral principle into the law. If it misses its objective, if it fails to do what we hope it will do, or if it has a deleterious effect upon business, it can be amended or repealed within a brief space of time. After all, most legislation is speculative in its effect and embodies the hopes as well as the thoughts of legislators. Were it not so we would have no need for a Supreme Court, and the Congress would only have to meet once in a generation.

Mr. MILLER. Mr. Chairman, in order to keep the record straight, I ask unanimous consent that all Members who have spoken or may speak on the bill this afternoon may have permission to revise and extend their remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MILLER. Mr. Chairman, I yield 5 minutes to the gentleman from Oklahoma [Mr. NICHOLS].

Mr. NICHOLS. Mr. Chairman, ladies and gentlemen of the Committee, I certainly hope the lack of attendance on the floor this afternoon does not indicate a lack of interest in this legislation.

This legislation in my judgment is vital; it is vitally important to these United States. I never lived in a great big town or city. I never lived in a town with over 30,000 population.

I now live in a town of 3,000 population, and have lived there for a number of years. From the standpoint of a town of that size and less than that size the corner or community or crossroads store plays a really important part in the upbuilding and holding together of that community.

So this bill means a great deal to the small communities in this country.

You know there is a certain sentiment and romance about the corner or crossroads grocery store. There formerly, and there now, exists the skit and whittle club. You know, where the boys gather around the stove in the winter, sit around its red-hot fire, chew tobacco, spit on the bowl, and listen to it sizzle, and settle the problems of the Nation, and the problems of the community. [Laughter.] There their hopes grow, there they dream the dreams of building the community better, to make it a better place in which they may rear a little family. That thing will apply also in the towns.

When you plant a man in a corner store he carries on his business for the benefit of the community, granting his neighbors credit for the very victuals they eat and the clothing they wear on their backs. He carries them sometimes even to the extent that he sustains losses by reason of carrying them, but with it all there is enough profit to enable him to continue and carry on. He grants them credit knowing that he will lose some accounts, but still is willing to lend a helping hand.

No chain store in my community has ever carried the widow Jones and her two little kids on their books for 30 days or 60 days or any length of time while she was getting together a few pennies to pay for the things which she had to buy from the store.

I live in a cotton country. We only have one cash crop a year. Our farmers go on a credit basis. They only pay their bills once a year. You destroy the independent merchant in Oklahoma and you destroy the cotton farmer. He cannot finance himself. No chain store will carry him on their books for 9 or 10 months.

The only one who will do that is the man who has a real interest in the community, the man who has raised a family there, the man who has invested his capital and who gets his living in that little community.

Now, my distinguished and good friends from New York City, and I have a high regard for them all, for I am very fond of them, tell me they have been working against this bill to protect the farmers of the Southwest and Middle West.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. MILLER. Mr. Chairman, I yield the gentleman 5 minutes more.

Mr. NICHOLS. Mr. Chairman, they tell me they are very much interested in this legislation because they tell me they are afraid it will hurt the farmer, they are afraid it will raise the prices to the consumers down in my country so much that perhaps they ought to be against the bill. Listen, boys. Let us worry about our farmers. We think we know what is good for them. We live there with them. We have grown up with them and if they are not healthy we are not healthy.

So I say to you, my friends from New York, you who are opposing this bill, if you are doing it by reason of the fact that your heart is beating in sympathy with the farmers of the Middle West, then get out of the way, because we will take a chance and if we are wrong they will defeat us, and not you.

My friends, what are we asking for, for the independent merchant? Are we asking that the chains be stamped out of business? No. All we are asking is that the little man be given exactly the same treatment that the man who is fortunate enough to control a corporation which can control a string of stores is given. Of course this bill does not say that if a chain store purchases a commodity by the carload lot that the independent merchant who buys only a gross shall receive the gross purchase at the same price that the other receives a carload purchase. Oh, no. It does not say that. It simply says proportionately. If they will sell to John Smith a carload of goods for a certain price, then this bill simply provides that they must sell to an independent merchant who purchases in carloads at the same price, and it also provides that of course they cannot hoodwink the independent merchant by entering into a secret agreement, and a secret combination with the chain store and give the chain store secret rebates that the man across the street, the independent, does not get, that they cannot give the chain store rebates for advertising, which money the chain-store proprietor puts in his pocket and does not use for advertising, when they do not afford the independent across the street the same opportunity and privilege. Is there anything unreasonable about this? Is there anything un-American; is there anything undemocratic about our wanting to give the same opportunity to the man who helped build this Nation and helped build the homes and communities of the Nation? Are we wrong in wanting to give him the same opportunity that is given the man who merely comes into our community for the purpose of accumulating huge fortunes in profits and who sends it back to

some other land, takes it out of our community so that it cannot build further? I think surely you gentlemen who are on the floor this afternoon will stand toe to toe and fight with both hands for the passage of this legislation, and I say to you that in my humble opinion you will have rendered a great service to a great Nation when you do it. [Applause.]

Mr. GUYER. Mr. Chairman, I yield 5 minutes to the gentleman from Oregon [Mr. PIERCE].

Mr. PIERCE. Mr. Chairman, my purpose in asking for time is to reply to the gentleman from New York [Mr. CELLER] who proposes to speak for the farm organizations of America and array them against this legislation. I belong to all the farming organizations that he mentioned. I have held office in those organizations and have been active in the local and State affairs of all named farm organizations. I have been a granger for more than a quarter of a century. I say to you that farm organizations sometimes are misguided or misinformed on the real import of proposed legislation. The real farm organizations are not opposed to the spirit of this legislation. I have met many times with a little group of Congressmen very sympathetic with the farmers. We have discussed this measure and others in which the farmers are interested. I confess that perhaps our early discussions led to the forming of an opinion by the farm group that this bill would not give necessary protection. I think that practically all of the objections that they may have had have been obviated by the amendments that will be offered here by the committee. I cannot think that the farm organizations of this Nation, or their cooperatives, would want any undue advantage. If there are practices, such as rebates, going on today whereby the farmers are securing unfair advantages, the farmers would be the first among the group that would say to change these practices. The farmers are not asking, through their organizations or individually, for any undue allowance or privilege. They want nothing but fair treatment in this matter.

I am for this legislation. I wish I were as hopeful as many of our colleagues are that it is going to work miracles. I fear it is not. I fear it is just one more attempt to right a wrong. I fear that the big chains will, by some means, defeat the beneficial purpose of the legislation. But it is worth trying. It is a step in the right direction. By passing this bill we are making a bold, open attempt to abolish unjustifiable trade practices. Our colleague from New York argued that the manufacturer would not sell his goods to the independent dealer; that the tendency would be to sell to the chains only who could buy in big quantities, and therefore he feared for the independent merchant. I believe he is mistaken.

There is no question that the chain store and the chain-business idea is wiping out our local trading centers. It is all over my country. We lost our banks in Oregon in the disaster of 1929 and 1930. Chain banks have come in. There are two great chain banks in Oregon. They control practically all of the banking business. While Governor of that State I prevented chain-banking legislation. I was no sooner out of office than they put over, with the Governor's consent, a law which allowed chain banking within the State. Then, of course, the Federal banks took advantage of it, and now two national banks control practically all the banking of the State.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. MILLER. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. MORITZ.]

Mr. MORITZ. Mr. Chairman, it has come about in the city of Pittsburgh that when any Congressman advocates liberal legislation he is considered not only radical but almost a communist. If I have to be regarded as a radical in order to be for liberal legislation, I will be satisfied to be classified as such, because I know the evil of the chain stores. While they do some good as, for instance, the renting of property and the paying of clerks and the fact of having sanitary stores, the fundamental principle of monopoly of controlling food is wrong. It is a monopoly on foodstuffs, pure and simple. Who finances the chain stores? The big financiers, like the Rockefellers and the Mellons and J. P. Morgan, who use their surpluses to garner in foodstuff stores and make you pay the price eventually. Just as it is wrong to have a monopoly on land that produces food, it is wrong to have a monopoly on stores that distribute foodstuffs.

Pittsburgh has always been considered a great place for monopolies. It is bad enough to have a monopoly on luxuries, but when it comes to foodstuffs it is tragic.

The gentleman from Texas [Mr. PATMAN] visited Pittsburgh last fall and before a great audience of independent merchants explained this bill. I was present at the time. I had introduced a bill before this bill was introduced. My bill provided that at the source everything should be the same price, but whether that would be correct or not we have to abide by this bill.

I do not know what our family would have done when I was a child if we had not used the book of the independent store. We used the book of the friendly neighborhood grocery store. We waited until dad got paid and then paid the bill. You cannot do that at the chain store. If that is radical, make the most of it. I believe that chain stores should not only be curbed, but they should be eliminated, because the great harm they do far outweighs the little good they do. They take all the money out of a community, and you cannot get one cent of credit out of them. Why not give the individual a chance? We are talking about giving individuals a chance as against corporations. Here is an opportunity. Give the individual a chance to start up a little business in his home town and let him rear his children and send them to college as they used to do. At the present time you can hardly go a square in Pittsburgh until you find a chain store, and there are usually three of them together, one right next to the other. How they do business is a miracle to me, but they seem to do it. The independent merchant does not have a chance. Of course, his prices must be higher and people go to the chain stores.

Mr. Chairman, in conclusion, I want to say that probably this is the last time I will ever have a chance to speak on the floor of this House. I have gone along on all liberal legislation of the Democratic Party, but through circumstances not controlled by myself I was not nominated; but I have this consolation, that as long as I have been here I have been for the common person, as I am one of them. I believe this bill is another step toward helping the common person. I am glad to rise here and to be recorded as favoring the common people, because I believe that if you not only control the chain stores but forbid them to exist people will have a better chance. There is too much profit on necessary things and too much concentration of wealth. [Applause.]

[Here the gavel fell.]

Mr. GUYER. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. MICHENER].

Mr. MICHENER. Mr. Chairman, no bill in this Congress has been subjected to so much propaganda as the Robinson-Patman bill. I know of no bill about which more general misinformation has gone to the country. I think I know something about this, because I am a member of the Judiciary Committee, and was also a member of the subcommittee of five which has been considering this subject matter for almost a year. I am heartily in sympathy with the objectives sought. And every act of mine has been in an effort to bring to the House a bill that will be effective, and at the same time a bill that is constitutional, and that will not be a disappointment to those looking forward to this law as a lifesaver. I believe that in this bill as it will pass the House much help will be given. I think this is the general consensus of opinion of those who are truly interested in results, and not in publicity.

I am just as sure in my own mind that the original Patman bill, as introduced, required consideration and change. This fact is today conceded by those originally interested in the bill. In short, the original Patman bill had not had sufficient consideration, and after that consideration all friends

of the measure join now in the advocacy of this perfected measure.

I possibly feel rather keenly about the propaganda above referred to because while the bill was before the subcommittee a notice was sent out to independent dealers throughout the length and breadth of my congressional district which was as follows:

URGENT! URGENT! URGENT!

We are informed Michigan Congressman, Hon. EARL C. MICHENER, opposing action on Robinson-Patman bill in present form. Also trying to amend bill to make it worthless. Suggest you write or wire him today demanding he support bill in present form. Address him at Washington, D. C. Get all merchants in other lines to write or wire him. Understand bill would be on floor of Congress except for MICHENER and a few others. Don't mince words. Let the gentleman know your attitude toward his present opposition. Act now! Passage of this bill is new hope for small businessmen.

DETROIT RETAIL DRUGGISTS ASSOCIATION.

Now this statement was probably sent out in good faith, because the organization in Michigan interested in getting the bill enacted into law did not understand the situation, and possibly listened to a Washington representative or lobbyist who was trying to use high-pressure methods. Propaganda of this nature is discouraging when a Member of Congress in the committee is working night and day and conscientiously endeavoring to accomplish something. This is but a sample of that with which all Members of Congress are ofttimes confronted. In passing, I might say that that notice was responsible for my office receiving more than 100 telegrams and communications on 1 day.

It is a pleasure now, however, to say to these constituents that I have helped perfect this bill, and that in my judgment the Robinson-Patman bill as now drawn will become a law.

Of course, this legislation is not going to do all the things that some of the proponents have lead people to believe. Yet in my judgment it will help, and is headed in the right direction. In the beginning, let us understand clearly that this is not an antichain-store bill. It simply takes from the chain-store systems those unfair advantages which, in good conscience, they should not enjoy.

The original Patman bill was drafted by Mr. H. B. Teegarden, attorney for the Wholesale Grocers' Association. That organization was in the beginning, as I understand the matter, the first sponsor of the bill. Later, retail organizations, especially grocers, druggists, and hardware dealers, espoused the cause and rendered much assistance in perfecting the legislation. An opportunity was given for every group and individual interested to be heard. Dozens of individuals and representatives of organizations were heard. The printed hearings comprise two volumes, and it would be difficult to think of any possible angle of the law that has not been digested and thought through.

The Patman-Robinson bill does not suggest a new policy or a new theory. The Clayton Act was enacted in 1914, and it was the purpose of that act to do just what this law sets out to do. The Clayton Act attempted to make unlawful price discriminations between different purchasers of commodities, which commodities were to be sold for use, consumption, or resale within the United States, where the effect of such discrimination was to substantially lessen competition or tend to create a monopoly in any line of commerce. The act, however, contained a provison that nothing in the act should "prevent discrimination in price between purchasers of commodities on account of difference in the grade, quality, or quantity of the commodity sold."

This proviso destroyed the effect of the act so far as quantity discounts are concerned, and it is primarily to remedy this situation that this bill is before us. In short, this bill provides generally that discrimination in price is prohibited, but sets forth all conditions under which reasonable and proper allowance may be made in prices for the specific reasons and upon particular grounds set forth in the bill.

Some have argued here that the bill, if enacted into law, would require a manufacturer to sell to the man who buys a dozen articles at the same rate per article as the man who buys a thousand or a thousand gross of those same articles. This is incorrect. The amount does allow for the difference in the cost of manufacturing, sale, or delivery resulting from differing measures or quantities in which the commodities are sold or delivered to the purchaser, but allows the Federal Trade Commission to fix quantity limits beyond which no discount will be allowed.

The bill aims at three things: First, fraudulent advertising allowance and discounts; that is, the manufacturer gives to the chain, for instance, the same price that he gives to the ordinary wholesaler. However, he then returns to the chain the manufacturer's check in payment for advertising of the article, which the chain agrees to do. This may mean simply the hanging of a small sign in the chain store. The independent dealer does not get this advertising allowance. The discount is not intended in payment for services but is intended, and so understood, as a discount.

Second, the chain, buying in large quantities from the manufacturer, requires a discount for brokerage allowance, or, in other words, insists on a discount equal to what the commission of the wholesaler would equal.

Third, quantity discounts; that is, in many cases the manufacturer is at the mercy of the chain store, in that the chain store will fix the price that it will pay for a given quantity and the manufacturer is compelled to take the price fixed. In many respects this is much like the manner in which the farmer must sell his product today. He has nothing to say about the price he is to receive. He must take what is offered.

Now, the first and second factors above referred to are easily remedied, but the committee has experienced much difficulty in arriving at a constitutional solution of the quantity discount problem. This same principle obtained in regard to shipments on the railroads, and a number of years ago the Congress passed legislation making it possible for the Interstate Commerce Commission to fix the rates on freight shipments so far as large shipments were concerned—that is, if there are two factories in the same town—one shipping a thousand carloads of freight a week and the other shipping but five carloads of freight a week, it is obvious that the railroad could possibly deliver the thousand-carload shipment for little less than it could the five-carload shipment. Yet, if that practice had not been prevented, the five carload shipper would have been out of business years ago. The Supreme Court has held this act valid, so far as the railroads are concerned, and it would seem that by the same analogy the Congress should have the power to prevent large monopolies, whether they be chain store or otherwise, from destroying and driving out of business the smaller or independent dealer.

I am not going to take any time extolling the virtues of the independent dealer and his value to the local community other than to say that America is made up of local communities, that individual initiative must be permitted and must survive if the door of opportunity is to be open in the future. We have had too much concentration in Washington. We have had too much centralization of industry, and I, for one, believe that the country will be better off with the family-sized farm, with the community grocery store, and the corner drug store, owned and operated by local citizens, who pay their taxes, are the backbone of the churches and local organizations and, in fact, make the home town what it is.

[Here the gavel fell.]

Mr. GUYER. Mr. Chairman, I yield 5 additional minutes to the gentleman from Michigan.

Mr. MICHENER. Understand me, I am not condemning the chain store or efficient business methods. We must have progress, and chain stores are here to stay. They have taught the independent merchant much in merchandising. It seems to me, however, that it is the duty of the Congress, in the interest of all, to go as far as possible in seeing that the independent merchant is protected against fraudulent discrimination. After all, competition in business means the survival of the fittest, and if the independent dealer cannot survive when placed on an equal basis with his competitor, then I do not believe that legislation will help him.

The hearings disclosed that during the last year one large chain store received $8,000,000 bonuses or discounts in the

way of advertising allowances, brokerage allowances, and quantity rebates. It was clearly shown that the dividend requirements of that concern were met entirely by these bonuses and allowances, and that they did not even have to earn a dividend out of regular, legitimate sales, but could pay it and cover it entirely by these discriminatory allowances.

Much has been said, and will be said, about the consumer, and it will be insisted that enactment of this law will increase prices in certain instances to the consumer. Well, now, just who is the consumer in this country? Why, the consumer is all of the people. It is true that the consumer may be placed into several groups. For instance, the last statistics obtainable from the Bureau of the Census show that 36,000,000 of our people are dependent on the mechanical and manufacturing pursuits for a livelihood, 26,000,000 of the people in America are dependent upon agriculture for a livelihood, 18,000,000 people are dependent upon distribution and trade, 11,000,000 are dependent upon transportation and communication, and 9,000,000 are dependent upon the professions.

Each of these groups is dependent upon the other. All are consumers. If the farmer cannot get the cost of production plus a profit for his products, he has little money with which to buy the products of the factories. If the manufacturer cannot get the cost of production plus a profit, he has little money with which to buy the products of the farm. The wage earner buys the products of the factories and the products of the farms and, in fact, everything that is used in living. His purchasing power is dependent entirely upon the size of his wage. Therefore it seems clear to me that even though the public may buy a commodity a little cheaper here or there, yet if the price paid does not represent the cost of the product plus a profit, then everybody is injured. Good prices and decent wages are essential to prosperity in the country. I have always insisted that no group or class of our people can long prosper at the expense of other groups or classes. We must all be prosperous if the country is to be prosperous. Stated in another way, we must be prosperous together or there will be no prosperity.

We are told that the people of America today owe $250,000,000,000. Generally speaking, our tax burden has been fixed for the next 40 years; that is, the minimum tax burden, if we stop our profligate spending, balance our Budget now, and begin to live within our means. Now the question arises, how are we going to pay this $250,000,000,000 in debts and taxes? We certainly cannot pay debts or taxes from any source other than profits; that is, we must live first. If this is correct, then it would seem to me that the only way we will ever recover is by good wages and good prices; that is, the lowest possible price to the consumer, consistent with a living wage to the farmer and the wage earner, together with a fair cost for distribution.

Absentee ownership of business is not good for the country. Large corporations located in New York, owning and operating large farms in Kansas, is not good for the farmer; it is not good for Kansas; neither is it good for the country. Large chain stores, operating entirely from the great cities are not good, especially for the smaller communities. When the independent makes a dollar profit, that dollar is invested in the local community. It is a part of the community. When an absentee owner makes a dollar profit in a community, that profit usually goes to the headquarters of the absentee owner and never again returns to the community where it was earned, except as a small portion might trickle down through the channels of industry. There is no question but that the sentiment of the country favors the retention wherever possible of the independent merchant and local ownership, and the enactment of this legislation will go as far as the Congress can go in a legitimate effort to bring this about.

[Here the gavel fell.]

The CHAIRMAN. The Clerk will read the bill for amendment.

Mr. MILLER. Mr. Chairman, I ask unanimous consent that the original bill may be considered as read and that the Clerk proceed with the reading of the committee amendment which begins at the bottom of page 4.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

Mr. RICH. Mr. Chairman, reserving the right to object, may I ask the gentleman if it is possible for him to place in the RECORD the amendments that he proposes to offer tomorrow to paragraph 6?

Mr. MILLER. I will be glad to do that.

Mr. RICH. So that we will know tomorrow morning what the amendments are.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 2 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914, as amended (U. S. C., title 15, sec. 13), is amended to read as follows:

"SEC. 2. (a) That it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price or terms of sale between different purchasers of commodities of like grade and quality, where either or any of the purchases involved in such discrimination are in commerce, and where such commodities are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States: *Provided*, That nothing herein contained shall prevent differentials in prices as between purchasers depending solely upon whether they purchase for resale to wholesalers, to retailers, or to consumers, or for use in further manufacture; nor differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered: *And provided further*, That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade.

"(b) That it shall be unlawful for any person engaged in commerce, in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation to an agent, representative, or other intermediary in connection with the sale or purchase of goods, wares, or merchandise, where such intermediary is acting therein for or in behalf or is subject to the direct or indirect control of any party to such purchase and sale transaction other than the person by whom such compensation is so granted or paid.

"(c) That it shall be unlawful for any person engaged in commerce to pay or contract for the payment of anything of value to or for the benefit of a customer of such person in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such person, unless—

"(1) such payment or consideration is offered on proportionally equal terms to all other customers competing in the distribution of such products or commodities; or unless

"(2) the business, identity, or interests of such customer are in no way publicly associated, by name, reference, allusion, proximity, or otherwise, with or in the furnishing of such services or facilities, and the consideration paid therefor does not exceed the fair value of such services or facilities in the localities where furnished.

"(d) For purposes of suit under section 4 of this act, the measure of damage from any violation of this section shall, in the absence of proof of greater damage, be presumed to be the unit amount of the prohibited discrimination, payment, or grant concerned, multiplied by—

"(1) the volume of business involved in such violation in case the plaintiff shall be in competition with the grantor therein in the distribution of the products or commodities concerned; and

"(2) the volume of plaintiff's business in the respective products and commodities, and for the period of time concerned in such violation, in case the plaintiff shall be in competition with the grantee therein, or, in cases under paragraph (b) of this section, in competition with the intermediary or with the person for or under whose control such intermediary shall act therein."

Mr. MILLER. Mr. Chairman, I ask unanimous consent that the committee amendment may be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

Mr. CRAWFORD. Mr. Chairman, reserving the right to object, is it understood that an opportunity will be afforded tomorrow to speak on the various sections of the committee amendment?

Mr. MILLER. Mr. Chairman, as I understand the parliamentary situation, the committee amendment will be considered as having been read and will be open to amendment tomorrow.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The committee amendment is as follows:

Strike out all after enacting clause and insert:

"That section 2 of the act entitled 'An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes', approved October 15, 1914, as amended (U. S. C., title 15, sec. 13), is amended to read as follows:

"'SEC. 2. (a) That it shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, where either or any of the purchasers involved in such discrimination are in commerce, where such commodities are sold for use, consumption, or resale within the United States or any Territory thereof, or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or receives the benefit of such discrimination, or with customers of either of them; and that it shall also be unlawful for any person, whether in commerce or not, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality where in any section or community and in any line of commerce such discrimination may substantially lessen competition in commerce among either sellers or buyers or their competitors or may restrain trade or tend to create a monopoly in commerce or any line thereof; all subject to the following provisions:

"'(1) That nothing herein contained shall prevent or require differentials as between purchasers depending solely upon whether they purchase for resale to wholesalers, to retailers, or to consumers or for use in further manufacture; for the purpose of such classification of customers as wholesalers or jobbers, or retailers, the character of the selling of the purchaser and not the buying shall determine the classification, and any purchaser who, directly or indirectly, through a subsidiary or affiliated concern or broker, does both a wholesale or retail business shall, irrespective of quantity purchased, be classified (1) as a wholesaler on purchases for sale to retail dealers only, not owned or controlled, directly or indirectly, by the purchaser; and (2) as a retailer on purchases for sale to consumers.

"'(2) That nothing herein contained shall prevent or require differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered: *Provided, however,* That the Federal Trade Commission, after due investigation and hearing to all interested parties, following insofar as applicable the procedure and subject to the recourse of the courts, provided in section 11 of this act, may issue an order fixing and establishing quantity limits and revising the same as it finds necessary, as to particular commodities or classes of commodities, and the foregoing shall then not be construed to permit differentials based on differences in quantities greater than those so fixed and established.

"'(3) That nothing herein contained shall prevent price changes from time to time where in response to changing conditions affecting the market for or the marketability of the goods concerned, such as but not limited to actual or imminent deterioration of perishable goods, obsolescence of seasonal goods, distress sales under court process, or sales in good faith in discontinuance of business in the goods concerned.

"'(4) That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona-fide transactions and not in restraint of trade.

"'(5) That the word "price", as used in this section 2, shall be construed to mean the amount received by the vendor after deducting actual freight or cost of other transportation, if any, allowed or defrayed by the vendor.

"'(b) That it shall be unlawful for any person engaged in commerce, in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount, in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

"'(c) That it shall be unlawful for any person to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all purchasers on proportionally equal terms.

"'(d) That it shall be unlawful for any person engaged in commerce to pay or contract for the payment of anything of value to or for the benefit of a customer of such person in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such person, unless such payment or consideration is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

"'(e) Upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price, the burden of rebutting the prima-facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: *Provided, however,* That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor.

"'(f) Nothing in this section shall prevent a cooperative association from returning to its members, or a cooperative wholesale association from returning to its constituent retailer members, the whole or any part of the net earnings resulting from its trading operations, in proportion to their purchases or sale from, to, or through such association.'"

"Amend the title so as to read: 'A bill to amend section 2 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914, as amended (U. S. C., title 15, sec. 13), and for other purposes.'"

Mr. MILLER. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. MEAD, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H. R. 8442) making it unlawful for any person engaged in commerce to discriminate in price or terms of sale between purchasers of commodities of like grade and quality, to prohibit the payment of brokerage or commission under certain conditions, to suppress pseudo-advertising allowances, to provide a presumptive measure of damages in certain cases and to protect the independent merchant, the public whom he serves, and the manufacturer from whom he buys, from exploitation by unfair competitors, had come to no resolution thereon.

Mr. MILLER. Mr. Speaker, I ask unanimous consent to insert in the RECORD at this point some proposed committee amendments to the bill H. R. 8442, which will be offered for consideration tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MILLER. Mr. Speaker, the amendments to the committee amendment, which will be offered by the Committee on the Judiciary, are as follows:

On page 6 of the committee amendment strike out all of lines 4 to 17, both inclusive, which is designated as subsection (1) of section 2 of the committee amendment.

This is the so-called classification subsection and the Committee on the Judiciary on May 21, 1936, decided to offer an amendment to strike the same from the bill as reported.

The second amendment which the Committee on the Judiciary will offer is to lines 20 and 23 on page 7 of the committee amendment to the bill, and the amendment will be a motion to strike said lines 20 to 23, both inclusive, therefrom.

This particular section which the committee will seek to strike out is designated as subsection (5) on page 7, and is what is commonly called the basing-point provision.

The third amendment which the Committee on the Judiciary will offer is to subsection (2) of the committee amendment on page 9, and is as follows:

After the word "price", in line 9, page 9, insert the words "or services or facilities furnished." In line 16, page 9, after the word "price", insert the words "or the furnishing of services or facilities." Immediately following the word "competitor", in line 18, page 9, add a comma and the following: "or the services or facilities furnished by a competitor."

This would make subsection (E) of the committee amendment to the bill, on page 9, read as follows:

(E) Upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price or services or facilities furnished, the burden of rebutting the prima-facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: *Provided, however,* That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor or the services or facilities furnished by a competitor.

At the request of the Federal Trade Commission I propose to offer an amendment which will add two new sections to the committee amendment. These have not been presented to the Committee on the Judiciary because I have not had an opportunity to do so, and they will not be offered as amendments bearing the approval of the Committee on the Judiciary, but will be offered by me upon my own responsibility. However, I may add that I do not think the Committee on the Judiciary would have any objection to the amendment. The proposals which I expect to offer, adding sections (2) and (3) to the committee amendment, are as follows:

SEC. 2. That nothing herein contained shall affect rights of action arising, or litigation pending, or orders of the Federal Trade Commission issued and in effect or pending on review, based on section 2 of said act of October 15, 1914, prior to the effective date of this amendatory act: *Provided,* That where, prior to the effective date of this amendatory act the Federal Trade Commission has issued an order requiring any person to cease and desist from a violation of section 2 of said act of October 15, 1914, and such order is pending on review or is in effect either as issued or as affirmed or modified by a court of competent jurisdiction, and the Commission shall have reason to believe that such person has committed, used, or carried on, since the effective date of this amendatory act, or is committing, using, or carrying on, any act, practice, or method in violation of any of the provisions of said section 2 as amended by this act, it may reopen such original proceeding and may issue and serve upon such person its complaint, supplementary to the original complaint, stating its charges in that respect. Thereupon the same proceedings shall be had upon such supplementary complaint as provided in section 11 of said act of October 15, 1914. If upon such hearing the Commission shall be of the opinion that any act, practice, or method charged in said supplementary complaint has been committed, used, or carried on since the effective date of this amendatory act, or is being committed, used, or carried on, in violation of said section 2 as amended by this act, it shall make a report in writing in which it shall state its findings as to the facts and shall issue and serve upon such person its order modifying or amending its original order to include any additional violations of law so found. Thereafter the provisions of section 11 of said act of October 15, 1914, as to review and enforcement of orders of the Commission shall in all things apply to such modified or amended order. If upon review as provided in said section 11 the court shall set aside such modified or amended order, the original order shall not be affected thereby, but it shall be and remain in force and effect as fully and to the same extent as if such supplementary proceedings had not been taken.

SEC. 3. If any part, clause, sentence, or paragraph of this act shall, for any reason, be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder thereof, but shall be confined in its operation to the part, clause, sentence, or paragraph thereof directly involved in the controversy or proceeding in which such judgment shall have been rendered.

The above proposals are self-explanatory, but I may add that section 2 will be offered to protect the proceedings that have already been had in the Goodyear Tire & Rubber Co. case, and section 3 is merely the separability amendment.

THE WORKS PROGRESS ADMINISTRATION IN WESTCHESTER COUNTY, N. Y.

Mr. MILLARD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. MILLARD. Mr. Speaker, Mrs. CAROLINE O'DAY, Democratic Congresswoman at Large from New York, has seen fit to read into the CONGRESSIONAL RECORD a personal attack on Mrs. Eugene Meyer because Mrs. Meyer has revealed that shocking conditions exist in the administration of W. P. A. in Westchester County, N. Y. The main thing that Mrs. O'DAY seems to hold against Mrs. Meyer is that she has served our county as a public official for 13 years without any other compensation except the satisfaction that comes from work well done. But Mrs. Meyer needs no defense from such attacks as Mrs. O'DAY's other than the valuable contributions which she has made to the welfare and happiness of her fellow citizens. It is only fair to ask, however, what Mrs. O'DAY has ever done for Westchester County that entitles her to criticize Mrs. Meyer's distinguished record.

But Mrs. O'DAY forgets that it is the Works Progress Administration and not Mrs. Meyer that is on trial. Indeed, Mrs. O'DAY does not seem very clear in her mind just what W. P. A. is, for she also refers to it as P. W. A.

It is interesting to see that Mrs. O'DAY and Mr. Bryan, the director of W. P. A. in Westchester County, furnish glowing descriptions of the great abilities of some of the Democratic foremen with whom the W. P. A. pay rolls in Westchester are overloaded throughout the county. If these men were so able, why did Mr. Bryan throw 37 of them off the pay roll in the towns of Rye and Mamaroneck as soon as publicity was given to their presence? And why did the efficiency on the projects in these two towns go up about 25 percent as soon as these so-called able Democrats were dismissed?

In the future it will not be as easy for W. P. A. officials to continue this particular racket in Westchester County, for though W. P. A. tries to keep its pay rolls secret, it has become a favorite sport for the newspapers to ferret them out. Thus the Mount Vernon News of May 19, under the heading "Lucrative Key Jobs Given Faithful Democratic Boys", publishes about twoscore names of Mount Vernon Democratic district leaders and workers, all of whom are being "taken care of" by W. P. A. The News reports, for example, that former Alderman William Bantz, long identified with Democratic affairs, "will continue his W. P. A. post in preference to running for alderman in November."

Mrs. O'DAY is reckless enough to repeat the word "falsehood" concerning Mr. Bryan's remark that he "would be a dog traitor if he did not see that people who are 100 percent for Roosevelt receive first consideration." But the following article in the New York Sun of February 19 will prove to Mrs. O'DAY how much she can rely on her friend Mr. Bryan:

W. P. A. AX FOR ANTI-NEW DEALERS—WESTCHESTER DIRECTOR WARNS HE WILL OUST DISLOYAL FOREMEN "ON A HUNCH"

The article begins:

"I'll have Republicans for foremen—if they're Roosevelt Republicans", John Buckley Bryan, W. P. A. director for Westchester County, told a Sun reporter today in his office in White Plains.

The article continues:

The Westchester director makes no bones about the political preference to be given to "men who are loyal to the President"—

And so forth. Again he says:

I'm going to have men who will be working for me and for the W. P. A. and for the President.

This story Mr. Bryan has never denied.

Mrs. O'DAY excuses the extortion of subscriptions from relief workers for the Standard Democrat, a new weekly paper, because, as she artlessly puts it—

The need for a Democratic paper becomes acute as the time comes for a Presidential election.

Nor does she think it shows moral turpitude when Democratic clubs "spring up like mushrooms" with forced contributions from relief workers, nor to give Democratic dinners to which they are obliged to buy tickets.

But the most unpardonable slur which Mrs. O'DAY permits herself is about the mythical case of F. M., as she calls it. For this man, Felix Minnetti by name, is her own townsman; and if he had not felt that it is useless to appeal to Mrs. O'DAY for help against her friends in the Federal administration, he would have done so long ago. This man, as Mrs. Meyer states in her report, supports a wife and seven children of whom one is bedridden. He is highly competent as he has been a superintendent of construction since 1906. W. P. A. first gave him a job on the Midland Avenue Playfield, where he was suddenly told that there were too many supervisors and was discharged. Immediately, however, his place was filled by a Democratic garbage collector who was not a relief case. After giving Felix Minnetti relief for a time, the town of Rye secured him a job on the sea wall, but here again he was discharged May 8, while other men, one of them a general foreman, a nonrelief steamfitter by trade, were kept on. Mrs. O'DAY sees fit to deny W. P. A. discrimination but this man, like many another Republican, received $93.50 on the sea wall to feed his seven children, although he was made to do foreman's work, while the Democratic protégés, doing less responsible work, got $130. When he was asked whether his full name could be used to substantiate his experiences, he replied:

> Why not? Nothing worse could happen to me than has happened already.

A more shameless instance of the ruthless cruelty of W. P. A. can scarcely be imagined. I only hope Mrs. O'DAY does not know conditions in Westchester County as well as she says she does, for otherwise her townspeople and neighbors are sure to ask here whether she thinks she was sent to Congress to protect her constituents or to protect the unjust practices of the Federal administration.

Mrs. Meyer's articles "have been answered point by point", says Mrs. O'DAY; but how can she or Mr. Bryan, or anybody, answer the fact that Mrs. Meyer offers actual subscriptions extorted from relief workers to Democratic papers that do not even exist, proof of Democratic club meetings they must attend on pain of dismissal, and the lists of Democratic foremen in definite towns, all of whom were unnecessary to the progress and positively disastrous to the morale of the work projects? In these two towns about $5,000 a week was stricken off the pay roll and off the Democratic campaign fund when W. P. A. officials became alarmed at the sudden publicity given their political activities. As all the projects throughout the county are equally overloaded, that means at least $50,000 or $60,000 of the taxpayers' money similarly wasted in Westchester County alone. Figure out for yourselves what the losses and the graft must be on this basis for the entire country where similar conditions prevail.

Mrs. O'DAY presumes to say that Mrs. Meyer has defended her county and its relief workers against these intolerable conditions because—I quote: "Mrs. Meyer is an ardent Republican worker", and was "piqued because Republican prestige began to wane."

Mrs. Meyer has taken no part in county politics since she became chairman of the Bipartisan Recreation Commission, 13 years ago, and, as for the Republican enrollment in Westchester County, I am glad to inform Mrs. O'DAY it was never higher than it is now. Indeed, we gained another Republican supervisor at the last election, though with a 3-to-1 majority we scarcely needed more.

It is noticeable that Mrs. O'DAY says little to defend the cruel hardships which have been endured by relief workers in Westchester County owing to the long-delayed pay rolls resulting from W. P. A. incompetency in handling its accounts. She merely says "delays are ended" because she is ignorant of the fact that on May 20 an army of relief workers in Westchester County was still 2 to 6 weeks in arrears. Mrs. O'DAY forgets that on April 22 in the Mount Vernon Argus, and on many a previous occasion, Mr. Bryan has said "delays are ended" only to disappoint the destitute relief workers again and again. Last week, owing to the unwelcome publicity which these chaotic financial conditions were given, Mr. Bryan succeeded for the first time in paying the city pay rolls, but when relief workers came in from the rural districts to ask when their checks could be expected, they were still given the favorite reply of W. P. A. clerks, "Your guess is as good as mine."

What Mrs. Meyer is trying to do is to secure more protection and better working conditions for the unemployed of Westchester County, and in this her articles have already been partly successful, as hundreds of messages of thanks and gratitude clearly indicate. The unfortunate relief worker in Westchester County will therefore be surprised to hear that Mrs. O'DAY thinks his lot needs no improvement and that everybody has "a lively appreciation of what the administration is doing through P. W. A."—quotations are Mrs. O'DAY's, not mine. Equally surprising will the people of Westchester find her conclusions concerning Mrs. Meyer and Mr. Bryan that—

> The choice must be made between the statements of a person obviously biased and bitter, having no official position, and a public official chosen for outstanding and well-known qualifications.

There Mrs. O'DAY betrays herself and her case, for Mr. Bryan has yet to prove his "outstanding qualifications", whereas Mrs. Meyer has held an official position for 13 years with marked success. No judge could hesitate between these two pieces of evidence nor would the citizens of Westchester County hesitate between these two witnesses. Mr. Bryan's unsubstantiated fulminations meet with the suspicion that is natural toward a paid Federal employee having no reason for loyalty toward Westchester County; Mrs. Meyer's judicial and fully documented statements carry additional weight because of her long and unselfish devotion to the county and because of the confidence which the people of Westchester have acquired in her competence and her integrity.

COINAGE OF 50-CENT PIECES IN COMMEMORATION OF THE COMPLETION OF BRIDGES IN SAN FRANCISCO BAY AREA

Mr. COCHRAN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 12397) to authorize the coinage of 50-cent pieces in commemoration of the completion of the bridges in the San Francisco Bay area.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. RICH. Mr. Speaker, reserving the right to object, is this another coinage bill?

Mr. COCHRAN. This is a bill introduced by the gentleman from California [Mr CARTER] and is one in which the entire California delegation is interested. It provides for the coinage of 50-cent pieces in commemoration of the construction of two of the largest bridges in the world.

Mr. RICH. Mr. Speaker, I would like to favor my colleagues, the gentleman from California and also the gentleman from Missouri, but may I say to the Members of the House that this is about the thirty-fifth new coinage bill that has come before the House this year for consideration. I am going to suggest to the gentleman from Missouri that we place on the one side of this coin the face of Mr. Farley, Democratic National Committeeman; then turn the coin over and place on the other side of it the face of Mr. Farley, the New York city committeeman; then when you flop coins you will always have the head of Farley.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in commemoration of the completion of the bridges in the San Francisco Bay area there may be coined at the mints of the United States 250,000 silver 50-cent pieces of such design as the Director of the Mint, with the approval of the Secretary of the Treasury, may select; but the United States shall not be subject to the expense of making the models or master dies or other preparations for this coinage. Not less than 25,000 silver 50-cent pieces shall be coined at one time.

SEC. 2. All laws now in force relating to the subsidiary silver coins of the United States and the coining or striking of the same, regulating and guarding the process of coinage, providing for the purchase of material, for the transportation, distribution, and redemption of the coins, for the prevention of debasement or counterfeiting, for security of the coin, or for any other purposes, whether said laws are penal or otherwise, shall, so far as applicable, apply to the coinage authorized by this act.

SEC. 3. The coins authorized by this act shall be issued only to the San Francisco Bay Exposition, Inc., or its duly authorized agent, and upon payment to the United States of the face value of such coins.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANNIVERSARY OF ARRIVAL OF MARCUS AND NARCISSA WHITMAN IN WALLA WALLA VALLEY, WASH.

Mr. KNUTE HILL. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 11555) to authorize the coinage of 50-cent pieces in commemoration of the one hundredth anniversary of the arrival of Marcus and Narcissa Whitman in the Walla Walla Valley, Wash., and the founding of the Waiilatpu Mission.

The Clerk read the title of the bill.

Mr. SNELL. Mr. Speaker, reserving the right to object, I would like to know in whose honor these 50-cent pieces are to be coined. I could not tell from the reading of the title.

Mr. KNUTE HILL. Marcus Whitman and his wife, Narcissa Whitman, who come to the Walla Walla Valley 100 years ago, and were mainly instrumental in the great Northwest Territory becoming a part of the United States.

Mr. SNELL. I think they ought to have a 50-cent piece, too.

Mr. RICH. Mr. Speaker, reserving the right to object, I am going to suggest to the gentleman from Washington that, while we are Walla Walla-ing around and do not know where we are going, we put on one side of these coins the Democratic Members of Congress and on the other side Mr. Farley and then when we flip the coin we will surely have heads again.

Mr. BLANTON. Mr. Speaker, reserving the right to object, if the gentleman from Pennsylvania would follow Mr. Farley around awhile he would know exactly where he is going. [Laughter and applause.]

Mr. RICH. I may say to the gentleman from Texas that if I followed him I would go crazy. [Laughter.]

Mr. BLANTON. By not following him, the gentleman possibly is somewhat that way already.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, in commemoration of the one hundredth anniversary of the arrival of Marcus and Narcissa Whitman in the Walla Walla Valley, Wash., and of the founding of the Waiilatpu Mission, there shall be coined by the Director of the Mint, 25,000 silver 50-cent pieces, such coins to be of standard size, weight, and fineness of a special, appropriate design to be fixed by the Director of the Mint with the approval of the Secretary of the Treasury, but the United States shall not be subject to the expense of making the models for master dies or other preparations for this coinage.

SEC. 2. Coins shall be issued at par, and only upon the request of a committee of not less than three persons duly authorized by the officers of the Whitman Centennial, Inc.

SEC. 3. Such coins may be disposed of at par or at a premium by the committee, duly authorized in section 2, and all proceeds shall be used in furtherance of the commemoration of the founding of the Waiilatpu Mission.

SEC. 4. All laws now in force relating to the subsidiary silver coins of the United States and the coining or striking of the same; regulating and guarding the process of coinage; providing for the purchase of material, and for the transportation, distribution, and redemption of the coins; for the prevention of debasement or counterfeiting; for the security of the coin; or for any other purposes, whether said laws are penal or otherwise, shall, so far as applicable, apply to the coinage herein directed.

SEC. 5. The coins authorized herein shall be issued in such numbers, and at such times as they may be requested by the committee, duly authorized by said officers of the Whitman Centennial, Inc., and only upon payment to the United States of the face value of such coins.

With the following committee amendment:

Page 2, beginning in line 22, strike out section 5.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. O'MALLEY, for 1 week, on account of death of his father.

To Mr. POWERS, to attend the funeral of the late Randolph Perkins, of New Jersey.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 11454. An act to incorporate the Veterans of Foreign Wars of the United States.

The SPEAKER announced his signature to a joint resolution of the Senate of the following title:

S. J. Res. 209. Joint resolution authorizing the presentation of silver medals to the personnel of the second Byrd Antarctic expedition.

BILL PRESENTED TO THE PRESIDENT

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H. R. 11454. An act to incorporate the Veterans of Foreign Wars of the United States.

HONEST CONGRESS-CONTROLLED MONEY OR WALL STREET BANKER'S DISHONEST COLLAPSIBLE MONEY? COUNTERFEIT FEDERAL RESERVE BANKER THIEVES HAVE PROMOTED WAR, MURDER, CRIME, STARVATION, POVERTY, AND UNEMPLOYMENT FOR 22 YEARS, SINCE 1914

Mr. BUCKLER of Minnesota. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. BUCKLER of Minnesota. Mr. Speaker, the Frazier-Lemke farm-refinancing bill would provide $3,000,000,000 for a revolving fund for long-time, low-interest loans to refinance farm mortgages. This plan is far better than the existing method of paying 3 percent or so to private Federal Reserve bankers for using their manipulated and unconstitutional credits on a racketeering basis, dealing in Government bonds.

Bankers' bondage bonds tighten our slavery chains. They create vast, dishonest wealth and untold poverty and unemployment.

Refusal to issue sufficient money is a crime. Refusal to permit farm owners, home owners, and all citizens to have the use of Congress-coined and issued constitutional money is a double crime. Refusal to return to every farmer and every citizen the wealth he was robbed of during the defiation period, which started late in 1920, is worse than a crime.

The big banker swindlers who have illegally issued money and robbed our citizens are our greatest criminals. They have confiscated most of our national wealth. Their greed has almost destroyed our democracy, and now almost has doomed their own monopoly rackets.

Big banker money changers and their puppets lie about inflation and expansion.

Advocates of dishonest inflation oppose honest currency expansion provided by the Frazier-Lemke plan.

Wall Street's and bunco banker's fraudulent inflation, like that built up under Coolidge, Mellon, Hoover, has been rigged up in all financial channels again.

Tens of millions of irredeemable fake values have been rigged into the gambling chips, markers, stocks and bonds, by Wall Street's racketeering money swindlers.

Du Pont stocks, Liberty League promoted stocks, United States Steel, Bethlehem, Chrysler, General Motors, other motors, Standard Oil, telephone and other stocks have been pumped with fake inflations month after month.

Inflated deposits run nearly twenty-five billions in 5,000 national banks. An increase of eight billions in 2 years.

New York City banks (152) alone report deposits of over $16,000,000,000 (mostly fictitious bank inflation stage money) to help back up Wall Street's fraudulent inflations.

Mr. Joseph Kennedy, a Wall Street operator, who was chairman of the Government's Security Exchange, is "a gambling club, a monoply"; a "gambling place" dealing with "dice" where insiders look at the customers' "cards"; "records of thousands of swindles"; "reams and reams of stocks and bonds must have been printed on paper that contained 90 percent water, for that's about what these securities contained."

Out of more than two hundred billions of money changers' inflations in recent years, 90 percent was treated as water and manipulated to rob nearly every citizen with savings in the United States.

Senator FLETCHER's committee investigation of Wall Street swindlers reports in volume 17, pages 7923–7929, that 33 of the biggest big bankers in the United States were guilty of pool-operation inflations.

All the biggest American banks and bankers found themselves together on a communistic bankers' basis, or a community of interest monopoly basis.

All the big money changers worked in harmony, concert, and cooperation in criminal pool stock-rigging deals with the J. P. Morgan gang of stock-jobbing partners, Rockefeller's Chase National Bank, the George Baker-Jackson Reynolds First National, and other Wall Street banks.

Judge Woolsey, Federal Court of the Southern District of New York, in *United States* v. *Brown* (5 Fed. Supp. 81), November 23, 1933, dealt with pool operations in his exhaustive decision which he traced back to a British case 120 years before as his base. Artificial pool operations were decreed to be criminal.

A court indictment charged that artificial manipulation by means of pool and fictitious sales to raise prices constitutes fraud.

Judge Woolsey ruled:

> If * * * a group of insiders, to profitably dispose of their holdings, are artificially raising quoted prices on the only market a man to buy resorts * * * then (he) hence is a victim of unfair dealing by the insiders. But he is entitled to fair dealing and should get it.
>
> * * * Even a speculator is entitled not to have any present fact * * * misrepresented by word or act.
>
> Judges have properly set their faces sternly against any practices by which the right of fair dealing between man and man is in any way infringed, and whenever there is any false representation * * * it is held to be a fraud, contracts illegal and against public policy.

Judge Woolsey decreed:

> I hold, therefore, that the indictment states a crime * * * to meet the requirements of the criminal law.

In violation of the coin and issue money powers of the Constitution, and in violation of our criminal laws, the big bankers of Wall Street became responsible for thousands of millions of the greatest inflations and the greatest financial crimes of history.

Criminal pool operations, promoted and shared by three dozen of the largest banks and their bunco agents in the United States set the pace and fanned the flames for scores of billions of faked, counterfeit and inflated bankable values in worthless stocks and other banker stock-market securities.

Congressman ADOLPH SABATH's committee that has been busy many months investigating the money changers' receivership and protective committee swindling operations, reports approximately twenty billions of deflated values juggled by the big banker dealers in, and receivers of, stolen wealth, or wealth confiscated under cloak of the law.

Fraudulent inflation and deflation in the many thousands of millions of dollars have been juggled out of millions of our thrifty citizen investors in first-mortgage bonds. Billions of dollars were thus taken away from innocent investors by crooked money changers and their conniving lawyer accomplices through operation of a fraudulent money system.

Another $40,000,000,000 of inflation and deflation was juggled in and out of only two dozen Wall Street stocks by the big banker money changers and their accomplices. A summary of this particular forty billions of fakers' inflations is given in the House Banking and Currency Committee hearings on the Banking Act of 1935, pages 789 and 790.

Congressman RAYBURN's committee that investigated electric power holding company racketeers reported over $20,000,000,000 of inflation among power-company highjackers alone.

Senator HIRAM JOHNSON's committee, that investigated foreign bond swindlers, disclosed over $7,000,000,000 of mostly bunco inflation by New York banker gangs of racketeers. More than twice this much additional American wealth was dumped into Europe through Wall Street's bankers and repudiated. A total of more than an additional twenty billions of inflation for foreigners.

Most all of the New York Stock Exchange and Curb Exchange stocks were added to the Rockefeller, Morgan, Baker, and other bunco bank stocks, to Sam Insull, and other fake stocks, to pile up a total of over two hundred billions of wind, water, and air inflation that circulated through all American banking and financial channels. These inflations robbed nearly everybody in the United States and produced the 7 years of misery, depression, and poverty.

A system of debt and a system of stifled freedom and liberty were built up by the money changers the past twenty-odd years. Now, Herbert Hoover falsely says the Roosevelt administration is responsible for these false systems even when we note that it happened during Republican administrations, more so than Democratic.

These destructive systems were developed by counterfeit monopoly money changers who issued money for their own exclusive use to enslave the American people and bring themselves tremendous profits.

Unlimited license for the few to steal the wealth of the many was developed through control of the private racketeer owners of the Federal Reserve bank system, operated through Wall Street thieves and their counterfeit associates.

The biggest banker money changer fakers in America have done and still Congress seems to lack courage to coin money constitutionally. Congress should drive the money changers out of our temples and regain control of our Government.

Congress should have the courage to put out of business or to correct the methods of the fraudulent operators of the privately owned and privately controlled Federal Reserve banks.

Congress lacks courage to curb the Supreme Court, which the Constitution says "shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make."

Congress must curb judicial usurpations, must dethrone the money changers, must abolish financial slavery, and take back control of our Government for the benefit of all the people.

Senator NYE's Munitions Committee proved that the money changers are war makers and murderers who drove us into the World War for greedy bankers' profits.

Senator NYE's speech on the Nye-Sweeney bank bill proves the Federal Reserve money changers are slave masters of the American people, and that Wall Street banker criminals are our greatest criminals. His arguments clearly show how the wealth of the American people has been absorbed and stolen by a small group of banker bandits and brigands. His speech clearly shows how banker bandits inflated and deflated and ruthlessly destroyed prosperity to rob farmers and home owners, and the people generally, of all or most of their wealth.

As a result of all the crimes revealed by Senator NYE we have had for a long time an unendurable volume of debt, a system of fake bankers' inflation, and a system of unlimited license to ruthlessly rule by small cliques and classes of money changers.

Under a fraudulent system of money control the money changers' aristocracy of plutocratic parasites have brought about our most important crisis—a major crisis in our civilization, with tens of millions of victims.

Private Federal Reserve money changers, who illegally and unconstitutionally issue money fraudulently, have virtually wrecked our fundamental concepts of government, of organized society, and of our democracy.

The wealth of all the American people a few years ago was estimated to be about $350,000,000,000. It was largely irredeemable, inflated boom wealth. It has become tremendously deflated.

Debts, unbearable and at present irredeemable, now exceed $250,000,000,000. Europe was allowed to cancel her debts, but not America. They must be greatly reduced or eventually they may have to be repudiated. Easier money conditions to wipe out debts will help to establish a necessary balance between our present wealth and existing debts. More money must circulate. Congress only can legally circulate enough money.

One way to reduce debts then is by placing a sufficient amount of currency in circulation.

The old Hebrews understood the philosophy of debt. Periodically they erased all debts. The Chinese still follow the custom of erasing debts.

Borrowers, forced or tricked into borrowing, become the virtual slaves of the lenders. Congress has provided no escape for debtors in 150 years. Financial slavery has constantly increased: our financial slavery today affects 30 times as many people as Negro slavery affected. We have today over ten million families being driven into poverty and pauperism, more than forty million citizens.

When our voters send representatives to our next Congress as their carefully chosen agents who will have the courage to coin money for all our States, as prescribed by the Constitution, then we can have production for mutual use and mutual profit to take the place of our present scarcity, and the poverty production now regulated by a few monopoly money masters who seek only their personal gain.

With representatives of the people in control of Congress, we will be able to satisfy human needs with service to all. Then it will not longer be necessary for millions of citizens to spend the night without enough clothing and covering, or without decent shelter, or hungry, and be driven "like wild asses in the wilderness to hide themselves."

ADJOURNMENT

Mr. MILLER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 56 minutes p. m.) the House adjourned until tomorrow, Thursday, May 28, 1936, at 12 o'clock noon.

COMMITTEE HEARING

COMMITTEE ON IMMIGRATION AND NATURALIZATION

The Committee on Immigration and Naturalization, room 445, will hold public hearings at 10 a. m., Thursday, May 28, on a group of private bills relating to fraudulent birth certificates and visas at time of entry.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

853. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers, United States Army, dated May 20, 1936, submitting a report, together with accompanying papers on a preliminary examination and survey of Big and Little Suamico Rivers, Wis., authorized by the River and Harbor Act approved August 30, 1935 (H. Doc. No. 498); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

854. A letter from the Chairman of the Federal Trade Commission, transmitting various reports in regard to the textile industries; to the Committee on Interstate and Foreign Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. BLAND: Committee on Merchant Marine and Fisheries. House Joint Resolution 597. Joint resolution authorizing an investigation by the Bureau of Fisheries of the California sardine (pilchard) fishing industry; with amendment (Rept. No. 2822). Referred to the Committee of the Whole House on the state of the Union.

Mr. RAMSPECK: Committee on the Civil Service. H. R. 11152. A bill to extend the retirement privilege to the Director, Assistant Directors, inspectors, and special agents of the Federal Bureau of Investigation; without amendment (Rept. No. 2823). Referred to the Committee of the Whole House on the state of the Union.

Mr. DEMPSEY: Committee on the Public Lands. S. 32. An act to establish a national military park to commemorate the campaign and Battles of Saratoga, in the State of New York, without amendment (Rept. 2824). Referred to the Committee of the Whole House on the state of the Union.

Mr. RAMSPECK: Committee on the Civil Service. H. R. 6679. A bill extending the classified executive civil service of the United States; without amendment (Rept. No. 2825). Referred to the Committee of the Whole House on the state of the Union.

Mr. RAMSPECK: Committee on the Civil Service. H. R. 12717. A bill to provide for the right of election by employees, subject to the provisions of the Civil Service Retirement Act, of a joint and survivorship annuity upon retirement; without amendment (Rept. No. 2826). Referred to the Committee of the Whole House on the state of the Union.

Mr. RAMSPECK: Committee on the Civil Service. S. 2712. An act to promote the efficiency of the Bureau of Engraving and Printing; with amendment (Rept. No. 2827). Referred to the Committee of the Whole House on the state of the Union.

Mr. GASQUE: Committee on Pensions. H. R. 12758. A bill to increase the pension to certain veterans of the Regular Establishment on the rolls March 19, 1933; without amendment (Rept. No. 2828). Referred to the Committee of the Whole House on the state of the Union.

Mr. ENGLEBRIGHT: Committee on the Public Lands. H. R. 1994. A bill to provide for the selection of certain

lands in the State of California for the use of the California State park system; with amendment (Rept. No. 2829). Referred to the Committee of the Whole House on the state of the Union.

Mr. PETERSON of Georgia: Committee on the Public Lands. H. R. 11180. A bill to extend the boundaries of the Fort Pulaski National Monument, Georgia, and for other purposes; without amendment (Rept. No. 2830). Referred to the Committee of the Whole House on the state of the Union.

Mr. MOTT: Committee on the Public Lands. H. R. 11536. A bill to provide $25,000 for the restoring and preserving of the home of Dr. John McLoughlin at Oregon City, Oreg.; without amendment (Rept. No. 2831). Referred to the Committee of the Whole House on the state of the Union.

Mr. DOUGHTON: Committee on Ways and Means. H. R. 12800. A bill to regulate interstate commerce in bituminous coal, and for other purposes; with amendment (Rept. No. 2832). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII.

Mr. FARLANE: Committee on Naval Affairs. H. R. 10509. A bill authorizing the President to present in the name of Congress a medal of honor to Harold R. Wood; with amendment (Rept. No. 2821). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MONTAGUE: A bill (H. R. 12870) to aid in defraying the expenses for the celebration of the bicentennial of the birth of Patrick Henry to be held at Hanover Courthouse, Va., July 15, 16, and 17, 1936; to the Committee on the Library.

By Mr. DIMOND (by request): A bill (H. R. 12871) for the protection of oyster culture in Alaska; to the Committee on Merchant Marine and Fisheries.

By Mr. DISNEY: A bill (H. R. 12872) to provide revenue for the importation of crude petroleum and its products; to the Committee on Ways and Means.

By Mr. EKWALL: A bill (H. R. 12873) to authorize completion, maintenance, and operation of certain facilities for navigation on the Columbia River, and for other purposes; to the Committee on Rivers and Harbors.

By Mr. DEROUEN: A bill (H. R. 12874) to enlarge and extend the authority of the Secretary of the Interior under the acts of June 9, 1916 (39 Stat. 218), and February 26, 1919 (40 Stat. 1179), and for other purposes; to the Committee on the Public Lands.

By Mr. PIERCE: A bill (H. R. 12875) to authorize completion, maintenance, and operation of certain facilities for navigation on the Columbia River, and for other purposes; to the Committee on Rivers and Harbors.

By Mr. BANKHEAD: A bill (H. R. 12376) to waive any exclusive jurisdiction over premises of resettlement or rural rehabilitation projects; to authorize payments to States, political subdivisions, and local taxing units, in lieu of taxes on such premises; and for other purposes; to the Committee on Ways and Means.

By Mr. McSWAIN (by request): A bill (H. R. 12877) to provide a commissioned strength for the Corps of Engineers, United States Army, for the efficient performance of military and other statutory duties assigned to that corps; to the Committee on Military Affairs.

By Mr. DICKSTEIN: Resolution (H. Res. 527) to authorize an investigation of the Black Legion, and for other purposes; to the Committee on Rules.

By Mr. BLOOM: Joint resolution (H. J. Res. 606) amending section 5 of Public Resolution No. 6, Seventy-fourth Congress, approved March 4, 1935; to the Committee on the Library.

By Mr. DINGELL: Joint resolution (H. J. Res. 607) to provide that no veteran shall be denied work-relief benefits by reason of benefits received under the World War Adjusted Compensation Act or the Adjusted Compensation Payment Act of 1936; to the Committee on Ways and Means.

By Mr. DOUGHTON: Joint resolution (H. J. Res. 608) extending for 2 years the time within which American claimants may make application for payment, under the Settlement of War Claims Act of 1928, of awards of the Mixed Claims Commission and the Tripartite Claims Commission, and extending until March 10, 1938, the time within which Hungarian claimants may make application for payment, under the Settlement of War Claims Act of 1928, of awards of the war claims arbiter; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARRY: A bill (H. R. 12878) for the relief of Charles F. Tashlein; to the Committee on Military Affairs.

By Mr. CULKIN: A bill (H. R. 12879) granting an increase of pension to Selena M. Combs; to the Committee on Invalid Pensions.

By Mr. FOCHT: A bill (H. R. 12880) granting a pension to Lillie Haupt; to the Committee on Invalid Pensions.

By Mr. GAMBRILL: A bill (H. R. 12881) for the relief of Allen Blow Cook and William Hawley Sewell; to the Committee on Naval Affairs.

By Mr. PEYSER: A bill (H. R. 12882) for the relief of Anastasios Nicholas Pagoulatos; to the Committee on Immigration and Naturalization.

By Mr. SNELL: A bill (H. R. 12883) granting an increase of pension to Jane Currier; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10995. By Mr. COLDEN: Resolution adopted by the Central Labor Council of San Joaquin County, Calif., May 18, 1936, protesting against the practice of dry drilling in silica rock at the Kennett Dam project of the United States Bureau of Reclamation in California, and calling attention to the similarity of conditions there to those which existed at Gauley Bridge, W. Va., where the practice of dry drilling in silica resulted in many cases of silicosis and a number of deaths, which might have been avoided by wet drilling; to the Committee on Mines and Mining.

10996. By Mr. CULKIN: Petition of the New York State Senate, petitioning Congress to retain a tariff of at least 3 cents per pound on coconut oil; to the Committee on Interstate and Foreign Commerce.

10997. By Mr. DORSEY: Petition numerously signed by residents of the Fifth Congressional District, Pennsylvania, in support of House bill 7122 which provides that all blind persons who are 21 years of age and upward, whose annual income is less than $1,800 per annum, shall receive a pension of $75 per month; to the Committee on Pensions.

10998. By Mr. KING: Petition of the Woman's Christian Temperance Union of the Territory of Hawaii, opposing the merger of the Bureau of Narcotics into the Secret Service Division; to the Committee on Ways and Means.

10999. By Mr. KRAMER: Resolution of the Los Angeles County committee of the Young Democratic Clubs of California, relative to endorsing the radio application of the

Metro Broadcasting Co., Voice of Labor Station, for a permit to operate a radio station in Los Angeles under the control of the Central Labor Council; to the Committee on Interstate and Foreign Commerce.

11000. Also, resolution of the City Council of the City of Maywood, relative to the construction of the proposed Federal building for the city of Maywood, etc.; to the Committee on Public Buildings and Grounds.

11001. By Mr. O'CONNELL: Resolution relating to the Nye committee investigation concerning the manufacture of munitions in privately owned plants; to the Committee on Rules.

11002. By the SPEAKER: Petition of the Central Labor Council, Stockton, Calif.; to the Committee on Irrigation and Reclamation.

11003. Also, petition of the American Historical Association, Washington, D. C.; to the Committee on Printing.

11004. Also, petition of the Cleaners, Dyers, and Pressers Union, Local No. 17960; to the Committee on Banking and Currency.
